Heritage Signature® Auction #1221 | Long Beach Coin Expo

U.S. Coins

Featuring: The New Orleans Collection, Part Two • The Eugene Exman Collection • The Dr. Harry Salyards Collection
The Steitz Collection • The Skidaway Island Collection, Part Two

June 4-5 & 7, 2015 | Long Beach

Signature® Floor Sessions 1-4
(Floor, Telephone, HERITAGE Live!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103C
300 E. Ocean Blvd. • Long Beach, CA 90802

Session 1
Thursday, June 4 • 1:00 PM PT • Lots 3001-3730

Session 2 – PREMIER
Thursday, June 4 • 6:00 PM PT • Lots 3731-4447

Session 3
Friday, June 5 • 1:00 PM PT • Lots 4448-5130

Session 4
Friday, June 5 • 6:00 PM PT • Lots 5131-5652

Signature® Internet Session 5
(HERITAGE Live!®, Internet, Fax, & Mail only Session)

Session 5
Sunday, June 7 • 1:00 PM CT • Lots 7001-8765

LOT SETTLEMENT AND PICK-UP
Friday, June 5 • 10:00 AM – 1:00 PM PT
Saturday, June 6 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

This auction is subject to a 17.5% Buyer's Premium.

BIDDING METHODS:

HERITAGE Live!® Bidding
Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGE Live!® program at HA.com/Live

Live Floor Bidding
Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)
Phone bidding must be arranged on or before Wednesday, June 3, by 12:00 PM CT.
Client Service: 866-835-3243.

Internet Bidding
Internet absentee bidding ends at 10:00 PM CT the evening before each session. HA.com/1221

Fax Bidding
Fax bids must be received on or before Wednesday, June 3, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding
Mail bids must be received on or before Wednesday, June 3.

This Auction is catalogued and presented by Heritage Numismatic Auctions, Inc., doing business as Heritage Auctions.

HERITAGE AUCTIONS HA.com

Dear Bidder,

Welcome to Heritage's Official Auction of the June, 2015 Long Beach Expo! While Heritage visits Long Beach multiple times each year, every trip to the West Coast is special. We look forward to more exciting numismatic action at the upcoming June Expo. This year, a remarkable array of rare coins is included in our auction. Four floor sessions include more than 2,600 lots, including a Premier Session with more than 700 high-value offerings. The weekend Signature® Internet Session continues to grow in popularity and participation, with more than 1,700 additional lots for your bidding pleasure.

Please take a few minutes to read these short descriptions of the Featured Collections for highlights of our Long Beach offerings:

The New Orleans Collection, Part Two
The first part of this exceptional collection was offered at the Central States event in Chicago, where the coins created quite a stir and an enthusiastic thumbs-up from the bidders. The collection was assembled with the advice and counsel of Blanchard and Company, and four important coins lead the way at Long Beach: two 1880 stellas – a Flowing Hair variety in PR65 NGC, and an extremely rare Coiled Hair in PR65 PCGS, both with CAC endorsement – as well as an equally rare 1933 eagle in MS65 PCGS, and a 1798/7 eagle 9x4 Stars, BD-1 variety, in MS62 NGC.

The Eugene Exman Collection
Eugene Lester Exman was born in Ohio in 1900. He became an avid large cent collector and was a charter member of EAC (#22). A personal friend of Dr. William H. Sheldon, Mr. Exman had a long career at Harper & Brothers publishing (later Harper & Row) where, as Vice President of the company, he assisted Sheldon with publication of the classic large cent references Early American Cents and Penny Whimsy. His collection was willed to his daughter upon his death in 1975, where it resided with the family until consigned to Heritage for auction at this year's Long Beach event. The collection includes many scarce and rare varieties, and in particular many highly desirable 1794 cents.

The Dr. Harry Salyards Collection
A retired family physician in Nebraska and a collector of American coins since age 10, Harry is perhaps best-known for his interest in early American coppers and large cents in particular. As a collector of large cents since 1974, he joined EAC in 1979 and has been editor of EAC's Penny-Wise since 1986. Having collected early date cents in a variety of ways over the years, he currently focuses on the cents of 1794.

A member of LSCC since 1980, Harry was drawn to the Seated half dollar as the truest representation of Christian Gobrecht's original design, as struck for general circulation. He believes that a close study of the striking characteristics and surfaces of these coins will reward the observer with a virtual history of the evolution of 19th century minting technology, as reflected in the output of the Philadelphia Mint and its three far-flung branches. His collection of Seated halves in preferred "collector" grades is offered in the current sale. We encourage those who have any interest in Seated halves to pay special attention to these coins. Most were acquired in the 1980s through the early 2000s, with an eye for originality, visual appeal, and variety. We consider many of these coins to be conservatively graded by today's standards, and as a group they are outstanding. A total of 123 coins make up the complete collection. In addition to the Long Beach Premier and Session 3 lots, approximately 30 of the coins are in the Signature® Internet Session – they are not to be overlooked, because many of these coins are exceptional, with several pieces housed in AU58 holders as well as other popular collector grades. Additional selections from the collection will appear in the upcoming July Summer FUN sale.

The Steitz Collection
A great collection of Silver Eagles will be of keen interest to collectors of the modern series, with many coins in the ultimate grades of MS70 and PR70. Although issued as bullion coins, the Silver Eagles are enthusiastically pursued by a new generation of collectors who strive to complete their sets in the highest possible grades. An impressive compilation of high-graded, top-rated Silver Eagles comprise this fine collection, which is represented in the Premier Session, as well as in Floor Session 3 and the Signature® Internet Session.

The Skidaway Island Collection, Part Two
Much of this extensive collection of Lettered Edge Bust half dollars was included in our Dallas Signature sale in March. Additional selections are included the Long Beach auction, and we encourage the many Bust half aficionados not to overlook the Overton varieties offered in the fast-paced internet sale. Bids for the Signature® Internet Session are also accepted by mail, e-mail, or fax.

If you plan on attending the Long Beach Expo in person, please accept our open invitation to stop by the Heritage booth on the Bourse, view the Signature and Premier Floor Session lots on-site, and stay to bid at the auction. If not able to attend in person, please remember that we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® – our proprietary, award-winning online platform.

We look forward to a lively and mutually successful event, and as always we wish you good luck with your bids!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

SESSION ONE

COLONIALS

3001 **1652 Pine Tree Shilling, Small Planchet — Clipped — PCGS Genuine. VG Details. Noe-26.2, W-900, Salmon 9-E, R.5.** 57.87 gn. The expected weight of a Small Planchet shilling is approximately 70 grains. Although moderately underweight and somewhat oval-shaped, this cream-gray representative will nonetheless please many collectors. The date and denomination are bold, as are most peripheral letters. The tree is softly defined but readily observed. Listed on page 39 of the 2017 *Guide Book*. PCGS# 24

3002 **1652 Pine Tree Shilling, Small Planchet — Damaged — NGC Details. VF. Noe-16, W-835, Salmon 2-B, R.2.** 68.2 gn. A stone-white and charcoal-gray example of this final Massachusetts silver type. Moderately wavy, with wear focused on peripheral obverse high points. Well centered and evenly struck. The legends are clear except for the final S in MASATHVSETS. A relatively early die state, although a break joins the ends of two left-side tree branches. Listed on page 39 of the 2017 *Guide Book*. PCGS# 24

3003 **(1670-75) St. Patrick Farthing VF20 PCGS Secure. Breen-212, W-11500.** The legends and types are clear on this moderately granular and slightly glossy olive-gray example. One of Breen's "Masonic Punctuation" varieties with a trio of dots at 3 o'clock on the reverse. This rare variety, unlisted in Breen, shows the A punched over an inverted A in QVIESCAT. The brass splasher is well centered on the crown. Listed on page 41 of the 2016 *Guide Book*. PCGS# 42

1723 Hibernia Farthing, Scarce D:G:REX
MS64 Brown, Among Finest Known
Martin 1.1-Bc.1, W-12350

3004 **1723 Hibernia Farthing, D:G:REX, Martin 1.1-Bc.1, W-12350, R.5, MS64 Brown PCGS.** An exquisite chocolate-brown example of this scarce early Hibernia variety. Precisely struck and unabraded with a hint of planchet granularity at the borders. Struck a few degrees off center toward 2:30, although all of the legends and devices are fully intact. Listed on page 44 of the 2016 *Guide Book*. Population: 11 in 64 Brown, 0 finer (4/15). PCGS# 173

3005 **1760 Hibernia-Voce Populi Halfpenny MS62 Brown PCGS. N. 4, Z. 2-A, W-1382X, R.1.** A charming mahogany-brown example. The centers are incompletely brought up and retain the granular texture of the flan prior to the strike. An intermediate die state with moderate crumbling on POPULI. Certified in a green label holder. Listed on page 49 of the 2016 *Guide Book*. PCGS# 262

3006 **1760 Hibernia-Voce Populi Halfpenny MS62 Brown PCGS. N. 4, Z. 2-A, W-1382X, R.1.** A impressive chocolate-brown example with satiny and unblemished surfaces. The strike is bold for the "Older Head" Zelinka 2-A variety. An early die state without any obverse crumbling. Listed on page 49 of the 2016 *Guide Book*. Population: 11 in 62 Brown, 17 finer (4/15). PCGS# 262

3007 **1766 Pitt Halfpenny VF35 PCGS. CAC. Betts-519, W-8350, R.3.** Even in Colonial days, it was popular for a politician to lower taxes. Thus, William Pitt the Elder was heralded on both sides of the Atlantic when he convinced Parliament to repeal the hated Stamp Act. A moderately circulated but problem-free mahogany-brown example. Listed on page 50 of the 2016 *Guide Book*. PCGS# 236

3008 **1787 Massachusetts Cent, Arrows in Left Talon AU55 PCGS. Ryder 3-G, W-6090, R.3.** A charming example that displays olive-green fields and walnut-brown high points. Despite light wear on the Indian's attire, abrasions are minimal and confined to the obverse margin at 7 o'clock. Listed on page 59 of the 2016 *Guide Book*. PCGS# 302

1787 Connecticut Copper, AU53
Popular Muttonhead Variety
Miller 1.2-C, W-2720

3009 **1787 Connecticut Copper, Muttonhead AU53 NGC. Miller 1.2-C, W-2720, R.3.** Ex: The Old New England Collection. The Whitman *Colonial Encyclopedia* refers to the present die marriage as one of the most distinctive and famous issues in the Connecticut series. The mailed bust left is unusually large and bears a serene expression. The reverse is nearly as well-known, since it is the only die in the series with a topless Liberty. Relatively early in the die's life, the dies were lapped, severely weakening the legends. They are faint on the present example, as made. The medium brown surfaces are well-defined given the die state, though the centers are incompletely brought up. Nicely centered and nearly free from marks. The upper-right quadrant is somewhat granular. Listed on page 61 of the 2016 *Guide Book*. PCGS# 343

3010 **1787 Machin's Mills Halfpenny VF30 PCGS. Vlack 17-87A, W-7900, R.2.** Deep dove-gray toning embraces this well centered and nicely defined imitation British halfpenny. The surfaces are moderately granular, and we note two small dull marks near the ribbon loop and a pair of hair-thin lines on Britannia's chest. Machin's Mills was a private postwar New York coiner. Listed on page 67 of the 2016 *Guide Book*. PCGS# 469

3011 **1785 Vermont Copper, VERMONTS XF40 PCGS. RR-2, Bressett 1-A, W-2005, R.2.** A medium brown Republic copper with clear types. Due to the absence of a raised rim, the legends show uneven wear. Marks are chiefly confined to a couple of tiny rim nicks. The few unimportant planchet flaws are usual for the series. Listed on page 72 of the 2016 *Guide Book*. PCGS# 539

3012 **1786 Vermont Copper, VERMONTENSIUM XF45 PCGS. RR-7, Bressett 5-E, W-2025, R.3.** A well defined sea-green and chestnut-gold Landscape copper. Free from detrimental abrasions, although the right-side borders display flaws present on the planchet before the strike. Listed on page 72 of the 2016 *Guide Book*. Population: 23 in 45, 27 finer (5/15). PCGS# 545

3013 **1783 Nova Constellatio Copper, Blunt Rays AU55+ NGC. Crosby 3-C, W-1875, R.3.** A satiny golden-brown and olive-green representative that has an even strike and exemplary surfaces. A fairly late die state with rust west of the eye and a heavy diagonal crack through the RT in LIBERTAS. Listed on page 54 of the 2016 *Guide Book*. Census: 3 in 55 (1 in 55+★), 4 finer (4/15). PCGS# 807

3014 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU55 PCGS. CAC. N. 11-X, W-6790, R.4.** A chocolate-brown Fugio type coin with satin luster and no evident abrasions. The strike is consistent save for blending on the obverse border at 7:30. A small spot is noted on a reverse ring near 4 o'clock. Listed on page 87 of the 2016 *Guide Book*. PCGS# 883

1787 Fugio Cent, MS63 Brown
N. 11-X, Pointed Rays
Rotated Double Struck

3015 **1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Close Overlap Double Struck — MS63 Brown PCGS. N. 11-X, W-6790, R.4.** Substantial mint red illuminates recessed regions, while the open fields and high points are brown. Unabraded, but several minor planchet striations are distributed. The dies rotated slightly counter-clockwise (relative to the obverse) between strikes. The doubling is strongest on the central reverse legends. Listed on page 87 of the 2016 *Guide Book*. PCGS# 883

3016 **1787 Fugio Cent, UNITED STATES, Cinquefoils MS64 Brown PCGS. CAC. N. 8-B, W-6740, R.3.** An olive-brown near-Gem with glimpses of mint red in design crevices. Free from any marks, although trivial flan imperfections are present. The dies were slightly out of parallel, such that the sun and lower reverse are fully struck, while BUSINESS and the uppermost rings are lightly brought up. Listed on page 87 of the 2016 *Guide Book*. PCGS# 889

1789-Dated Mott Token, MS63 Brown
Plain Edge, Thin Flan, Breen-1021
Popular *Guide Book* Token

3017 **1789 Mott Token, Thin Planchet, Plain Edge MS63 Brown NGC. Breen-1021.** An unmarked and coruscating medium to deep brown example. The late die state with a buckled central obverse, a large break from the upper left clock corner, and soft definition on the central reverse. A small curved clip is noted at 2:30, as made from a minor mishap with the planchet cutter. Although dated 1789, the Mott token was likely issued during the Hard Times era. The eagle imitates the reverse motif of post-1807 gold coins. Listed on page 74 of the 2016 *Guide Book*. PCGS# 604

3018 **1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge, W-10955, Baker-29B or -29AA, R.1, MS65 Brown NGC.** Reeded edge, per the NGC insert, but the directional angle of the reeding is hidden by the holder and thus exact attribution by Baker number is not currently possible. Glossy dark brown surfaces show traces of reflectivity, with bold design features. This highly appealing Gem will find considerable demand from colonial collectors and Washington enthusiasts. Census: 4 in 65 (1 in 65+) Brown, 0 finer (4/15). Listed on page 83 of the 2016 *Guide Book*. PCGS# 746

REPUB. AMERI Washington Token
MS64 Red and Brown, Baker-69

3019 **(1870) REPUB. AMERI, Plain Edge, Born 1732 Under Bust, MS64 Red and Brown NGC. Baker-69.** Bronze, 33 mm. Much closer to Red than Brown, although the portrait and right obverse field have mellowed toward gunmetal-gray. A satiny and well struck example. The Baker-68 Originals bear the obverse date 1796, replaced with a verbose birth-and-death legend on the 1870 Baker-69 restrikes. Classification of this medallic variety has been problematic over the years, but Fuld, Rulau, Dalton, Hamer, Vlack, and Breen placed it with the late 18th-century Washington penny tokens.
Ex: F.C.C. Boyd Estate, John J. Ford, Jr. Collection, Part II (Stack's, 5/2004), lot 87. PCGS# 20038

3020 **(1800) Washington Funeral Urn, Silver — Damaged — NGC Details. VG. Baker-166A, Die Variety 1-B.** Jacob Perkins of Newburyport, Massachusetts, was the engraver for the Funeral Urn medals. All examples show a small hole at 12 o'clock, since the medals were made for display at Washington's Feb. 22, 1800 civic funeral. The present cream-gray example was likely carried as a pocket piece after the ceremony, although the legends remain clear. Scattered tiny obverse marks are strictly assessed by NGC. PCGS# 928

HALF CENTS

1793 Half Cent, C-2, VF Details

3021 **1793 C-2, B-2, R.3 — Corrosion — NGC Details. VF.** This is an affordable example of the 1793 half cent, showing legible peripheral legends and boldly outlined devices; the date and fraction are of notable clarity. Uniformly granular surfaces preclude a numeric grade, although the light auburn-brown color of the planchet heightens the overall appeal. Our EAC grade Good 6.

3022 **1794 Normal Head, Small Letters Edge, C-2a, B-2b, High R.2, Fine 12 NGC.** Two different edge lettering sizes were used for the C-2 die marriage, the Small Letters variant being the most frequently seen, ideal for date representation. This mid-grade circulated example has a pleasing light brown planchet, with moderately smooth surfaces. The devices are boldly represented, and the legends are complete. Our EAC grade Good 6. PCGS# 35024 Base PCGS# 1003

3023 **1794 High Relief Head, C-9, B-9, R.2, Fine 12 PCGS. CAC.** Manley Die State 2.0. A gunmetal-gray representative. All legends are bold except HALF CENT, which is faint but fully readable. A lens reveals a few minor marks, with the most apparent above Liberty's nose. Our EAC grade VG7. PCGS# 35063 Base PCGS# 35054

1797 Half Cent, Choice VF
C-1, 1 Above 1

3024 **1797 1 Above 1, C-1, B-1, R.2, VF35 PCGS.** Manley Die State 1.0 to 2.0. A hairline radial crack reaches the B in LIBERTY, but no bulge is apparent left of the L. This tan-brown representative is nicely detailed, and shows only two mentionable marks: a rim bump on the reverse at 5:30, and a hair-thin horizontal line across Liberty's neck. No hint of Talbot, Allum & Lee undertype can be detected. Our EAC grade Fine 15. PCGS# 35101 Base PCGS# 1042

3025 **1797 Plain Edge, C-2, B-2, R.3 — Improperly Cleaned — NGC Details. VF.** This piece is well-detailed, with strong borders and consistent indigo-brown patina that offers a mildly glossy appearance. Faintly granular on each side from an old cleaning, but decidedly attractive for a Details-graded coin from this period, most of which are plagued by heavy corrosion and illegible legends. Our EAC grade VG7.

3026 **1803 Widely Spaced 3, C-3, B-3, R.1, AU58 PCGS. CAC.** Manley Die State 4.0. A coruscating olive-brown near-Mint example. A couple of minor marks are noted near the E in CENT. As usually seen with buckling at the 18 in the date and a heavy diagonal crack across the F in HALF. Our EAC grade XF40. PCGS# 35134 Base PCGS# 1060

3027 **1805 Small 5, Stems, C-3, B-3, R.4 — Corrosion — NGC Details. VG.** Manley Die State 2.0. The peripheral legends are bold on this cream-white and charcoal-gray representative. Marks are minor for the grade, but both sides display several small to moderate pits, and the surfaces are mildly granular. Dr. Manley writes, "most specimens are in very low grades, with the finest known reported as Extremely Fine." Our EAC grade Good 4.

1806 C-1 Half Cent, MS63 Brown
Small 6, No Stems

3028 **1806 Small 6, No Stems, C-1, B-3, R.1, MS63 Brown NGC.** The obverse of this Select Mint State Draped Bust half cent blends olive and steel-brown, while the reverse exhibits olive and tan. A trace of faded mint red remains in the protected areas on each side. Cartwheel luster enhances the eye appeal of this piece. Our EAC grade MS60. PCGS# 35191 Base PCGS# 1093

3029 **1811 Close Date, C-2, B-2, Low R.3, VF20 NGC.** An attractive medium brown example of this conditionally rare Classic Head date. A couple of unobtrusive spots are noted near the date, and the reverse exergue has a pair of tiny digs, but the surfaces are otherwise exemplary. Our EAC grade Fine 12. PCGS# 35242 Base PCGS# 1135

3030 **1811 Close Date, C-2, B-2, Low R.3, VF25 PCGS.** Manley Die State 2.0. A better date half cent with unmarked and moderately granular walnut-brown surfaces. The curls and leaves exhibit wear commensurate with the grade. The normal size of the E in LIBERTY distinguishes C-2 from the even scarcer C-1, which features a large E in LIBERTY. Our EAC grade Fine 15. PCGS# 35242 Base PCGS# 1135

3031 **1825 C-2, B-2, R.1, MS63 Brown NGC.** Manley Die State 2.0 to 3.0. A lovely plum-red and apple-green representative. The fields are semiprooflike and virtually devoid of contact. Well struck except on the uppermost stars. Our EAC grade MS60. PCGS# 35249 Base PCGS# 1141

1835 Half Cent, C-2, B-2, Late Die State
MS65 Red and Brown

3032 **1835 C-2, B-2, R.1, MS65 Red and Brown NGC. CAC.** Manley Die State 3.0, showing a peripheral crack through MERICA, an arcing crack from D S through the wreath to O in OF, and a third crack running vertically through R in AMERICA to a berry. Much mint orange and red is present with tinges of purple and blue on the obverse, a sharply struck and lustrous piece. Our EAC grade MS62. PCGS# 35292 Base PCGS# 1169

LARGE CENTS

3033 **1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — Tooled — PCGS Genuine. XF Details.** This medium brown and steel-gray Wreath cent is well defined but displays several rows of minute triangular marks on Liberty's hair and ONE CENT. The left obverse field is smoothed, and the surfaces are inoffensively granular. EAC grade unassigned. PCGS# 35447 Base PCGS# 1347

3034 **1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Corrosion — NGC Details. Good.** Although the interior recesses show granularity, the relief elements and borders exhibit smooth, chocolate-brown patina. The date and other legends are clear and the central devices are boldly outlined. The even wear and uniform appearance of each side makes this coin unusually choice for a low-end Details-graded example. Our EAC grade AG3.

3035 **1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Genuine — NCS.** In our opinion, this coin has the details of a Good specimen that has been corroded and scratched. The darkly toned fields are granular and the lilac-red portrait exhibits pitting. The centers exhibit pinscratches from an attempt at verdigris removal. The date is indistinct but other legends can be discerned. The more available S-11c variant is presumed, since the edge is concealed within the NCS holder. Our EAC grade Fair 2. PCGS# 35477 Base PCGS# 1350

3036 **1794 Head of 1793, S-18b, B-2b, R.4 — Environmental Damage — NGC Details. VF. Our EAC Grade VG8.** The die state is difficult to determine through the light porosity on both sides of this sharply detailed example. Del Bland and Bill Noyes each grade this piece VG7, with Noyes assigning a sharpness grade of VF20. In our opinion the sharpness grade is VF30 and the net grade is VG8. Both sides are medium steel-brown with hints of mahogany in the protected areas. A trivial scrape is evident at 3:30 on the reverse. *Purchased from Moore.*
From The Eugene Exman Collection. PCGS# 35513 Base PCGS# 1362

3037 **1794 Head of 1793, S-19b, B-3b, R.4 — Environmental Damage — NGC Details. VF. Our EAC Grade VG8.** Breen Die State II. Head of 1793, Edge of 1794, discovered by Dr. Edward Maris before 1869. Del Bland grades this piece VG8, while Bill Noyes assigns a sharpness grade of Fine 15 and a net grade of VG7, with average minus surfaces. In our opinion, the sharpness grade is VF20 and the net grade is VG8. The dark brown surfaces show some porosity on both sides but most lettering is legible and some interior detail remains intact on the devices.
Purchased for Exman at the 1957 ANA Convention by Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35519 Base PCGS# 1362

3038 **1794 Head of 1794, S-22, B-6, R.1 — Obverse Scratched — NGC Details. XF. Our EAC Grade Fine 15.** Breen Die State VII. The letters LI in LIBERTY are close and RTY is slightly low. This coin was graded Fine 15 by Del Bland in 1991. Bill Noyes assigns it a VF30 grade for sharpness, with a net grade of Fine 12 and average minus surfaces. We grade it VF30 sharpness, net Fine 15. Some scratches on Liberty's cheek and in the right obverse field account for the noted damage. Olive drab patina, with attractive overall presentation.
Ex: Dr. G.F.E. Wilharm; William H. Sheldon; Dorothy I. Paschal; C. Douglas Smith; Sale 50 (New Netherlands, 12/1957), lot 912.
From The Eugene Exman Collection. PCGS# 35531 Base PCGS# 901374

3039 **1794 Head of 1794, S-23, B-7, High R.4 — Reverse Damage — NGC Details. XF. Our EAC Grade Fine 15.** Breen Die State V. The variety is easily identified by the die crack from the rim, through the pole, to the throat. A gouge in the upper wreath and a couple of scratches through the denomination constitute the noted damage. The design elements are sharply detailed, with some wear on the high points and the pleasing chocolate-brown surfaces show a few hints of underlying mint luster. Del Bland grades this coin Fine 15, which is also our net grade. We agree with Bill Noyes that this piece has VF25 sharpness, but his net grade is VG10, with average minus surfaces.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35534 Base PCGS# 901374

1794 Liberty Cap Cent, XF40
Head of 1794, S-24

3040 **1794 Head of 1794, S-24, B-8, R.1, XF40 NGC. Our EAC Grade VF20.** Breen Die State V. Liberty's cheek is rounded, in high relief, and the top of the pole does not enter the cap. Excessive die polishing left an ear-shaped hollow in the hair to the left of the neck. Del Bland assigned a grade of VF25 to this coin in 1991. More recently, Bill Noyes graded it VF20 for sharpness and a net of VG10, with average minus surfaces. In our opinion, this coin has the sharpness of a VF30 specimen, with a net grade of VF20. Some of the design elements on the reverse show weakness due to die buckling and the olive drab surfaces show slight granularity in some areas, but the overall presentation is quite attractive.
Ex: Dr. G.F.E. Wilharm; William H. Sheldon; Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35537 Base PCGS# 901374

1794 Liberty Cap Cent, S-25, XF40
Popular Head of 1794 Variety

3041 **1794 Head of 1794, S-25, B-15, R.3, XF40 NGC. Our EAC Grade VF20.** Breen Die State II. Both N's in ONE CENT show signs of recutting and a curious period-shaped lump is evident between L and I in LIBERTY, identifying the popular S-25 variety. Del Bland gives this coin a VF25 evaluation, while we concur with Bill Noyes that it deserves a VF25 grade for sharpness, with a net grade of VF20. Noyes evaluates the surfaces as average. Like many examples of this variety, this coin is unevenly struck, with the left side showing more detail than the right, especially on the reverse. The smooth olive-brown surfaces show only minor abrasions.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35540 Base PCGS# 901374

3042 **1794 Head of 1794, S-27, B-9, R.5 — Environmental Damage — NGC Details. VF. Our EAC Grade Good 6.** Breen Die State I. The E in LIBERTY is positioned higher than B or R, and the wreath shows a single leaf at I in AMERICA, characteristics of the popular S-27 variety. Del Bland graded this coin Good 6 in 1991 and that is our net grade today. We concur with Bill Noyes that this coin has the sharpness of a Fine 15 example, and Noyes rates the surfaces average minus. The S-27 is usually found in low grades. This pleasing specimen is lightly abraded, but the surfaces are somewhat porous.
From The Eugene Exman Collection. PCGS# 35546 Base PCGS# 901374

3043 **1794 Head of 1794, S-32, B-18, R.2 — Environmental Damage — NGC Details. XF. Our EAC Grade Fine 15.** Breen Die State IV. The variety is easily recognized by the rim break above L in LIBERTY and the heavy die crack at ST in STATES. Del Bland graded this coin VF20 in 1991. Bill Noyes evaluated it as VF25 sharpness and Fine 15 net grade, with average surfaces in 2013. We agree with Noyes on both sharpness and net grade. The dark brown surfaces show no large abrasions, but both sides exhibit areas of corrosion, with attractive highlights of violet.
Ex: Anderson Dupont Collection (Stack's, 9/1954), lot 47.
From The Eugene Exman Collection. PCGS# 35561 Base PCGS# 901374

1794 S-34, Head of '94 Cent, Fine Details
Ex: Hines - Sheldon - Downing

3044 **1794 Head of 1794, S-34, B-20, High R.5 — Environmental Damage — NGC Details. Fine. Our EAC Grade Good 6.** An early die state piece, although heavy surface granularity prevents definitive identification. Described as "Eroded surface. Very rare" in the 1927 Chapman catalog, and "probably the third finest known" in the 1952 ANA sale. A few additional examples have been traced since then, but Sheldon-34 remains a rare acquisition. This piece is uniformly deep ebony in color, with Fine 12 sharpness. We rate this coin Good 6, as does Del Bland; Bill Noyes calls this coin Good 6 with Fine 15 sharpness. The H and D in HUNDRED are filled with yellow ink (by H.K. Downing).
From the F.B. King Collection (Henry Chapman, 12/1927), lot 23; Henry C. Hines; Dr. William H. Sheldon; Homer K. Downing; 1952 ANA Sale (New Netherlands, 8/1952), lot 1670 to Dorothy Paschal at $115.00; purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35567 Base PCGS# 901374

3045 **1794 Head of 1794, S-36, B-23, R.5 — Obverse Scratched — NGC Details. VF. Our EAC Grade Fine 12.** Breen Die State I. An old, hair-thin scratch extends vertically from rim to rim behind Liberty's head. The strike is even and the borders are strong, even while mild granularity textures the deep steel-brown surfaces. We rate this coin Fine 12 with VF25 sharpness; Bill Noyes assigned a grade of VG10 with VF25 sharpness and slightly below average surface quality.
From Dr. William H. Sheldon.
From The Eugene Exman Collection. PCGS# 35573 Base PCGS# 901374

1794 S-38 Cent, XF Details
A Challenging Head of '94 Variety

3046 **1794 Head of 1794, S-38, B-25, R.5 — Scratches, Rim Damage — NGC Details. XF. Our EAC Grade VG8.** Breen Die State I. This is a well-detailed example, with numerous small ticks on each side and a few light scratches on the obverse through LIBERTY and on the neck; the upper-right reverse border is weak, and a wide rump bump is at 9 o'clock on the obverse. The coin is otherwise deep brown and glossy. We rate this piece VG8 with VF25 sharpness, slightly more conservative than Del Bland or Bill Noyes, who assigned respective grades of Fine 12, and Fine 12 with VF30 sharpness. Noyes notes below-average surfaces.
From Dr. William H. Sheldon; purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35579 Base PCGS# 901374

3047 **1794 Head of 1794, S-41, B-30, R.3 — Improperly Cleaned — NGC Details. XF. Our EAC Grade VF25.** Breen Die State III, radially cracked through the D in UNITED. Consistent, deep brown color masks minutely granular texture in the recesses of this well-struck Sheldon-41 example. We concur with Bill Noyes' rating of VF25 with VF30 sharpness and average surfaces. A comparable VF25 grade was assigned by Del Bland.
From Richard Picker (1958); Roy E. Naftzger, Jr.; Edward H. Schwartz (Kosoff, 10/1961), lot 43; purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35588 Base PCGS# 901374

3048 **1794 Head of 1794, S-43, B-32, R.2 — Environmental Damage — NGC Details. AU. Our EAC Grade VF25.** Breen Die State I. Bill Noyes notes slightly below average surfaces, confirmed by mild granularity on each side, but the rims are complete and the interior relief elements are boldly rendered amid reddish-olive patina. We rate this piece VF25 with XF40 sharpness. Noyes and Del Bland reflect this assessment themselves. Struck from mildly rotated dies.
From New Netherlands Fiftieth Catalog Sale (New Netherlands, 12/1957), lot 939.
From The Eugene Exman Collection. PCGS# 35594 Base PCGS# 901374

3049 **1794 Head of 1794, S-44, B-33, R.1 — Environmental Damage — NGC Details. XF. Our EAC Grade VF20.** Breen Die State V, heavily cracked on each side. This available variety is frequently found in type cabinets. We agree with Bill Noyes on this coin's VF30 sharpness, but concur with Del Bland on the net grade of VF20, rather than Noyes' Fine 15 assessment. A couple small marks are noted on Liberty's neck, while the surfaces are otherwise uniformly dark and granular. The motifs are well-defined and the border dentils are complete.
From New Netherlands Fiftieth Catalog Sale (New Netherlands, 12/1957).
From The Eugene Exman Collection. PCGS# 35597 Base PCGS# 901374

1794 Head of '94 Cent, Fine 12
Rare S-45 Die Marriage

3050 **1794 Head of 1794, S-45, B-35, High R.5, Fine 12 NGC. Our EAC Grade VG8.** Breen Die State II, cracked from the reverse rim near the I in AMERICA to the right ribbon end. The surfaces are original, showing light olive-brown color over the relief elements and dark, mildly granular patina in the recesses. The legends are clear, and the only uneven quality is minor fading of the lower-left obverse rim. We rate this piece VG8 with Fine 12 sharpness, identical to Bill Noyes' assessment. Del Bland called this coin VG7. With the exception of a few exceptional examples, most representatives of this rare variety are in lower circulated grades.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35600 Base PCGS# 901374

3051 **1794 Head of 1794, S-46, B-36, R.3 — Obverse Damage — NGC Details. AU. Our EAC Grade VF20.** Breen Die State IV. Glossy chocolate-brown surfaces and boldly render design elements are the hallmarks of this Sheldon-46 representative. The reverse is essentially problem-free, although the obverse shows numerous light marks in addition to the die cracks that determine the late die state. We rate this piece VF20 with VF35 sharpness, similar to Bill Noyes' assessment of VF25 with VF35 sharpness. Del Bland called this coin VF20.
Purchased from C. Douglas Smith.
From The Eugene Exman Collection. PCGS# 35603 Base PCGS# 901374

3052 **1794 Head of 1794, S-47, B-39, R.4 — Environmental Damage — NGC Details. VF. Our EAC Grade VG7.** This uniformly granular Sheldon-47 example grades VG7 with Fine 12 sharpness. The border dentils are complete around each side and the legends and design elements are boldly defined. Dark plum-brown color subdues much of the fine corrosion. Del Bland called this coin VG8; Bill Noyes offered a more generous assessment of VG10 with VF20 sharpness.
From The Eugene Exman Collection.

3053 **1794 Head of 1794, S-49, B-41, R.2 — Damaged — NGC Details. AU. Our EAC Grade Fine 15.** Breen Die State III. We grade this piece Fine 15 with VF35 sharpness, slightly finer than Bill Noyes' assessment of VG10 with VF25 sharpness; Del Bland called this coin VF25. The level of detail is considerable, even if the strike is a trifle weak over the date and the corresponding portion of the reverse border. A few old, shallow scratches in the obverse fields are not overly distracting, and neither are a few light ticks around the reverse rim. Glossy auburn surfaces please the eye.
From New Netherlands Fiftieth Catalog Sale (New Netherlands, 12/1957), lot 947.
From The Eugene Exman Collection. PCGS# 35609 Base PCGS# 901374

1794 S-51 Cent, Head of '94, XF Details
Medium Brown Surfaces

3054 **1794 Head of 1794, S-51, B-42, Low R.5 — Improperly Cleaned — NGC Details. XF. Our EAC Grade Fine 15.** Breen Die State I. The finest examples of Sheldon-51 in Breen's Condition Census are several XF coins. This representative was graded Fine 15 by Del Bland, an assessment with which both we and Bill Noyes concur. The sharpness is VF25. NGC notes evidence of old cleaning, although the surfaces have since acquired pleasing bronze-brown color. No corrosion is observed. Both sides exhibit light, scattered ticks, the most noticeable being a couple old hits on Liberty's neck.
Purchased from John Adams (1974).
From The Eugene Exman Collection.

1794 S-52 Cent, VG Details
A Rare Head of '94 Variety

3055 **1794 Head of 1794, S-52, B-44, Low R.6 — Obverse Graffiti — NGC Details. VG. Our EAC Grade Good 5.** Breen Die State I. Acquiring an example of Sheldon-52 is challenging enough that few collectors can afford to be picky in regards to condition. This piece displays consistent light brown color, with minute granularity in the fields and DBE faintly scratched into the obverse — really minor complaints for the variety. We give this piece a Good 5 grade with VG7 sharpness, a little more generous than Bill Noyes' Good 4 with Good 6 sharpness and below average surfaces. Del Bland called this piece Good 6.
From Walter Breen; purchased from Dorothy I. Paschal (1963).
From The Eugene Exman Collection.

3056 **1794 Head of 1794, S-54, B-46, R.3, VF25 NGC. Our EAC Grade VG10.** Breen Die State II. This piece shows deep brown surfaces with minute granularity evident in the reverse fields. The central devices are boldly defined, although the reverse periphery is a trifle worn. We concur with Bill Noyes' grade of VG10, noting Fine 15 sharpness. Del Bland also assessed this piece as VG10 in 1991.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35624 Base PCGS# 901374

1794 Head of '94 Cent, S-55, XF40
Ex: Hines - Sheldon

3057 **1794 Head of 1794, S-55, B-47, R.2, XF40 NGC. Our EAC Grade Fine 15.** Breen Die State II. This is the only use of this reverse, although the obverse is shared by Sheldon-54 and -56. Our assessment of this example's grade is Fine 15, with VF25 sharpness — slightly more conservative than Bill Noyes' VF20 with VF30 sharpness. Del Bland graded this piece VF20. The surfaces are a deep plum-brown, with no evidence of corrosion, although scattered small ticks are observed on each side. An exact strike shows full borders and boldly renders the central devices.
From the Henry C. Hines Collection; Dr. William H. Sheldon; purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35627 Base PCGS# 901374

1794 S-58 Cent, XF40
Pleasing Head of '94 Example

3058 **1794 Head of 1794, S-58, B-56, R.3, XF40 NGC. Our EAC Grade VF25.** Breen Die State II, with a crack through the IT in UNITED. Sheldon-58 is typically seen only in well-worn or impaired condition, and is scarce in the upper circulated grades. We concur with Bill Noyes' assessment of this piece, giving it a grade of VF25 but acknowledging the sharpness of VF30; Del Bland's VF25 grade is consistent. The strike is even, with complete dentils around each periphery. Deep olive-brown surfaces show trivial marks, primarily on the obverse, which are not distracting.
From the J.P. Young Collection; Dr. William H. Sheldon; purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35636 Base PCGS# 901374

1794 Cent, Pleasing VF30
S-59, Head of '94

3059 **1794 Head of 1794, S-59, B-57, R.3, VF30 NGC. Our EAC Grade Fine 12.** Breen Die State V. A heavy die crack crosses the fraction and right ribbon end; this fracture later breaks away completely, obscuring much of the fraction. Given the relatively smooth, medium brown surfaces of this mid-grade Sheldon-59 example, we feel Bill Noyes' grade of VG10 is a mite conservative, but concur with his assessment of the sharpness as Fine 15. Del Bland's Fine 12 estimate is exact to our EAC assessment. There is substantial detail remaining in Liberty's hair curls and the wreath is well-defined. Border dentils grow slightly weak along the left obverse periphery, but a distinct rim is still brought up.
Purchased by Dr. William H. Sheldon from Chapman (1920); acquired by Dorothy I. Paschal (1952); purchased from Dorothy I. Paschal (1956).
From The Eugene Exman Collection. PCGS# 35639 Base PCGS# 901374

3060 **1794 Head of 1794, S-61, B-53, R.4 — Rim Damage — NGC Details. VF. Our EAC Grade VG8.** Sharing the same obverse as Sheldon-60, the bold clash marks behind Liberty's head were removed (more or less) when the obverse die was reground, sacrificing some thickness at the curl points. The bold clashed dentils through the fraction, ribbon, and UN of UNITED suggest Breen Die State I, since no clashing from the hair at ONE is visible. A pair of obverse rim bumps and another at CA of AMERICA on the reverse account for our net grade of VG8, although we assign a sharpness grade of Fine 15, net VG8. Noyes believes the sharpness is VF20 with a net VG10 grade; Del Bland rated the coin VG8. Deep chocolate-brown patina covers both sides, with slight granularity in and around the wreath.
Purchased from Moore.
From The Eugene Exman Collection.

3061 **1794 Head of 1794, S-62, B-54, High R.4 — Environmental Damage — NGC Details. VF. Our EAC Grade VG8.** Recognizable as the Sheldon-62 variety by a trio of obverse diagnostics including an oblong rim cud between 8 and 9 o'clock, an abnormally thick and blunt lowest curl, and missing hair detail and the cap edge above the first curl from a die depression. The variety was discovered by Dr. Edward Maris circa 1870. The current coin is from the Hines Collection via Dr. Sheldon. A deep olive-brown example, we note moderate corrosion on the reverse. In our opinion the coin grades Fine 15 for sharpness with a net grade of VG8. Noyes suggests sharpness of VF20, net VG10 with average minus surfaces. Bland rates as VG10. Glossiness remains despite the environmental issues, which are largely confined to the Short Right Stem reverse.
From the Henry C. Hines Collection; purchased from Dr. William H. Sheldon on 12/25/1954.
From The Eugene Exman Collection.

1794 S-63 Cent, VF35
Attractive 'Fallen 4' Example

3062 **1794 Head of 1794, S-63, B-37, R.2, VF35 NGC. Our EAC Grade VF20.** An instantly recognized variety and the only 1794 cent with the date not conforming to the curve of the border. Both the date and LIBERTY are poorly spaced and misaligned on the obverse. Parts of the reverse legend and ONE CENT are weak from die lapping. Die clashing is visible on both sides including low areas of the portrait, equivalent to Breen Die State II. Del Bland grades this coin VF25, while Bill Noyes believes it is VF35 for sharpness, net grade VF25 with average surfaces. Our opinion is VF30 for sharpness and net VF20. This is a nicely preserved and pleasing example, with faintly iridescent, medium-brown surfaces and reddish undertones.
From the Henry C. Hines Collection; purchased from Dr. William H. Sheldon in 1954.
From The Eugene Exman Collection. PCGS# 35651 Base PCGS# 901374

3063 **1794 No Fraction Bar, S-64, B-50, Low R.5 — Repaired — NGC Details. VF. Our EAC Grade Good 6.** Other than the Sheldon-48 Starred Reverse, the Sheldon-64 Missing Fraction Bar is the most readily recognized of the 65 die marriages known for the cents of 1794. The omission of the fraction bar has puzzled — and attracted — large cent specialists since its discovery. Whether due to overzealous die resurfacing or an engraver's error, the variety remains in strong demand in all grades. The present coin shows areas of smoothing and repair on the obverse and overall microporosity on the reverse. Die buckling corresponds to Breen Die State III. Del Bland graded this coin a VG8, while Noyes indicates Fine 12 sharpness, net Good 5. Our assessment is a bit higher at Fine 15 sharpness, net Good 6. In hand, the surfaces appear glossy and smooth with medium-to-dark brown color and hints of blue and green.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35708 Base PCGS# 911374

1794 S-65 Large Cent, XF40
'Shielded Hair' Obverse

3064 1794 Head of 1794, S-65, B-51, R.1, XF40 NGC. Our EAC Grade VF20. The broad, deep obverse border at lower left provided a "shield" for Liberty's hair curls and cap, while the upper-right border is weak and not nearly as protective. Deeply toned olive-brown surfaces show a distribution of small marks across Liberty's portrait and right obverse field. The reverse is mildly granular through the center and lower border, foreshadowing late state die degeneration. This example represents the Breen Die State VII. Del Bland called this coin VF25. Noyes suggests VF30 for sharpness and VF20 as a net grade, an assessment we agree is accurate.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35654 Base PCGS# 901374

3065 1794 Head of 1794, S-66, B-58, R.5 — Corrosion — NGC Details. Fine. Our EAC Grade Good 5. A scarce R.5 cent with a very wide date spaced 1 794 and LIBERTY widely spaced as well. This is Sheldon's "Split Pole" variety, with a straight radial die crack running parallel to the pole from the edge and past the neck truncation. The die crack is diagnostic of the Breen Die State II or later, although the exact die state is indeterminate due to the condition of the current example. While the ebony-brown surfaces are corroded and coarsely granular, all of the main elements are surprisingly clear and well-centered. Del Bland calls the coin Good 6. Noyes lists the coin as Fine 15 sharpness, net VG7, with average-minus surfaces. In our opinion, the coin shows Fine 12 detail with a net Good 5 grade. With top of the Condition Census at the VF level, this example is a worthwhile representative of a challenging variety.
Purchased from an unknown dealer at the Metropolitan New York Convention in 1958 via Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35657 Base PCGS# 901374

1794 S-67 Large Cent, XF40
Head of 1795, Late Die State

3066 1794 Head of 1795, S-67, B-59, R.3, XF40 NGC. Our EAC Grade VF25. Known by either the Head of 1795 or Breen's "Gardner's First Head," the portrait die was prepared by assistant engraver John Smith Gardner, who also did the head punch for 1795-97 half cents and the "Small Head" half dollars of 1795. On the large cents, the lower lock loops into an almost-closed curl to help identify Gardner's single portrait punch. This example displays deep olive-brown color and remarkably smooth fields. Virtually no granularity or corrosion appears on the coin despite the late state of the dies matching Breen Die State V. A few nicks and marks are distributed across the surfaces, including a curving scrape on Liberty's jawline. Del Bland lists the coin as VF25. Noyes gave the coin a net VF30 grade with average-plus surfaces. Our assigned grade is VF30 for sharpness, net VF25.
Purchased from Moore.

1794 Head of 1795 Cent, VG8
Very Scarce S-68

3067 1794 Head of 1795, S-68, B-60, R.5, VG8 NGC. Our EAC Grade Good 6. Minimally granular and only lightly abraded. ONE CENT is faint but the other legends are bold. A deep brown representative of this scarce Sheldon marriage. Breen Die State V with a bisecting obverse break between 2 and 8 o'clock. The break is severe on the field below the cap. Del Bland graded this cent as VG7. Noyes grades it VG8 for sharpness, net Good 6. Our assessment is Good 7 sharpness, net Good 6.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35687 Base PCGS# 1365

1794 S-69 Cent, XF40
'Blundered 1' Variety

3068 **1794 Head of 1795, S-69, B-61, R.3, XF40 NGC. Our EAC Grade VF25.** An inverted, mispunched 1 in the date and recutting of the 7 at the upper right serif identifies this popular Sheldon-69 variety. Likewise, AM of AMERICA was originally mispunched and multiply recut to appear larger than the other letters. This is an attractive, olive-brown cent with smooth surfaces and moderate wear. The obverse shows no die clashing, a characteristic of Breen Die State I. Del Bland graded the coin VF25, and Bill Noyes lists a similar VF25 as the net grade with VF30 sharpness. We agree with a solid VF25 grade for this pleasing Blundered 1 cent.
From Stack's sale of the Davis-Graves Collection via C. Douglas Smith on 4/10/1954.
From The Eugene Exman Collection. PCGS# 35690 Base PCGS# 1365

1794 Cent, VF35
Head of 1795, S-70

3069 **1794 Head of 1795, S-70, B-62, R.2, VF35 NGC. Our EAC Grade Fine 15.** The Blundered 1 obverse was employed for the second time on Sheldon-70. A bold die crack between TY of LIBERTY from rim to brow suggests Breen Die State II for this example. The reverse shows a triple leaf at D of UNITED and a double leaf at OF. The right ribbon is recut. Generally smooth surfaces are interrupted by scattered small nicks and marks. The deep chocolate-brown patina is glossy with a few golden glints among the reasonably sharp devices. Del Bland rates Fine 15; Noyes suggests VF20 sharpness and net Fine 15 average surfaces. Our grade is VF20 sharpness with a Fine 15 net grade.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35693 Base PCGS# 1365

3070 **1794 Head of 1795, S-72, B-65, R.2 — Obverse Tooled — NGC Details. VF. Our EAC Grade Fine 15.** Breen Die State III, cracked on both sides. Glossy auburn-brown surfaces are smooth and free of distractions on the reverse, although the obverse shows die fatigue around the outer periphery and there are faint, linear tool marks on the portrait, along with an old dig on Liberty's jaw. The dentils are complete and the central devices are boldly defined. Del Bland called this coin VF20, and Bill Noyes concurred, also noting VF25 sharpness and average surfaces. We are a little more conservative with our assessment, rating this piece Fine 15 with VF20 sharpness.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35699 Base PCGS# 1365

3071 **1795 Lettered Edge, S-74, B-2, Low R.4, VF20 NGC. Our EAC Grade Fine 15.** Breen Die State VII with numerous fine cracks and a faint clash mark west of the C in CENT. A medium brown with generally pleasing surfaces, though we note small marks beneath the IB in LIBERTY. Del Bland has graded this cent as VF25. Noyes designates it as VF20 sharpness, net Fine 15, and we concur with his assessment.
Ex: Ernest Henderson Collection.
From The Eugene Exman Collection. PCGS# 35714 Base PCGS# 1377

3072 **1796 Liberty Cap, S-82, B-3, R.5 — Burnished — NGC Details. VG. Our EAC Grade AG3.** Breen Die State I. All legends are readable, although UNITED and CENT are faint. The medium to deep brown surfaces are moderately granular and have been burnished. Four small to medium rim knocks are noted on the reverse between 9 and 10 o'clock. A very scarce die variety. Noyes graded the present coin as VG8 details, net Good 4. Our sharpness grade is also VG8.
From The Eugene Exman Collection. PCGS# 35753 Base PCGS# 1392

1796 S-110 Cent, AU Details
Draped Bust, Partial Luster

3073 **1796 Reverse of 1794, S-110, B-16, R.3 — Damaged — NGC Details. AU. Our EAC Grade VF20.** Breen Die State VII with breaks near the Es in UNITED and ONE. A glossy olive-green example with lilac-red tints in protected areas. Luster glimmers from the legends, curls, and wreath. Both sides exhibit many distributed small abrasions. Del Bland graded this coin VF25. Noyes gave it XF40 for sharpness, net VF25. Our assessment is XF40 details, net VF20.
Ex: Anderson Dupont Collection, Part I (Stack's, 9/1954), lot 144.
From The Eugene Exman Collection. PCGS# 35801 Base PCGS# 1404

1797 S-128 Cent, AU Details
Stems, Reverse of 1797

3074 **1797 Reverse of 1797, Stems, S-128, B-23, R.3 — Improperly Cleaned — NGC Details. AU. Our EAC Grade VF30.** Breen Die State IX with many obverse cracks. Glossy from a wipe, but the chocolate-brown surfaces display substantial luster and show only a trace of wear. A roundish depression, possibly as made, is noted on Liberty's chest near the drapery. Del Bland called the present cent XF40. Bill Noyes regarded it as XF45 details, net VF30. We call it XF40 sharpness, net VF30.
From The Eugene Exman Collection. PCGS# 35924 Base PCGS# 1422

3075 **1798 Second Hair Style, S-170, B-29, R.3 — Environmental Damage — NGC Details. AU.** Breen Die State III, confirmed by an arcing die crack through the hair ribbon. This piece shows sharp central detail, but is weakly struck along the right reverse border. The surfaces are surprisingly smooth, with a soft matte-like texture, although a couple areas of deep russet-brown discoloration on the obverse contribute to the Details grade from NGC; otherwise, the surfaces display dusky orange-brown patina. Our EAC grade VF20.

1798 S-173 Cent, AU50
Second Hair Style
Cud Over ERTY

3076 **1798 Second Hair Style, S-173, B-38, R.3, AU50 PCGS.** Breen Die State VII. A late die state with a cud over ERTY, touching the final three letters. This rotated dies example is well struck on the upper obverse and left reverse, while the lower obverse and right reverse display selected softness. The tan-brown surfaces are impressively free from detractions. Our EAC grade VF35. PCGS# 36089 Base PCGS# 1434

3077 **1799 S-189, B-3, R.2 — Scratched — ANACS. Poor 1 Details.** The top half of the date is clear, and ONE CENT is readable. Portions of LIBERTY and the country name emerge when evaluated at arm's length. A moderately granular medium brown key date cent. Both centers display several fairly lengthy thin marks. Our EAC grade Poor 1. PCGS# 36140 Base PCGS# 1443

3078 **1799 S-189, B-3, R.2, PCGS Genuine.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fair specimen that has scratches and environmental damage. The wreath and ONE CENT are relatively sharp. The peripheral legends are well-worn but mostly readable. The date is very faint except for the final digit. Numerous pinscratches cross the portrait, and the deep brown surfaces are granular. Our EAC grade Fair 2. PCGS# 36140 Base PCGS# 1443

1800 Draped Bust Cent, AU Details
Attractive S-211 Example

3079 **1800 S-211, B-13, R.3 — Improperly Cleaned — NGC Details. AU. Our EAC Grade VF30.** Breen Die State VIII. The S-211 variety is easily identified by the long diagonal die lumps between the L in LIBERTY and the hair. The variety was discovered by Dr. McGirk and examples are often seen on broad planchets. Del Bland graded this coin VF35 in 1991. Bill Noyes felt it had the sharpness of XF40 in 2013 and a net grade of VF30, with average surfaces. We assign an identical net grade, but feel it has the sharpness of an XF45 specimen. This coin was struck considerably off-center, and about half of LIBERTY was cut off. Only slight wear shows on the design elements and the lightly abraded russet surfaces show a few hints of original red.
Ex: R.L. Miles Collection, Part II (Stack's, 4/1969), lot 102.
From The Eugene Exman Collection. PCGS# 36221 Base PCGS# 1449

3080 **1801 100/000, S-221, B-5, R.2, VF35 NGC. Our EAC grade VF25.** Breen Die State III. A glossy medium brown example that has an unmarked reverse and scattered minor obverse contact, including a small pit on the upper right field. Minutely granular near the shoulder curl. S-221 merits its own Guide Book listing as the sole corrected fraction variety for the date. Del Bland graded the coin VF25. Noyes assessed it as XF40 sharpness, net VF30. We call it VF35 details, net VF25.
Ex: Elder, Judge Thomas L. Gaskill Collections.
From The Eugene Exman Collection. PCGS# 36284 Base PCGS# 1467

1802 S-232 Cent, Choice AU
Well-Defined, Partial Luster

3081 **1802 S-232, B-12, R.1, AU55 PCGS.** The sizeable cud above the AT in STATES promptly attributes this cent as S-232. A well defined medium chocolate-brown example with exemplary surfaces and excellent eye appeal. Metal flow into the reverse cud during the strike causes minor weakness opposite near the 1 in the date, as made. Our EAC grade XF40. PCGS# 36305 Base PCGS# 1470

1803 S-258 Cent, Small Date, Large Fraction
Exceptional Surfaces, AU58

3082 **1803 Small Date, Large Fraction, S-258, B-17, R.1, AU58 NGC. Our EAC Grade AU50.** Breen Die State III, arcing crack on the obverse, clashed. A truly problem-free, original example of this available variety, outstanding for type purposes. Largely complete design elements and smooth, steel-brown surfaces are aglow with faint remnants of silvery luster. Well-struck and centered on the flan. Bill Noyes awarded this piece above-average surface quality (an assessment granted to few coins in this offering), and rated it AU50 with AU55 sharpness. We concur on every level. In 1991, Del Bland also called this coin AU50, denoting its long-recognized quality. Such a piece is seldom offered of any variety.
Hon. Jos. Sawicki Collection (Stack's, 2/1954), lot 614.
From The Eugene Exman Collection. PCGS# 36398 Base PCGS# 1485

3083 **1803 Small Date, Large Fraction, S-261, B-20, R.2 — Improperly Cleaned — NGC Details. AU. Our EAC Grade VF30.** Breen Die State II. Sheldon-261 is from one of the plentiful 1803 date and fraction size combinations, frequently seen in type or date sets. This piece is well-defined with glossy reddish-brown surfaces. Light cleaning has not overly marred the visual appeal. Our assessment of VF30 with AU50 sharpness is identical to Bill Noyes'; Del Bland was a little more generous with this piece, calling it XF40.
From The Eugene Exman Collection. PCGS# 36407 Base PCGS# 1485

1804 S-266c Cent, XF Details
Advanced Die State

3084 **1804 S-266c, B-1, R.2 — Environmental Damage — NGC Details. XF. Our EAC Grade Fine 15.** Breen Die State IV, advanced breaks, with heavy cuds over RTY in LIBERTY and MERIC in AMERICA. This is the only die pairing for the 1804 Draped Bust cent, highly sought-after in all grades. We rate this piece Fine 15 with VF30 sharpness, mirroring Bill Noyes' assessment which also notes slightly below average surfaces. Each side is mildly granular in the recesses but shows lighter olive-brown color over the relief elements with well-defined motifs. A small rim bump is mentioned at 8 o'clock on the obverse and there are a few light marks on the portrait. Del Bland was a little more conservative with this piece, calling it Fine 12.
From The Eugene Exman Collection. PCGS# 36422 Base PCGS# 1504

3085 **1806 S-270, B-1, R.1, XF40 NGC. Our EAC Grade Fine 12.** Breen Die State IV. The only known dies for the 1806 issue. This piece is well-detailed, if only a trifle weak around portions of the obverse periphery. The central devices are well-defined. A few light, scattered ticks are observed with a loupe on each side, none obvious to the unaided eye, and the surfaces are otherwise deep brown in color and devoid of environmental impairments. Fine 12 with VF20 sharpness, but rated slightly better by Del Bland in 1991 at VF20. Bill Noyes called this piece Fine 12 with Fine 15 sharpness and average surface quality.
From The Eugene Exman Collection. PCGS# 36436 Base PCGS# 1513

3086 **1807 Comet, S-271, B-1, R.1, VF35 PCGS.** A lovely chocolate-brown example of this popular *Guide Book* variety, exhibiting consistently smooth, problem-free surfaces and retaining strong central detail for the grade. The "comet" die flaw is bold. A minor rim bump is noted on the obverse at 2 o'clock. Our EAC grade Fine 15. PCGS# 36454 Base PCGS# 1531

1809 S-280 Cent, AU Details
Middle Die State

3087 **1809 S-280, B-1, R.2 — Environmental Damage — NGC Details. AU. Our EAC Grade Fine 12.** Breen Die State III. The only die pair for the 1809 cent, here seen in an intermediate die state with two fine cracks through the E in STATES. The coin is struck minutely off-center toward 9 o'clock, with almost no rim on that edge. Scattered areas of mild granularity in the recesses are masked by glossy auburn-brown coloration. The devices are well-defined, although the peripheral stars are weak, having been struck so. This is a pleasing Fine 12 coin with VF30 sharpness, slightly finer than Bill Noyes suggested with his rating of Fine 12 and VF25 details. Del Bland called this coin VF20 in 1991.
From The Eugene Exman Collection. PCGS# 36466 Base PCGS# 1546

3088 **1810 S-283, B-4, R.2 — Environmental Damage — NGC Details. AU. Our EAC Grade VF20.** Breen Die State III. Within the Classic Head type, some degree of environmental impairment can be expected on most coins, although this 1810 example remains moderately pleasing. Rich, reddish centers deepen to russet and plum around the borders. The devices are sharp and the peripheral stars and legends are clear. The border recesses are minutely granular when viewed with a glass. We concur with Bill Noyes' assessment of VF20 and XF45 sharpness. Del Bland called this coin VF35 in 1991.
From The Eugene Exman Collection. PCGS# 36478 Base PCGS# 1549

1811 S-287 Cent, AU Details
Glossy Surfaces

3089 **1811 S-287, B-1, R.2 — Whizzed — NGC Details. AU. Our EAC Grade VF35.** Breen Die State III. Lightly whizzed, per the NGC insert, although the evidence is not immediately obvious. The design elements are sharp and there is not any noticeable fading around the relief elements. Glossy auburn-brown surfaces are free of major flaws. Bill Noyes' rating of VF35 with AU50 sharpness and slightly below average surfaces is exact to our own assessment. Del Bland called this coin AU50 in 1991, which speaks to the level of eye appeal. Described in the DuPont catalog as having a "beautiful olive-brown surface entirely free of dents or injuries," where it was also plated. Plate matching confirms that the coin is in the same condition as it was at the time of that writing.
From the Anderson DuPont Collection, Part I (Stack's, 9/1954), lot 510.
From The Eugene Exman Collection. PCGS# 36496 Base PCGS# 1555

1812 S-288 Cent, AU Details
Pleasing Classic Head Type Coin

3090 **1812 Large Date, S-288, B-3, R.2 — Improperly Cleaned — NGC Details. AU. Our EAC Grade VF30.** Breen Die State III. Although lightly cleaned in the past, the glossy, olive and steel-brown surfaces of this sharp Sheldon-288 example are nonetheless pleasing. The left-hand stars are weak, but the central devices are sharp and only trivial wear is evident over the high points of the design. XF sharpness and rated VF30, slightly finer than Bill Noyes' assessment of VF20 with VF30 sharpness. Del Bland called this piece XF45. The planchet quality is excellent for the type.
From The Eugene Exman Collection. PCGS# 36505 Base PCGS# 1564

3091 **1813 S-293, B-1, R.2, VF35 PCGS.** The scarcity of this issue in problem-free condition is well-known, regardless of numeric grade. This Choice VF piece displays uniform auburn-brown patina, with faintly matte-like surface texture. The strike is even and wear is consistent with the grade. Our EAC grade Fine 15. PCGS# 36514 Base PCGS# 1570

3092 **1817 13 Stars, N-14, R.1, MS63 Red and Brown PCGS.** The left base of the N in ONE is repunched, diagnostic for N-14. Orange-gold accompanies protected areas, while the open fields are sea-green. The strike is good except on the right-side stars and the hairbun. Encapsulated in an old green label holder. Our EAC grade MS60. PCGS# 36590 Base PCGS# 1595

3093 **1820 Large Date, N-13, R.1, MS64 Brown NGC.** Circumnavigating peripheral die cracks on the obverse are characteristic of this variety, which is more concretely attributed by recutting on the L and Y in LIBERTY. This Choice example displays glossy auburn patina, with hints of coppery-red escaping throughout the recesses. Sharply struck, with considerable luster revealed in-hand. Our EAC grade MS60. PCGS# 36673 Base PCGS# 1615

3094 **1820 Large Date, N-13, R.1, MS64 Brown PCGS. CAC.** Grellman Die State B. A chocolate-brown cent with plentiful glimpses of the initial fire-red about the stars and letters. Smooth aside from moderate marks on the cheek and forehead. The left obverse field shows a fingerprint fragment. The most frequently encountered Randall Hoard die marriage. Our EAC grade MS60. PCGS# 36673 Base PCGS# 1615

3095 **1820 Large Date, N-13, R.1, MS64 Red and Brown PCGS. CAC.** The majority of both sides is orange-red, although the lower obverse and upper reverse display blushes of apple-green. Virtually void of contact. A small spot on a point of star 1 merits only passing mention. Our EAC grade MS63. PCGS# 36674 Base PCGS# 1616

3096 **1824 N-2, R.2, AU53 PCGS.** A medium brown and mahogany representative. Richly detailed and exceptionally free from perceptible marks, although one tick each is present on the neck and reverse exergue. A late die state with minimal dentilation and several stars drawn toward the rim. Our EAC grade AU50. PCGS# 36769 Base PCGS# 1636

3097 **1828 Large Narrow Date, N-3, R.2, AU50 PCGS.** Blended olive-green and steel-gray toning embraces this richly detailed and spot-free Matron Head cent. Smooth aside from a few wispy marks near star 2. A widely spaced CA in AMERICA is a pick-up point for the Newcomb marriage. Our EAC grade XF45. PCGS# 36880 Base PCGS# 1654

3098 **1828 Small Wide Date, N-10, R.1, AU58 NGC.** Small 8s in the date readily identify this available variety, listed in the *Guide Book* as Small Wide Date. This example displays virtually complete detail, with smooth, auburn brown surfaces that show hints of lighter orange-brown color in the recesses. Several stars are weakly defined, as usual, but the central devices are well brought up. A few small depressions are present on Liberty's cheek and neck. Our EAC grade XF40. Census of Small Date examples: 2 in 58 Brown, 7 finer (4/15). PCGS# 36907 Base PCGS# 1657

3099 **1838 N-4, R.2, MS65 Brown NGC.** A coruscating Gem. The obverse is gunmetal-blue and the reverse is olive-brown. The borders display hints of tan toning. Essentially devoid of contact, although a couple of shallow strike-throughs are noted near ONE CENT. A middle die state with a crack across the obverse die between star 9 and the 8 in the date. Our EAC grade MS62.
Ex: FUN Signature (Heritage, 1/2005), lot 7068; FUN Signature (Heritage, 1/2011), lot 3170, which realized $1,035. PCGS# 37189 Base PCGS# 1741

3100 **1850 N-19, N-16, R.2, MS65 Red and Brown PCGS. CAC.** Grellman Die State b, which Newcomb designated N-16. A sharply struck Gem with a generous amount of fire-red about the legends and stars. The open fields and high points are brown. A couple of minor strike-throughs (as coined) inside the wreath, but the quality is nonetheless exceptional. Our EAC grade MS63. PCGS# 405905 Base PCGS# 1890

3101 **1852 N-12, N-13, R.1, MS66 Brown PCGS.** Grellman Die State c. The late die state with prominent flowlines on both sides and a long, slender crack from the bust tip. Newcomb incorrectly assigned different varieties to the early (N-12) and late (N-13) die states due to their different appearances. The present high grade example is well struck and satiny with unabraded medium brown surfaces. Hints of mint red emerge from protected regions. Our EAC grade MS62. PCGS# 147260 Base PCGS# 1898

3102 **1853 N-10, R.1 MS64 Red NGC.** Grellman Die State b, the usual die state for this hoard variety. Aside from a dark toning spot over the head, useful for pedigree identification, this Choice Mint State piece has full brilliant orange mint color with frosty luster and exceptional eye appeal. Our EAC grade MS64. PCGS# 406005 Base PCGS# 1903

3103 **1853 N-25, R.1, MS65 Red and Brown PCGS. CAC.** Grellman Die State b. A magnificent Gem that has unabraded and spot-free surfaces. Brick-red luster accompanies most of the fields, while the high points are walnut-brown. The wreath and portrait are well struck, though a few stars are incompletely brought up. Our EAC grade MS62. PCGS# 403926 Base PCGS# 1902

3104 **1853 N-25, R.1, MS64 Red PCGS.** Grellman Die State b. A beautiful orange-red Choice cent. The fields are virtually free from contact, and the cheek shows only delicate grazes. A faint fingerprint fragment is apparent near the tip of the coronet. Our EAC grade MS64. PCGS# 403925 Base PCGS# 1903

3105 **1855 Upright 55, N-3, R.1, MS66 Brown NGC. CAC.** Grellman Die State b. Bold die lines through the RTY in LIBERTY attribute this high grade Mature Head cent. Jade-green and orange-gold grace both sides, with the latter color more prominent on the reverse. Devoid of contact or carbon. The strike is bold except on the first 10 stars. Our EAC grade MS60. PCGS# 406151 Base PCGS# 1907

3106 **1855 Upright 55, N-4, R.1, MS64 Red PCGS.** Grellman Die State a. An outstanding pumpkin-gold Mature Head type coin. Lustrous and mark-free. Carbon is confined to a faint fingerprint below the hairbun. Minor retained laminations, unusual for the series, are noted near stars 8 and 12. Our EAC grade MS65. PCGS# 406155 Base PCGS# 1909

FLYING EAGLE CENTS

3107 **1857 MS64 PCGS.** A satiny, bronze-gold example of the short-lived Flying Eagle type, this Choice 1857 cent is sharply rendered on the wreath and the eagle's head and tail. A few light grazes are apparent when studied with a loupe, but there are no significant distractions. NGC ID# 2276, PCGS# 2016

3108 **1857 MS64 PCGS.** A crisply struck golden-brown near-Gem with good luster and minor peripheral carbon. A shallow strike-through (as coined) is noted beneath the E in CENT.
Ex: Long Beach Signature (Heritage, 6/2001), lot 7506, which realized $977.50. NGC ID# 2276, PCGS# 2016

3109 **1857 MS64 PCGS. CAC.** This Choice Mint State example exhibits rich, frosty luster over minimally abraded bronze-gold surfaces. The strike is well-executed, but there is minor weakness on the forward portion of the eagle's wing and along the obverse borders due to die erosion. NGC ID# 2276, PCGS# 2016

3110 **1857 MS64 PCGS. CAC.** Type of 1857. This is a satiny, bronze-gold example of this short-lived Flying Eagle type. The eagle's tailfeathers are slightly soft, as is the corresponding portion of the reverse wreath, though the remainder of each side is sharply struck. A couple small die cracks are present in the central eagle feathers. NGC ID# 2276, PCGS# 2016

3111 **1857 MS64 PCGS. CAC.** The satiny bronze-gold surfaces of this Flying Eagle type coin are free of any naked-eye distractions, and the only mentionable striking weakness is seen lightly on the eagle's tailfeathers and the upper portion of the right wreath branch. A shallow planchet void sits atop the E in ONE. NGC ID# 2276, PCGS# 2016

3112 **1858 Large Letters MS64 PCGS.** High Leaves, Closed E in ONE. A sea-green near-Gem with glimpses of peach-red about the legends and motifs. Lustrous and exceptionally attractive. Marks are absent, and carbon is relegated to a small spot above the E in AMERICA.
Ex: Long Beach Signature (Heritage, 6/2001), lot 7511, which realized $1,063.75. NGC ID# 2277, PCGS# 2019

3113 **1858 Small Letters MS64 PCGS.** High Leaves, Closed E in ONE. A semiprooflike caramel-gold near-Gem. Marks are absent, although minuscule flecks are present, along with a small strike-through (as made) beneath the 1 in the date. The strike is intricate except on the bottom of the tailfeathers. NGC ID# 2279, PCGS# 2020

3114 **1858 Small Letters MS64 PCGS.** Low Leaves Reverse. An intricately struck and lustrous chestnut-gold Choice cent. Closed E hubbed over Open E in ONE, similar to Snow-5, but not an exact match to either S-5a or S-5b. The reverse has advanced rim breaks, including a wedge-shaped cud into the dentils at 10:30. NGC ID# 2279, PCGS# 2020

3115 **1858 Small Letters MS64 PCGS. CAC.** Low Leaves Reverse, Open E in ONE. A coruscating chestnut-brown Choice cent with minor carbon and only incidental contact. A late die state with occasional blurry definition on the eagle and ONE, as made.
Ex: Central States Signature (Heritage, 4/2012), lot 3118, which realized $1,380. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

3116 **1862 MS65+ PCGS. CAC.** Fully rendered design elements are accentuated by satiny bronze-gold luster on each side of this Plus-graded Gem 1862 cent. A few trivial carbon specks do not detract, and the only mentionable abrasions are a couple ticks near the 2 in the date and another on Liberty's eyebrow. NGC ID# 227H, PCGS# 2064

3117 **1863 MS66 PCGS.** Almond-tan and orange surfaces are complemented by glints of saffron and pale olive on this impeccably preserved Premium Gem copper-nickel cent, one of the finest survivors of this more than 150-year-old mintage. The strike is sharp, save on the feather tips which are just a touch soft. Even under a loupe, no mentionable contact appears. Population: 46 in 66 (3 in 66+), 0 finer (5/15). NGC ID# 227J, PCGS# 2067

1863 Indian Cent, MS66
None Finer at PCGS

3118 **1863 MS66 PCGS. CAC.** The 1863 is the most available copper-nickel Indian cent overall, but in MS66 the certified population falls below that of the 1860, '61, and '62. This CAC-labeled example is aglow with orange-tinted bronze-gold luster and semiprooflike fields. The extreme tips of the headdress feathers are a trifle weak. Population: 46 in 66 (3 in 66+), 0 finer (5/15). NGC ID# 227J, PCGS# 2067

3119 **1864 Copper-Nickel MS65 PCGS. CAC.** A peach-gold Gem with coruscating luster and exceptionally unmarked surfaces. One tiny spot between the IT in UNITED. Boldly struck except for the date. Last of the copper-nickel issues. NGC ID# 227K, PCGS# 2070

3120 **1864 Bronze No L MS66 Red PCGS. CAC.** A nicely struck copper-red Gem with virtually immaculate surfaces. Struck from clashed dies, with one tint toning spot noted on the 1 of the date. Scarce with full Red color despite a healthy mintage. Population: 36 in 66 Red, 1 finer (5/15).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5204, which realized $2,760; Central States Signature (Heritage, 4/2009), lot 1106. NGC ID# 227L, PCGS# 2078

1864 L on Ribbon Cent, MS65 Red
Lustrous and Unabraded

3121 **1864 L On Ribbon MS65 Red PCGS.** Olive-green centers are framed by a broad band of peach-red. Well struck, lustrous, and free from contact. One small fleck is noted above the E in CENT, but carbon is minimal overall. A semikey Civil War issue, relative to the fairly high mintage transitional bronze, No L variety. Housed in a green label holder. NGC ID# 227M, PCGS# 2081

3122 **1867 MS65 Red and Brown PCGS.** Lustrous and essentially mark-free with substantial peach-gold color. The strike is good aside from incompleteness on AMERICA and the top of the shield. A few pinpoint flecks are of little import. NGC ID# 227R, PCGS# 2089

3123 **1867 MS64 Red PCGS.** This gleaming, coppery-orange 1867 Indian cent was struck from worn dies, but the radiant luster produced on the surfaces is nothing short of outstanding. A few light marks on Liberty's cheek define the grade. Significant sharpness is present in the wreath and headdress feathers. Population: 72 in 64 (2 in 64+) Red, 22 finer (5/15). NGC ID# 227R, PCGS# 2090

3124 **1867/67 Snow-1, FS-301, AU58 PCGS.** The 67 in the date is repunched north with a significant spread. A whisper of wear on the ribbon confirms a momentary stint in commerce, but the green-gold, apricot, and lilac surfaces display satin luster. A late die state with an orange-peel texture on Liberty's neck and the field near her chin. PCGS# 37459 Base PCGS# 92088

1868 Indian Cent, MS65 Red
Conditionally Elusive In High Grade

3125 **1868 MS65 Red NGC.** The 1868 cent was not considered rare in any sense by collectors either at time of issue or later. With a 10+ million-piece mintage, the issue was readily available in the years shortly after it was struck. Most collectors opted for a proof. Melting in the years prior to 1874 vastly reduced its numbers, and soon there were few Mint State coins to preserve. This lustrous, fire-orange cent is one of a surprisingly meager pool of Red Gems available. Sharply struck on the headdress and other elements, a few freckles of lilac toning toning confirm the natural surfaces. Census: 16 in 65 Red, 3 finer (5/15). NGC ID# 227S, PCGS# 2093

1869 Cent, MS65 Red
Full Strike, Vibrant Luster

3126 **1869 MS65 Red PCGS.** Pumpkin-orange color consumes this precisely struck and lustrous Gem. Only incidental contact emerges beneath a lens, along with scattered tiny gray flecks on the central reverse. A comparatively low mintage date. Certified in a green label holder. Population: 27 in 65 Red, 7 finer (4/15). NGC ID# 227T, PCGS# 2096

3127 **1869/69 Snow-3f, FS-301, AU58 PCGS.** The 69 in the date is nicely repunched north. No longer regarded as an 1869/8 overdate, but the variety is still listed in the *Guide Book* with a substantial premium. A horizontal die crack across the top of the shield identifies the reverse variant. Toned medium brown with traces of mint red in protected regions. PCGS# 37474 Base PCGS# 2094

3128 **1870 MS64 Red and Brown PCGS. CAC. Snow-29.** Bold N in ONE. The 18 in the date is repunched, and ONE CENT exhibits minor die doubling. The straight die crack listed under S-29 is absent on the present Choice cent. Orange-gold is plentiful across both sides, although the high points and left obverse field are steel-blue. The obverse impression is sharp but the reverse periphery exhibits incompleteness of strike. NGC ID# 227U, PCGS# 2098

3129 **1870 Shallow N, FS-901, MS64+ Red and Brown PCGS. CAC.** Generally orange-gold, although hints of sea-green and faint gunmetal freckles are also present. The strike is precise save for blending near the upper right shield corner. From the obsolete reverse hub with a low relief right base on the N in ONE, replaced over several years by the Bold N hub, first introduced in 1870. PCGS# 408018 Base PCGS# 2098

3130 **1870 Shallow N, FS-901, MS65 Red and Brown NGC.** The borders and the central reverse field display orange-gold. The high points and left obverse field are steel-blue. Well struck and lustrous with mark-free surfaces and one tiny strike-through (as made) on the cheek. PCGS# 408018 Base PCGS# 2098

1872 Cent, MS65 Red and Brown
Unabraded, Close to Full Red

3131 **1872 MS65 Red and Brown PCGS. CAC. Snow-2.** Bold N in ONE. This orange-gold Gem is practically full Red, although ONE CENT displays a hint of lilac toning. The lustrous and unabraded surfaces show incompleteness of strike on the date and the top of the shield. An interesting die line emerges from the cheek at Liberty's eye and ear. Snow calls the variety "quite rare." NGC ID# 227W, PCGS# 2104

3132 **1873 Closed 3 MS65 Red and Brown PCGS.** Orange-gold color intermingles with lilac-red. A fully struck and lustrous Gem. Carbon and contact are chiefly relegated to the upper obverse field. A lower mintage date shared with the Open 3 variety. NGC ID# 227X, PCGS# 2110

1873 FS-101 Cent, Choice VF
Doubled LIBERTY, Snow-1

3133 **1873 Doubled LIBERTY, Snow-1, FS-101, VF35 PCGS.** LIBERTY is strongly die doubled throughout, unlike the lesser but also interesting Snow-2, FS-102 variety. Liberty's eye and the headdress feathers also exhibit an impressive spread between hubbings. An olive-brown Choice VF example with ruby-red high points. Evenly circulated and attractive with scattered minor marks on the left obverse. PCGS# 37504 Base PCGS# 2115

1873 Closed 3 Cent, VF35
Doubled LIBERTY, FS-101
Key Indian Cent Variety

3134 **1873 Doubled LIBERTY, Snow-1, FS-101, VF35 PCGS. CAC.** LIBERTY is widely die doubled, as are her eye and lips. This olive-brown Choice VF example has only minor marks from its limited stint in 19th century commerce. The 1873 Snow-1 is a popular *Guide Book* variety that is second in importance to only the rare 1888/7 overdate.
Ex: Palm Beach Signature (Heritage, 7/2009), lot 99, which realized $2,415. PCGS# 37504 Base PCGS# 2115

1874 Cent, MS65 Red
Green Label Holder

3135 **1874 MS65 Red PCGS.** Dynamic cartwheel luster sweeps this slightly dusky apricot-gold Gem. Virtually without abrasion, and the traces of carbon are mostly localized to the left obverse field. Only a small portion of Uncirculated 1874 cents retain their initial Mint color. Housed in a green label holder. Population: 35 in 65 Red, 8 finer (4/15). NGC ID# 227Z, PCGS# 2120

3136 **1875 MS66 Red and Brown PCGS.** This boldly rendered Premium Gem exhibits significantly more "Red" than Brown, with each side displaying rich coppery-orange luster that shows subtle auburn overtones. The strike is razor-sharp and there are no distracting abrasions. Population: 4 in 66 Red and Brown, 0 finer (5/15). NGC ID# 2282, PCGS# 2122

3137 **1877 AU53 NGC.** Only trivial friction precludes a Mint State grade for this olive-brown 1877 Indian cent. The peripheral regions are not fully struck, but the overall appeal is pleasing to the unaided eye. This coin will fit well into a quality Indian cent date set. NGC ID# 2284, PCGS# 2127

3138 **1877 — Recolored — ANACS. AU55 Details.** This is a well-struck example of this key Indian cent issue with remnants of coppery-orange luster residing beneath appealing violet and plum overtones. ANACS questions the originality of the patina. NGC ID# 2284, PCGS# 2127

3139 **1878 MS65 Red PCGS.** A colorful Gem, this boldly struck representative displays flashy bronze-gold color overall, with a touch of jade at the obverse periphery and russet-violet accents elsewhere on the surfaces. A few light flecks are noted over each side, but do not significantly detract from the overall eye appeal. Housed in an old green-label holder. Population: 50 in 65 Red, 16 finer (5/15).
Ex: FUN Signature (Heritage, 1/2006), lot 790; Long Beach Signature (Heritage, 9/2007), lot 193, which realized $2,300. NGC ID# 2285, PCGS# 2132

3140 **1882 MS65 Red PCGS. CAC.** Well-struck surfaces show lots of copper-red luster and are free of major marks. An attractive example of this midseries date, harder to find at the next grade level than one might expect. Population: 71 in 65 (2 in 65+) Red, 23 finer (4/15). NGC ID# 2289, PCGS# 2144

1886 Type One Cent, Frosty MS65 Red

3141 **1886 Type One MS65 Red PCGS.** This is a frosty copper-red Gem with well-preserved surfaces and notable sharpness on the ribbon and headdress feathers. Lightly clashed, with a few tiny specks of carbon that do not detract. The Type One 1886 Indian cent is trivially more available than the Type Two, but in high-grade full Red condition, both issues are rare. Population: 22 in 65 Red, 2 finer (5/15). NGC ID# 228D, PCGS# 2156

3142 **1886 Type Two MS65 Red and Brown PCGS.** The orange and rose surfaces approach full Red but have mellowed slightly over the past 129 years. Coruscating and well struck. Marks are relegated to a tick or two on the N in ONE. NGC ID# 228E, PCGS# 92155

3143 **1889 MS65 Red PCGS.** Rich orange and ruby-red embrace lustrous and minimally marked surfaces. The fields are unabraded and the strike is bold. One small spot is above the T in CENT. Housed in an old green label holder. NGC ID# 228H, PCGS# 2174

3144 **1890 MS65 Red PCGS.** Olive-gold and rose-red grace this lustrous and intricately impressed Gem. Virtually void of contact, although a loupe reveals infrequent minuscule carbon. Encapsulated in a green label holder. NGC ID# 228J, PCGS# 2177

3145 **1890 MS65 Red PCGS.** A scarce full Red Gem example, this 1890 Indian cent displays luminous coppery-orange luster with deep crimson overtones on the reverse that delight the eye. The design elements are boldly impressed and neither side shows any significant carbon spotting. Population: 47 in 65 Red, 9 finer (5/15). NGC ID# 228J, PCGS# 2177

3146 **1891 MS65 Red PCGS.** This frosty, boldly defined Gem is aglow with soft amber-red luster that shows faint violet overtones on the reverse. The coin appears about a grade point finer at first glance, and close study with a glass is needed to find a few small grazes on the cheek. Population: 69 in 65 (1 in 65+) Red, 10 finer (5/15). NGC ID# 228K, PCGS# 2180

3147 **1896 MS65 Red PCGS.** A splendid fire-red Gem that boasts booming luster and a crisp strike. The cheek displays delicate contact. Certified in a scarce and popular "doily label" holder, briefly issued by PCGS circa December 1989. NGC ID# 228R, PCGS# 2195

3148 **1903 MS66 Red PCGS. CAC.** Glowing luster illuminates the copper-red surfaces of this gorgeous Premium Gem representative. The motifs are boldly impressed with four full diamonds on the ribbon, and each side lacks any distracting impairments. PCGS has certified only eight numerically finer pieces (10/14). NGC ID# 228Y, PCGS# 2216

3149 **1909 MS66 Red PCGS. CAC.** This is an immensely attractive, largely unabraded final-year Indian cent with glowing coppery-orange luster. The top three headdress feathers are weakly defined, as is the reverse bowknot, but the remaining relief elements are crisp. PCGS has seen only five numerically finer full Red representatives (5/15). NGC ID# 2297, PCGS# 2237

3150 **1909-S MS63 Red and Brown PCGS.** The woodgrain toning pattern on this key-date last-year Indian cent ranges from tan to copper to nut-brown, with a few toning flecks but no obvious carbon. A decent strike if not exacting. NGC ID# 2298, PCGS# 2239

3151 **1909-S MS63 Red and Brown PCGS.** An affordable Mint State example of this sought-after branch mint key, this Select 1909-S Indian cent exhibits satiny bronze-orange luster with mottled auburn overtones and the occasional speck of carbon. The top three headdress feathers are weak, as always on this issue. NGC ID# 2298, PCGS# 2239

3152 **1909-S MS63 Red and Brown NGC. CAC.** Copper-gold luster is minimally impeded by traces of light green and tan. Well-struck save for weakness in the feather tips; the diamonds are razor-sharp. Occasional minute marks and flecks do not significantly detract. *Ex: ANA Signature (Heritage, 3/2010), lot 220.* NGC ID# 2298, PCGS# 2239

3153 **1909-S MS65 Red and Brown NGC.** Booming luster sweeps this essentially mark-free Gem. Sun-gold is prevalent although intermingled with hints of lavender toning. The strike is crisp except on the upper feathertips. Certified in a prior generation holder. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

1859 Indian Cent, Bright PR64
Only Year of the Laurel Wreath Reverse

3154 **1859 PR64 PCGS.** Peach and tan shades grace this fully struck and unmarked near-Gem, which is kept from a finer grade by only a couple of pinpoint flecks of carbon. Significant as a single-year proof type coin, with only about 800 proofs struck. *From The Antebellum Collection, #1 All-Time Finest PCGS Registry 1859 Proof Set / Long Beach Signature (Heritage, 2/2007), lot 2763.* NGC ID# 2299, PCGS# 2247

3155 **1861 PR64 NGC.** Deep orange-red, jade-green, and cobalt-blue encompass this sharply struck Choice proof. A small spot is noted west of the O in OF. Certified in a former generation holder. NGC ID# 229B, PCGS# 2256

3156 **1864 Copper Nickel PR64 Cameo PCGS.** Modest cameo contrast is accentuated by a degree of mirroring in the iridescent fields and impeccable sharpness on the satiny relief elements. The surfaces are largely nickel-gold in color, with hints of more vibrant shadings revealed when tilted in-hand. Population: 28 in 64 (2 in 64+) Cameo, 35 finer (5/15). PCGS# 82265

3157 **1869 PR66 Red and Brown PCGS. CAC.** Orange-gold, cherry-red, and apple-green embrace this razor-sharp specimen. The undisturbed and reflective fields ensure excellent eye appeal. From a proof mintage of only 600 pieces. NGC ID# 229M, PCGS# 2295

3158 **1871 PR65 Red PCGS. CAC.** Shallow N in ONE. An exquisite Gem. The obverse is wheat-gold and the reverse displays rich peach color. The strike is exemplary, and only occasional pinpoint carbon limits the grade. NGC ID# 229P, PCGS# 2302

1872 Cent, PR66 Red and Brown
Mostly Red, Full Strike

3159 **1872 PR66 Red and Brown NGC.** Bold N. The 1872 is a semikey due to a low commercial mintage, but the proof mintage of 950 pieces is much less than any post-1877 date. The present fully struck Premium Gem is primarily rich orange-gold, although the portrait has slightly mellowed toward lilac. Both sides are devoid of detractions. NGC ID# 229R, PCGS# 2304

3160 **1875 PR64 Red PCGS.** Gleaming fields and razor-sharp devices are appealing, but pale in comparison to the vibrant fire-orange color that encompasses the margins on each side of this Choice Red proof. The central regions show a splash of lighter bronze-gold color. A few linear lint marks are present on Liberty's neck and chin. Population: 26 in 64 Red, 16 finer (5/15). NGC ID# 229U, PCGS# 2314

1877 Indian Cent, PR63 Red and Brown
Highly Sought-After Proof Issue

3161 **1877 PR63 Red and Brown PCGS.** Commenting on the mintage of 1877 Indian cent proofs in his book *A Buyer's and Enthusiast's Guide to Flying Eagle and Indian Cents*, Bowers says: "I estimate 1,250 to 1,500 pieces. Most probably the 1877 Proof Indian cents, Three Cent pieces and Shield nickels were sold in minor sets, and the Proof mintages of all three are the same. However, fewer of the Proof 1877 cents seem to have survived." The specimen offered here displays warm golden-tan patina, and a nice contrast between the motifs and the partially reflective fields. The design elements are sharply struck, with nice definition on the Indian's headdress, hair, and diamonds. No mentionable contact marks are apparent, but a few light flecks are scattered over the reverse. This key date possesses nice eye appeal for the grade.
Ex: FUN Signature (Heritage, 1/2005), lot 5214. NGC ID# 229W, PCGS# 2319

3162 **1881 PR66 Red and Brown PCGS. CAC.** Deep coppery-red and sun-orange hues provide a vivid overlay on each side of this deeply mirrored proof, with subtle lavender overtones evident on the relief elements. The strike is bold. A stray carbon speck is lost in the field near the C in AMERICA. Population: 29 in 66 (1 in 66+) Red and Brown, 8 finer (5/15). NGC ID# 22A2, PCGS# 2331

3163 **1883 PR66 Red and Brown PCGS. CAC.** This Premium Gem proof shows sharp, satiny devices set against mirrored fields, with consistent olive-gold and amber toning over each side. A scattering of tiny specks have gone astray in the right obverse margin. Population: 36 in 66 Red and Brown, 3 finer (5/15). NGC ID# 22A4, PCGS# 2337

3164 **1885 PR66 Red and Brown PCGS. CAC.** The design elements of this impressive Premium Gem are sharply detailed and the fields show hazy reflectivity on both sides. The well-preserved surfaces are mostly original red, with highlights of lilac and light brown. Population: 48 in 66 (1 in 66+) Red and Brown, 24 finer (5/15). NGC ID# 22A6, PCGS# 2343

3165 **1885 PR65 Red PCGS.** From a proof mintage of 3,790 pieces, this impressive Gem offers sharply detailed design elements and deeply mirrored fields, with original red surfaces that show a few microscopic specks of carbon. Population: 19 in 65 Red, 11 finer (5/15). NGC ID# 22A6, PCGS# 2344

3166 **1885 PR65 Red PCGS. CAC.** A flawless apricot-gold and olive Gem. The dies were slightly out of parallel, causing the date and upper shield to show minor incompleteness while the remainder of the strike was bold. Population: 19 in 65 Red, 11 finer (5/15). NGC ID# 22A6, PCGS# 2344

3167 **1886 Type Two PR65 Red and Brown PCGS. CAC.** Eagle Eye Photo Seal, card included. This needle-sharp Gem is predominantly dusky peach-gold but displays lilac-red and gunmetal-blue shades on the central reverse. The reverse border shows traces of lacquer. NGC ID# 22A8, PCGS# 92346

3168 **1892 PR66 Red and Brown PCGS. CAC.** A lovely patina of purple accents over deep-orange coloration is perfectly balanced from front-to-back on this mirrored proof cent. Sharply struck and glossy with the look of aged copper, the surfaces show virtually no distractions or spots. A single finer proof in this format exists at PCGS. Population: 24 in 66 Red and Brown, 1 finer (4/15). NGC ID# 22AE, PCGS# 2364

3169 **1896 PR66 Red and Brown PCGS.** The original red surfaces of this delightful Premium Gem have mellowed to a darker lilac in some areas, but no mentionable distractions are evident. The design elements are sharply detailed and the fields are brightly reflective. Population: 5 in 66 Red and Brown, 0 finer (5/15). NGC ID# 22AJ, PCGS# 2376

3170 **1898 PR65 Red PCGS.** From a limited proof mintage of 1,795 pieces, this spectacular Gem is sharply detailed throughout, with deeply reflective fields and original red surfaces that show few signs of contact. Population: 29 in 65 (1 in 65+) Red, 14 finer (5/15). NGC ID# 22AL, PCGS# 2383

LINCOLN CENTS

3171 **1909 VDB Die Doubled Obverse, FS-1101, MS65 Red PCGS.** The RTY in LIBERTY and the first three date digits are nicely die doubled northwest. A lustrous orange-red Gem that boasts an intricate strike and potent luster. Minor carbon includes a spot west of Lincoln's eye. PCGS# 37633 Base PCGS# 82425

3172 **1909-S VDB AU58 PCGS.** Intermingled shades of chestnut-brown, deep-blue, and glimpses of mint-orange luster occupy the smooth surfaces of this near-Mint cent. Always at the top of nearly every Lincoln cent collector's list, this original and appealing example would be an unsurpassable addition to any circulated set. An extremely sharp and pleasing AU coin. NGC ID# 22B2, PCGS# 2426

3173 **1909-S VDB MS62 Brown NGC.** Glowing coppery-orange hues remain beneath consistent auburn and plum patina on each side of this affordable, yet, eye-appealing 1909-S VDB Lincoln cent. Few distractions are present. NGC ID# 22B2, PCGS# 2426

3174 **1909-S VDB MS62 Brown NGC.** This "Brown" example displays significant mint Red in the recesses, although the dominant color is auburn-brown. The surfaces are somewhat glossy and lack any major distractions. A pleasing 1909-S VDB for the grade. NGC ID# 22B2, PCGS# 2426

3175 **1909-S VDB MS62 Red and Brown PCGS.** Brass-brown toning smooths satiny golden surfaces on this lower-grade Mint State example. The strike is sharp and there are no major abrasions. A pleasing and moderately affordable 1909-S VDB representative. NGC ID# 22B2, PCGS# 2427

3176 **1909-S VDB MS64 Red and Brown NGC. CAC.** This glowing coppery-orange 1909-S VDB cent exhibits substantially more "Red" than Brown, and is furthermore impressively well-preserved for the MS64 grade level, as affirmed by the CAC green label. The strike is sharp and the eye appeal is unsurpassed for the grade. NGC ID# 22B2, PCGS# 2427

3177 **1909-S VDB MS64 Red PCGS.** This Choice Mint State example is well-struck and displays consistent bronze-gold luster, characteristic of most 1909-S VDB Lincoln cents. Abrasions are minimal. NGC ID# 22B2, PCGS# 2428

3178 **1909-S VDB MS64 Red PCGS.** Victor David Brenner proved to be a troublesome outside artist for the Mint. His initial reverse for the Lincoln cent was too close to an existing European design, and the first version of his "Wheat Ears" reverse had his full name at the bottom. Even the initials that replaced his name proved to be too much, and the design changed yet again; this last change created the one-year VDB subtype, represented here by a Choice 1909-S VDB cent. The glowing surfaces are golden-brass with a hint of orange, suggestive of long-term storage in a roll. The well-struck surfaces have few marks, though small carbon flecks and a spot at the upper O of ONE define the grade.
Ex: Dallas Signature (Heritage, 4/2007), lot 234. NGC ID# 22B2, PCGS# 2428

3179 **1909-S VDB MS64 Red NGC.** Peach-gold and lime-green grace this lustrous and intricately struck Choice key date cent. A loupe reveals infrequent minuscule carbon, but both sides are free from marks. Certified in a former generation holder. NGC ID# 22B2, PCGS# 2428

3180 **1909-S VDB MS64 Red PCGS.** This boldly struck and inherently attractive Choice Red example displays intermingled bronze-gold and coppery-orange luster with the occasional glimpse of deeper rose. A peppering of tiny specks behind Lincoln's head is not detracting to the unaided eye. NGC ID# 22B2, PCGS# 2428

1909-S Cent, MS64+ Red
Rich, Glowing Surfaces

3181 **1909-S VDB MS64+ Red PCGS.** Budget-conscious collectors will appreciate the quality this Plus-graded 1909-S VDB Lincoln cent offers over most other comparably graded pieces, without the significantly higher cost of a full Gem representative. The frosty surfaces exhibit glowing orange-gold luster and are pleasantly devoid of major abrasions. Sharply struck, with a few minute specks of carbon near the borders. NGC ID# 22B2, PCGS# 2428

3182 **1909-S VDB MS64 Red PCGS. CAC.** The 1909-S VDB Lincoln cent is the low-mintage first-year key to the series, prized by collectors in all grades and conditions. This well-detailed Choice example shows the all-important designer's initials in bold relief and the original red surfaces show just a hint of light bronze shading, as usual for this issue. A few minor specks do not distract. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red
Widely Sought Key Date

3183 **1909-S VDB MS65 Red PCGS.** A needle-sharp orange-gold Gem of this introductory and low mintage key date. Dynamic luster sweeps exemplary surfaces that are virtually devoid of contact. One small spot is noted at the base of the bust. Certified in an old green label holder.
Ex: Denver Signature (Heritage, 8/2006), lot 347, which realized $6,325. NGC ID# 22B2, PCGS# 2428

1909-S Lincoln Cent, MS66
Virtually Unobtainable Any Finer

3184 **1909-S MS66 Red PCGS.** The 1909-S is one of the keys to the Lincoln cent series because of its relatively low mintage and status as a first-year issue, though examples are readily available through Gem condition with full Red surfaces. Only in this lofty grade does the 1909-S become truly scarce, and even the most patient, well-resourced collector may be unable to procure a finer example. The surfaces of this piece show lovely pumpkin-gold color with deeper russet accents and a crisp strike. PCGS reports just five numerically finer submissions (5/15). NGC ID# 22B4, PCGS# 2434

3185 **1909-S/S S Over Horizontal S, FS-1502, MS65+ Red PCGS.** An unabraded and lustrous peach-red and olive-green Gem. Infrequent pinpoint carbon cannot deny the eye appeal. The first-year branch mint 1909-S is a popular low mintage issue, and the blundered mintmark variety provides additional collector interest. PCGS# 37645

3186 **1912-D MS65 Red PCGS.** This is a well-struck example of the conditionally scarce 1912-D Lincoln cent, with smooth, satiny luster and pale coppery-orange surfaces. A couple ticks on Lincoln's face limit the grade, but are not obvious to the unaided eye. PCGS has seen 18 numerically finer submissions (5/15). NGC ID# 22BB, PCGS# 2455

3187 **1913-S MS65 Red and Brown PCGS.** This Gem 1913-S Lincoln cent is unusually well-struck for the issue. The satiny surfaces are largely free of major abrasions and display pleasing amber-orange color with hints of lilac and olive throughout. Population: 38 in 65 Red and Brown, 0 finer (5/15). NGC ID# 22BF, PCGS# 2466

3188 **1913-S MS65 Red NGC.** The 1913-S Lincoln cent is a less often seen issue in full Red grades, particularly Gem or finer. This piece displays satiny coppery-orange luster with a few wisps of olive and violet color throughout. Well-struck, with few distractions. Census: 15 in 65 Red, 0 finer (4/15). NGC ID# 22BF, PCGS# 2467

3189 **1914-D AU50 PCGS.** A notable series key, the 1914-D is scarce in all grades and formats to the point that deceiving forgeries exist. This unquestionably authentic About Uncirculated example is a pleasing, rich chocolate-brown with sharp definition on the elements despite slight wear. There are no relevant distractions for the grade. NGC ID# 22BH, PCGS# 2471

3190 **1914-D AU53 NGC.** An AU grade is fitting for this sharply detailed 1914-D, showing deep auburn and olive-brown patina over each side. Minor die fatigue is evident in the peripheral recesses, not unusual for the issue. NGC ID# 22BH, PCGS# 2471

1914-D Lincoln Cent, MS64 Brown
Blue-Toned Beauty, Rare in All Grades

3191 **1914-D MS64 Brown NGC.** A notable key date in anyone's book, the number of full Gem coins is exceedingly small. This attractive Brown near-Gem holds its own with the finest-known examples, with eye appeal far beyond most pieces and spot-free, sharply struck fields and devices. Cloaked in blue tones over medium-brown patina and fleeting orange accents, the coin is glossy, lustrous, and bold. A tiny tick beneath Lincoln's eye is the sole mentionable mark. Census: 52 in 64 Brown, 18 finer (4/15). NGC ID# 22BH, PCGS# 2471

1914-D Lincoln Cent Key, MS63 Red and Brown

3192 **1914-D MS63 Red and Brown PCGS.** This attractive key-date Lincoln cent is certified in an early full-size PCGS green-label holder with dot-matrix printing, seldom seen these days. The coin shows a few linear toning streaks and a couple of light toning flecks that determine the grade, but much red color and good eye appeal are evident. The strike is decent on the obverse, but die erosion is setting in on the reverse, which also shows more carbon than the obverse. NGC ID# 22BH, PCGS# 2472

3193 **1915 MS66 Red PCGS.** A meticulously struck and satiny representative that has luminous orange centers surrounded by rich olive margins. The fields are essentially as made, although a wispy diagonal handling mark on the forehead is detectable when viewed with a loupe. Population: 88 in 66 (3 in 66+) Red, 11 finer (4/15).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5303; Long Beach Signature (Heritage, 2/2005), lot 5419. NGC ID# 22BK, PCGS# 2479

3194 **1915-D MS65 Red PCGS.** A lovely red-orange example that shows minor weakness on the upper reverse motto, but excels in all other areas. Luscious color and luster combines with seemingly impeccable preservation on this no-questions Gem. Population: 136 in 65 (1 in 65+) Red, 29 finer (4/15).
Ex: Dallas Signature (Heritage, 12/2004), lot 5253; Long Beach Signature (Heritage, 2/2005), lot 5425. NGC ID# 22BL, PCGS# 2482

3195 **1917 Doubled Die Obverse, FS-101, AU53 NGC.** *Cherrypickers'* writes, "arguably the most sought after of the early Lincoln cent varieties." TRUST and the date are nicely die doubled. This chocolate-brown representative shows light wear on Lincoln's jaw and cheekbone, but the sole noticeable mark is a slender diagonal line on the shoulder.
Ex: Long Beach Signature (Heritage, 5/2008), lot 1050, which realized $2,645. PCGS# 37673 Base PCGS# 92495

3196 **1920-S MS64 Red PCGS.** The 1920-S is an elusive issue in full Red grades. This Choice example has satin surfaces with medium copper-gold luster. A few tiny specks do not distract. In keeping with the date's characteristics, there is minor striking softness on the ST in TRUST and on the upper-left reverse. Population: 82 in 64 Red, 10 finer (5/15). NGC ID# 22C5, PCGS# 2530

3197 **1922 No D, Strong Reverse, FS-401, VF30 ANACS.** A midgrade chocolate-brown example of the coveted Die Pair 2 variety. The lines in the wheat ears are sharp, as is TRUST and the second 2 in the date. Lightly abraded and highly collectible. PCGS# 37676 Base PCGS# 3285

3198 **1922 No D, Strong Reverse, FS-401, XF40 PCGS.** A chocolate-brown representative of the key *Guide Book* variety. Smooth aside from minor marks near the U in TRUST. Bold wheat ears and a sharp second 2 in the date are diagnostic for the desirable Die Pair 2. PCGS# 37676 Base PCGS# 3285

3199 **1922 No D, Strong Reverse, FS-401, XF45 NGC.** Die Pair 2. This die pair is the one listed in the *Guide Book* and is identified by a bold reverse and a sharp second 2 in the date. The currently offered piece is an obvious match, if only lightly circulated. Both sides show glossy olive-brown patina and are free of distractions. PCGS# 37676 Base PCGS# 3285

3200 **1922 No D, Strong Reverse, FS-401, XF45 PCGS.** Die Pair 2. A luminous example with olive-green fields and tan-brown high points. Unmarked except for a slender obverse line near 3 o'clock. 1922 was the sole small cent date without a Philadelphia production, but economy at the Denver Mint nonetheless led to the rare No D variety. PCGS# 37676 Base PCGS# 3285

3201 **1922 No D, Strong Reverse, FS-401, XF45 NGC.** Die Pair 2. The most desirable No D die pair, with bold lines in the wheat ears on the reverse. TRUST and the second 2 in the date are sharp, characteristic of the key variety. This chocolate-brown cent is spot-free and lacks consequential contact.
Ex: Long Beach Signature (Heritage, 5/2007), lot 256, which realized $3,220. PCGS# 37676 Base PCGS# 3285

3202 **1924-S MS64+ Red and Brown PCGS. CAC.** The 1924-S Lincoln cent is surprisingly difficult to locate in really high grade. This high-end Choice example displays lightly marked surfaces with mingled olive, lilac, and original red patina. The design elements are sharply detailed throughout. PCGS has graded 23 numerically finer examples (5/15). NGC ID# 22CE, PCGS# 2556

1925-D Cent, MS65 Red
Extremely Rare Any Finer

3203 **1925-D MS65 Red PCGS. CAC.** Although MS64 and lower-grade examples are moderately plentiful, Gem-quality full Red 1925-D cents are seldom seen. This example displays satiny coppery-pink luster with few surface imperfections. The reverse is in an advanced die state with the expected softness around the peripheries. Population: 48 in 65 Red, 2 finer (5/15). NGC ID# 22CG, PCGS# 2563

1925-S Cent, MS64 Red
Conditionally Rare Branch Issue

3204 **1925-S MS64 Red PCGS.** The 1925-S ranks among the most difficult Lincoln issues to secure in full Red. In fact, even the key 1926-S has a higher PCGS Population in MS64 Red than the 1925-S. The present satiny peach-red near-Gem has a fully struck reverse, although the portrait displays blending due to its long-in-use obverse die. Abrasions are absent and carbon is moderate. Housed in a green label holder. Population: 56 in 64 Red, 10 finer (4/15).
Ex: Dallas Signature (Heritage, 12/2004), lot 5301, which realized $3,220. NGC ID# 22CH, PCGS# 2566

3205 **1929-D MS66 Red NGC.** This piece exhibits glowing coppery-orange luster and delicately preserved surfaces. The design elements are well brought up, although there is trivial blurring around the edges of the obverse relief elements from die wear. Census: 4 in 66 Red, 0 finer (4/15). NGC ID# 22CV, PCGS# 2599

3206 **1936 MS67+ Red PCGS. CAC.** This Registry-quality blazer is tied with just 12 other Plus-graded MS67 Red examples as the finest at PCGS (5/15). Both sides are sharp and vibrantly frosted in shades of coppery-pink, apricot, and sun-gold hues. NGC ID# 22DE, PCGS# 2650

1936 Cent, MS63 Red and Brown
Doubled Die Obverse, FS-101

3207 **1936 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS.** Strong die doubling on the date and LIBERTY makes FS-101 a desirable Lincoln cent variety. Similar to FS-102, but FS-101 shows a much greater spread on TRUST. *Cherrypickers'* also lists a third doubled die, FS-103, and all three varieties are popular with specialists. The present sharply struck and unblemished example is toned olive-green with orange-gold in design recesses.
Ex: FUN Signature (Heritage, 7/2007), lot 203, which realized $4,025. PCGS# 82649

1941 Doubled Die Obverse Cent, MS66 Red
FS-101, Among the Finest Certified

3208 **1941 Doubled Die Obverse, FS-101, MS66 Red NGC.** One of three known doubled dies for 1941, this variety is identifiable by specific doubling on LIBERTY, GOD, and TRUST, as well as the 4 in the date. Caramel-gold centers are framed by pumpkin-orange margins. Lustrous and well struck with outstanding preservation. Census: 10 in 66 Red, 1 finer (4/15).
Ex: Atlanta Signature (Heritage, 4/2006), lot 154, which realized $3,220. PCGS# 37780 Base PCGS# 92695

3209 **1941 Doubled Die Obverse, FS-103, MS65 Red PCGS. CAC.** The 19 in the date and the TY in LIBERTY are lightly but widely die doubled southwest. The present Gem has lustrous orange surfaces and is free from abrasions. An unobtrusive spot is noted on the upper left portion of Lincoln's vest, and the reverse displays minor carbon. PCGS# 37786 Base PCGS# 92695

3210 **1943-D/D FS-501 MS65 PCGS.** The mintmark is blatantly repunched southwest, with a wide spread. A well struck and lustrous Gem that is separated from a higher grade by only incidental contact. A popular *Guide Book* variety. Population: 40 in 65, 36 finer (4/15).
Ex: Santa Clara Signature (Heritage, 11/2002), lot 5530, which realized $1,552.50. PCGS# 37819 Base PCGS# 2715

1943-D/D FS-501 Cent, MS66
Scarce *Guide Book* Variety

3211 **1943-D/D FS-501 MS66 PCGS.** The mintmark is widely repunched southwest. The secondary mintmark is lightly entered but fully outlined. A lustrous, sharply struck, well preserved, and untoned example of the popular *Guide Book* variety. Population: 29 in 66, 7 finer (4/15).
Ex: Estate of Francis A. Sullivan, Part Two (Heritage, 6/2008), lot 289, which realized $3,450. PCGS# 37819 Base PCGS# 2715

3212 **1943-S MS68 NGC.** An intricately struck and thoroughly lustrous representative of the single-year alloy subtype. Evaluation beneath a lens locates only a couple of pinpoint imperfections. Census: 15 in 68, 0 finer (5/15). PCGS# 2717

3213 **1944 MS67+ Red PCGS.** Only 12 MS67 Red examples of this issue have received the ever-important Plus designation at PCGS, with none finer (5/15). This piece is beautifully preserved and impressively lustrous. The reverse is deep rose-red, while the obverse displays equal parts coppery-orange and bronze-yellow. NGC ID# 22EA, PCGS# 2722

3214 **1951 MS67 Red PCGS.** Remarkably few 1951 Lincoln cents have been certified in Superb Gem Red condition. This rare exception is boldly struck and satiny. The central regions show medium coppery-gold luster, but the peripheries are more vividly toned in crimson, amber, a olive rings. Population: 24 in 67 Red, 0 finer (5/15). NGC ID# 22F3, PCGS# 2788

1954 Lincoln Cent, MS67 Red
Rich Copper-Red Color

3215 **1954 MS67 Red NGC.** Deep copper-red luster glows on each side of this boldly rendered Superb Gem Registry coin, and a few scant traces of carbon are almost imperceptible. The high points of the portrait show minute contact, hardly discernible. None are numerically finer at either service. Census: 14 in 67 Red, 0 finer (4/15). NGC ID# 22FC, PCGS# 2815

1954 Cent, MS67 Red
Tied for Finest Certified

3216 **1954 MS67 Red NGC.** The 1954 cent is available in quantity, but almost all examples are restricted to MS66 and lower grades; full Red Superb Gems are significant rarities. This glowing MS67 example displays blended rose and coppery-orange hues, with satiny luster and well-struck motifs. Mild die erosion is evident in the reverse peripheries, a common characteristic of this issue. This piece is with just 13 others for finest at NGC (5/15). NGC ID# 22FC, PCGS# 2815

3217 **1955 Doubled Die Obverse, FS-101, AU50 NGC.** A partly lustrous golden-brown example of the dramatic and famous doubled die variety. High point wear is minimal, and reportable marks are confined to a single diagonal line above the O in ONE. PCGS# 37910 Base PCGS# 2825

3218 **1955 Doubled Die Obverse, FS-101, AU53 PCGS.** A lightly circulated and minimally abraded medium brown representative. The surfaces exhibit lavender-red and olive-green undertones. The strongest and best known of all Lincoln cent doubled dies. PCGS# 37910 Base PCGS# 2825

3219 **1955 Doubled Die Obverse, FS-101, AU58 PCGS.** A lustrous and well struck golden-brown example of this landmark doubled die variety. Lincoln's cheekbone and jaw show a trace of wear, but marks are essentially confined to a single hair-thin line behind Lincoln's head. PCGS# 37910 Base PCGS# 2825

3220 **1955 Doubled Die Obverse, FS-101, AU58 PCGS.** This *Guide Book* variety is typically soft on Lincoln's portrait, with the result that many lower-end Mint State pieces have the overall eye appeal of an AU coin. This Borderline Uncirculated example is refreshingly attractive, rivaling in that regard many higher-grade Brown coins. Both sides display satiny auburn patina with lush steel-blue overtones. Slight friction, denoted by subtle olive-colored high-points on the devices, is only detectable with a glass. A lovely, problem-free example. PCGS# 37910 Base PCGS# 2825

3221 **1955 Doubled Die Obverse, FS-101, AU58 PCGS.** A well-struck chocolate-brown representative with generally smooth surfaces and impressive eye appeal for the grade. This is perhaps the most famous doubled die variety, known even to casual collectors. *Ex: Central States Signature (Heritage, 5/2007), lot 1275.* PCGS# 37910 Base PCGS# 2825

3222 **1955 Doubled Die Obverse, FS-101, AU58 PCGS. CAC.** A chestnut-brown example with substantial ocean-blue toning in protected regions. Satiny and well struck with good eye appeal despite distributed minute marks. All obverse legends show remarkable die doubling, characteristic of this famous *Guide Book* key. PCGS# 37910 Base PCGS# 2825

3223 **1955 Doubled Die Obverse, FS-101, MS62 Brown NGC.** This *Guide Book* variety is known for being weakly struck, and the current representative exhibits this to a certain degree on the obverse portrait, although there is no evidence of actual wear. Satiny auburn-brown patina blankets each side, with no distracting abrasions. This issue becomes increasingly elusive in finer grades. PCGS# 37910 Base PCGS# 2825

3224 **1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS.** Although predominantly olive-brown, this key date cent displays glimpses of mint red in design crevices. Lustrous and boldly struck with smooth surfaces and a solitary small spot beneath the first 5 in the date. PCGS# 37910 Base PCGS# 2825

3225 **1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS.** A coruscating sea-green Select example of the spectacular 1955 doubled die obverse cent. Hints of lilac-red visit the margins. The well struck surfaces appear free from marks. A trio of tiny spots are noted on the upper right obverse field. PCGS# 37910 Base PCGS# 2825

1957-D Cent, MS67+ Red
The Sole Finest at PCGS

3226 **1957-D MS67+ Red PCGS.** Even the most advanced Registry Set collectors will want to take a close look at this magnificent coin, as it is, by the margin of the coveted Plus designation, the *sole finest* 1957-D Lincoln cent at PCGS (4/15). Both sides exhibit rolling coppery-orange luster and well-defined relief elements. The strike is bold and the surfaces are apparently free of distracting carbon spots. Population: 71 in 67 (1 in 67+) Red, 0 finer (4/15). NGC ID# 22FN, PCGS# 2845

3227 **1962 MS67 Red PCGS.** A beautiful peach-red Superb Gem. Potent luster sweeps virtually mark-free surfaces. The strike is full aside from slight blending on the base of Lincoln's shoulder. Population: 14 in 67 (1 in 67+) Red, 0 finer (5/15). NGC ID# 22G3, PCGS# 2878

1972 Doubled Die Obverse Cent
Vividly Colored MS67 Red and Brown

3228 **1972 Doubled Die Obverse, FS-101, MS67 Red and Brown PCGS. CAC.** This is the most prominent of the 1972 doubled die cent varieties, characterized by a wide secondary image on all obverse lettering, as well as on Lincoln's bowtie and lapel. The present example is boldly rendered and exhibits seemingly perfect preservation. PCGS has granted only a Red and Brown color designation, although the surfaces undeniably showcases nearly full Red patina; the peripheries yield bright bronze-gold and pale lavender hues, while the centers display deep fire-red toning. The transitional colors make this Superb Gem every bit as eye-appealing as a full Red example of the same grade. This piece is tied with one other for finest Red and Brown at PCGS (4/15). PCGS# 38012

3229 **1972 Doubled Die Obverse, FS-101, MS66 Red PCGS. CAC.** Cherrypickers' lists nine different doubled die obverse varieties for the 1972 cent, but FS-101 is certainly the most prominent, and is the variety listed in the Guide Book. This high grade orange-red Premium Gem has a full strike and nearly pristine surfaces. PCGS# 38013 Base PCGS# 2950

3230 **1977-D MS67 Red PCGS.** The 1977-D is a fairly modern issue, but high-end examples are scarce. This piece is tied with just 18 others as the finest seen by PCGS (5/15). Cherry-red and rose-gold surfaces are impeccably well-preserved and showcase a radiant cartwheel effect. NGC ID# 22HA, PCGS# 2987

3231 **1909 PR65 Red and Brown PCGS.** Broad rims and thick matte luster leave no doubt as to the proof origin of this Gem first-year Lincoln cent. Toning bathes each side in warm bronze-gold and coppery-red hues, with a few deeper olive and violet overtones further evident in the peripheral regions. Trivial specks are discernible with low-power magnification. Housed in a first generation holder. NGC ID# 22KS, PCGS# 3304

PROOF LINCOLN CENTS

3232 **1913 PR66 Red and Brown PCGS.** This razor-sharp matte proof shows largely apricot-gold patina, although a blush of deeper violet over the right-hand portion of each side precludes a full Red color designation from PCGS. A couple tiny specks do not detract. Population: 25 in 66 (1 in 66+) Red and Brown, 4 finer (5/15). NGC ID# 22KW, PCGS# 3316

1913 Cent, PR66 Red
Exceptional Color and Surfaces

3233 **1913 PR66 Red NGC.** Those desiring a high-grade Matte Proof Lincoln cent often look to the 1913 issue because of its generous proof mintage of 2,983 pieces. Few examples, however, survive in the highest grades to satisfy the legions of collectors filling type and date sets. This exceptional Premium Gem offers rich tan overtones on the obverse with underlying red-orange luster over the unmarked, textured surfaces. The reverse is equally without flaws, with deeper red accents and lime-green borders. Census: 11 in 66 (1 in 66+) Red, 5 finer (4/15). NGC ID# 22KW, PCGS# 3317

1915 Cent, Bold PR65 Brown

3234 **1915 PR65 Brown PCGS.** This Gem matte proof 1915 exhibits needle-sharp detail throughout Lincoln's portrait and the reverse wheat ears, and the borders a broad and squared. Olive-brown patina is the order of the day, although hints of red glow in the peripheral recesses. A few scattered specks are not distracting. Population: 22 in 65 Brown, 27 finer (5/15). NGC ID# 22KY, PCGS# 3321

TWO CENT PIECES

3235 **1864 Small Motto, FS-401, MS64 Brown NGC.** Lilac-red, golden-brown, and apple-green enrich this lustrous and lightly abraded Choice semikey example. Well struck except for minor merging on the NTS in CENTS. The introductory Small Motto variety is much scarcer than its plentiful Large Motto successor. *Ex: FUN Signature (Heritage, 7/2007), lot 227, which realized $1,495.* PCGS# 38232 Base PCGS# 3579

3236 **1864 Large Motto MS66 Brown PCGS. CAC.** A sharply detailed Premium Gem representative of this first-year type issue, with a mix of light brown and lilac patina and traces of original red around the devices. An extensive network of die cracks and clash marks shows on the reverse. Population: 3 in 66 Brown, 1 finer (5/15). NGC ID# 22N9, PCGS# 3576

3237 **1864 Large Motto MS65 Red PCGS.** A sharply detailed Gem from the first year of the denomination, this coin offers lightly marked lustrous surfaces that retain much of their original red color, but have mellowed to lavender in places on the reverse and show some minor carbon spots. NGC ID# 22N9, PCGS# 3578

3238 **1864 Large Motto MS65 Red PCGS. CAC.** Generous golden-orange luster complements surfaces that show few marks or impairments of any kind. Gem Red examples of this first-year issue can be occasionally found, but Red pieces in MS66 are far more elusive. The CAC green approval sticker further separates this coin from most of its cohort. NGC ID# 22N9, PCGS# 3578

3239 **1865 Plain 5 MS65 Red PCGS.** The top of the 18 is repunched north. Unlisted in Flynn or Cherrypickers'. A lustrous and boldly struck peach-red Gem. The surfaces are essentially unabraded, although a loupe reveals minor reverse flecks. PCGS# 38249 Base PCGS# 3584

3240 **1865 Plain 5 MS65 Red PCGS. CAC.** A precisely struck fire-red two cent type coin. The lustrous surfaces are unabraded, and carbon is both infrequent and inconsequential. Clashed near CENTS. Although a high mintage date, the 1865 is scarce as a Red Gem, and rare any finer. PCGS# 38249 Base PCGS# 3584

3241 **1865 Fancy 5 MS65+ Red and Brown PCGS.** Plum and auburn overtones largely yield to brighter coppery-orange hues on each side of this Plus-graded Gem. The wreaths are sharply impressed and careful study fails to reveal any obvious abrasions. A single carbon speck lives near the obverse rim above GOD. Population: 5 in 65 (1 in 65+) Red and Brown, 1 finer (5/15). PCGS# 38257 Base PCGS# 3583

3242 **1869 MS65 Red and Brown PCGS. CAC.** This Gem 1869 two cent piece is almost full Red, although just a suggestion of subtle auburn toning that deepens the overall hue a trifle limited PCGS' assessment. The strike is sharp and there are no major abrasions, although the occasional carbon speck is observed. Population: 55 in 65 (1 in 65+) Red and Brown, 3 finer (5/15). NGC ID# 22ND, PCGS# 3604

3243 **1872 AU55 PCGS.** The 1872 two cent piece is the final year for business strikes of this "odd" denomination. Only 65,000 pieces were struck for commercial usage, and such pieces are rare and valuable in all grades. This is definitely a business strike rather than a mishandled proof. Just the faintest trace of red remains around the devices. The striking details are soft on the obverse, and there are numerous handling marks present, the most obvious a diagonal abrasion to the left of the 2 on the reverse. Population: 21 in 55, 64 finer (4/15).
Ex: Long Beach Signature (Heritage, 9/2011), lot 3240. NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

3244 **1865 PR65 Red and Brown PCGS.** Original mint-orange color fades to light-brown over both sides of this Gem proof two-cent piece. The fields are reflective and attractive, with sharply struck devices throughout. The two cent denomination flashed only brief acceptance by the public, soon to be replaced in the minds and pockets of the populace by three cent nickels. Population: 35 in 65 Red and Brown, 14 finer (4/15). NGC ID# 274U, PCGS# 3628

3245 **1870 PR66 Red and Brown NGC. CAC.** Auburn-brown overtones reside primarily on the bold relief elements, backlit by gleaming orange-gold color in the mirrored fields. No contact marks or distracting hairlines are discernible. Census: 21 in 66 Red and Brown, 0 finer (5/15). NGC ID# 274Z, PCGS# 3643

3246 **1871 PR66 Red and Brown NGC. FS-102.** All proof 1871 two cent pieces exhibit obverse die doubling, most boldly evident on the motto IN GOD WE TRUST. This Premium Gem displays razor-sharp design definition and yields deep mirroring in the fields beneath beautiful shades of sun-gold, olive, and cherry-red toning. Census: 22 in 66 (1 in 66 ★) Red and Brown, 1 finer (4/15). NGC ID# 22NH, PCGS# 3646

3247 **1872 PR66 Red and Brown NGC.** Peach-gold and apple-green endow this precisely struck and lustrous specimen. Thorough inspection is required to locate even pinpoint carbon. Due to a low associated commercial mintage, the 1872 proof is subject to greater demand than preceding dates of the series. Housed in a prior generation holder. NGC ID# 2752, PCGS# 3649

3248 **1873 Closed 3 — Improperly Cleaned — NCS. Proof.** A richly detailed and unabraded representative of this very scarce proof-only date. The olive-brown surfaces exhibit orange-gold and sea-green undertones, particularly on the reverse. NGC ID# 2753, PCGS# 3651

THREE CENT SILVER

1851 Three Cent Silver, MS66+
Outstanding First-Year Type Coin

3249 **1851 MS66+ PCGS. CAC.** A high-end Premium Gem representative of this popular first-year type coin, with well-detailed design elements and well-preserved surfaces that show some interesting peripheral die cracks on the obverse. Vibrant mint luster and attractive shades of champagne-gold and lavender toning add to the outstanding eye appeal. PCGS has graded 14 numerically finer examples (5/15). NGC ID# 22YX, PCGS# 3664

1852 Three Cent Silver, MS67
Colorful and Lustrous

3250 **1852 MS67 NGC.** Wheat-gold borders encompass stone-gray, lilac, and olive fields and devices. Lustrous and unabraded with a few small obverse carbon specks. The central high points display parallel roller marks, as made and present on the planchet before the strike. Census: 18 in 67 (1 in 67+), 0 finer (5/15). NGC ID# 22YZ, PCGS# 3666

3251 **1853 MS66 PCGS. CAC.** Cream-gray, apple-green, and chestnut-tan toning graces this original and high grade type coin. Lustrous and nicely struck with exemplary preservation. Population: 65 in 66 (3 in 66+), 8 finer (5/15). NGC ID# 22Z2, PCGS# 3667

1853 Three Cent Silver, MS67
None Finer at NGC

3252 **1853 MS67 NGC.** A substantial mintage of 11.4 million three cent silver pieces was achieved at the Philadelphia Mint in 1853 and this delightful Superb Gem is among the finest survivors. The design elements are sharply detailed and the well-preserved silver-gray surfaces show hints of lavender toning and ample mint luster on both sides. Census: 10 in 67, 0 finer (5/15). NGC ID# 22Z2, PCGS# 3667

3253 **1860 MS65 PCGS.** A silver-white Type Three coin with olive-gold accents, with the toning slightly more pronounced on the reverse. Full frosty mint luster covers both sides of this well-produced Gem. The low-mintage of 286,000 pieces was typical of the early war years for the denomination, although not really noticed by the public since three cent pieces had fallen out of favor by then. Scarce this nice, housed in an old green-labeled holder. Population: 23 in 65, 14 finer (4/15). NGC ID# 22Z9, PCGS# 3678

1861 Three Cent Silver, MS67
None Certified Finer at PCGS

3254 **1861 MS67 PCGS.** A mintage of 497,000 pieces makes this issue relatively available for collectors, but production of three cent silver coins declined thereafter. The series would soon disappear from circulation, either from hoarding in the Civil War years or from nominal mintages after the war. This high-grade Variety Three issue displays lustrous surfaces and substantial eye appeal. The obverse is fully struck, while the reverse shows weakness on two or three of the stars and at the uppermost arrow fletchings. There is no evidence of die clashing, and the frosty surfaces are essentially mark-free. Population: 30 in 67, 0 finer (5/15). NGC ID# 22ZA, PCGS# 3679

3255 **1862/1 MS66+ NGC. CAC.** Lavender, golden-brown, aquamarine, and cherry-red endow this lustrous and pristine Civil War trime. The strike shows minor incompleteness on the border of the shield. Census: 67 in 66 (2 in 66+), 13 finer (4/15). NGC ID# 22ZC, PCGS# 3681

3256 **1862 MS66 PCGS.** This 1862 silver three cent is almost complete devoid of abrasions, and the frosty surfaces are accented by splashes of amber, russet, and olive toning. The usual striking weakness is evident in the centers. PCGS records only 15 numerically finer representatives (5/15). NGC ID# 22ZB, PCGS# 3680

3257 **1862 MS66 NGC.** Ex: Highland Collection. Both sides of this attractive Premium Gem show well-detailed design elements and prominent clash marks, with well-preserved lustrous surfaces. Delicate shades of silver-gray and golden-brown toning visit the surfaces of both sides. NGC has graded 23 numerically finer examples (5/15). NGC ID# 22ZB, PCGS# 3680

1862 Three Cent Silver, MS67
Impressive Original Toning

3258 **1862 MS67 NGC.** Ex: Highland Collection. Variegated shades of cerulean-blue and tan-gold dominate both sides of this impressively toned Superb Gem. 1862 represented the final sizable mintage for the three cent silver series at 343,000 pieces struck. Most were quickly hoarded, and few were saved by collectors. Mint luster glows beneath the frosted surfaces and intense toning of this scarce survivor, which displays a sharp strike and problem-free surfaces. Census: 23 in 67 (1 in 67 ★), 0 finer (5/15). NGC ID# 22ZB, PCGS# 3680

3259 **1864 MS63 PCGS.** From a small mintage of 12,000 pieces, this attractive Select specimen exhibits sharply detailed design elements and lustrous, lightly marked surfaces under vivid shades of golden-brown and violet toning. Prominent clash marks show on the obverse. Population: 12 in 63, 68 finer (5/15). NGC ID# 22ZE, PCGS# 3684

3260 **1871 MS64 NGC.** The low mintage of 3,400 pieces foreshadowed the end of the series, followed by a token mintage in 1872 and the even smaller proof-only final mintage in 1873. Iridescent multihued toning covers both sides of this prooflike three cent silver. The reflective surfaces are deeply toned but impressively colored when viewed at an angle. The strike shows central weakness, with some loss of detail at the shield scrollwork, arrow fletchings, and bow. NGC ID# 22ZM, PCGS# 3692

1871 Three Cent Silver, Lightly Toned MS67

3261 **1871 MS67 NGC.** Ex: Highland Collection. Pale rose-gray and gold patina decorates each side of this nicely preserved Type Three issue, a low-mintage production of only 3,400 circulation strikes (although it is doubtful that many survivors ever circulated, given the average grade of MS63 for certified examples). No clash marks are visible, and the strike is decent despite minor softness on the bowknot on the reverse. A coin not easily upgraded. Census: 17 in 67, 3 finer (4/15). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

1859 Three Cent Silver, PR66
Multicolor Masterpiece

3262 **1859 PR66 NGC.** Blue-green, butter-gold, and lavender dominate the obverse. The reverse displays fire-red, orange-gold, and apple-green. A flashy and crisply struck specimen. First year of the Type Three design with a double-outline to the six-pointed star. A meager 800 proofs were issued. NGC ID# 27C6, PCGS# 3708

3263 **1859 PR64 Cameo PCGS.** This proof three cent silver issue is not overly challenging in the absolute sense, but Cameo representatives are rarely seen. This fully struck Choice example exhibits stark field-motif contrast, with just a hint of light champagne toning overall. Population: 8 in 64 Cameo, 4 finer (5/15). PCGS# 83708

1861 Three Cent Silver, PR66
Richly Toned, Brightly Mirrored

3264 **1861 PR66 PCGS.** An official mintage of 1,000 pieces was actually less than half of that amount when unsold proofs were melted at year's end. Many other proofs were lost to attrition, and today few pieces are known in Gem or finer conditions. This well-preserved example displays deeply mirrored fields that are imbued with silvery iridescence and rich shades of gunmetal-blue, reddish-gold, and aged bronze. A Premium Gem, this wartime issue is seldom seen any finer. Population: 7 in 66, 5 finer (5/15). NGC ID# 27C8, PCGS# 3710

1873 Three Cent Silver, PR66 Cameo
Exceptional Final-Date Type Coin

3265 **1873 Closed 3, PR66 Cameo NGC.** The three cent silver piece was only produced in proof format in 1873, all with the Closed 3 in the date. This impressive Premium Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. Attractive shades of pale gold and cerulean-blue toning add to the terrific eye appeal. Census: 12 in 66 Cameo, 7 finer (5/15). PCGS# 83724

THREE CENT NICKELS

3266 **1865 MS66 PCGS.** Close study with a glass fails to reveal any mentionable abrasions on either side of this high-end 1865 three cent nickel. Silvery-gray luster yields hints of pastel iridescence when tilted in-hand, and the only noticeable striking weakness is seen on the reverse denomination. Population: 41 in 66 (1 in 66+), 2 finer (4/15). NGC ID# 22NJ, PCGS# 3731

3267 **1865 MS66 PCGS.** A spectacular Premium Gem specimen of this popular first-year type coin, with sharply detailed design elements and well-preserved lustrous surfaces, under shades of greenish-gold and lavender-gray patina. Population: 41 in 66 (2 in 66+), 2 finer (5/15). NGC ID# 22NJ, PCGS# 3731

1866 Three Cent Nickel, Nicely Preserved MS66

3268 **1866 MS66 PCGS. CAC.** Pale rose-gray patina appears uniformly on both sides of this nicely preserved Premium Gem 1866 business strike three cent nickel. Although there was a plentiful mintage exceeding 4.8 million pieces for this issue, most seen are lightly circulated or in low Mint State grades. Some die fatigue appears on the last 6 in the date and via a small die crack nearby, and a curved lintmark shows just above the coronet. Several die cracks appear on the reverse, an interesting coin, well-preserved yet showing the challenges of mid-19th century Mint technology. Population: 30 in 66 (4 in 66+), 2 finer (4/15). NGC ID# 22NK, PCGS# 3732

3269 **1868 MS66 PCGS.** A blush of soft champagne toning adds a degree of warmth to the satiny nickel-gray surfaces of this Premium Gem three cent nickel type coin. Well-struck, with no distracting abrasions. Population: 36 in 66 (1 in 66+), 1 finer (4/15). NGC ID# 2756, PCGS# 3734

3270 **1868 MS66 PCGS. CAC.** A blush of light golden toning accentuates the delicate preservation of the surfaces. This frosty Premium Gem is a little soft on the central Roman numeral, but is otherwise well-struck. Clash marks are present on the obverse and the reverse is cracked in the wreath. Population: 36 in 66 (2 in 66+), 1 finer (4/15). NGC ID# 2756, PCGS# 3734

1868 Three Cent Nickel, Elusive MS66+

3271 **1868 MS66+ PCGS. CAC.** The prevailing coin-gray surfaces show a hint of rose patina throughout. The post-Mint preservation is virtually impeccable, although each side shows bold clash marks for the other side's die. Rich luster and a nice sharp strike are pluses. For an issue of more than 3.2 million coins, examples in MS66 or finer are surprisingly elusive. Population: 36 in 66 (2 in 66+), 1 finer (5/15). NGC ID# 2756, PCGS# 3734

1873 Open 3 Three Cent Nickel, MS65
Challenging in High Grade

3272 **1873 Open 3 MS65 NGC.** The Open 3 logotype was employed for about two thirds of the three cent nickels coined in 1873 (783,000 pieces), but in high grades the two varieties are surprisingly similar in scarcity. This Gem Open 3 representative displays soft golden-gray toning, with boldly render design elements and minimally disturbed, satiny luster. Census: 12 in 65 (1 in 65+), 3 finer (4/15). PCGS# 3740

1873 Three Cent Nickel, MS65
Appealing Open 3 Representative

3273 **1873 Open 3 MS65 PCGS. CAC.** Gem surface quality is blatantly evident on each side of this Open 3 1873 three cent nickel. Trivial striking softness is noted on the hair curls above Liberty's ear, but the reverse wreath is well-defined. A heavy die crack stretches from the reverse rim at 9:30, through the upper-left wreath branch, to the rim at 12:30. Satiny olive-gray luster yields just a hint of pale golden color when examined beneath a light. Population: 37 in 65 (1 in 65+), 2 finer (4/15). PCGS# 3740

1884 Three Cent Nickel, MS61
Scarce in Mint State

3274 **1884 MS61 ANACS.** From a tiny mintage of just 1,700 pieces, the 1884 three cent nickel is a rare issue in Mint State. This attractive nickel-gray example exhibits hints of green and lavender toning, with slightly subdued luster, and well-detailed design elements. A couple small planchet laminations are tucked against the reverse rim at 3 and 5 o'clock.
Ex: Long Beach Signature (Heritage, 2/2012), lot 3237. NGC ID# 275F, PCGS# 3752

3275 **1889 MS66 NGC.** This is an important coin for final-year type purposes, from a small mintage of 18,100 pieces. The current Premium Gem offers impeccably smooth, satiny surfaces that are lightly toned on the reverse. Census: 22 in 66 (1 in 66 ★), 4 finer (5/15). NGC ID# 275J, PCGS# 3758

PROOF THREE CENT NICKELS

1866 Three Cent Nickel, PR66 Cameo
Well-Contrasted and Well-Preserved

3276 **1866 PR66 Cameo PCGS.** Pale rose-gray surfaces are free of all but minor contact on Liberty's cheek and show great contrast between frosty devices and reflective fields. A nice example of this second-year proof issue, a coin not easily bettered, according to the certified populations. Population: 17 in 66 Cameo, 1 finer (4/15). PCGS# 83762

3277 **1866 PR65 Deep Cameo PCGS.** The Deep Cameo designation is almost an understatement on this Gem proof, which showcases frost-white relief elements set against a backdrop of glass-like mirroring. No distracting marks are present. Population: 10 in 65 Deep Cameo, 12 finer (5/15). PCGS# 93762

3278 **1868 PR65 Deep Cameo PCGS.** An untoned and extraordinarily well mirrored specimen that adds a remarkable amount of contrast between the fields and the devices. Close inspection reveals a series of die file marks on the portrait. Early three cent nickel proofs are rarely found with this much eye appeal. Population: 12 in 65 (2 in 65+) Deep Cameo, 8 finer (5/15). PCGS# 93764

3279 **1871 PR66 Cameo NGC.** A delightful, blemish-free Cameo proof with frost-white devices and amply mirrored fields. A lack of lintmarks or other mint-made imperfections further heightens the eye appeal. Census: 11 in 66 Cameo, 5 finer (4/15). PCGS# 83767

3280 **1872 PR66 PCGS. CAC.** Pale powder-blue patina complements the lavender-gray shadings on each side of this Premium Gem proof. Carefully preserved with elegant eye appeal. Population: 22 in 66, 0 finer (5/15).
Ex: Dallas Signature (Heritage, 10/2009), lot 222. NGC ID# 275T, PCGS# 3768

1872 Three Cent Nickel, Brilliant PR67
The Finest Certified

3281 **1872 PR67 NGC.** The 1872 proof three cent nickel was produced in a quantity of at least 950 pieces, and while the date is not considered rare, survivors achieving the Superb Gem grade level are. This piece is fully brilliant, with deeply mirrored fields and near-cameo contrast with the sharp devices. Significantly, this is the only non-Cameo Superb Gem certified by either NGC or PCGS with none finer (5/15). NGC ID# 275T, PCGS# 3768

3282 **1875 Misplaced Date, FS-301, PR66 NGC.** The flag or base of a 1 emerges from the lower left border of Liberty's neck. FS-301 was initially struck in proof format without obverse cracks. Later, FS-301 commercial pieces were coined that show a die crack across the base of the date. Satiny and well struck with a rose-gold obverse and a lime-green reverse. PCGS# 524940 Base PCGS# 3771

1877 Three Cent Nickel, PR65 Cameo
Important Proof-Only Issue

3283 **1877 PR65 Cameo NGC.** Always the most sought-after issue in the series, just 900 proofs were struck and no circulation strikes. The current example is an ideal candidate for a Gem set of three cent nickels, with faint golden toning that strengthens slightly at the borders and gleaming, reflective fields. The devices are nicely frosted for medium contrast. There are no untoward marks and the strike is razor-sharp. PCGS# 83773

3284 **1879 PR67 Cameo NGC.** A brilliant, starkly contrasted Cameo, this Superb Gem proof exhibits deep mirroring in the fields and the design elements are fully rendered and frosty. Suitable for date representation due to the scarcity of high-end circulation strikes of this year. Census: 30 in 67 Cameo (1 in 67 ★ Cameo), 7 finer (5/15). PCGS# 83775

3285 **1881 PR67 Cameo NGC. CAC.** Ex: Highland Collection. The design elements of this spectacular Superb Gem are sharply detailed and the deeply reflective fields contrast boldly with the frosty devices. The impeccably preserved surfaces show pleasing hints of pale gold toning and eye appeal is outstanding. Census: 34 in 67 Cameo (4 in 67 ★ Cameo), 11 finer (5/15). PCGS# 83777

1884 Three Cent Nickel, PR66 Deep Cameo
One of Two Examples in This Format

3286 **1884 PR66 Deep Cameo PCGS.** Nearly 4,000 proof three cent nickel pieces wire minted in 1884, and almost 1,400 examples have been certified by PCGS. A mere two specimens have been designated Deep Cameo by that service, the current Premium Gem and a PR67 (5/15). Both sides are clearly contrasted with only hints of blue and gold-rose color to the fields. A small planchet depression on Liberty's cheek does not distract. PCGS# 93780

3287 **1886 PR67 Cameo PCGS.** A lovely Cameo, this Superb Gem proof also showcases incredibly sharp design definition and the surfaces are free of distractions. The coin delivers a brilliant appearance, but in actuality possesses a touch of light golden color. Population: 24 in 67 Cameo, 0 finer (5/15). PCGS# 83782

3288 **1887/6 PR67 NGC. FS-302.** Remnants of the underlying 6 are visible on the lower-left side of the 7 and the 188 is repunched. Soft golden-gray and light blue patina covers the obverse while slightly deeper bluish-gray dominates the reverse. The impeccably preserved surfaces complement fully struck design elements. Census: 4 in 67, 0 finer (4/15).
Ex: Houston Signature (Heritage, 12/2009), lot 219; Long Beach Signature (Heritage, 6/2010), lot 332. NGC ID# 276A, PCGS# 3784

3289 **1887 PR67 NGC.** Reflective fields provide a blemish-free backlight for the light golden hue that graces each side, and attractively frame the sharp, frosty relief elements. This piece ranks alongside just three others as the finest at NGC (5/15). NGC ID# 2769, PCGS# 3783

SHIELD NICKELS

3290 **1866 Rays MS65 NGC.** This piece shows minor machine doubling on all obverse design elements, although this should not be confused for the doubled die variety listed in the *Cherrypickers'* reference. The surfaces display satiny, gold-tinted luster with several fine die cracks around portions of the peripheries. The horizontal shield lines lack full definition. Struck from mildly rotated dies. Only 23 coins are numerically finer at NGC (4/15). NGC ID# 22NX, PCGS# 3790

3291 **1866 Rays MS65 PCGS. CAC.** The peripheral legends are boldly machine doubled on this Gem 1866 With Rays nickel, and this should not be mistaken for one of the repunched date or doubled die varieties listed in the *Cherrypickers'* reference. This piece is well-struck and has few signs of surface contact. Golden-gray toning warms the satiny surfaces. NGC ID# 22NX, PCGS# 3790

3292 **1870 MS65 NGC. CAC.** Satiny golden-gray luster illuminates well-preserved surfaces on this Gem 1870 Shield nickel. The strike is lacking sharpness on the lower reverse, but is otherwise well-executed. The obverse is extensively cracked throughout the periphery, a typical characteristic of this issue. Census: 37 in 65, 7 finer (5/15). NGC ID# 22P4, PCGS# 3797

3293 **1872 MS65 PCGS.** More than 6 million Shield nickels rolled off the coin presses in 1872, many of them with die anomalies and one sort of imperfection or another as the Mint struggled with die attrition from the hard nickel alloy. Numerous die varieties for the date exist as documented by Fletcher. Strike-related problems show on many coins such as the present example, with a shattered obverse die and heavy reverse die striations and weakness at the legends from lapping and machine (strike) doubling. Nevertheless, nice luster and eye appeal earn a Gem designation for this untoned and frosty coin. Few are certified finer. Population: 37 in 65, 22 finer (4/15). NGC ID# 22P6, PCGS# 3799

3294 **1872 MS66 PCGS. CAC.** Even though more than 6 million pieces of this issue were struck, Premium Gems such as this piece are scarce. The silver-white surfaces show a satiny sheen with a hint of gold tone. The date shows a repunched 872, and straight-line die breaks frame the central device at top and bottom, and under CEN on the reverse. A nice piece for the grade. Population: 21 in 66 (1 in 66+), 1 finer (4/15). This is one of seven MS66 with the CAC green approval sticker. NGC ID# 22P6, PCGS# 3799

3295 **1876 MS65 PCGS.** A sharp and attractive Gem with a faintly iridescent and satiny obverse paired with a slightly deeper iridescence on the lightly toned reverse. The surfaces are lustrous and unmarked. A sharp strike attends both sides, with minor weakness at the date where die cracks interconnect the broadly struck digits. Population: 43 in 65 (1 in 65+), 15 finer (4/15). NGC ID# 22PB, PCGS# 3805

3296 **1883/2 FS-305 — Improperly Cleaned — NGC Details. Unc.** The curve of an underdigit 2 is visible within the lower loop of the 3 in the date. Five different 1883/2 varieties are known, and all are collectible, although FS-302, FS-304, and FS-305 are very scarce. The present evenly struck olive-gray example is moderately subdued and displays minor hairlines. PCGS# 406858 Base PCGS# 3814

PROOF SHIELD NICKELS

3297 **1866 Rays PR64 Cameo PCGS.** This is a seldom seen Cameo representative of this first-year proof Shield nickel issue. A couple dashes of amber-gold toning appear on the obverse, but leave the reverse essentially brilliant. The strike is sharp throughout and the field-motif contrast is impressive. Population: 14 in 64 Cameo, 63 finer (5/15). PCGS# 83817

3298 **17-Piece Proof Shield Nickel Collection.** With the exception of the 1874, all pieces are housed in circa-1992 former generation NGC holders with consecutive certification numbers. Many of the coins exhibit beautiful multicolor toning, and a few are lacquered, a common practice several decades ago. The 1867 No Rays is absent from this lot because it is the rare transitional reverse variety, offered elsewhere in the present auction. The very rare 1867 Rays is also absent. The first page from a Wayte Raymond album of five cent pieces accompanies the lot, since that album page housed the present coins for many years. The lot includes: **1867 PR65 NGC; 1868 PR65 NGC; 1869 PR65 NGC; 1870 PR64 NGC; 1871 PR63 NGC; 1872 PR65 NGC; 1873 PR65 NGC; 1874 PCGS PR64; 1875 PR64 NGC; 1876 PR66 NGC; 1877 PR64 NGC; 1878 PR64 NGC; 1879 PR64 NGC; 1880 PR64 NGC; 1881 PR64 NGC; 1882 PR64 NGC;** and an **1883 PR64 NGC.** *From The DuPont Collection.* (Total: 17 coins)

3299 **1867 No Rays PR65 PCGS.** Always popular as the first year of the No Rays design, this impressive Gem displays sharply detailed design elements and well-preserved surfaces under pleasing shades of greenish-gold and lavender toning. Population: 34 in 65, 9 finer (5/15). NGC ID# 22PF, PCGS# 3821

1867 No Rays Shield Nickel, PR66 Cameo
Bold Field-Motif Contrast

3300 **1867 No Rays PR66 Cameo NGC.** This starkly contrasted Premium Gem Cameo delivers bold, frosty design elements and deeply mirrored fields that accentuate a tinge of warm golden toning which intrudes from the direction of the upper obverse and lower reverse borders. No contact marks or obtrusive hairlines are present, and the overall eye appeal is excellent. Census: 14 in 66 Cameo (3 in 66 ★ Cameo), 3 finer (4/15). PCGS# 83821

3301 **1868 PR65 Cameo PCGS. CAC.** This boldly struck Gem proof shows frosty design elements set against glass-black fields which are largely free of hairlines. A hint of light golden toning graces each side. Population: 35 in 65 (1 in 65+) Cameo, 15 finer (5/15). PCGS# 83822

1869 Shield Nickel, PR67
Among the Finest Proofs Certified

3302 **1869 PR67 PCGS.** Only a handful of proof 1869 Shield nickels are certified as fine as the PR67 grade level, with or without a Cameo designation. This representative yields deeply mirrored fields and sharp, satiny devices, but lacks sufficient contrast for a Cameo grade. Nonetheless, warm golden toning accents each side and the overall eye appeal is excellent. Population: 2 in 67 (1 in 67+), 0 finer (4/15). NGC ID# 276K, PCGS# 3823

3303 **1869 PR66 Cameo NGC.** This boldly struck Cameo proof exhibits just a tinge of pale tan-gold color on each side, leaving the deeply mirrored fields unhindered and the frosty devices starkly contrasted. A lack of any distracting marks or hairlines confirms the lofty grade. Census: 9 in 66 Cameo, 2 finer (4/15). PCGS# 83823

1872 Nickel, PR66+ Cameo
Doubled Die Obverse

3304 **1872 PR66+ Cameo PCGS.** The obverse is die doubled north, most apparent on the annulet of the shield. The variety is similar to FS-101, but is a different die marriage with a slightly greater spread. Brilliant and flashy with no post-strike detractions. A lint mark at the T in CENTS provides an identifier. Population: 26 in 66 (3 in 66+) Cameo, 4 finer (4/15). PCGS# 83826

1873 Closed 3 Nickel, PR66+ Cameo
Only a Single Coin Finer at PCGS

3305 **1873 Closed 3 PR66+ Cameo PCGS. CAC.** With a reported mintage of 1,100 proofs, the 1873 is widely available in most grades but not so in Premium Gem condition with both Cameo and Plus designations from PCGS and a green bean approval sticker from CAC. Glassy, deeply mirrored fields frame thickly frosted motifs, producing impressive white-on-black contrast over each side. PCGS has seen 28 Premium Gem proofs, but this is the only PR66+ example, and there is just a single submission rated finer at that service (5/15). PCGS# 83827

3306 **1875 PR65 Cameo NGC.** The 1875 is an elusive Shield nickel issue, and this Gem Cameo proof is an exceptional example. Both sides have delicate gold toning over mirrored fields and sharp motifs. Light cameo contrast completes the picture of this beautiful specimen. Census: 15 in 65 Cameo, 12 finer (5/15). PCGS# 83829

3307 **1878 PR63 PCGS.** A proof-only issue, essential for a complete date set of this underappreciated series. This Select example displays bold devices set against reflective nickel-gray fields. A peppering of russet specks is seen over each side, but is not distracting to the unaided eye. NGC ID# 276V, PCGS# 3832

3308 **1878 PR64 NGC. CAC.** This near-Gem example of the proof-only 1878 Shield nickel displays sharply struck design elements and is devoid of mentionable abrasions. Numerous tiny flecks run over each side. NGC ID# 276V, PCGS# 3832

3309 **1878 PR64 Cameo PCGS.** Eye-catching white-on-black contrast advances the eye appeal of this Choice proof Cameo, although the bold motifs are also a chief visual attribute. The 1878 proof is essential for a complete date set of Shield nickels, as no circulation strikes were issued. Population: 10 in 64 Cameo, 32 finer (5/15). PCGS# 83832

3310 **1879/8 PR67 PCGS.** What appear to be the remnants of an 8 are evident in the recesses of the 9 in the date. This *Guide Book* variety is unlisted in *Cherrypickers'* but it recognized by PCGS, with about half of the proof 1879 shield nickels certified at that service so-attributed. This example displays bold detail and deeply reflective fields that show just a tinge of pale golden color. Population: 27 in 67, 7 finer (4/15). NGC ID# 22PG, PCGS# 3834

3311 **1879 PR67 NGC.** The quality of this lavender-blue proof is outstanding, with fully rendered design elements and reflective, undisturbed fields. The 1 in the date is recut with the previous impression visible in the field to the left of the primary; all four date numerals also exhibit bold machine doubling, along with much of the obverse elements. Census: 16 in 67 (2 in 67 ★, 1 in 67+★), 1 finer (5/15). NGC ID# 22PG, PCGS# 3833

LIBERTY NICKELS

3312 **1883 No Cents MS67 NGC.** A virtually brilliant, highly lustrous, and nearly immaculate Superb Gem. The strike is full except on a few kernels on the left ear of corn. Both borders display numerous heavy cracks. Census: 70 in 67 (4 in 67 ★), 0 finer (5/15). NGC ID# 2772, PCGS# 3841

3313 **1883 With Cents MS66 PCGS. CAC.** This semiprooflike Premium Gem example was struck with an advanced state of the dies, as evidenced by the peripheral cracks on the obverse. Design sharpness is lacking on the corn ear to the left of the bowknot, but the relief elements are otherwise well-defined. This piece is radiantly lustrous and shows a suggestion of light champagne color. Population: 61 in 66 (5 in 66+), 3 finer (5/15). NGC ID# 22PH, PCGS# 3844

3314 **1886 MS63 PCGS. Peters-Mohon 23.1.** The second 8 is repunched. Faint straw-gold toning adorns the margins of this lustrous and carefully preserved key date nickel. The strike is bold except on the left ear of corn. NGC ID# 22PK, PCGS# 3847

3315 **1887 MS66 NGC.** Were it not for a couple faint grazes near Liberty's mouth, this satiny Premium Gem might have garnered a finest-certified status at NGC. The corn ear to the left of the wreath bow is softly struck, as are the right-hand obverse stars, but this is of little notice to the unaided eye. Light golden toning deepens toward the peripheries. Census: 20 in 66 (1 in 66 ★), 0 finer (4/15). NGC ID# 22PL, PCGS# 3848

3316 **1887 MS66 PCGS.** This is a vibrantly lustrous Premium Gem with hints of light golden toning throughout. No obvious abrasions are present. Star 7 shows a touch of weakness, as does the corresponding reverse corn ear to the left of the bowknot. Population: 25 in 66 (3 in 66+), 2 finer (5/15). NGC ID# 22PL, PCGS# 3848

3317 **1888 MS65 PCGS.** The 1888 Liberty nickel is very scarce in MS65 condition, and finer examples are rare. This attractive Gem offers well-detailed design elements and lightly toned surfaces with no mentionable distractions. Population: 69 in 65 (2 in 65+), 21 finer (5/15). NGC ID# 2774, PCGS# 3849

3318 **1889 MS66 PCGS.** This frosty Premium Gem 1889 Liberty nickel is among the finest seen by PCGS, and rightfully so. The golden-gray surfaces are largely free of abrasions, and the only mentionable striking weakness is seen on the corn ear to the left of the bowknot, as usual. Population: 26 in 66 (2 in 66+), 0 finer (5/15). NGC ID# 2775, PCGS# 3850

1890 Nickel, MS66
Among the Finest Certified at PCGS

3319 **1890 MS66 PCGS.** Above-average detail is present on peripheral details such as the obverse stars and the ears of corn. This Premium Gem is smooth with a touch of satin to the luster, largely gleaming silver-nickel with hints of blue at the interiors and touches of greenish-gold and crimson close to the rims. Population: 19 in 66 (4 in 66+), 0 finer (5/15). NGC ID# 22PM, PCGS# 3851

3320 **1892 MS66 PCGS.** With a mintage of nearly 11.7 million pieces, the dies were often pushed beyond their normal limits. As a result, few 1892 nickels demonstrate the combined attributes of a sharp strike, luster, and eye appeal. This Premium Gem is tied for the numerically finest-known at either service — one of the few examples that possess all aspects of quality necessary for such a high grade. The star centers are sharp and the ear of corn shows moderate definition. Nice satin luster covers both sides, with a few tiny flecks among wisps of light gold toning. Population: 22 in 66 (4 in 66+), 0 finer (4/15). NGC ID# 2777, PCGS# 3853

3321 **1892 MS66 NGC.** A couple faint grazes on Liberty's cheek appear to be all that precluded a Superb Gem grade from NGC, as the remainder of each side is pristine and illuminated in frosty golden-gray luster. The lower-left portion of the wreath is typically weak. Census: 12 in 66 (1 in 66 ★), 0 finer (5/15). NGC ID# 2777, PCGS# 3853

3322 **1893 MS65 PCGS. CAC.** This attractive Gem features well-preserved nickel-gray surfaces with a few hints of lavender toning and cart wheel mint luster on both sides. The design elements are well-detailed and a small planchet flaw between star 1 and Liberty's throat is the only mark of note. Population: 88 in 65 (1 in 65+), 25 finer (5/15). NGC ID# 2778, PCGS# 3854

3323 **1894 MS66 PCGS.** The well-preserved surfaces of this spectacular Premium Gem radiate vibrant mint luster, under attractive shades of champagne-gold and lavender toning. The design elements are well-detailed, with just a touch of softness on the stars and lower wreath. Population: 29 in 66 (3 in 66+), 1 finer (5/15). NGC ID# 2779, PCGS# 3855

3324 **1895 MS65 NGC.** A frosty and fully lustrous Gem, this 1895 Liberty nickel is brilliant light gray, exhibiting a hint of peripheral iridescence on each side. Every individual kernel appears in both ears of corn on the reverse. Census: 43 in 65 (2 in 65 ★), 13 finer (5/15). NGC ID# 277A, PCGS# 3856

3325 **1895 MS65 PCGS.** Sharply struck and showing faint amounts of mottled olive-gold patina, this is an impressively preserved Gem with clean surfaces and gleaming, satiny mint luster. Population: 64 in 65 (3 in 65+), 20 finer (5/15). NGC ID# 277A, PCGS# 3856

3326 **1895 MS65 PCGS.** A practiced eye selected this Liberty nickel for its exceptionally full strike and high quality surfaces. The lustrous, microscopically textured surfaces offer terrific eye appeal. The only marks are a trio of tiny abrasions on the reverse at the top of the left arm of the V. The wreath is diamond-sharp on all of its elements. Housed in an old green label holder for more than 20 years. Population: 63 in 65 (3 in 65+), 19 finer (4/15). NGC ID# 277A, PCGS# 3856

1895 Liberty Nickel, MS66+ Tied for Finest at PCGS

3327 **1895 MS66+ PCGS.** Lively cartwheel luster embraces the frosted, silver-lilac surfaces of this high-end Premium Gem nickel. The strike is sharp for the date, with only minor blending on stars 7 and 8, and a nearly complete ear of corn at the lower left wreath. Marks are limited to one or two short, light grazes and a few microscopic, medium gray toning spots beneath Liberty's chin. Tied with one other at 66+ PCGS for the finest at either service. PCGS population: 20 in 66 (2 in 66+), 0 finer (5/15). NGC ID# 277A, PCGS# 3856

3328 **1901 MS66+ PCGS. CAC.** The lightly textured surfaces of this Premium Gem capture mint luster within the tiny facets for strong cartwheel flash. Creamy silver surfaces are virtually untoned and attractive, with marks limited to a single microscopic tick on Liberty's chin. The 1901 issue is readily available up to the Gem level, but seldom so any finer. This diamond-sharp, Plus-graded example is among the finest known of the date. Population: 58 in 66 (8 in 66+), 3 finer (4/15). NGC ID# 277C, PCGS# 3862

3329 **1902 MS66+ PCGS. CAC.** Above-average sharpness on the design elements is beautifully showcased by vibrant, frosty luster in shades of lilac and golden-gray. A lack of obvious abrasions affirms the legitimacy of the Plus designation. Population: 61 in 66 (3 in 66+), 5 finer (5/15). NGC ID# 277D, PCGS# 3863

3330 **1902 MS66+ PCGS. CAC.** This high-end Premium Gem offers well-detailed design elements, with just a touch of softness on the lower wreath, and well-preserved lustrous surfaces under shades of pale gold and lavender-gray toning. Population: 61 in 66 (3 in 66+), 5 finer (5/15). NGC ID# 277D, PCGS# 3863

3331 **1904 MS66+ PCGS. CAC.** This Plus-graded Premium Gem type coin showcases intense, frosty luster with just a hint of golden color precluding snow-white brilliance. The strike is boldly rendered and the only mentionable abrasions are a couple small ticks around Liberty's eye. Population: 85 in 66 (7 in 66+), 0 finer (4/15). NGC ID# 277F, PCGS# 3865

3332 **1906 MS66 PCGS.** This attractive Premium Gem displays well-detailed design elements and lustrous surfaces with no mentionable distractions. A few hints of lavender and pale gold toning add to the outstanding eye appeal. The 1906 Liberty nickel is seldom encountered at this grade level. Population: 21 in 66 (1 in 66+), 0 finer (5/15). NGC ID# 277H, PCGS# 3867

3333 **1909 MS66 PCGS.** Pastel sea-green, butter-gold, and ice-blue shades invigorate this lustrous and crisply struck Premium Gem. Despite a high mintage, the 1909 is scarce in the present exalted quality. Certified in an old green label holder. Population: 28 in 66 (1 in 66+), 0 finer (4/15). NGC ID# 277K, PCGS# 3870

3334 **1910 MS66 PCGS.** A few hints of golden-brown and lavender-gray toning highlight the well-preserved surfaces of this impressive Premium Gem. The design elements are well-detailed and slightly subdued mint luster shines through the toning. Population: 21 in 66 (3 in 66+), 1 finer (5/15). NGC ID# 277L, PCGS# 3871

3335 **1912-S — Improperly Cleaned — NGC Details. Unc.** To the unaided eye, this piece appears similar to numerically graded examples, with glossy surfaces and iridescent golden patina. Close study with a lens reveals evidence of old cleaning, but also shows above-average sharpness on the lower-left portion of the wreath. NGC ID# 277R, PCGS# 3875

3336 **1912-S MS63 NGC.** Almond-gold and cream-gray intermingle across this satiny Select nickel. Sharply struck for the issue, with nearly full definition on the left corn ear and the forehead curls. The first San Francisco nickel five cent piece, and also a scarce low mintage issue. Certified in a former generation holder.
Ex: Long Beach Signature (Heritage, 9/2007), lot 623, which realized $2,990. NGC ID# 277R, PCGS# 3875

3337 **1912-S MS64 PCGS.** Soft luster shines through the rich, pewter-gray toning with amber-gold and lilac accents. The near-Gem surfaces show few marks or abrasions, with a touch of weakness on Liberty's hair and the usual softness on the wreath bow, ear of corn, and left interior leaves. NGC ID# 277R, PCGS# 3875

1912-S Nickel, MS65 Modestly Iridescent Surfaces

3338 **1912-S MS65 PCGS.** The 1912-S Liberty nickel boasts the series-low mintage of just 238,000 coins, and is rarely seen finer than the currently offered Gem. Both sides show glossy golden-gray luster with intermingled wisps of lavender and powder-blue. The usual striking weakness is observed in the centers and on the corn ear to the left of the bowknot, a characteristic which is unusually prominent on this San Francisco issue. The neck shows a small fleck below the ear. PCGS has seen only 21 numerically finer pieces (5/15). NGC ID# 277R, PCGS# 3875

1912-S Liberty Nickel, Satiny MS65+ Rarely Encountered Finer

3339 **1912-S MS65+ PCGS.** The sole San Francisco issue in the series and an important semikey. This high-end Gem exhibits satiny luster beneath uniform golden-gray toning that shows the occasional wisp of lavender and sky-blue. The lower-left wreath leaves and the corresponding portion of Liberty's hair are slightly soft, as usual, though the eye appeal is above-average for this seldom lustrous issue. Only 21 coins are numerically finer at PCGS (5/15). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3340 **1883 No Cents PR66 Cameo PCGS.** A spectacular Premium Gem representative of this important first-year type coin, with well-detailed design elements and deeply mirrored fields that show a few highlights of pale gold toning. No mentionable flaws are evident and overall eye appeal is outstanding. PCGS has graded 18 numerically finer examples (5/15). PCGS# 83878

1883 No Cents Nickel, PR67 Cameo
None Certified Finer

3341 **1883 No Cents PR67 Cameo PCGS.** The obverse is particularly impressive on this Superb Gem No Cents proof nickel, with white-on-black contrast and a full strike on Liberty's portrait. The star centers are sharply brought up. The reverse is slightly less contrasted yet equally brilliant. A tiny lint mark near the V is the sole mentionable flaw. Population: 18 in 67 Cameo, 0 finer (5/15). PCGS# 83878

1884 Liberty Nickel, PR67 Cameo
High-End for the Grade

3342 **1884 PR67 Cameo NGC.** Although the PR67 grade level allows for a few minute imperfections, this outstanding proof does not seem to take advantage, as close study with a loupe fails to reveal any distinct flaws. Reflective fields frame the softly frosted design elements, amid a blush of warm golden toning over each side. Sharpness is far above average, particularly on the ear of corn to the left of the wreath bow. Census: 14 in 67 Cameo (1 in 67 ★ Cameo), 3 finer (4/15). PCGS# 83882

1884 Liberty Nickel, PR67 Cameo
Delicate Champagne Patina

3343 **1884 PR67 Cameo PCGS.** The 1884 is an available proof issue in the Liberty nickel series, but collectors seeking a Superb Gem-quality example will usually find themselves on a long waiting list. This Cameo representative is impressively sharp and starkly contrasted. The surfaces are essentially devoid of blemishes, warmed by a light golden hue overall. Population: 11 in 67 Cameo, 0 finer (5/15). PCGS# 83882

3344 **1885 PR66+ PCGS. CAC.** Nicely reflective fields offer moderate contrast with the frosted devices of this PCGS Plus-graded Premium Gem proof. Lilac hues circulate across the lustrous surfaces. The strike is razor-sharp as expected for an 1885 nickel in this high-end grade. A few tiny speckles — mostly on the reverse — are visible under magnification but the eye appeal is terrific. CAC endorsed. Population: 118 in 66 (6 in 66+), 19 finer (4/15). NGC ID# 277T, PCGS# 3883

3345 **1885 PR64 Cameo NGC.** This sharp proof representative displays noticeable cameo contrast beneath a blanket of iridescent lavender and gold toning that flashes sky-blue when tilted at the right angle. There are no distracting contact marks, although scattered specks contribute to the grade. PCGS# 83883

1886 Nickel, PR67
Exceptional Satiny Surfaces

3346 **1886 PR67 PCGS.** Repunched Date. The dearth of high-grade business strikes puts considerable pressure on high-end proofs as well for this scarce issue. The proofs are always in demand, particularly with the untoned, satiny appeal of this example. The strike is needle-sharp on all of the elements, and the eye appeal is terrific. A thin, curved lintmark between stars 7 and 8 is positioned near some light planchet lamination in the same area. Repunching on the 8 and 6 of the date is mentioned in the Peters-Mohon reference as #23.1, an R.6 variety. Population: 23 in 67, 0 finer (5/15). NGC ID# 277U, PCGS# 3884

3347 **1892 PR66 Cameo PCGS. CAC.** This eye-catching proof Cameo is devoid of toning which allows the stark white-on-black contrast to glow uninhibited. A couple small planchet voids (mint-made) are located in the reverse field above the Roman numeral, but there are no other obvious interruptions in the glass-like mirrors. Population: 37 in 66 (6 in 66+) Cameo, 5 finer (5/15). PCGS# 83890

1892 Liberty Nickel, PR67 Cameo
Brilliant Reflective Fields

3348 **1892 PR67 Cameo NGC.** The design elements of this delightful Superb Gem exhibit razor-sharp definition throughout and the devices have a frosty texture that contrasts boldly with the deeply mirrored fields. The brilliant surfaces are free of mentionable defects and eye appeal is extraordinary. Census: 10 in 67 Cameo (2 in 67 ★ Cameo), 0 finer (5/15). PCGS# 83890

1892 Liberty Nickel, PR65 Ultra Cameo
None Finer at NGC

3349 **1892 PR65 Ultra Cameo NGC. CAC.** A nominal proof mintage of 2,745 Liberty nickels was achieved in 1892 and the coin offered here is among the finest survivors. The sharply detailed design elements have a frosty texture that contrasts profoundly with the deeply mirrored fields, producing a dramatic cameo effect. The surfaces are impeccably preserved and eye appeal is outstanding. Census: 2 in 65 Ultra Cameo (1 in 65+ Ultra Cameo), 0 finer (5/15). PCGS# 93890

3350 **1894 PR66 Cameo PCGS.** Light autumn-gold toning congregates along the peripheries but the motifs display frost. A fully struck and flashy Premium Gem. Population: 22 in 66 (4 in 66+) Cameo, 8 finer (5/15). PCGS# 83892

3351 **1897 PR67 Cameo PCGS.** The 1897 is one of the more plentiful proof issues in the series with cameo qualities, ideal for the type collector. Many of the early 20th century issues are available, but are also scarce with a Cameo designation. This lovely piece is boldly struck and deeply mirrored, with warm sun-gold toning over both sides. Population: 18 in 67 (3 in 67+) Cameo, 2 finer (5/15). PCGS# 83895

3352 **1901 PR67 PCGS.** From a proof mintage of 1,985 pieces, this delightful Superb Gem exhibits razor-sharp definition on all design elements and the fields are deeply mirrored throughout. The impeccably preserved surfaces show hints of pale gold and ice-blue toning at certain angles and eye appeal is terrific. Population: 33 in 67 (2 in 67+), 1 finer (5/15). NGC ID# 278B, PCGS# 3899

1905 Nickel, PR67 Cameo
Tied for Finest Certified

3353 **1905 PR67 Cameo NGC.** Seldom is an example of this proof issue located with significant field-device contrast; NGC lists only 11 coins in Cameo grades, with the current piece tied with just three others for the finest (4/15). A hint of golden toning accents each side, and design elements exhibit above-average sharpness on the stars and the lower-left portion of the wreath. PCGS# 83903

3354 **1906 PR67 Cameo PCGS.** Available in lower grades, the proof 1906 Liberty nickel becomes conditionally rare at the Superb Gem level, particularly with a Cameo designation. This piece is pleasantly contrasted beneath pastel gold and powder blue toning. A few light specks appear on the obverse. The corn ear to the left of the wreath bow is well-defined. Population: 20 in 67 (1 in 67+) Cameo, 2 finer (5/15). PCGS# 83904

3355 **1906 PR67 Cameo PCGS. CAC.** This is a beautiful and virtually flawless example of the 1906 Liberty nickel issue. Both sides of the piece are fully struck and untoned, showing good reflectivity in the fields and light frost on the devices. Population: 20 in 67 (1 in 67+) Cameo, 2 finer (5/15).
Ex: Dallas Signature (Heritage, 11/2007), lot 265, realized $4,312.50.
PCGS# 83904

3356 **1907 PR66 Cameo PCGS. CAC.** An important Premium Gem Cameo proof, struck at a time when frosted devices were the exception, rather than the norm. Few pieces survive with any degree of contrast. This brilliant proof has fully mirrored fields and bold motifs. Population: 19 in 66 (1 in 66+) Cameo, 5 finer (5/15). PCGS# 83905

3357 **1909 PR67 PCGS.** Almond-gold and powder-blue adorn this fully struck and lustrous Superb Gem. A few minuscule flecks on the lower reverse are all that deny an even finer grade. NGC ID# 278K, PCGS# 3907

3358 **1909 PR67 Cameo NGC.** Green-to-gold toning graces the rims, while nickel-frost and pearl elements prevail at the centers. This Superb Gem specimen has clear contrast on both sides, though the obverse is more obvious with its cameo effect. Census: 29 in 67 Cameo (2 in 67+ Cameo, 4 in 67 ★ Cameo), 8 finer (5/15). PCGS# 83907

3359 **1909 PR67 Cameo PCGS. CAC.** This spectacular coin is firmly within the Superb Gem preservation level, and the stark field-motif contrast is more than adequate for the assigned Cameo designation. Bold design elements complement warm sun-gold toning on each side, delivering a high degree of eye appeal. Population: 27 in 67 (3 in 67+) Cameo, 1 finer (4/15). PCGS# 83907

3360 **1911 PR67 NGC.** A delightful Superb Gem from a proof mintage of 1,733 pieces, this coin displays impeccably preserved surfaces under vivid shades of cerulean-blue and champagne-gold toning. The design elements are sharply detailed throughout and eye appeal is tremendous. Census: 17 in 67 (3 in 67 ★), 2 finer (5/15). NGC ID# 278M, PCGS# 3909

BUFFALO NICKELS

3361 **1913 Type One MS67+ NGC.** Glowing surfaces yield soft rose and sun-gold hues overall, with deeper aquamarine also evident around the outer peripheries. This magnificent Type One representative is sharply struck and impeccably well-preserved. Significant die erosion does not impede the sharpness nor the luster. NGC shows only 12 numerically finer pieces (5/15). NGC ID# 22PW, PCGS# 3915

3362 **1913-D Type One MS67 PCGS.** James Earle Fraser's bold motifs are unhindered on this well-struck, matte-like Type One Buffalo nickel. Subtle iridescent hues highlight the uniform golden-gray surfaces and the overall eye appeal is outstanding. Population: 64 in 67 (3 in 67+), 2 finer (5/15). NGC ID# 22PX, PCGS# 3916

3363 **1913-S Type One MS66 PCGS.** This Premium Gem is a glittering testament to Fraser's vision, with vivid sun-gold toning on either side and highly lustrous, well-preserved surfaces. Boldly struck and original. Only 26 pieces are numerically finer at PCGS (5/15).
Ex: Denver Signature (Heritage, 8/2006), lot 643. NGC ID# 22PY, PCGS# 3917

3364 **1914-S MS65 PCGS.** A lovely Gem example, well-defined for this early S-mint issue with light golden patina over quicksilver luster. With a mintage of just 3.47 million pieces, the 1914-S had the lowest production for any of the three mints for that year.
Ex: Long Beach Signature (Heritage, 5/2007), lot 490. NGC ID# 22R6, PCGS# 3926

3365 **1915-S MS64+ PCGS. CAC.** A high-end Choice example of this better date from the early series, with satiny mint luster under shades of champagne-gold and ice-blue toning. Only minor signs of contact are evident. NGC ID# 22R9, PCGS# 3929

1915-S Nickel, MS65
Unusually Sharp Motifs

3366 **1915-S MS65 PCGS.** The 1915-S Buffalo nickel is occasionally seen in Gem condition, but the rarity of finer pieces keeps demand for the former coins high. This satiny example displays subtle ice-blue toning and is remarkably sharp for a San Francisco product of this period. No distracting abrasions are observed. There are 33 numerically finer submissions at PCGS (5/15). NGC ID# 22R9, PCGS# 3929

3367 **1916 Doubled Die Obverse, FS-101 — Extensive Corrosion — NGC Details. Fine.** The date and feathertips are strongly die doubled, characteristic of this series key variety. A stone-white and charcoal-gray representative with evenly granular surfaces. Devoid of any visible abrasions.

3368 **1916-S MS65 PCGS.** Rated R.4 in Gem condition by David W. Lange in his Buffalo nickel reference, and although the book is 15 years old the assessment still seems accurate. Just 37 pieces have been seen in a numerically finer grade by PCGS (4/15) — a tiny number from a mintage of nearly 12 million pieces. This example is satiny with nice mint luster on both sides. Slight peripheral strike weakness of is seen at the feather tips and the bison's tail curl, although the main motifs are reasonably sharp. Hints of rose and lilac overtones flash across the smooth surfaces for great eye appeal. NGC ID# 22RC, PCGS# 3933

3369 **1916-S MS65 PCGS.** Scarce in Gem condition, the 1916-S Buffalo nickel becomes rare in finer grades. This piece is boldly brought up on each side and displays satiny golden toning with few surface contact points. Die fatigue is minimal, restricted to the peripheral recesses. PCGS has awarded numerically finer grades to 37 representatives (5/15). NGC ID# 22RC, PCGS# 3933

1916 Buffalo Nickel, MS66
Elusive This Fine

3370 **1916-S MS66 NGC.** Extraordinary strike and luster for the issue, with a hint of delicate golden color here and there. A horizontal die crack bisects much of the obverse, and a few tiny speckles of carbon are seen overall. While relatively common in lower grades and occasionally available with a strong strike in these lower grades, in fully struck Premium Gem condition the 1916-S is a rare coin. Census: 14 in 66, 1 finer (4/15).
Ex: Long Beach Signature (Heritage, 6/2006), lot 776. NGC ID# 22RC, PCGS# 3933

3371 **1917-S MS64 PCGS.** This piece is unusually well-struck for the 1917-S, and the surfaces are free of major abrasions. Iridescent golden accents provide occasional highlights over the nickel-gray surfaces. Finer representatives are only infrequently encountered. NGC ID# 22RF, PCGS# 3936

3372 **1918/7-D FS-101 VG10 NGC.** All four date digits are distinct on this pearl-white and charcoal-gray key date nickel. The crossbar and downstroke of the underdigit 7 are readily observed. Abrasions are refreshingly absent, although the reverse rim has a slight bump at 8 o'clock, and a loupe reveals a few delicate hairlines on the bison's flank. PCGS# 38446 Base PCGS# 3939

3373 **1918/7-D FS-101 Fine 12 NGC.** This piece is evenly circulated, with natural battleship-gray patina that yields tinges of gold and olive color in the recesses. The date is complete and the overdate feature is clear. This *Guide Book* variety is seldom seen in mid-grade condition with a clear date. PCGS# 38446 Base PCGS# 3939

3374 **1918/7-D FS-101 — Environmental Damage — NGC Details. XF.** The shape of the underdigit 7 is all too obvious. A nicely defined representative of this famous and scarce overdate. The olive-green surfaces are minutely and evenly granular. PCGS# 38446 Base PCGS# 3939

3375 **1919-D MS63 NGC.** The 1919-D Buffalo nickel is known for its deficient strike, and the current example is typical in that regard. Atypical, however, is the somewhat luminous silver-gray luster which is the hallmark of this coin's visual attributes. Fewer abrasions are present than are expected for the grade. NGC ID# 22RM, PCGS# 3942

3376 **1919-D MS64 NGC.** This highly lustrous 1919-D Buffalo nickel is unusually well-struck for the issue, despite significant die erosion that is evident in the recesses on each side. Traces of light golden toning are interspersed over the bright, satiny surfaces. NGC records only 23 numerically finer representatives (5/15). NGC ID# 22RM, PCGS# 3942

3377 **1919-S MS63 NGC.** Finding a 1919-S Buffalo nickel with full detail is almost an impossible task, although this Select representative comes close. Trivial weakness is noted on the bison's head and shoulder, as well as on the usual obverse trouble spots, namely the Indian's braid and the peripheries, but the overall impression is sharper than usual. Uniform golden-gray toning blankets each side. NGC ID# 22RN, PCGS# 3943

3378 **1920-D MS64 PCGS.** A well-struck Choice example of this popular issue, with just a little softness on the hair and the Bison's shoulder. The softly iridescent surfaces show little evidence of contact.
Ex: FUN Signature (Heritage, 7/2010), lot 3323. NGC ID# 22RR, PCGS# 3945

3379 **1921 MS66 ★ NGC.** Well struck and lustrous, with lovely steel-blue and rose-gray coloration over the centers, and luscious rainbow toning near the obverse peripheries. Seemingly perfect on both sides. Census: 64 in 66 (1 in 66+, 6 in 66 ★), 14 finer (5/15).
Ex: Central States Signature (Heritage, 5/2005), lot 6148, where it realized $1,495. NGC ID# 22RT, PCGS# 3947

1924-D Nickel, MS65
Exceptional Surface Quality

3380 **1924-D MS65 PCGS.** Well-struck for the issue with vibrant, satiny mint luster, each side is covered with rich reddish-olive toning and is free of carbon spotting. An important coin in Gem condition, with only five finer examples certified at PCGS and one at NGC (5/15).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5377. NGC ID# 22RY, PCGS# 3952

3381 **1924-S AU50 PCGS.** With a fairly low mintage of less than 1.5 million pieces, the 1924-S Buffalo nickel is a slightly better date in all grades. This problem-free AU representative displays medium battleship-gray patina, with minimal evidence of die fatigue in the recesses. Much of the high-point softness is due to a poor strike rather than actual wear. NGC ID# 22RZ, PCGS# 3953

3382 **1924-S AU55 NGC.** The 1924-S Buffalo is challenging overall with a mintage of less than 1.5 million pieces, but its availability in sharply struck condition is even more limited. This Choice AU coin shows trivial wear, but retains unusually pleasing detail on the trouble spots. Deep olive-gold and gray toning blankets each side, and the overall appeal is pleasing. NGC ID# 22RZ, PCGS# 3953

3383 **1925-S MS63 PCGS.** The 1925-S Buffalo nickel is difficult to find well-struck, although this Select example is better defined than normal. Iridescent gold toning blankets each side. Minor die fatigue is evident in the peripheral recesses, but is not noticeable to the unaided eye. NGC ID# 22S4, PCGS# 3956

1926 Nickel, Sharply Struck MS67

3384 **1926 MS67 PCGS. CAC.** The 1926 Buffalo, coming from a hefty mintage approaching 45 million pieces, is common in all grades. Even Premium Gems have a certified population of nearly 600 examples. PCGS and NGC have seen only 53 MS67 coins, however, and higher-grade pieces are virtually unobtainable. Olive-green, caramel-gold, and rose-red tints endow this satiny Superb Gem. Immaculate aside from the infrequent pinpoint fleck. The design elements are sharply struck, save for the usual softness in portions of the Indian's hair and the bison's fur. Population: 36 in 67 (1 in 67+), 0 finer (5/15).
Ex: Houston Signature (Heritage, 11-12/2012), lot 3915. NGC ID# 22S5, PCGS# 3957

3385 **1926-D MS64 PCGS.** Like its quarter dollar counterpart, the 1926-D Buffalo nickel is one of the classic weak strikes in the series, and this is evident on the current piece in moderate striking deficiency on each side. The surfaces are nonetheless smooth and appealing, with iridescent nickel-gold luster. NGC ID# 22S6, PCGS# 3958

3386 **1926-S AU53 NGC.** The 1926-S, with a mintage of only 970,000 coins (the lowest in the series) garners much attention in all grades. This AU representative is pleasing on the eyes, with hints of violet and lilac interspersed throughout the pale olive-gold patina. Light wear is present, but leaves the devices reminiscent of a sharp strike. NGC ID# 22S7, PCGS# 3959

1927-S Nickel, MS64
Glossy Light Golden Patina

3387 **1927-S MS64 PCGS.** The nickel-gray and golden surfaces of this Choice 1927-S Buffalo are struck to a glossy sheen with polished dies, although there is trivial design weakness on the bison's shoulder and immediately above the Indian's braid. No abrasions are apparent, and the overall eye appeal is consistent on each side. There are 32 numerically finer representatives at PCGS (5/15). NGC ID# 22SA, PCGS# 3962

1930 Buffalo Nickel, MS67
None Finer at PCGS or NGC

3388 **1930 MS67 PCGS. CAC.** The 1930 nickels are generally well-produced and attractive, with a degree of "sameness" that is not displeasing, but often not outstanding. This Superb Gem example is an exception, with distinctive lilac and reddish-gold toning combined with dazzling mint luster. The strike is unfailingly sharp on both sides except immediately over the hair braid, which is always the weak spot for this issue. Neither PCGS nor NGC has certified a numerically finer example. CAC endorsed. Population: 32 in 67, 0 finer (5/15). NGC ID# 22SH, PCGS# 3969

1930-S Nickel, MS66+
Fresh, Shimmering Luster

3389 **1930-S MS66+ PCGS. CAC.** Although available in circulated grades, the 1930-S is recognized as a notably scarce issue in Premium Gem and finer condition. This Plus-designated piece emits silky-smooth luminescence amid pastel shades of champagne and lavender-blue toning. Some of the usual striking deficiency is noted on the bison's shoulder and the Indian's braid, but this is not distracting. PCGS shows only five numerically finer representatives (4/15). NGC ID# 22SJ, PCGS# 3970

1934 Buffalo Nickel, MS67
None Numerically Finer

3390 **1934 MS67 PCGS.** The 1934 Buffalo nickel is a plentiful date in the absolute sense, but it is rare as fine as the present example. Both sides of this glowing Superb Gem display delicately preserved, satiny luster with lovely shades of ice-blue and pale champagne color throughout. Some minor die fatigue is evident in the recesses, but the striking definition is not overly compromised, with just trivial weakness on the bison's shoulder and the hair immediately above the Indian's braid. Population: 27 in 67 (2 in 67+), 0 finer (4/15). NGC ID# 22SL, PCGS# 3972

1934-D Buffalo Nickel, Sharp MS66
Beautiful Patina, None Graded Finer

3391 **1934-D MS66 PCGS.** One glance at the eye appeal of this coin clearly gives the correct impression that it is among the finest survivors of the issue. The preservation is essentially pristine amid pale violet and rose-gold patina on each side. The mintmark is nearly filled in and the bison's back leg shows some minor die erosion, also perceptible elsewhere, but the strike is nicely executed for the state of the dies. Population: 71 in 66 (3 in 66+), 0 finer (4/15). NGC ID# 22SM, PCGS# 3973

3392 **1937-D Three-Legged, FS-901 — Artificial Toning — NGC Details. Unc. FS-901.** While we defer to the judgement of NGC regarding the toning, the vibrant shades of peach-gold, steel-blue, and lemon-yellow are undeniably pleasing. Full satiny luster emphasizes the smooth surfaces and unmarked devices. This piece would be completely at home in an advanced set of toned nickels.

3393 **1937-D Three-Legged, FS-901, MS61 NGC.** What this Uncirculated Three-Legged nickel lacks in flamboyance it makes up for in natural appeal. The surfaces display an underlying glow of copper-gold luster beneath earthy-tan patina. The strike is relatively sharp for the issue, and the three-legged die effacement is in full evidence. PCGS# 38475 Base PCGS# 3982

3394 **1938-D/S Overmintmark, FS-511, MS67+ NGC.** The previous S is plainly visible beneath the D mintmark on this popular *Guide Book* variety. This high-end example displays glowing satin surfaces, with soft sun-gold, lavender, and powder-blue hues blending over each side. The design elements are well-defined and the preservation is exceptional. NGC lists only six numerically finer overmintmark representatives (4/15). PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKELS

1913 Type One Buffalo Nickel, PR66
Sharp Example, First-Year Matte Proof

3395 **1913 Type One PR66 PCGS. CAC.** A wide-rimmed example, with the softly lustrous, monochromatic lilac-gray patina often seen on these first-year Type One matte proofs. Full details define the devices. A proof mintage of 1,520 pieces was plenty for the issue, as the public did not appreciate the subtleties of the proof format. Most were sold as part of proof sets. Today, collectors recognize the issue as a one-year type coin and have also come to appreciate the matte finish. NGC ID# 278R, PCGS# 3988

3396 **1914 PR66+ PCGS. CAC.** This brilliant matte proof is fully rendered on even the finest design details, and close study with a lens fails to reveal even the most minuscule surface impairment. The 1914 is one of the most well-made proof Buffalos from the early period, and this piece is a beautiful representative of this quality. NGC ID# 278T, PCGS# 3991

3397 **1936 Type One — Satin Finish PR66 PCGS. CAC.** Iridescent surfaces flash pale champagne or ice-blue hues depending on which way the coin is tilted beneath a light. The strike is full and the preservation is outstanding. NGC ID# 278X, PCGS# 3994

1936 Buffalo Nickel, PR67+ Type One, Satin Finish

3398 **1936 Type One — Satin Finish PR67+ PCGS.** The glowing satin surfaces of this Superb Gem proof exude soft ice-blue and champagne hues, with hints of mint and rose-gold throughout. The strike is fully rendered and the eye appeal is seemingly unsurpassable for the issue. The total mintage for this date, including both the satin and brilliant finishes, was only 4,420 pieces. PCGS shows just 37 numerically finer representatives of this Type One variant (5/15). NGC ID# 278X, PCGS# 3994

3399 **1936 Type Two — Brilliant Finish PR67 ANACS.** A blush of iridescent toning deepens to olive-tinged gold around the reverse periphery on this carefully preserved brilliant proof. Fully rendered design elements are accentuated by glassy fields. NGC shows 18 numerically finer representatives (4/15). NGC ID# 278Y, PCGS# 3995

1936 Buffalo Nickel, PR67 Type Two, Brilliant Finish

3400 **1936 Type Two — Brilliant Finish PR67 PCGS. CAC.** Orange and pink tints endow the centers, while the fields shimmer with ice-blue iridescence. All design elements are exactingly defined, which includes the curve of the tail, the bison's hair at 9 o'clock, and the Indian's braid. The low mintage of 4,420 pieces is divided into Satin and Brilliant finishes. PCGS has certified a mere seven pieces numerically higher (4/15).
Ex: Long Beach Signature (Heritage, 6/2006), lot 885; FUN Signature (Heritage, 7/2012), lot 4004. NGC ID# 278Y, PCGS# 3995

3401 **1937 PR65 NGC.** Caramel-gold toning dominates, although a blush of lavender is noted near the Indian's braid. Well struck and satiny. A loupe reveals a distribution of minute flecks. NGC ID# 278Z, PCGS# 3996

3402 **1937 PR66 PCGS. CAC.** Mirrored fields provide an eye-appealing backdrop for the well-struck, satiny motifs on each side of this Premium Gem proof Buffalo, while a glaze of light golden toning adds a degree of warmth to the display. No marks or distracting hairlines are observed. NGC ID# 278Z, PCGS# 3996

1937 Nickel, Reflective PR67+

3403 **1937 PR67+ PCGS. CAC.** All 1938 nickel coinage at Philadelphia was with the new Jefferson dies, making the 1937 the final proof issue in the Buffalo nickel series. This high-end Superb Gem displays deeply mirrored fields with sharp, glossy devices. A hint of light golden toning is discernible, although the coin has a brilliant first-glance appearance. PCGS shows 22 numerically finer representatives (4/15). NGC ID# 278Z, PCGS# 3996

1937 Buffalo Nickel, Rose-Gray PR68

3404 **1937 PR68 NGC.** The gleaming rose-gray surfaces are completely free of mentionable distractions on this impeccably preserved coin. The sharp proof strike is an obvious plus. This Superb Gem proof is tied for the finest certified at both NGC and PCGS with the sole exception of one PR69 at PCGS. A great-looking type coin. Census: 49 in 68 (4 in 68 ★), 0 finer (4/15). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

3405 **1940 MS67+ Full Steps PCGS.** For the Registry Set enthusiast, this high-end Superb Gem is a must-have specimen, with impeccably preserved surfaces that radiate vibrant mint luster under shades of greenish-gold and ice-blue toning. The sharply detailed design elements include Full Steps definition on Monticello's stairs. Population: 55 in 67 (5 in 67+) Full Steps, 0 finer (5/15). NGC ID# 22TD, PCGS# 84007

1940-S Jefferson Nickel, MS67+ Full Steps
Unblemished Surfaces, Colorful Toning

3406 **1940-S MS67+ Full Steps PCGS.** Struck from recently polished dies, the fields show ultra-smooth surfaces and strong reflectivity. The strike on Jefferson's portrait is sharp, and nearly 6 Full Steps are visible on the reverse, although some architectural features on Monticello are slightly blended. Any marks are microscopic and do not distract. Visually, the coin is everything a high-end Superb Gem should be, with golden iridescence and pale blue colors flashing amid bright mint luster. It is the sole PCGS Plus-graded coin at this level, and no coin is numerically finer at either service. PCGS population: 12 in 67 (1 in 67+) Full Steps, 0 finer (5/15). NGC ID# 22TF, PCGS# 84009

3407 **1941-D MS67+ Full Steps PCGS.** This high-end Superb Gem exhibits well-detailed design elements, including Full Steps definition on Monticello, and the impeccably preserved lustrous surfaces are blanketed in shades of greenish-gold and ice-blue toning. PCGS has graded one numerically finer example (5/15). NGC ID# 22TH, PCGS# 84011

3408 **1944-S MS68 PCGS.** Attractive shades of lavender and pale gold toning grace the flawless surfaces of this magnificent MS68 specimen. The design elements are sharply detailed and vibrant mint luster adds to the incredible eye appeal. Population: 2 in 68, 0 finer (5/15). NGC ID# 22TW, PCGS# 4024

3409 **1944-S MS67 Full Steps PCGS.** Olive-gold toning dominates both sides, but blushes of steel-blue are noted near Jefferson's eye and the TS in CENTS. Population: 44 in 67 (8 in 67+) Full Steps, 0 finer (5/15). NGC ID# 22TW, PCGS# 84024

3410 **1961-D MS66 PCGS.** Suitable for Registry purposes, this Premium Gem 1961-D nickel is one of just 10 for the grade at PCGS, with a single MS67 coin finer (5/15). Full Steps examples of this date are almost unobtainable, with just three seen by PCGS in all grades. This coin displays soft lavender and powder-blue hues, with deeper sun-gold and amber accents over portions of each side. NGC ID# 22VB, PCGS# 4070

3411 **1990-P MS67 Full Steps PCGS.** The steps are indeed full on this Superb Gem Registry coin. Pastel rainbow colors on the obverse yield to primarily sun-gold on the reverse. Tied with just three others for finest at PCGS (5/15). NGC ID# 22X3, PCGS# 84124

PROOF JEFFERSON NICKEL

3412 **1938 PR68 NGC.** This Registry-quality Superb Gem ranks among the finest 1938 proof Jeffersons certified at either leading service, and is visually spectacular, as well. Iridescent champagne, lavender, and powder-blue hues blanket the mirrored fields and lend an eye-appealing complement to the sharp, satiny devices. Census: 13 in 68 (1 in 68 ★), 0 finer (4/15). NGC ID# 279W, PCGS# 4175

EARLY HALF DIMES

3413 **1795 V-3, LM-4, R.6 — Surfaces Tooled — PCGS Genuine.** In our opinion, this coin has the details of a VF specimen that has been tooled. A moderately granular steel-gray half dime. The portrait has a few shallow depressions, and clusters of thin marks are noted above the eagle's head and on the reverse margin at 6 and 10 o'clock. A seldom-encountered die marriage. PCGS# 38588 Base PCGS# 4251

1795 Flowing Hair Half Dime, VF35
V-4, LM-10, Collector-Grade Type Coin

3414 **1795 V-4, LM-10, R.3, VF35 NGC. CAC.** A late die state example, with the diagnostic rim cud evident above the TY in LIBERTY and star 9. This piece is ideally suitable to represent the Flowing Hair type, particularly for the budget-conscious collector who finds the occasional Mint State offering to be out of reach. Both sides are boldly detailed for the grade, with deep olive-green, lemon-gold, amber, and pale aquamarine patina. The left obverse and corresponding reverse borders are not fully defined, but the eye appeal is hardly affected. PCGS# 38594 Base PCGS# 4251

3415 **1800 V-1, LM-1, R.3, PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been cleaned. A lightly hairlined and subdued cream-gray example. Visible marks are absent except for a line near the O in OF. Granularity is limited to a small area of the reverse field above the arrows. PCGS# 38601 Base PCGS# 4264

BUST HALF DIMES

3416 **1829 V-7, LM-1, R.2, MS63 Prooflike NGC.** A flashy and fully brilliant Select half dime from the initial year of the Capped Bust type, struck years after John Reich departed from the U.S. Mint. The centers display minor incompleteness, but peripheral elements are intricate. NGC has certified only 15 1829 half dimes as Prooflike, along with a single piece as Deep Prooflike (4/15). *Ex: FUN Signature (Heritage, 6/2008), lot 670, which realized $1,265.* PCGS# 38612 Base PCGS# 4276

1829 Half Dime, V-2, LM-3, MS65
First-Year Capped Bust Type Coin

3417 **1829 V-2, LM-3, R.2, MS65 PCGS.** Following a halt in 1805, coinage of half dimes resumed in 1829 with a mintage of 1.23 million coins. The issue remains available for type purposes, but is nonetheless conditionally challenging at the Gem grade level and rare any finer. This piece displays sharp design elements amid satiny luster. Tinges of vivid sun-gold, cherry-red, and forest-green highlight the lower portions of the obverse, while the remainder of each side exhibits soft lavender and olive-gray hues. Population: 25 in 65, 12 finer (4/15). PCGS# 38614 Base PCGS# 4276

3418 **1831 V-4, LM-4, R.2, MS64 PCGS. CAC.** Delicate tan-gold and powder-blue toning graces this coruscating and crisply struck near-Gem. Exceptionally free from marks. LM-4 is distinctive for its repunching on star 2 and the O in OF. PCGS# 38659 Base PCGS# 4278

3419 **1832 V-8, LM-5, R.1, MS64 PCGS.** The second S in STATES is filled on this available variety. The present example exhibits outstanding eye appeal, suitable for type or date representation. Satin luster illuminates well-struck devices. The reverse is brilliant but the obverse displays shades of golden-brown, violet-red, and navy-blue toning. PCGS# 38667 Base PCGS# 4279

3420 **1832 V-8, LM-5, R.1, MS64 PCGS.** Iridescent cherry-red, aquamarine, and butter-gold toning fills the fields of this satiny and precisely struck near-Gem. Without any detectable marks. The second S in STATES is filled, as is the upper half of the N in UNITED. The U in UNITED has a triple-punched base. PCGS# 38667 Base PCGS# 4279

3421 **1833 V-6, LM-9, R.2, MS64 PCGS.** A stone-white obverse is paired with a deeply variegated forest-green and mauve reverse. Devoid of evident abrasions. Peripheral elements are well struck, but softness is noted near the left border of the shield. PCGS# 38700 Base PCGS# 4280

3422 **1835 Large Date, Large 5C, V-3, LM-3, R.1, MS64 PCGS.** The second S in STATES is entered low on the collectible LM-3 marriage. Medium cream-gray centers are framed by chestnut-brown and jade-green borders. Well struck and satiny with a mark-free appearance. PCGS# 38709 Base PCGS# 4282

3423 **1835 Large Date, Large 5C, V-4, LM-7, R.3, MS65 PCGS.** Lustrous and bold, with only slight softness at the wing junction with the top left (facing) shield point. Richly toned at the borders in blue-green, russet, and reddish-gold shades, merging into golden-ivory centers. An area variously described as die clashing or metal flow lines appears as a crescent in front of Liberty's portrait. A bold die crack connects the outer points of stars 12 through 9. The scarcer of two varieties with the Large Date and Large 5C. PCGS# 38711 Base PCGS# 4282

3424 **1836 3 Over Inverted 3, V-4, LM-3, FS-301, R.1, MS64 NGC.** Forest-green borders surround autumn-brown centers. A coruscating and crisply struck example. No marks are apparent, although a small lint mark is noted on the field near Liberty's chin. PCGS# 38729 Base PCGS# 94288

3425 **1836 Small 5C, V-6, LM-5, R.2, MS64 PCGS. CAC.** Moderate autumn-gold and lavender toning visits this coruscating and crisply struck Choice half dime. Pristine aside from a solitary hair-thin line on the field near the shoulder curl. PCGS# 38728 Base PCGS# 4288

SEATED HALF DIMES

3426 **1838 Large Stars, No Drapery MS65 NGC.** A well-struck, Gem example of this short-lived No Drapery type. Both sides display sharp motifs and luminous, satiny luster shining through a blend of gunmetal-blue, lavender, and amber-gray toning. NGC ID# 2TXX, PCGS# 4317

3427 **1839 No Drapery MS65 NGC.** This is a sharply defined No Drapery type coin, with Gem-quality surfaces and soft, satiny luster. Both sides show primarily lavender-gray and gunmetal-blue toning, although small bits of gold and amber are also in evidence. Census: 36 in 65, 31 finer (5/15). NGC ID# 232S, PCGS# 4319

3428 **1845 MS66 PCGS. CAC.** This attractive Premium Gem is impressively well-preserved, with satiny mint luster and well-detailed design elements, under shades of champagne-gold and lavender toning. Population: 19 in 66 (2 in 66+), 7 finer (5/15). NGC ID# 2337, PCGS# 4335

3429 **1850 MS66 PCGS.** Attractively toned in alternating shades of steel-blue, violet, and rose-gold across both the obverse and the reverse. There are no distracting marks or weakness of strike to report. Mint luster radiates from both sides in cartwheels, unhindered by the rich patina. Population: 19 in 66, 11 finer (4/15). NGC ID# 233F, PCGS# 4345

3430 **1852 MS65 NGC. CAC.** Half dollars and dollars of this Philadelphia date are notable rarities, while half dimes, dimes, and quarters are more readily available in all grades. At the Gem level, though, all of the 1852 silver denominations become challenging. This is a particularly well-preserved half dime, with lilac overtones covering frosted, silver-gray surfaces. Plentiful mint luster shines through. The coin is fully struck throughout, with no marks worthy of individual mention. CAC endorsement confirms the quality. Census: 33 in 65, 15 finer (4/15). NGC ID# 233K, PCGS# 4349

3431 **1853 No Arrows MS65 PCGS.** The 1853 No Arrows half dime is significantly scarcer than its With Arrows counterpart, seldom seen in any Mint State grade, let alone Gem or better condition. This light golden example is pleasantly sharp throughout, with remnants of minor clash marks on each side. A few faint grazes on the high points of Liberty's figure are all that preclude an even loftier grade. Population: 8 in 65, 12 finer (4/15). NGC ID# 233M, PCGS# 4351

3432 **1854 Arrows MS66 NGC.** Despite a mintage of 5.74 million pieces and although many were set aside as curiosities, few examples of the 1854 Arrows half dime are seen as well-preserved. This piece shows snow-white surfaces and thick mint frost. Nearly perfect, with the only a touch of striking softness over the A in HALF. Census: 19 in 66, 4 finer (5/15).
Ex: Denver Signature (Heritage, 8/2006), lot 817. NGC ID# 2342, PCGS# 4358

3433 **1856 MS66 PCGS.** This attractive Premium Gem display well-detailed design elements, with just a touch of softness on the lefthand stars. Satiny mint luster shines through shades of greenish-gold and lavender-gray toning. Population: 11 in 66 (2 in 66+), 1 finer (5/15). NGC ID# 233P, PCGS# 4363

3434 **1857 MS66 PCGS. CAC.** An impressive Premium Gem specimen, with sharply detailed design elements and well-preserved lustrous surfaces, under delicate shades of lavender and golden-tan toning. Population: 39 in 66 (6 in 66+), 6 finer (5/15). NGC ID# 233S, PCGS# 4365

3435 **1857 MS66 PCGS. CAC.** Areas of colorful toning add to the eye appeal of this Premium Gem example. Shades of pale blue, lavender, and gold appear on the obverse, while the central reverse reveals areas of rich yellow-gold, orange, and red. Light clash marks are present on this piece exhibiting blending at large portions of the dentils as is typical. Population: 39 in 66 (6 in 66+), 6 finer (5/15). NGC ID# 233S, PCGS# 4365

1858 Seated Half Dime, MS67
Seldom Seen Finer

3436 **1858 MS67 PCGS.** These small coins were prone to die clashing, and evidence of clashed dies shows on both sides of this otherwise unmarked coin. The *Guide Book* lists three date varieties for the 1858 half dime — a scarce Repunched High Date and an equally scarce Inverted Overdate, as well as a Normal Date. This is the Normal Date variety. The frosted surfaces of the coin are lustrous and lightly toned on both sides, where orange-gold toning mingles with lilac accents and bold mint luster. Only a single coin is numerically finer than this sharply struck and attractive Superb Gem at PCGS. Population: 15 in 67 (1 in 67+), 1 finer (4/15). NGC ID# 233U, PCGS# 4367

3437 **1860 MS67 NGC. CAC.** Were this delicately preserved Superb Gem struck a little sharper on the upper-left portion of the wreath and the correspond obverse rock, it might have ranked at the MS68 numerical level. As it stands, the surface quality cannot be surpassed for an MS67 coin, and original toning in shades of rose-gold and aquamarine further contribute to the eye appeal. Census: 23 in 67 (1 in 67+, 1 in 67 ★), 7 finer (4/15). NGC ID# 2347, PCGS# 4377

3438 **1860 MS67 PCGS. CAC.** The year 1860 saw the production of 798,000 half dimes, and the issue often serves as a first-year type because of the addition of the obverse legend. This gorgeous Superb Gem features bright mint luster that shines through mostly violet-gray toning, with areas of peripheral ice-blue and sea-green color. Sharply struck and attractive. Population: 41 in 67, 4 finer (5/15). NGC ID# 2347, PCGS# 4377

3439 **1861/0 FS-301 MS65 PCGS.** Die fill west of the 1 in the date suggests an underdigit 0, although the variety's status as a true overdate is contested. Dusky apricot-gold and silver-gray dominate, but the rims offer blushes of lavender and steel-blue. Unabraded and satiny. PCGS# 145479 Base PCGS# 4380

3440 **1862 MS67 PCGS.** A Superb Gem grade from PCGS is fully appropriate for this boldly struck and impeccably well-preserved 1862 half dime. Frosty light-golden luster on the reverse deepens to amber, violet, and navy blue toward the borders, while the obverse exhibits mint-green, lilac and powder-blue in the center with splashes of deep russet and olive at the top and bottom. Population: 56 in 67 (6 in 67+), 4 finer (5/15). NGC ID# 234B, PCGS# 4381

PROOF SEATED HALF DIMES

1858 V-8 Half Dime
Lightly Toned PR65 Cameo

3441 **1858 PR65 Cameo NGC.** The Valentine-8 proof dies show a die file line between IC on the reverse and rather soft 8s in the date and the lower ball of the 5. This variety is more frequently seen than the V-4a proof dies. A range of attractive colors enhances each side of this Gem Cameo proof, including pinkish-gold, moss-green, and slate-violet patina. Some die roughness shows on the obverse, along with a soft strike around Liberty's upper gown, and a few thin ticks on Liberty's left (facing) thigh. The reverse is distraction-free, but both sides offer plenty of eye appeal as well as a broad quotient of collectibility. Census: 3 in 65 Cameo, 2 finer (5/15). PCGS# 84437

1859 Half Dime, PR65
Paquet Obverse

3442 **1859 PR65 PCGS.** Warm sun-gold toning glows in the mirrored fields of this boldly struck Gem proof, while the relief elements show occasional glimpses of lilac and sky-blue. This issue was struck using an obverse design by Anthony Paquet, similar to Gobrecht's Seated Liberty motif but with a mildly slimmer Liberty and stars fashioned with a hollow interior. Population: 24 in 65 (1 in 65+), 18 finer (5/15). NGC ID# 235P, PCGS# 4438

1862 Half Dime, PR67 ★ Cameo
Splendidly Contrasted Example

3443 **1862 PR67 ★ Cameo NGC.** Splashes of honey-gold, ocean-blue, ruby, and aqua patina endow this razor-sharp Superb Gem. Icy devices demonstrate bold contrast with the flashy fields. Just 550 proofs were struck, and this gleaming example ranks high among the very finest 1862 Cameo proof half dimes. The sole PR67 example to receive the NGC star designation. Census: 7 in 67 Cameo (1 in 67 ★ Cameo), 3 finer (5/15).
Ex: Dallas Signature (Heritage, 11/2006), lot 485. PCGS# 84445

3444 **1864 PR65 Cameo NGC.** A delicate Gem proof, with stark white-on-black contrast accentuating the bold design definition. A thin veil of light golden toning adds a degree of warmth to each side. Census: 6 in 65 Cameo, 6 finer (5/15). PCGS# 84447

1865 Half Dime, PR66 Cameo
Lovely Peripheral Toning

3445 **1865 PR66 Cameo PCGS.** Appreciable contrast is seen against a backdrop of russet and turquoise peripheral toning. Proofs from this year enjoy added popularity due to their proximity to the Civil War and low total production for the year of just 13,500 pieces. This two-toned specimen ranks among the finer survivors of 500 proofs struck. Mild die doubling on the reverse wreath and legend is diagnostic of this proof die pair. Population: 11 in 66 (1 in 66+) Cameo, 2 finer (4/15).
Ex: Long Beach Signature (Heritage, 2/2005), lot 6167. PCGS# 84448

1869 Seated Liberty Half Dime, PR67
Only One Finer Coin at NGC

3446 **1869 PR67 NGC.** Only 600 proof Seated Liberty half dimes were struck in 1869 and this spectacular Superb Gem is one of the finest survivors. The design elements exhibit razor-sharp definition throughout and the well-preserved deeply mirrored fields are blanketed in shades of golden-brown and cobalt-blue toning. Census: 9 in 67 (1 in 67 ★), 1 finer (5/15). NGC ID# 2366, PCGS# 4452

1869 Half Dime, Richly Toned PR67 Cameo

3447 **1869 PR67 Cameo NGC.** The 1869 half dime saw a production of 600 proofs. NGC and PCGS have seen 360 submissions, mostly in near-Gem and Gem. This Superb Gem exhibits remarkable contrast between the frosted devices and the richly toned fields. On the obverse, golden patina graces the figure of Liberty, while deeper violet, blue, and green-gold toning covers the moderately reflective surfaces. On the reverse, the wreath is part silver-gray and part champagne-gold, while the remainder of that side has more opaque patina in similar colors. Both sides exhibit sharply struck devices and are impeccably preserved. Census: 9 in 67 Cameo (3 in 67 ★ Cameo), 2 finer (5/15).
Ex: Long Beach Signature (Heritage, 2/2007), lot 2843. PCGS# 84452

3448 **1870 PR65 PCGS.** The bold devices and glassy fields on each side of this lovely Gem proof are accentuated by vivid ocean-blue, violet, and rose-gold hues, with a few tinges of mint-green also evident on the reverse. From a mintage of only 1,000 proofs. Housed in a first generation holder. Population: 21 in 65 (1 in 65+), 17 finer (4/15). NGC ID# 2367, PCGS# 4453

3449 **1870 PR65+ PCGS.** Sharply struck with variegated layers of green, mauve, plum, and gray patina over both sides. A well-preserved Gem proof example with splendid eye appeal. Population: 21 in 65 (1 in 65+), 17 finer (5/15). NGC ID# 2367, PCGS# 4453

1871 Half Dime, PR65 Deep Cameo
Sole Finest at PCGS

3450 **1871 PR65 Deep Cameo PCGS. CAC.** This fully brilliant Gem half dime features spectacular Deep Cameo contrast and equally bold eye appeal. Frosty devices show complete definition that is typical of a proof strike, while the deep mirrors surrounding the motifs are highly reflective with few indications of contact. The 1871 has one of the larger proof mintages in the series with 960 specimens struck, yet this ideal Registry coin is the sole finest example with a Deep Cameo designation at PCGS (5/15). PCGS# 94454

3451 **1873 PR66 PCGS. CAC.** Lovely ocean-blue and rose-gold toning adorns this flashy and undisturbed Premium Gem. The strike is full aside from a few grains on the upper left portion of the wreath. A scant 600 proofs were issued. NGC ID# 236A, PCGS# 4456

EARLY DIMES

1796 JR-1 Dime, Good 6
Bold Legends, Colorful Borders

3452 **1796 JR-1, R.3, Good 6 NGC.** All legends and stars are clear on this luminous first-year dime. The minutely granular surfaces show pearl-gray centers and iridescent aquamarine and lavender borders. Abrasions are inconsequential except for a hair-thin reverse mark between 12 o'clock and the left (facing) wingtip. PCGS# 38742 Base PCGS# 4461

3453 **1805 4 Berries, JR-2, R.2 — Improperly Cleaned — NGC Details. XF.** Deep gunmetal-gray toning blankets this sharply detailed Draped Bust type coin. The surfaces appear whizzed, and the rim is crimped beneath the 05 in the date and opposite above the TES in STATES. The portrait exhibits four tiny roundish marks.

3454 **1805 4 Berries, JR-2, R.2 — Scratch — PCGS Genuine. AU Details.** A pinscratch crosses the right obverse field between the rim at 2:30 and Liberty's jaw. A second and lesser pinscratch connects star 3 to a shoulder curl. Otherwise, this briefly circulated Heraldic Eagle type coin is a pleasing piece with silver-gray centers and forest-green margins. PCGS# 38769 Base PCGS# 4477

BUST DIMES

3455 **1811/09 JR-1, R.3, AU50 NGC.** A cream-gray better date dime with lavender, cobalt-blue, and apple-green undertones. Void of noticeable abrasions. An intermediate and unclashed die state with some, but not all, of the eventually dramatic reverse cracks. PCGS# 38772 Base PCGS# 4487

1824/2 JR-1 Dime, MS63
Semiprooflike and Colorful

3456 **1824/2 JR-1, R.3, MS63 NGC.** Although the blatant 2 underdigit receives more numismatic attention, the 8 in the date is also interesting, since it appears to be punched over a smaller 8. The present semiprooflike dime displays lovely forest-green, plum-red, and gunmetal-blue toning. The centers show incompleteness of strike but peripheral elements are crisp. PCGS# 38805 Base PCGS# 4502

1827 Dime, JR-5, MS63
Concentric Coloration

3457 **1827 JR-5, R.3, MS63 PCGS.** Entrancing concentric ribbons of color dazzle the eye, drawing in attention on a full display of the color spectrum throughout the margins on each side of this Select Capped Bust type coin. Tight rings of olive, sun-gold, pine-green, violet, amber, and steel-blue surround soft champagne centers and yield to deep midnight-blue around the outer peripheries. Subtle semiprooflike mirroring further highlights the peripheral recesses. The eagle's head and several obverse stars are weak, but the design elements are otherwise well-defined. A few minute abrasions on the obverse portrait limit the grade, but pale in comparison to the beautiful patina. PCGS# 38815 Base PCGS# 4504

3458 **1829 Small 10C, JR-7, R.1, MS63 PCGS.** Apple-green margins encompass dusky lilac and apricot centers. A sharply struck and semiprooflike example that has unabraded fields and unobtrusive contact on Liberty's cheek. PCGS# 38832 Base PCGS# 4511

3459 **1835 JR-9, R.2, MS62 PCGS.** The 83 in the date are repunched. This sharply struck and lustrous representative has a brilliant obverse. The reverse displays light olive-green and lavender shades. *Ex: Houston Signature (Heritage, 12/2009), lot 373, which realized $1,035.* PCGS# 38887 Base PCGS# 4527

SEATED DIMES

1838 Seated Dime, MS65
Fortin-101a, Small Stars, Dramatic Toning

3460 **1838 Small Stars MS65 NGC. Fortin-101a, R.3.** This is the late die state Small Stars variety, with prominent peripheral die cracks on each side. The reverse shows bold die doubling, most easily detected on the O and D in ONE DIME, as well as on the lower wreath leaves and bow. The relief elements are boldly impressed, and the surfaces show delicately preserved, frosty luster. Splashes of teal, gold, and pale lavender toning blanket each side, attesting to the originality of this immensely appealing No Drapery dime. Census: 8 in 65, 4 finer (5/15). NGC ID# 2TVT, PCGS# 4569

3461 **1839-O No Drapery MS63 PCGS. Fortin-101.** Small O. Blended tan-brown and stone-gray consume most of this coruscating New Orleans dime. Glimpses of sky-blue adorn the upper left stars. Marks are minimal aside from delicate abrasions west of star 13. Population: 6 in 63, 12 finer (5/15). NGC ID# 237Y, PCGS# 4572

1840 No Drapery Dime, MS65 'Chin Whiskers' Fortin-103

3462 **1840 No Drapery MS65 NGC. Fortin-103, R.3.** A Top 100 Variety. The "Chin Whiskers" variety, distinguished by several bold parallel die lines beneath the chin. Deep autumn-brown, dove-gray, and aquamarine toning blankets satiny and crisply struck surfaces. Unabraded except for a single, short mark on the field below star 8. For all die varieties, Census: 14 in 65, 13 finer (4/15). NGC ID# 237Z, PCGS# 4573

1841-O Small O, Closed Bud Die, VF20 In-Demand Transitional Variety, Fortin-102

3463 **1841-O Transitional Reverse, Small O, Closed Bud, VF20 NGC. Fortin-102.** A Top 100 Variety per Gerry Fortin. This reverse showing the Small O mintmark, was a die left over from the Closed Bud 1840-O coinage used to strike more dimes in early 1841. This pinkish-gray example shows one noticeable gash through Liberty's left (facing) arm, and two other mentionable marks show on the reverse, one left of the left branch tip, the other at the rim above the second T in STATES. Both, fortunately, miss the crucial design elements. Extensive wear and strike weakness are apparent on the reverse, which is essentially dentil-free, but the obverse is better-defined overall. This piece remains a nice, collectible midgrade example of this sought-after variety. PCGS# 145486

1842 Seated Dime, MS65 Fortin-106a, Rare Polished Die State

3464 **1842 MS65 NGC. CAC. Fortin-106a, R.7.** This rare late die state variant of Fortin-106 was discovered by Larry Briggs at the January 2011 FUN show. The dies are heavily polished to the point of delivering a prooflike appearance that has caused some series specialists to wonder if the coins struck from this polished die state were perhaps intended to be proofs. However, it is equally possible that the dies were worked down to remove rust or clash marks.

This Gem example delivers noticeable cameo contrast with bold, satiny devices and highly reflective fields. Pale champagne toning dominates each side, but yields occasional splashes of lavender and aquamarine color throughout. No lintmarks are discernible, an aspect of this coin which differs from the 2011 discovery piece. Census: 7 in 65, 5 finer (4/15). NGC ID# 2386, PCGS# 4581

3465 **1843 MS64 NGC. Fortin-105a.** Dusky mauve and olive-green toning encompasses this satiny and unmarked Choice dime. The strike is precise except on the dentils. Very scarce in the present quality. Census: 11 in 64, 7 finer (4/15). NGC ID# 2388, PCGS# 4583

1849-O Large O Dime, MS63 Rare in Uncirculated Grades

3466 **1849-O MS63 NGC. Fortin-101.** Large O. The mintmark was entered at an angle, which caused a deeply impressed top and a lightly brought up base. This die variety is associated with soft strikes, but the present Select example shows incompleteness only on star 13 and Liberty's hair. Toned medium dove-gray and golden-brown. Smooth except for faint field marks near the right (facing) knee. Census: 6 in 63, 3 finer (4/15). NGC ID# 238H, PCGS# 4592

1852 Seated Dime, MS65
In an Old Green Label Holder

3467 **1852 MS65 PCGS. Fortin-102a, R.3.** The 1 in the date is repunched on this variety, and the reverse is boldly cracked along the top of AMERICA. As a date, the 1852 is one of the more available No Arrows Seated dime issues from this early period, but it is still itself scarce in all Mint State grades and is rarely seen at the Gem level. This example displays satiny luster beneath consistent champagne-gold toning. The high points of Liberty's figure and the lower portion of the wreath are not fully defined, but the stars are sharp and there are no distracting abrasions. Population: 15 in 65 (1 in 65+), 7 finer (4/15). NGC ID# 238N, PCGS# 4597

1853 Arrows Dime, MS66
Lustrous and Untoned

3468 **1853 Arrows MS66 NGC. Fortin-101, R.2.** Hubbed Date and Arrows. Multiple obverse die cracks and a defect on Liberty's arm to the left of the pole identify the Fortin-101 variety. This example is sharply struck from a late state of the dies, as indicated by the presence of several advanced obverse cracks plus die clashing on the reverse not mentioned by Fortin. A brilliant, silver-white and frosty coin, with problem-free surfaces and fantastic eye appeal. Census: 45 in 66 (1 in 66+, 1 in 66 ★), 17 finer (5/15). NGC ID# 2398, PCGS# 4603

1853 Arrows Seated Dime, MS66
Lightly Toned, Frosty Surfaces

3469 **1853 Arrows MS66 PCGS. Fortin-5, R.3.** Unhubbed Date and Arrows. Lilac and gold hues vie for attention over the frosted surfaces of this lustrous Premium Gem dime. A fully struck coin, with Liberty's head and hair strands bold and each of the stars fully formed. The reverse is equally sharp. More than 12 million pieces were struck, a feat unmatched until more than 15 million dimes were struck in 1891. Population: 35 in 66 (1 in 66+), 20 finer (5/15). NGC ID# 2398, PCGS# 4603

1853 Arrows Dime, MS66
Three-Year Subtype

3470 **1853 Arrows MS66 NGC. CAC.** Hubbed date and arrows. The jade-green centers are framed by plum-red peripheries. The strike is sharp except on the dentils. Lustrous and unabraded with imposing eye appeal. Housed in a prior generation holder. Census: 45 in 66 (1 in 66+, 1 in 66 ★), 17 finer (4/15). NGC ID# 2398, PCGS# 4603

3471 **1857 MS66 NGC. Fortin-108.** The pearl-gray centers are bounded by deep sunset-orange patina with accents of moss-green and emerald on this attractive Premium Gem Seated dime. The edge is filed near the obverse at 2:30. Census: 15 in 66 (2 in 66+), 1 finer (5/15). NGC ID# 238X, PCGS# 4614

1857-O Dime, Bold MS66
Challenging So Fine

3472 **1857-O MS66 NGC. Fortin-107a, R.3.** Medium O. The usual late die state, with a pair of obverse cracks originating at 8 o'clock and stretching to the upper rock and the date. As a date, the 1857-O dime is unusually available for a branch mint issue from this period, aided by a mintage in excess of 1.5 million coins. Nonetheless, Premium Gem or finer representatives are rarely seen. This piece displays sharp detail and satiny luster, with complementary olive-gray and pale gold hues overall. Census: 14 in 66 (1 in 66+), 8 finer (4/15). NGC ID# 238Y, PCGS# 4615

1858 Dime, MS66+
Superior Eye Appeal

3473 **1858 MS66+ NGC. Fortin-110.** A beautiful high-grade Stars Obverse dime. The strike is full, and the lustrous surfaces are lightly toned in peripheral jade-green and caramel-gold shades. Both sides are double clashed but nearly void of contact. Census: 7 in 66 (1 in 66+, 1 in 66 ★), 5 finer (4/15). NGC ID# 238Z, PCGS# 4616

3474 **1860 MS66 NGC.** The strike on this piece is razor-sharp throughout, and the carefully preserved surfaces are illuminated by vibrant frost-white luster. This moderately available Philadelphia issue is conditionally rare in Gem or finer grades. Census: 11 in 66, 3 finer (5/15). NGC ID# 239D, PCGS# 4631

3475 **1862-S XF45 PCGS. Fortin-101.** An unheralded rarity, the 1862-S has a low survival rate from its West Coast mintage of 180,750 pieces. The present aquamarine and cream-gray representative has sharp definition and pleasing surfaces. Population: 6 in 45, 9 finer (5/15). NGC ID# 239J, PCGS# 4636

3476 **1866 MS62 PCGS. Fortin-102b.** Orange-gold, fire-red, steel-gray, and sea-green embrace this nicely struck and semiprooflike dime. Minimally abraded, although a spot is noted on the base of the D in DIME. The upper left portion of the wreath is lightly die doubled, a feature not yet noted in the Fortin online reference. NGC ID# 239S, PCGS# 4643

1867-S Seated Dime, MS62
Scarce This Nice

3477 **1867-S MS62 PCGS. Fortin-102, R.4.** A moderate mintage of 140,000 pieces makes this San Francisco issue a slightly better date, particularly in Mint State. Few Uncirculated examples exceed the grade of the present example, which displays two-tone gold and lilac shades over both sides. Sharply struck except at Liberty's head, which lacks completeness as often seen for the series. Nice luster provides strong eye appeal. Population: 1 in 62, 9 finer (5/15). NGC ID# 239V, PCGS# 4646

3478 **1872-CC — Tooled — PCGS Genuine. VF Details. Fortin-101.** The 1872-CC dime is a major key date in the Seated dime series, spurred by a low mintage of only 35,480 pieces. This example shows moderately pleasing detail. The surfaces are unnaturally bright with steel-gray color, and there is evidence of repair work in the recesses. NGC ID# 23A8, PCGS# 4657

1876-S Seated Dime, MS66
None Finer at PCGS

3479 **1876-S MS66 PCGS. Fortin-118, R.4.** Early Die State. Turquoise and mauve toning meet in irregular-shaped patches over both sides of this interesting Seated dime. The strike is sharp on Liberty's portrait and equally so on the cereal wreath. Struck from seemingly perfect dies, with few distinguishing characteristics matching the Fortin variety reference. Mint luster glows beneath the unusual patina. A coin of high technical merit and a fascinating toning scheme. Population: 10 in 66, 0 finer (5/15). NGC ID# 23AK, PCGS# 4681

3480 **1877-CC MS65 NGC. Fortin-106.** Type Two Reverse. Autumn-brown and stone-gray centers are framed by peripheral aquamarine. A loupe fails to locate any marks on this lustrous and fully struck Gem. An available Carson City issue, although scarce in the present quality. Census: 74 in 65 (2 in 65+), 58 finer (4/15). NGC ID# 23AM, PCGS# 4683

3481 **1879 MS66 PCGS. Fortin-102, R.3.** Our consignor provided many coins housed in old green-label holders, suggesting that these coins were certified more than 20 years ago. The quality of the coins is exceptional. This Seated dime is easily identified as Fortin-102, with a weak base above 87 in the date and a diagnostic die scratch at the lower wreath. A Premium Gem — with frosted devices surrounded by prooflike fields, and a ring of attractive, blue and gold rim toning that frames the brilliant silver centers. The coin is sharply struck with just a few tiny marks on Liberty's right upper arm. Only 14,000 pieces were struck. Population: 58 in 66 (3 in 66+), 25 finer (4/15). NGC ID# 23AS, PCGS# 4687

3482 **1882 MS67 NGC. Fortin-111, R.3.** Radiant luster lies beneath the blended champagne and aquamarine patina that blankets both sides of this Superb Gem representative. Liberty's head and the upper-left portion of the wreath show trivial weakness, but the there are no other complaints. Census: 28 in 67 (1 in 67 ★), 2 finer (4/15). NGC ID# 23AV, PCGS# 4690

3483 **1884-S MS63 NGC. Fortin-Unlisted.** Fortin's obverse 2 is paired to an unlisted tail die. The reverse is in a perfect die state and is fully prooflike, with the mintmark perfectly centered between the ribbon ends. The obverse is frosty with mild abrasions. A bold strike and light golden toning ensure strong eye appeal. Census: 14 in 63, 16 finer (5/15). NGC ID# 23AY, PCGS# 4693

3484 **1886 MS66+ NGC. CAC. Fortin-105, R.4.** A Top 100 Fortin Variety, showing the 86 in the date boldly repunched. This is a high-end Premium Gem, with well-detailed design elements and partially prooflike surfaces under shades of champagne-gold and cerulean-blue toning. Census: 62 in 66 (3 in 66+, 5 in 66 ★, 2 in 66+★), 12 finer (5/15). NGC ID# 23B3, PCGS# 4696

3485 **1891 MS67 NGC. Fortin-121, R.3.** A hint of golden toning visits the borders of this otherwise brilliant Superb Gem. Close to immaculate from the technical perspective, although we note a couple of shallow mint-made strike-throughs near the D and M in DIME. Census: 19 in 67 (3 in 67 ★), 1 finer (4/15). NGC ID# 23BD, PCGS# 4706

PROOF SEATED DIMES

1857 Dime, Toned PR64
An Infrequently Seen Rarity

3486 **1857 PR64 NGC. Fortin-101, R.6.** The variety is attributed by a Medium Date with a Slight Downward Slope and a die line from the rim to the R in AMERICA. The PCGS website estimates 30 to 50 1857 proof dimes known, mostly in Select and near-Gem grades. Medium-intensity russet toning runs over both sides of this near-Gem offering. The design elements are sharply struck and no significant marks are apparent on either side. The Seated dime or proof specialist will not want to miss out on this infrequently seen rarity. Census: 10 in 64, 17 finer (5/15). NGC ID# 23CB, PCGS# 4746

1859 Seated Liberty Dime, PR66 Cameo
Scarcer Fortin-102 Variant

3487 **1859 PR66 Cameo NGC. Fortin-102.** Proofs struck from the Fortin-102 dies (with slight doubling on O in ONE) are much more difficult to locate than their Fortin-101 counterparts. This sharply detailed Premium Gem exhibits deeply mirrored fields that contrast boldly with the frosty design elements to create a stunning cameo effect. Eye appeal is terrific. Census: 6 in 66 Cameo (1 in 66 ★ Cameo), 12 finer (5/15). PCGS# 84748

3488 **1862 PR65 NGC. Fortin-101, R.3.** This fully struck Gem proof is awash in vivid ocean-blue, violet, and mint-gold toning, with a high degree of reflectivity observed in the fields when tilted against a light. From a meager mintage of only 550 proofs. Census: 10 in 65, 8 finer (5/15). NGC ID# 23CL, PCGS# 4755

3489 **1866 PR65 NGC. Fortin-102, R.3.** Fully struck design elements exhibit subtle cameo contrast against the glassy fields on this Gem 1866 proof, although the patination is a little too deep to warrant the appropriate designation. Pale rose and olive-gold hues are accentuated by sea-green and russet tinges. Census: 25 in 65, 20 finer (5/15). NGC ID# 23CP, PCGS# 4759

3490 **1866 PR64 Deep Cameo PCGS. Fortin-102.** Brilliant except for golden-brown borders. Luminous devices rise in full definition above glassy fields. A pair of minor lintmarks are noted above DIME. The base of the 1 is repunched north, and the second 6 is lightly repunched southwest. Likely, only the first proofs struck show this repunching, since the Fortin reference makes no mention of it, and also omits the minor die doubling on the upper left portion of the wreath. Population: 5 in 64 Deep Cameo, 5 finer (4/15). PCGS# 94759

1867 Dime, PR66 Cameo
Vivid Peripheral Color

3491 **1867 PR66 Cameo NGC. Fortin-103, R.5.** Repunching on the 1 and 7 in the date is diagnostic of this proof die pair. The present Premium Gem Cameo is sharply struck and shows stark field-motif contrast, with brilliant centers and deep blue and violet toning around the margins. A single, milky spot is noted on the reverse below the IM in DIME. Census: 6 in 66 Cameo (1 in 66 ★ Cameo), 3 finer (4/15). PCGS# 84760

3492 **1870 PR66 PCGS. CAC. Fortin-101.** A small proof mintage of 1,000 pieces was accomplished in 1870,making the issue quite rare in PR66 condition. This delightful Premium Gem offers sharply detailed design elements and deeply mirrored fields, under vivid shades of gold and lavender toning. Population: 8 in 66 (2 in 66+), 2 finer (5/15). NGC ID# 23CU, PCGS# 4763

3493 **1873 No Arrows, Closed 3, PR65 Cameo NGC. Fortin-101.** This impressive Gem is sharply detailed throughout, except for a touch of softness on the ribbon knot. The well-preserved surfaces show a few tiny planchet flakes on the reverse and the fields are deeply reflective, contrasting boldly with the frosty devices. Only 600 examples struck, all with the Closed 3 in the date. Census: 6 in 65 Cameo, 13 finer (5/15). PCGS# 84766

3494 **1874 Arrows PR64 PCGS. Fortin-101, R.3.** The bold, satiny motifs on this Choice proof deliver modest cameo contrast against the deep, reflective fields on each side. Faintly transparent rose-gold toning accents the gunmetal-gray surfaces and the overall visual impression is pleasing. NGC ID# 23DJ, PCGS# 4770

3495 **1875 PR65 PCGS. Fortin-101.** A later, unlisted die state without evidence of repunching on the 1 and 5 in the date. Medium gunmetal-blue and chestnut-brown toning embraces undisturbed and moderately mirrored surfaces. Encapsulated in a first generation holder. NGC ID# 23CY, PCGS# 4772

3496 **1879 PR65 PCGS. Fortin-102.** On the obverse, blended peach and rose toning dominates all but the left margin, which is jade-green. The reverse is principally ocean-blue but has a sun-gold periphery. A carefully preserved and colorful Gem. NGC ID# 23D4, PCGS# 4776

3497 **1884 PR65 PCGS. Fortin-101.** White-on-black contrast is apparent, but the green label holder precedes the extension of the Cameo designation to Seated dimes. This lightly toned and flashy Gem is sharply struck and impressively free from marks. Only 875 proofs were struck.
Ex: St. Louis Central States Signature (Heritage, 5/2007), lot 349, which realized $1,380. NGC ID# 23D9, PCGS# 4781

3498 **1886 PR66 PCGS. CAC. Fortin-103.** Aquamarine and sun-gold bathe this crisply struck and glossy representative. An undisturbed and attractive specimen. One of just 886 proofs delivered. Population: 24 in 66 (2 in 66+), 9 finer (5/15). NGC ID# 23DB, PCGS# 4783

3499 **1886 PR66 Cameo NGC. Fortin-Unlisted.** The date position on this piece does not match that of either of the two known proof die pairs. The right foot of the 1 is centered between two dentils, and the flag of the same ends beneath the point of the shield; the second 8 is perfectly centered below the pendant. This proof Cameo is well-contrasted with a light golden hue overall. Liberty's head is a trifle soft. Census: 14 in 66 Cameo (2 in 66 ★ Cameo), 15 finer (5/15). PCGS# 84783

3500 **1887 PR66 PCGS. Fortin-101, R.3.** This gleaming Premium Gem proof exhibits lovely rose-gold, mint-green, blue, and lavender-gray toning on the obverse in concentric hues, while the reverse is more evenly colored in warm champagne-gold with grayish undertones. Well-preserved and sharp. Population: 12 in 66, 1 finer (4/15). NGC ID# 23DC, PCGS# 4784

1888 Seated Dime, PR67
Tied for Finest at PCGS

3501 **1888 PR67 PCGS. Fortin-102a, R.3.** Diagnostics include a medium-level date that slopes slightly upward, weakness on the base above the 8s in the date, and a die defect on the corn ear. Faint golden-russet toning occurs over each side, with surfaces that feature boldly struck devices and reveal minimal marks. Of the 832 proofs issued, PCGS has seen just six in PR67, with none finer (5/15). NGC ID# 23DD, PCGS# 4785

BARBER DIMES

1892 Barber Dime, MS67
Lovely Original Colors

3502 **1892 MS67 NGC.** Beautifully iridescent jade-green, antique-gold, and rose toning gravitates to the borders. Faint die clashing can be seen to the right of the portrait. A comparatively liberal supply of Mint State representatives exist of this well-produced first-year issue, but few could compete with the surface quality and color of this sharp Superb Gem. Census: 22 in 67 (2 in 67 ★), 0 finer (4/15). *Ex: Long Beach Signature (Heritage, 2/2000), lot 5491; FUN Signature (Heritage, 1/2005), lot 4001; Long Beach Signature (Heritage, 9/2005), lot 2417.* NGC ID# 23DK, PCGS# 4796

3503 **1893/2 MS63 PCGS.** A straight line inside the lower loop of the 2 is the pick-up point for this scarce *Guide Book* variety. An early die state without any cracks. Untoned and semiprooflike with a full strike. Marks are confined to a few faint thin lines on the portrait. Population: 6 in 63 (1 in 63+), 21 finer (4/15). NGC ID# 23DP, PCGS# 4799

3504 **1895 MS64+ PCGS.** The Plus designation draws attention to the unusually well-preserved surfaces of this near-Mint 1895 dime. Satiny luster is only slightly inhibited by deep gunmetal-blue, lilac, and steel-gray toning that encompasses each side. Population: 40 in 64 (3 in 64+), 28 finer (5/15). NGC ID# 23DV, PCGS# 4806

3505 **1895-O Fine 15 PCGS.** With a mintage of only 440,000 pieces, the 1895-O is the prime key issue in the Barber dime series, not counting the unofficial 1894-S. This mid-grade circulated example displays original steel-gray surfaces with hints of olive in the recesses. LIBERTY is complete. NGC ID# 23DW, PCGS# 4807

3506 **1895-O VF30 NGC.** Aside from the non-collectible 1894-S, the key to the Barber dime series is the 1895-O. It has a low mintage of 440,000 pieces, and few were saved by collectors until years into the 20th century. This luminous and minutely granular example is mostly stone-white but displays green, gold, and rose toning along the obverse margin. NGC ID# 23DW, PCGS# 4807

1895-S Dime, MS65
Conditionally Rare

3507 **1895-S MS65 NGC.** This blatantly original 1895-S Barber dime displays thick, satiny luster beneath an overlay of rich lavender-gray, russet, and amber-gold toning. A couple tiny ticks on the cheek are all that limit the grade. This issue is somewhat challenging in Mint State grades, and is rare as fine as the Gem level. Census: 5 in 65 (1 in 65+), 2 finer (5/15). NGC ID# 23DX, PCGS# 4808

3508 **1896 MS65 PCGS.** The 1896 Barber dime is surprisingly difficult to locate in Gem Condition. This attractive MS65 example offers well-preserved lustrous surfaces under shades of pale gold and silver-gray toning. Population: 17 in 65, 12 finer (5/15). NGC ID# 23DY, PCGS# 4809

3509 **1896 MS66+ Prooflike NGC.** This Plus-designated Premium Gem misleadingly appears to be a proof at first glance, showcasing deep, glassy fields and sharp, frosty devices. Light golden on each side with no distracting abrasions present. This is the only Prooflike example certified by NGC (5/15). NGC ID# 23DY, PCGS# 4809

1900 Dime, MS66+
Rare This High-Grade

3510 **1900 MS66+ PCGS.** In the Barber dime series, mintage figures have little impact on the availability of high-grade coins. The 1900 was struck to the extent of 17.6 million pieces, but it is conditionally rare in MS66. This Plus-graded piece is sharply defined with satiny mint luster. Light golden centers yield to deeper olive and russet hues in the peripheries. Population: 13 in 66 (2 in 66+), 5 finer (5/15). NGC ID# 23EC, PCGS# 4821

3511 **1901 MS66 PCGS. CAC.** Rose-red borders frame the lime-green and ocean-blue centers. Lustrous and minimally marked. The strike is bold except for moderate blending on the cotton leaves and UNITED STATES. Population: 24 in 66 (2 in 66+), 1 finer (5/15). NGC ID# 23EF, PCGS# 4824

1903-S Barber Dime, MS66
Almost Unobtainable Finer

3512 **1903-S MS66 NGC.** The surfaces of this high-end 1903-S dime display a mixture of satiny luster and glossy patina, with shades of olive-green, rose-gold, and champagne toning throughout. Bold detail is the rule throughout the devices, and the only grade-limiting contact is evident in trivial disturbances on Liberty's cheek which are well-hidden by the rich patina. Census: 8 in 66, 2 finer (4/15). NGC ID# 23EP, PCGS# 4832

3513 **1906-D MS66 NGC.** Attractive shades of greenish-gold and violet toning enhance the outstanding eye appeal of this sharply detailed Premium Gem. The well-preserved surfaces radiate vibrant mint luster throughout. Census: 6 in 66, 0 finer (5/15). NGC ID# 23EY, PCGS# 4839

1906-O Dime, MS67
Conditionally Rare

3514 **1906-O MS67 PCGS.** Dappled gold, green, and blue hues enrich the eye appeal of this late-date New Orleans Barber dime. Bold underlying luster forms a cartwheel pattern on the obverse and the peripheral reverse. The 1906-O dime is a condition rarity as a Superb Gem. Population: 7 in 67, 0 finer (5/15). NGC ID# 23EZ, PCGS# 4840

3515 **1907-D MS64 PCGS.** Dappled russet toning resides over pale champagne surfaces on this Choice 1907-D Barber dime. Close study with a loupe finds the devices sharply brought up and there are no distracting abrasions. Seldom seen finer. Population: 22 in 64 (1 in 64+), 21 finer (5/15). NGC ID# 23F4, PCGS# 4843

3516 **1907-D MS65 NGC.** A boldly struck example of this conditionally challenging Denver issue. Lavender-gold and pale russet toning blankets each side, while a few minute ticks on Liberty's cheek render the grade. NGC ID# 23F4, PCGS# 4843

3517 **1910-S MS64 PCGS.** This attractive Choice specimen exhibits sharply detailed design elements and shows an interesting die crack from the rim at 5 o'clock up into Liberty's throat. The lustrous surfaces display only minor signs of contact, with a few hints of champagne-gold toning. Population: 17 in 64, 35 finer (5/15). NGC ID# 23FH, PCGS# 4856

1911-D Barber Dime, MS67
Remarkably Well-Preserved and Vibrant

3518 **1911-D MS67 PCGS.** Despite having a significantly higher mintage (more than 11.2 million coins versus just 3.5 million), the 1911-D Barber dime is remarkably similar in rarity to its San Francisco counterpart in Gem and finer grades. PCGS has seen only 11 MS67 examples of the 1911-D, and eight so-graded examples of the 1911-S (one in MS67+), both with none finer (5/15). This piece displays vibrant, frosty luster beneath pastel shades of ice-blue, lemon-gold, and mint-gray. The coin is attractive to the unaided eye, but when studied under a lens the eye appeal increases ten-fold, as the details are boldly struck and the surfaces are seemingly undisturbed. Even Liberty's face and neck are completely devoid of flaws. An important condition rarity and upper-end for the lofty grade. NGC ID# 23FK, PCGS# 4858

3519 **1914 MS66 PCGS. CAC.** Dramatic fire-red, jade-green, orange-gold, and pearl-gray alternate across this lustrous and sharply struck high grade dime. Distributed delicate marks do not deny the eye appeal. Population: 69 in 66, 6 finer (5/15). NGC ID# 23FT, PCGS# 4865

1914 Dime, MS67
Tied for Finest Certified

3520 **1914 MS67 PCGS.** An available date in lower grades, the 1914 Barber dime becomes a significant condition rarity at the Superb Gem level. This well-struck MS67 example shows smooth, satiny surfaces with peripheral dabs of gold, olive, and deep amber color. The central regions exhibit just pale golden hues. Population: 6 in 67, 0 finer (5/15). NGC ID# 23FT, PCGS# 4865

3521 **1915-S MS65 PCGS. CAC.** Only 960,000 Barber dimes were struck at the San Francisco Mint in 1915 and the issue is seldom seen in high grade. This attractive Gem is sharply detailed and lustrous, under shades of champagne-gold and lavender toning. Population: 18 in 65, 11 finer (5/15). NGC ID# 23FX, PCGS# 4869

1915-S Barber Dime, Rim-Toned MS66

3522 **1915-S MS66 PCGS.** Silver-white central areas cede to cinnamon and pale jade near the rims on this pristine 1915-S dime, one of the sub-1 million-coin mintages in the Barber series. Liberty's cheek and other high points are free of distractions. PCGS reports only a single MS67 finer. Population: 10 in 66, 1 finer (4/15). NGC ID# 23FX, PCGS# 4869

3523 **1916-S MS66 NGC. CAC.** From the final year of the Barber series, this Premium Gem S-mint example displays sharply struck devices and satiny luster. Mint-green and light golden toning blankets each side. Among the finest certified of the date. Census: 29 in 66, 1 finer (5/15). NGC ID# 23FZ, PCGS# 4871

PROOF BARBER DIMES

1898 Dime, PR67
Richly Toned Obverse

3524 **1898 PR67 NGC.** Deep blue-violet patina has a window of green-gold at the date exergue. The reverse is more flashy with lighter toning overall but eye appeal that is just as strong. An incredibly appealing and well-made specimen from an issue of just 735 pieces. Census: 28 in 67 (1 in 67 ★), 6 finer (5/15).
Ex: Houston Signature (Heritage, 11/2012), lot 3488. NGC ID# 23GB, PCGS# 4882

3525 **1901 PR66 Cameo NGC.** Fully rendered design elements exhibit smooth light golden frost, delivering significant cameo contrast with the mirrored fields. Close study with a glass finds only a few minor hairlines to limit the grade. Census: 12 in 66 Cameo, 7 finer (4/15). PCGS# 84885

3526 **1905 PR65 Cameo PCGS.** A worthy example of this proof Barber dime issue. This specimen is sharply struck throughout and seemingly pristine. The watery fields are unfathomably deep, and the devices are suitably frosted. Population: 14 in 65 Cameo, 20 finer (5/15). PCGS# 84889

3527 **1907 PR66 PCGS.** Exquisitely struck design elements stand out on this Premium Gem proof. Luminous surfaces display variegated steel-blue and reddish-purple coloration over incredibly deep mirrored fields that have obviously been well cared for. From a mintage of 575 pieces. Population: 24 in 66, 14 finer (4/15). NGC ID# 23GM, PCGS# 4891

3528 **1907 PR66+ NGC. CAC.** Sharp, satiny devices provide subtle contrast with the mirrored fields, though splashes of pale lavender-blue, olive, and sun-gold toning preclude a Cameo designation from NGC. No distractions are noted on this high-end Premium Gem. Census: 28 in 66 (1 in 66+), 22 finer (5/15). NGC ID# 23GM, PCGS# 4891

3529 **1907 PR66 Cameo NGC.** Only 575 proof dimes were struck in 1907, and coins with cameo contrast are surprisingly scarce. This is a mostly brilliant piece with just a hint of light golden color around the rims. The fields are deeply reflective with moderate frost over the devices. Essentially perfect surfaces. Census: 6 in 66 Cameo, 5 finer (4/15).
Ex: ANA Signature (Heritage, 8/2007), lot 600. PCGS# 84891

3530 **1909 PR65 PCGS.** This Gem 1909 proof dime is sharply detailed with modest cameo contrast visible beneath deep blue-green, gold, and iridescent toning. This issue had a mintage of only 650 pieces, and finer representatives are seldom seen. Population: 30 in 65, 51 finer (5/15). NGC ID# 23GP, PCGS# 4893

3531 **1913 PR65 NGC.** From a proof mintage of only 622 pieces, this Gem 1913 Barber dime displays modest field-motif contrast with deeply mirrored recesses and just a whisper of light golden toning overall. A few faint hairlines in the fields are all that preclude an even finer grade. Census: 21 in 65, 29 finer (4/15). NGC ID# 23GU, PCGS# 4897

3532 **1915 PR67 NGC.** Dusky ruby-red, peach, and forest-green consume the obverse of this fully struck specimen. The reverse displays peripheral lavender and aquamarine toning. Mintages of proof Barber coins tended to decline throughout the series, and the final two dates (1914 and 1915) had the lowest proof productions of the type. NGC ID# 23GW, PCGS# 4899

MERCURY DIMES

3533 **1916 MS67+ ★ Full Bands NGC.** The margins exhibit remarkable bands of cherry-red, lemon-gold, powder-blue, and forest-green. The centers are only faintly patinated. Lustrous, crisply struck, and nearly immaculate. One of only two 1916 dimes with all three NGC premium designations: Star, Plus, and Full Bands (5/15).
Ex: Dallas Signature (Heritage, 11/2005), lot 1065, which realized $1,035. NGC ID# 23GX, PCGS# 4905

3534 **1916-D Fine 12 PCGS. CAC.** Heavily circulated 1916-D dimes are seen with frequency, but problem-free mid-grade examples are somewhat more elusive. This example displays consistent battleship-gray patina, with moderate, even wear. There are no complaints and the coin's quality for the grade is affirmed by CAC. NGC ID# 23GY, PCGS# 4906

3535 **1917-S MS66 Full Bands NGC.** Matte-like luster accentuates the fully rendered design elements on each side of this Premium Gem 1917-S Mercury dime. Light golden toning in the centers yields to deeper olive-gold hues around the peripheries, giving this coin a nice original look. Census: 15 in 66 Full Bands, 4 finer (4/15). NGC ID# 23H4, PCGS# 4915

3536 **1918-S MS66 PCGS. CAC.** The surfaces of this well-preserved Premium Gem are visited by attractive shades of pale gold, lavender, and ice-blue toning, with a few specks of amber and vibrant mint luster throughout. Population: 19 in 66 (2 in 66+), 1 finer (5/15). NGC ID# 23H7, PCGS# 4920

3537 **1920 MS66+ Full Bands PCGS. CAC.** This radiantly lustrous example shows full horizontal and diagonal bands, with light golden toning overall that yields occasional rose or olive accents around the peripheries. Were it not for a couple truly faint lines on Liberty's neck, this coin might have garnered a full Superb Gem bid. PCGS lists only 21 numerically finer representatives (5/15). NGC ID# 23HB, PCGS# 4929

3538 **1920-S MS65 PCGS.** A rarely offered Gem example of this challenging San Francisco issue. Peppered russet overtones accent the champagne-gold surfaces, with few underlying abrasions in evidence. The central horizontal bands are not full defined, but the strike is otherwise sharp. Population: 14 in 65, 2 finer (5/15). NGC ID# 23HD, PCGS# 4932

3539 **1921 MS61 Full Bands NGC.** Bold central detail is the hallmark of this key Mercury dime representative, accentuated by satiny luster and light golden toning that deepens toward the peripheries. Scattered abrasions limit the grade. NGC ID# 23HE, PCGS# 4935

3540 **1923 MS67 Full Bands PCGS. CAC.** Bright-green, magenta, lilac, and red are among the hues that cover the impressively preserved surfaces of this outstanding Superb Gem. Fully struck with frosted surfaces and soft mint luster, the deep, colorful toning is the dominant feature. Not many Mercury dimes from this date will be able to match the current example in terms of eye appeal or technical quality. Population: 68 in 67 (2 in 67+) Full Bands, 3 finer (4/14). NGC ID# 23HG, PCGS# 4939

3541 **1923-S MS66 PCGS.** The 1923-S Mercury dime is very rare in MS66 condition and finer examples are virtually unobtainable. This well-detailed Premium Gem exhibits lustrous well-preserved surfaces under shades of champagne-gold and lavender toning. Population: 8 in 66 (1 in 66+), 0 finer (5/15). NGC ID# 23HH, PCGS# 4940

3542 **1924-D MS65 Full Bands PCGS.** This Gem 1924-D Mercury dime is boldly struck, showing sharp definition of the fasces on both the horizontal and diagonal bands. No major abrasions are observed, and the eye appeal is heightened by a blush of light golden toning. The obverse is lightly machine doubled. NGC ID# 23HK, PCGS# 4945

3543 **1926-S MS62 NGC.** The 1926-S is not known for being well-struck, although this piece is moderately sharp, with partial separation on the center horizontal bands. A faint golden hue accents each side, lessening the effect of a few scattered abrasions which are consistent with the grade. NGC ID# 23HT, PCGS# 4958

1928-D Dime, MS66 Full Bands
Vibrant and Bold

3544 **1928-D MS66 Full Bands PCGS.** This is a frosty, untoned silver-white Gem example of this conditional rarity, a date seldom seen with the Full Bands designation. The surfaces are high-end and appealing, despite a bit of streaky gray toning in the reverse field. The strike is razor-sharp on the central bands and throughout both sides, save for the last 8 in the date. Population: 19 in 66 (1 in 66+) Full Bands, 5 finer (5/15). NGC ID# 23HY, PCGS# 4969

3545 **1928-S MS65 Full Bands PCGS. CAC.** Lustrous and crisply struck with light to medium sea-green toning. Struck from long-in-use dies with a subtle orange-peel texture across the fields. A better branch mint issue. Population: 62 in 65 Full Bands, 40 finer (5/15). NGC ID# 23HZ, PCGS# 4971

1928-S Mercury Dime, MS66 Full Bands
Beautifully Clean Cheek

3546 **1928-S MS66 Full Bands PCGS.** The 1928-S is a less often seen date in high grade, particularly with a Full Bands designation. This Premium Gem is boldly defined on the central devices and throughout the peripheral legends. The light golden surfaces appear a point finer at first glance, although a second gander with a glass notices a couple small ticks hidden in the top of Liberty's cap. Population: 32 in 66 Full Bands, 8 finer (5/15). NGC ID# 23HZ, PCGS# 4971

3547 **1929-D MS67 Full Bands NGC.** Scattered specks of deep russet, pine-green, and gold toning accent soft, champagne surfaces on each side of this sharp Superb Gem, while close examination with a glass finds the surfaces beautifully pristine. Census: 3 in 67 (1 in 67 ★) Full Bands, 2 finer (4/15). NGC ID# 23J3, PCGS# 4975

3548 **1929-S MS66 Full Bands PCGS. CAC.** Butter-gold, lilac-red, olive-gold, and dove-gray enrich this lustrous, well struck, and splendidly preserved example. The left reverse field exhibits vertical die lines, as made. A lower mintage branch mint issue. NGC ID# 23J4, PCGS# 4977

3549 **1931-S MS65 Full Bands PCGS.** A lustrous Gem with smooth fields and light olive-gold toning. Liberty's jaw displays wispy contact. A popular low mintage issue, struck during the depths of the Great Depression. NGC ID# 23J9, PCGS# 4987

1931-S Dime, MS65 Full Bands
Sharp Interiors and Peripheries

3550 **1931-S MS65 Full Bands PCGS. CAC.** Not only does this Gem example display full horizontal and diagonal bands on the fasces, but the peripheral legends are also boldly rendered, with none of the fading that is often seen on San Francisco products of this period. The reverse displays soft lavender-gold toning, while the obverse shows iridescent silver luster over the upper half and deeper teal and lavender over the lower. A single tick on Liberty's cheek limits the grade. NGC ID# 23J9, PCGS# 4987

3551 **1939-S MS67 Full Bands NGC.** Light apricot-gold and ice-blue toning adorns lustrous and minimally abraded surfaces. The strike is complete except for fading on the tops of the LIB in LIBERTY. Census: 11 in 67 Full Bands, 1 finer (5/15). NGC ID# 23JT, PCGS# 5021

3552 **1942/1 FS-101 AU58 NGC.** Light butter-gold toning visits this lustrous and nearly mark-free key date dime. A trace of wear on the bands denies a Mint State assessment, but the overdate is obvious and the eye appeal is considerable. PCGS# 145473 Base PCGS# 5036

1942/1-D Dime, MS64 Full Bands
Notable Surface Quality

3553 **1942/1-D FS-101 MS64 Full Bands NGC.** This *Guide Book* variety is challenging in Mint State, although most such pieces exhibit Full Bands definition. This Choice example is consistently sharp and shows soft, satiny luster with warm tan-gold toning overall. Only a few light grazes are observed on the obverse portrait. Census: 24 in 64 Full Bands, 20 finer (4/15). PCGS# 145476 Base PCGS# 5041

3554 **1943 MS67+ Full Bands PCGS. CAC.** Due to the extreme rarity of anything finer, Plus-graded MS67 examples of this moderately available Philadelphia issue are in high demand. The present piece is beautifully rendered with sharp motifs and satiny luster. A pale light golden hue yields pastel rainbow hues around the reverse periphery. PCGS has seen only three finer examples (5/15). NGC ID# 23K8, PCGS# 5045

3555 **1943 MS67+ Full Bands PCGS. CAC.** An essentially pristine wartime dime. Hints of almond-gold toning visit Liberty's cap. Lustrous and intricately impressed. A high mintage issue, but virtually unobtainable any finer. NGC ID# 23K8, PCGS# 5045

PROOF MERCURY DIMES

3556 **1936 PR66 PCGS.** This fully brilliant Gem first-year proof has no trace of toning on either side. The fields are fully mirrored and the sharply detailed design elements have similar reflectivity. PCGS has graded 62 numerically finer examples (5/15). NGC ID# 27DG, PCGS# 5071

3557 **1936 PR67 PCGS.** The first proof issue in the Mercury dime series had a mintage of 4,130 pieces, which would prove to be the lowest in the seven-year run. This Superb Gem example is fully struck with deeply mirrored fields. Subtle hints of russet toning accent the peripheries. Population: 62 in 67 (1 in 67+), 1 finer (5/15). NGC ID# 27DG, PCGS# 5071

1939 Mercury Dime, PR67 ★ Cameo
Stark White-on-Black Contrast

3558 **1939 PR67 ★ Cameo NGC.** The cameo contrast on this Star-designated Superb Gem proof is almost unreal for the Mercury dime series, showcasing a stark white-on-black appearance that is devoid of toning. The frosty motifs are boldly rendered and the fields show seemingly infinite depth of mirroring. Census: 20 in 67 Cameo (3 in 67 ★ Cameo), 1 finer (5/15). PCGS# 85074

3559 **1940 PR68 NGC.** Splashes of sky-blue and creamy patination cascade over both sides of this Superb Gem. Crisply struck throughout and immaculately preserved. Census: 45 in 68 (5 in 68 ★), 2 finer (5/15). NGC ID# 27DL, PCGS# 5075

ROOSEVELT DIMES

1946-D Dime, MS68 Full Bands
Spectacular Color and Luster

3560 **1946-D MS68 Full Bands NGC.** Pale, silver-blue centers yield to stunning rainbow colors throughout the fields and legends of this noteworthy MS68 example. The strike is sharp throughout and the bands are complete, as confirmed by the Full Torch designation. Any Roosevelt dime at this level of preservation is of the utmost importance to Registry Set collectors. Neither PCGS nor NGC has seen a numerically finer example. Census: 5 in 68 (2 in 68 ★) Full Bands, 0 finer (5/15). NGC ID# 23KK, PCGS# 85083

1946-D Dime, MS68 Full Bands
Spectacular Color and Luster

3561 **1946-D MS68 Full Bands PCGS.** This magnificent Registry coin is vividly toned throughout both sides in swirling ribbons of crimson, forest-green, gold, and umber. The strike is bold and the luster is unhindered by the patina. A single small tick is well-hidden on Roosevelt's chin. This piece is tied with one other as the finest at PCGS (5/15). NGC ID# 23KK, PCGS# 85083

1947 Dime, MS68 Full Bands
Among the Three Finest Certified

3562 **1947 MS68 Full Bands NGC.** The better part of a Saturday afternoon could be absorbed trying to locate a grade-limiting flaw on this coin, only to turn up empty handed in the end. The frosty, gold-tinted surfaces are seemingly pristine, and the radiant luster is unhindered as it illuminates fully rendered design elements. Census: 3 in 68 (2 in 68 ★) Full Bands, 0 finer (4/15). NGC ID# 23KM, PCGS# 85085

1948-D Roosevelt Dime, MS68 Full Bands
Conditional Rarity

3563 **1948-D MS68 Full Bands PCGS.** This resplendent D-mint Roosevelt dime is a conditional rarity in so high a grade with Full Band designation, one of only three so certified at PCGS with none finer. A fine satiny sheen shows on both sides, complementing the minor patina more prominent on the cinnamon-tan obverse. The crucial reverse bands are convincingly full. Population: 3 in 68 Full Bands, 0 finer (5/15). NGC ID# 23KS, PCGS# 85089

3564 **1950 MS67+ Full Bands PCGS.** A spectacular Superb Gem Registry coin, nearly half of a grade point finer than the piece in the current highest-rated Registry Set. This example is boldly struck and possesses vibrant, frosty luster. The reverse shows a pale champagne hue, with deeper amber along the lower margin, while the obverse is more vividly colored in shades of lemon-gold, violet, forest-green, and crimson. Population: 47 in 67 (4 in 67+) Full Bands, 3 finer (5/15). NGC ID# 23KX, PCGS# 85094

3565 **1952-D MS67+ Full Bands PCGS.** An ideal opportunity for a competitive Registry collector to upgrade their ranking, this Plus-designated Superb Gem is nearly half a grade point finer than the coin in the current highest-rated Registry Set. The bold design elements are accentuated by vivid toning on each side which shows light champagne centers that deepen to amber-red, forest-green, and deep russet around the margins. Population: 77 in 67 (7 in 67+) Full Bands, 1 finer (5/15). NGC ID# 23L6, PCGS# 85101

3566 **1952-S MS68 PCGS.** This is a highly attractive, almost perfectly preserved Registry-quality coin, showcasing frosty luster and vivid toning. The obverse shows deep russet and brass-gold toning in the margins with a dash of lavender-blue in the center; the reverse has a similar arrangement, but the peripheral colors are restricted to the extreme outer borders. Population: 6 in 68, 0 finer (5/15). NGC ID# 23L7, PCGS# 5102

3567 **1965 MS67 Full Bands PCGS.** This uniquely toned Superb Gem shows a concentration of olive and pistachio-green in the margins on each side, deepening to aquamarine at the peripheries and lightening to lavender-blue in the centers. A sliver of rose-gold resides between the primary shades. There is a small spot near the uppermost olive leaf. This piece is tied numerically with the example in the current highest-rated Registry Set. Population: 8 in 67 Full Bands, 1 finer (5/15). NGC ID# 23M4, PCGS# 85130

TWENTY CENT PIECES

3568 **1875-CC AU55 NGC. BF-2, R.1.** Golden-brown margins encompass cream-gray centers. This moderately circulated Carson City type coin is free from reportable abrasions. A small vertical strike-through (as made) near star 13 provides an identifier. NGC ID# 23R6, PCGS# 5297

3569 **1875-CC AU55 ANACS. BF-4, R.2.** Luster brightens the borders and motifs of this briefly circulated Carson City type coin. Butter-gold toning graces both sides. No marks are conspicuous, although the right obverse field is luminous. NGC ID# 23R6, PCGS# 5297

3570 **1875-CC AU58 PCGS. BF-2, R.1.** The borders are lustrous, but light wear on Liberty's knees confirms a brief stint in Old West commerce. Only a hint of almond-gold toning visits the inoffensively abraded surfaces. NGC ID# 23R6, PCGS# 5297

3571 **1875-CC MS62 PCGS. BF-2, R.1.** Forest-green borders encompass cream-gray, lavender, and straw-gold centers. The strike shows incompleteness only on the eagle's breast and the top of the left (facing) wing. A thin mark is beneath star 8, but the satiny surfaces are otherwise well preserved. NGC ID# 23R6, PCGS# 5297

3572 **1875-S MS63 NGC. BF-13, R.2.** A caramel-gold representative that boasts vibrant luster, a sharp strike, and pleasing preservation. A late die state with many advanced cracks and breaks on the reverse periphery, but no rim break is evident beneath the date. The top of an 8 is misplaced "high in the denticles," per the Brunner-Frost standard reference. NGC ID# 23R7, PCGS# 5298

1875-S Twenty Cent, MS65
Very Scarce BF-8 Marriage

3573 **1875-S MS65 NGC. BF-8, R.5.** Sea-green fields and devices are bounded by a slender peripheral band of rose-red and straw-gold toning. Nicely struck and satiny. One hair-thin horizontal mark is noted above the 1 in the date. A very scarce and distinctive die marriage. What appears to be a misplaced date digit in the dentils below the 8 is actually a die chip, according to Brunner and Frost. The reverse border displays several prominent cracks along with a "knob" on the upright of the R in AMERICA. NGC ID# 23R7, PCGS# 5298

3574 **1875-S/S Misplaced Date, FS-302, MS63 PCGS. BF-16, R.1.** The so-called "dollar sign" variety with prominent repunching on the mintmark serifs. The top of a 5 is misplaced in the dentils beneath the 7 in the date. This coruscating type coin has a good strike and pleasing preservation. Original charcoal-gray toning visits the borders. PCGS# 145009 Base PCGS# 5298

3575 **1875-S/S Misplaced Date, FS-302, MS64 NGC. BF-16, R.1.** Dappled peach-gold, lavender-red, and cobalt-blue toning endows lustrous this lustrous near-Gem. Smooth aside from a faded field mark above the left (facing) claw. The top of a 5 is misplaced in the dentils beneath the 7 in the date. The popular "dollar sign" variety with prominently repunched serifs on the mintmark. PCGS# 145009 Base PCGS# 5298

PROOF TWENTY CENT PIECE

1876 Twenty Cent, PR63
Icy Devices, Toned Fields

3576 **1876 PR63 ANACS. BF-1, R.4.** Light lavender-red toning fills the fields, while the margins are blue-green and the frosty devices are stone-white. The strike is intricate throughout. A charming select specimen, despite delicate hairlines on the right obverse field. UNITED STATES is minutely die doubled. A scarce four-year proof type. NGC ID# 27H3, PCGS# 5304

EARLY QUARTERS

1806/5 Browning-1 Quarter, XF40
Obviously Appealing Overdate

3577 **1806/5 B-1, R.2, XF40 NGC. CAC.** Glimpses of silver luster remain among Liberty's hair strands, making this album-toned, boldly overdated quarter a connoisseur's delight. Any signs of die clashing are softened by wear, as are the few expected abrasions from circulation. A small mark above the 8 of the date is mentioned for accuracy, but all the focus will be on this coin's original appeal with ocean-blue and sea-green highlights at the borders. Census: 8 in 40, 35 finer (4/15). PCGS# 38938 Base PCGS# 5315

3578 **1806 B-3, R.1, VF30 PCGS.** A lavender and olive-brown midgrade Draped Bust type coin. The minutely granular surfaces are lightly abraded save for a couple of thin marks concealed in Liberty's hair. The eagle's head and neck are lightly brought up, usual for B-3. *Ex: Dallas Signature (Heritage, 7/2006), lot 7721.* PCGS# 38929 Base PCGS# 5314

BUST QUARTERS

3579 **1818 B-4, R.2, XF40 PCGS.** Tompkins Die State 1/1. A stone-gray representative with traces of russet toning along the margins. The moderately circulated surfaces retain glimpses of luster within the plumage and legends. Smooth aside from a couple of hair-thin marks near the chin. PCGS# 38945 Base PCGS# 5322

1820 Small 0 Quarter, AU55
Significant Remaining Luster

3580 **1820 Small 0, B-4, R.2, AU55 NGC.** The more available of the two Large 0 varieties. On B-4, the 2 is entered higher than the 5, while on B-5, the 25 are level. Luster illuminates the legends, hair, and plumage of this pearl-gray and gunmetal-blue Capped Bust quarter. Nicely struck and impressive. Census: 14 in 55, 31 finer (4/15). PCGS# 38958 Base PCGS# 5328

1824/2 Quarter, B-1, VF25
Appealing Surfaces

3581 **1824/2 B-1, R.3, VF25 PCGS.** This is the only known variety for the 1824 quarter, employing a leftover 1822 head die that was overdated 1824. A die line left into the field from the lowest arrowhead identifies the reverse. This issue had a mintage of 168,000 pieces, but is seldom offered in high grade. This mid-grade circulated piece delivers pleasing eye appeal, with warm amber-gold and lilac hues in the recesses and lighter battleship-gray color over the relief elements. The borders are strong and the devices show light, even wear. PCGS# 38972 Base PCGS# 5335

3582 **1825/4/(2) B-2, R.2 — Improperly Cleaned — NGC Details. Unc.** Autumn-brown margins encompass slate-gray fields and motifs. Patches of hairlines emerge beneath a loupe, but the strike is crisp and neither side shows signs of wear.

3583 **1832 B-1, R.1, MS61 NGC.** B-1 is the more often seen of the two 1832 quarter varieties, although both are plentiful enough to be suitable for type purposes. This Mint State example is boldly struck and displays noticeable semiprooflike mirroring in the fields. Pale bronze-gold toning warms each side, slightly lighter in the centers. PCGS# 38987 Base PCGS# 5351

3584 **1832 B-2, R.2, MS62 NGC.** A boldly struck and coruscating representative. Golden-brown, rose-red, and forest-green adorn the margins, while the fields and devices are lightly toned steel-gray. No abrasions are apparent, although areas under the beak and near the bust tip show minor granularity. PCGS# 38988 Base PCGS# 5351

1834 B-4 Quarter, MS62
Attractive Multicolor Patina

3585 **1834 B-4, R.1, MS62 NGC.** Star 10 is repunched east, and long die cracks throughout the reverse margin confirm the Browning attribution. Jade-green, rose-red, and sun-gold shades enrich this satiny and well struck Capped Bust type coin. Inspection beneath a lens reveals only unimportant contact. PCGS# 38995 Base PCGS# 5353

3586 **1835 B-1, R.1, AU58 PCGS.** Light straw-gold patina adorns the borders of this otherwise pearl-white Capped Bust type coin. Luster brightens the motifs and margins, and relevant marks are confined to the field above the right (facing) claw. PCGS# 38997 Base PCGS# 5354

1835 B-1 Quarter, MS62

3587 **1835 B-1, R.1, MS62 NGC.** The lengthy, descending die crack across the upper reverse identifies the Browning marriage. Almond-gold and powder-blue visit this well struck and satiny representative. The reverse is well preserved, while the obverse has a small edge knock at 3 o'clock and hair-thin lines near stars 5 and 10. PCGS# 38997 Base PCGS# 5354

1838 B-1 Quarter, MS63
Well-Struck, Carefully Preserved

3588 **1838 B-1, R.1, MS63 PCGS.** Dusky walnut-brown and gunmetal-gray blend throughout this coruscating and crisply struck representative. The fields are uncommonly free of contact for the MS63 level, and Liberty's cheek and neck display only minute and unobtrusive marks. The sole Capped Bust die variety for 1838, a year of transition to the Seated type. PCGS# 39015 Base PCGS# 5357

SEATED QUARTERS

3589 **1840-O No Drapery MS61 NGC. Briggs 1-A.** Olive-green, steel-blue, and lavender-red shades embrace this coruscating and well struck representative. Only trivial marks are present, but the obverse has a few small, minor spots. The No Drapery 1840-O variety is the first quarter issue from the New Orleans Mint, and is rare in Mint State. Census: 12 in 61, 28 finer (4/15). NGC ID# 23SG, PCGS# 5393

3590 **1842-O Small Date VG8 PCGS. Briggs 1-A.** Always in demand, the 1842-O Small Date is much scarcer than the usual Large Date variant. This problem-free example has bold peripheral legends and an absence of relevant marks. About half of LIBERTY is present. Population: 12 in 8, 38 finer (4/15). NGC ID# 23SN, PCGS# 5403

3591 **1844 MS64 NGC. Briggs 2-B.** Ocean-blue, lavender-red, and olive-gold toning endows both sides of this satiny and lightly abraded Choice quarter. A single diagonal roller mark across the seated Liberty is as struck. Census: 6 in 64, 3 finer (4/15). NGC ID# 23ST, PCGS# 5406

3592 **1847-O XF45 PCGS. Briggs 1-B.** Deep steel-gray patina encompasses this unmarked antebellum New Orleans quarter. The strike is good except on the fletchings, the upper left stars, and the eagle's left (facing) leg. Minor laminations (as made) are noted near the TA in STATES. NGC ID# 23SY, PCGS# 5411

3593 **1850 Misplaced Date, Briggs 1-A, FS-301, AU58 PCGS.** A sharply struck and original dove-gray No Motto quarter with glimpses of lilac-red and sea-green toning near the rims. The base of a tilted 1 is misplaced in the dentils. The variety is undesignated on the holder. It appears that all business strike 1850 quarters are Briggs 1-A, and none are Briggs 2-B, although the misplaced 1 is indistinct on low grade or late die state examples. PCGS# 395929 Base PCGS# 5415

3594 **1853 No Arrows XF40 PCGS. Briggs 1-A.** The Philadelphia Mint struck only 44,200 No Arrows quarters in 1853, using a single die pair that shows recutting on the 53 in the date. This XF example displays pleasing detail, with steel-gray surfaces that deepen to olive and gold around the borders. A seldom seen issue in any grade, and rare finer than the present example. Population: 5 in 40, 30 finer (4/15). NGC ID# 23TA, PCGS# 5421

3595 **1853 Arrows and Rays MS62 NGC.** The short-lived Arrows and Rays design was produced only at the New Orleans and Philadelphia Mints; of these, the Philadelphia issue is the more often seen in Mint State, ideal for type representation. This example is lightly abraded, as the grade suggests, but shows well-defined motifs with satiny luster. Pale champagne and lavender-gray toning accents each side. NGC ID# 23U4, PCGS# 5426

1853 Arrows and Rays Quarter, MS64
Exceptionally Clean Surfaces

3596 **1853 Arrows and Rays MS64 NGC.** A wisp of golden patina visits this coruscating and well preserved near-Gem. Minor strike-throughs (as coined) are noted near star 10. Clashed on at least four separate occasions, counting the distinct clashes on the field near Liberty's elbow. A popular single-year type. The rays reduced die life and were removed for the 1854 Arrows issue. NGC ID# 23U4, PCGS# 5426

3597 **1854-O Huge O, Briggs 1-A, FS-501, Fine 15 NGC.** The only die pairing of this variety. A collectible example of this rare issue showing the large donut-shaped mintmark believed to have been hand-engraved into the working die. The devices are slate-gray and contrast significantly with the mildly granular lavender-gray fields. *Ex: FUN Signature (Heritage, 1/2005), lot 6388; ANA Signature (Heritage, 8/2007), lot 634; ANA Signature (Heritage, 3/2011), lot 3500.* PCGS# 395933 Base PCGS# 5434

1856 Quarter, MS66
Among Finest Known

3598 **1856 MS66 NGC.** Golden-brown and olive-green occupy the obverse, while the reverse blends aquamarine, chestnut, and plum-mauve toning. A coruscating and virtually immaculate example. The obverse die was misaligned slightly toward 8:30, which created a "railroad rim" on the right obverse border. Nonetheless, the strike is sharp. Census: 8 in 66, none finer (5/15). NGC ID# 23TB, PCGS# 5438

3599 **1859 MS64 PCGS. Briggs 1-A.** Type One Obverse, Type One Reverse. Iridescent and frosted, this near-Gem quarter has only a few tiny marks on Liberty's legs and virtually no abrasions to be seen elsewhere. Gold and sea-green shades cover both sides with sky-blue accents around the central devices. The strike is incomplete on the eagle's forward leg and on most of the stars and Liberty's hair strands. An attractive and original coin, housed in an old green-labeled holder. Population: 39 in 64 (1 in 64+), 13 finer (4/15). NGC ID# 23TL, PCGS# 5448

3600 **1860-O MS62 NGC. Briggs 1-A.** Luster illuminates the borders and devices of this untoned and intricately struck New Orleans quarter. Bagmarks are absent, and the fields display only infrequent trivial hairlines. Census: 5 in 62, 25 finer (4/15). NGC ID# 23TR, PCGS# 5452

3601 **1866 Motto VF20 NGC. Briggs 1-A.** Shades of tan and lavender accent the pale steel-gray surfaces of this mid-grade 1866 With Motto Seated quarter. This issue had a mintage of only 16,800 pieces and is significantly challenging in all grades; Mint State coins are rare. Census: 1 in 20, 38 finer (4/15). NGC ID# 23UB, PCGS# 5468

3602 **1867-S VF25 PCGS. Briggs 1-A.** It is doubtful than anyone on the West Coast collected Seated quarters from circulation before the 20th century. Thus, the small 48,000-piece mintage of 1867-S quarters remained in commerce until the coins were worn slick, lost, or damaged. PCGS has graded a total of 62 pieces, including one as Poor 1 and two as Fair 2. The present coin is much nicer, with a full LIBERTY and problem-free cream-gray surfaces. NGC ID# 23UE, PCGS# 5471

3603 **1867-S — Edge / Rim Damage — PCGS Genuine. Briggs 1-A.** PCGS describes edge and rim damage as the reason that they deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen with minor damage to the upper reverse rim; an old dig is also evident on the eagle's right (facing) wing. The design elements are well-detail and surfaces yield uniform lavender-gray patina. NGC ID# 23UE, PCGS# 5471

1867-S Quarter, XF45
Seldom Seen in Any Grade

3604 **1867-S XF45 NGC.** The 1867-S quarter is remarkably scarce, especially in better grades. Only 48,000 pieces were struck (all from a single pair of dies), and almost the entire mintage entered circulation. This Choice XF example displays pale pastel toning over each side, and the only marks of any import are several shallow ones near the foot of Liberty. Census: 2 in 45, 3 finer (4/15). NGC ID# 23UE, PCGS# 5471

3605 **1871 MS63 NGC. Briggs 4-C.** A sharply struck and satiny example of this lower mintage and conditionally scarce issue. The outer borders exhibit a trace of pale gold toning. The reverse is well preserved and the obverse displays only unimportant marks. Census: 4 in 63, 11 finer (4/15).
Ex: FUN Signature (Heritage, 7/2007), lot 702, which realized $1,265. NGC ID# 23UM, PCGS# 5478

3606 **1871-S — Environmental Damage — ANACS. XF40 Details. Briggs 1-A.** Moderate granularity over each side of this 1871-S quarter precludes a numeric grade, although the sharpness of the design elements balances the eye appeal. The 1871-S is a scarce issue with a mintage of only 30,900 pieces, and well-detailed examples are always in demand. NGC ID# 23UP, PCGS# 5480

3607 **1873 Open 3, No Arrows, MS63 ANACS. Briggs 1-A.** Blushes of orange-gold toning adorn the margins of this coruscating and unmarked Select half dollar. The strike is sharp save for softness on a few right-side stars. A lower mintage variety struck during a narrow window of time between the Closed 3, No Arrows, and the Open 3, Arrows. NGC ID# 23UV, PCGS# 5485

1873 Seated Quarter, MS64
Open 3, No Arrows

3608 **1873 Open 3, No Arrows, MS64 NGC.** Satiny and intricately struck with only a hint of gold toning. Visible marks are essentially absent, and thorough evaluation is required to locate minor obverse hairlines. A Briggs-unlisted example that lacks the clash marks usually seen on this low mintage issue. Census: 9 in 64, 3 finer (4/15). NGC ID# 23UV, PCGS# 5485

3609 **1873 Arrows MS62 PCGS. Briggs 3-B.** Hints of peach-gold toning visit this lustrous and attractive Arrows type coin. Well struck except for stars 3 through 8. Smooth aside from a few delicate hairlines near star 11.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1198. NGC ID# 23VU, PCGS# 5491

1874-S Arrows Quarter, MS65
Booming Luster, Sharp Strike

3610 **1874-S Arrows MS65 PCGS. Briggs 1-A.** Caramel-gold, orange, and powder-blue shades adorn this lustrous and precisely struck Gem. The fields display infrequent incidental contact. According to Larry Briggs, high grade examples of the 1874-S originate from an accumulation "discovered in a West Coast bank in 1949." Certified in an old green label holder. Population: 49 in 65, 37 finer (4/15). NGC ID# 23VY, PCGS# 5495

3611 **1877/77-CC Briggs 2-B, FS-301, MS63 PCGS.** Wide Large CC. The 77 is repunched south. The foot of the 1 is repunched north. Delicate wheat-gold toning visits this crisply struck and lustrous Carson City quarter. Marks are minimal, and the eye appeal is superior for the designated grade. PCGS# 395941 Base PCGS# 5505

1877-S FS-501 Quarter, MS65
S Over Horizontal S
Guide Book Variety

3612 **1877-S S Over Horizontal S, FS-501, MS65 NGC.** Vibrant cartwheel sheen traverses iridescently toned sea-green, golden-brown, and cream-gray surfaces. A precisely struck Gem with unmarked and pleasing surfaces. Essentially unobtainable any finer. An absent-minded mint worker initially entered a "lazy S" mintmark with a 90 degree rotation, then punched the mintmark a second time with the proper rotation, partly overlapping the first impression. Census: 5 in 65, 0 finer (4/15). PCGS# 145562 Base PCGS# 5507

1878 Seated Quarter, MS65
Great Eye Appeal

3613 **1878 MS65 PCGS.** Great eye appeal is present for the grade on this piece and surprisingly few abrasions appear on either side. Fantastic rim patina includes cobalt-blue and deep cinnamon, complementing lightly toned rose-gray central areas. A peripheral die crack encircles much of the reverse at the letter tops. Nicely struck and thoroughly attractive. Population: 10 in 65, 11 finer (4/15). NGC ID# 23V8, PCGS# 5508

3614 **1878-S AU50 PCGS. Briggs 1-A.** A partly lustrous dove-gray example. Marks are unobtrusive save for a few hair-thin lines below the ED in UNITED. Well struck, but reverse detail is attenuated by lapping, as made and usual for the issue. A scarce and fairly low mintage issue, since branch mint quarter production ceased after Morgan dollar dies arrived. NGC ID# 23VA, PCGS# 5510

3615 **1883 MS65 PCGS. Briggs 2-A.** Booming cartwheel luster swirls about this fully struck Gem. Rich tobacco-brown and navy-blue toning illuminates the margins. The reverse is pristine, and the obverse displays only a few minor imperfections. NGC ID# 23VF, PCGS# 5515

1883 Quarter, MS66
Brilliant, Lustrous, Pristine

3616 **1883 MS66 PCGS. Briggs 2-A.** A stone-white Premium Gem that boasts booming cartwheel luster and an exemplary strike. Essentially as struck. A few dozen examples were saved by Philadelphia dealers upon issue, but nonetheless rare in the present quality. The commercial mintage was just 14,400 pieces. Population: 19 in 66 (1 in 66+), 3 finer (4/15). NGC ID# 23VF, PCGS# 5515

3617 **1886 MS64 PCGS. Briggs 1-A.** The low mintage of business strikes (5,000 pieces) explains why so many 1886 quarters exhibit semiprooflike and prooflike fields, as seen here. Each side is mostly brilliant with a few streaks of milky patina evident when closely examined. The strike details are strong in all areas except the top of the head of Liberty. Population: 28 in 64, 28 finer (4/15).
Ex: FUN Signature (Heritage, 7/2012), lot 3572. NGC ID# 23VJ, PCGS# 5518

3618 **1888 MS66 PCGS. Briggs 1-A.** The 1888 quarter boasts a low mintage of just 10,000 pieces, and examples in Premium Gem condition are seldom encountered. This piece displays the usually seen reflectivity in the fields, and the devices are well-struck. Both obverse and reverse are engulfed in toning that includes copper-tan and liberal splashes of iridescent aqua. Population: 58 in 66 (5 in 66+), 9 finer (5/15). NGC ID# 23VL, PCGS# 5520

3619 **1888-S MS64 PCGS. Briggs 4-D.** The first branch mint issue in ten years, the 1888-S is scarcer at the MS64 level than its mintage suggests. This golden-brown and sea-green half dollar has satin luster and a bold strike. Refreshingly devoid of abrasions. Population: 32 in 64 (1 in 64+), 9 finer (4/15). NGC ID# 23VN, PCGS# 5521

3620 **1888-S MS64 PCGS. Briggs-Unlisted.** Golden-brown, forest-green, and lavender-red bathe this lustrous and well struck Choice quarter. Smooth aside from wispy marks on the left obverse field. The mintmark location does not match any of the photographs in the Larry Briggs reference. A small die break atop the right end of the banner may be of interest to the specialist. NGC ID# 23VN, PCGS# 5521

3621 **1889 MS64 PCGS. Briggs 1-A.** Quarter coinage began increasing in 1890, making the 1889 issue the final date in the series severely affected by the dictates of the Bland Allison Act, which required the expenditure of enormous Mint resources on the coinage of millions of unneeded silver dollars. This Choice representative displays satiny champagne luster with deeper lavender-gray and russet overtones dusted over each side. The strike is sharp and the underlying surfaces are remarkable clean. NGC ID# 23VM, PCGS# 5522

3622 **1891 MS65 NGC. Briggs 3-C.** Cherry-red and forest-green occupy the obverse, while the reverse displays golden-brown, dove-gray, and aquamarine toning. A lustrous and needle-sharp Gem with a nearly pristine reverse. A small bright area is noted east of the cap. Struck from lightly clashed dies.
Ex: Jones Beach Estate, Part II (Heritage, 11/2003), lot 6196; Long Beach Signature (Heritage, 6/2004), lot 8199, which realized $1,265. NGC ID# 23VR, PCGS# 5524

3623 **1891 MS65 NGC.** Orange-gold centers are framed by navy-blue and cherry-red margins. This beautifully toned and lustrous Gem is boldly struck and exhibits only wispy field marks. Census: 60 in 65 (1 in 65+), 63 finer (4/15). NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

1857 Quarter, PR62
Attractive Gold Toning
Rare Proof Date

3624 **1857 PR62 NGC.** The proof 1857 quarter has an unknown but undoubtedly low mintage. NGC has certified 38 examples in all grades, and some of those are likely resubmissions. Nearly all proofs are Briggs 7-G, but the present piece is struck from an unlisted obverse die, which shows the date entered slightly further east relative to Briggs 7. The present well struck specimen displays light to medium peach-gold and pearl-gray toning. The obverse is misaligned toward 5:30, a curious mint error on a proof coin from the era. NGC ID# 23WJ, PCGS# 5553

1860 Seated Quarter, PR65 Cameo
Untoned, High-Contrast Proof

3625 **1860 PR65 Cameo NGC.** The official proof mintage was an ambitious 1,000 pieces — the first year of "official" proof sales to the public. A modest premium was charged for the special production, yet 458 pieces were melted as unsold at year's end. This is one of the finest Cameo survivors known. The brilliant surfaces display deeply reflective fields with strongly contrasting mint frost over the devices. The strike is full in the centers with some peripheral softness noted on the stars. Census: 5 in 65 Cameo (1 in 65+ Cameo), 5 finer (4/15). PCGS# 85556

3626 **1863 PR64 PCGS.** Frosted devices contrast nicely with the mirrored fields, where magenta and coppery-red hues vie with royal-blue toning across both sides. This near-Gem proof displays distinctive coloration that is both original and attractive. A sharp strike on the devices is normal for the 1863 proofs, of which 460 pieces were produced. Housed in an old green label holder. Population: 56 in 64, 21 finer (4/15). NGC ID# 23WR, PCGS# 5559

3627 **1863 PR64 PCGS Secure. Briggs 4-D.** Delicate golden-brown toning adorns the margins of this intricately struck Choice Civil War proof quarter. Cameo contrast is noticeable but not indicated by PCGS. A few wispy contact marks are noted on the field near star 3. One of only 460 proofs issued. NGC ID# 23WR, PCGS# 5559

3628 **1866 Motto PR64 Cameo NGC. Briggs 2-B.** A sharply struck and snow-white Choice proof with glassy fields and icy legends and devices. The cameo contrast is formidable, and we wonder why an Ultra Cameo designation was not attained. Census: 8 in 64 Cameo (1 in 64 ★ Cameo), 17 finer (4/15).
Ex: Denver Signature (Heritage, 8/2006), lot 1161, which realized $1,495. PCGS# 85565

1872 Seated Quarter Dollar, PR66
Eye-Catching Patination

3629 **1872 PR66 PCGS. CAC. Briggs 3-C.** Deeply mirrored fields and sharp, frosty devices contrast decidedly over each side of this Premium Gem, from a mintage of 950 proofs. The surfaces are beautifully toned in shades of olive-green, ice-blue, purple and pink-red, illuminated with reflective mint luster. NGC ID# 23X5, PCGS# 5571

3630 **1872 PR65 Cameo PCGS. Briggs 3-C.** An snow-white Gem with frosty devices and glassy fields. The strike is complete save for slight blending on the left (facing) claw. The first appearance of the proof reverse variety with a slender die scratch on the left shield border. PCGS# 85571

3631 **1873 No Arrows PR65+ NGC. Briggs 1-A.** All known proofs of the No Arrows 1873 quarter feature the Closed 3 logotype. This Plus-graded representative displays frosty devices and noticeable cameo contrast, even through deep multicolor toning that blankets each side in shades of rose-gold, mint-green, amber, and sky-blue. Census: 22 in 65 (1 in 65+), 14 finer (4/15). NGC ID# 23X6, PCGS# 5572

1873 Arrows Quarter, PR64
Undesignated Cameo Contrast

3632 **1873 Arrows PR64 PCGS. Briggs 5-D.** A boldly struck Choice proof. Brilliant aside from glimpses of tan-brown toning along the right obverse margin. Liberty, the eagle, and the legends exhibit substantial frost, and the fields are nicely mirrored, yet PCGS has demurred on a Cameo designation. The reverse die with a raised line on the left border of the shield, as made and familiar to specialists of the series. A very scarce proof subtype. NGC ID# 23XR, PCGS# 5574

3633 **1874 Arrows PR62 ANACS. Briggs 5-D.** Cherry-red and autumn-brown toning adorns the borders of this satiny and well preserved specimen. Star 13 is indistinct, but the remainder of the design is boldly struck. A scarce proof subtype. NGC ID# 23XS, PCGS# 5575

3634 **1874 Arrows PR63 PCGS. Briggs 5-D.** Light straw-gold toning visits this flashy and unblemished Select proof. The strike is sharp except on star 1. The Arrows, Motto type was struck for only two years. Only 700 proofs were issued. NGC ID# 23XS, PCGS# 5575

3635 **1877 PR64 Cameo PCGS. Briggs-Unlisted.** Type Two Reverse. This near-Gem has darkly mirrored fields and prominent obverse cameo contrast. Brilliant throughout aside from a wisp of tan toning near OF. An intricately struck representative of a proof emission of just 510 pieces. Population: 11 in 64 (2 in 64+) Cameo, 14 finer (4/15).
Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 803, which realized $1,380. PCGS# 85578

3636 **1877 PR64 Cameo PCGS. CAC. Briggs 1-B.** Type Two Reverse. Ice-white devices rise in full detail above darkly mirrored fields. The brilliant fields display minor imperfections, but the eye appeal is nonetheless attractive. Population: 11 in 64 (2 in 64+) Cameo, 14 finer (5/15). PCGS# 85578

3637 **1880 PR64 Cameo NGC. Briggs 2-B.** Type Two Reverse. Faint cherry-red toning adorns the borders of this well preserved near-Gem. The devices are boldly struck and nicely frosted. A low mintage date, with Mint resources devoted to cents, silver dollars, and gold. Census: 15 in 64 Cameo (1 in 64+ Cameo), 54 finer (4/15).
Ex: St. Louis Central States Signature (Heritage, 5/2007), lot 486, which realized $1,380. PCGS# 85581

3638 **1881 PR66 PCGS.** The 1881 Seated quarter issue is always of interest because of the low total mintage, with only 975 proofs and a mere 12,000 circulation strikes. Gorgeous multicolor toning and brilliant mirrored surfaces provide both sides of this Premium Gem with considerable visual appeal. Among the colors present are plum-red, orange-gold, and ocean-blue. NGC ID# 23XD, PCGS# 5582

3639 **1884 PR66 PCGS. Briggs 2-B.** Fire-red toning dominates the obverse of this flashy and fully struck specimen. Additionally, the obverse displays speckles of steel-gray. The reverse is principally sea-green, although lavender and orange also appear. A meager 875 proofs were produced. NGC ID# 23XG, PCGS# 5585

3640 **1885 PR64 PCGS. Briggs 3-B.** Golden-brown, aquamarine, and lilac toning adorns well preserved and flashy surfaces. The stars and dentils are lightly brought up, but the remainder of the design is well struck. A retained lamination (as made) is noted on the dentils near the O in DOL. NGC ID# 23XH, PCGS# 5586

3641 **1889 PR65 PCGS. Briggs 2-B.** Exquisite jade-green, navy-blue, plum-red, and peach-gold toning consumes both sides of this fully struck and pleasing specimen. A low mintage date, since only 711 proofs and 12,000 business pieces were struck. NGC ID# 23XM, PCGS# 5590

3642 **1890 PR65 PCGS Secure.** Dramatic ocean-blue, plum-red, and sun-gold shades endow this well struck and flashy Gem. No post-strike detractions are apparent. A scant 590 proofs were issued. NGC ID# 23XN, PCGS# 5591

BARBER QUARTERS

3643 **1894 MS65 PCGS. CAC.** This Gem 1894 Barber quarter is boldly struck throughout, with bright satiny luster that exudes russet and ocean-blue hues along the upper obverse and lower reverse borders. A few light grazes on Liberty's cheek limit the grade. Population: 19 in 65, 12 finer (5/15). NGC ID# 23XZ, PCGS# 5607

3644 **1896 MS65 PCGS. CAC.** This boldly struck Gem exhibits satiny mint luster beneath a blanket of pale russet-gold toning; further overtones of deep gunmetal-blue appear over much of the peripheral regions. A few light ticks on Liberty's cheek limit the grade. There is a shallow planchet void at the forward edge of the neck. Population: 33 in 65 (2 in 65+), 13 finer (5/15). NGC ID# 23Y7, PCGS# 5613

3645 **1896-S — Cleaned — ANACS. XF40 Details.** The Barber quarter series is easily pursuable with the exception of three "stoppers:" the 1913-S, the 1901-S, and the 1896-S. This example of the latter is well-detailed, with pale golden toning over steel-gray surfaces. Old, light cleaning has not overly impeded the eye appeal. NGC ID# 23Y9, PCGS# 5615

3646 **1897-S AU50 PCGS.** The 1897-S stands out as one the major semikey dates in the Barber quarter series, significantly rarer than the common dates but somewhat overshadowed by the three big keys (1913-S, 1901-S, and 1896-S). This problem-free example shows only a trace of wear, with a bold strike clearly evident. Light golden toning encompasses the surfaces. NGC ID# 23YC, PCGS# 5618

3647 **1898 MS65 PCGS.** Pale champagne-gray hues with mildly translucent russet and lilac overtones encompass each side of this Gem Barber type coin, while satiny luster glows beneath. The preservation appears at least a point finer to the unaided eye, although closer study with a loupe reveals a few minor grazes beneath the patina on Liberty's cheek and on the reverse shield. Population: 27 in 65 (1 in 65+), 29 finer (4/15). NGC ID# 23YD, PCGS# 5619

1899 Barber Quarter, MS66+
Impressively Well-Preserved

3648 **1899 MS66+ PCGS. CAC.** The Plus designation is fully warranted on this outstanding late-19th century type coin. The vibrant, frosty surfaces are seemingly perfect, save for a few tiny ticks on the cheek which are evident with 10x magnification. Shades of champagne and light aquamarine toning grace each side, and the coin seems to glow when held at the right angle beneath a light. Population: 19 in 66 (3 in 66+), 2 finer (5/15). NGC ID# 23YG, PCGS# 5622

3649 **1899-O MS64 NGC.** The satiny surfaces of this Choice 1899-O Barber quarter are brightly lustrous, with a pleasant lack of any singularly significant abrasions. The eagle's right (facing) talons and the clutched arrow fletchings are weak, as expected for this New Orleans issue. Census: 26 in 64, 14 finer (5/15). NGC ID# 23YH, PCGS# 5623

1900-O Barber Quarter, MS65
Well-Preserved Branch Mint Issue

3650 **1900-O MS65 PCGS.** The design elements of this impressive Gem Barber quarter exhibit razor-sharp definition throughout and the well-preserved lustrous surfaces are enhanced by shades of magenta and golden-brown toning. Overall eye appeal is excellent. Population: 12 in 65, 12 finer (5/15). NGC ID# 23YL, PCGS# 5626

1903 Quarter, MS66
None Finer

3651 **1903 MS66 NGC.** Trivial contact on Liberty's cheek is barely discernible with a glass, and appears to be all that kept this high-end 1903 quarter from an even finer grade. As it stands, this piece is nonetheless among the finest certified of the date. Just a tinge of amber-gold toning accents the satiny surfaces, deepening slightly toward the peripheries. The strike is bold and the overall eye appeal is comparably strong. Census: 4 in 66, 0 finer (4/15). NGC ID# 23YV, PCGS# 5634

3652 **1903-S MS65 PCGS.** The surfaces of this Gem 1903-S Barber quarter are free of distracting abrasions, and the satiny luster that underlies the patina on each side is original. The surfaces are consistently amber-gold and champagne in color, although soft steel-blue overtones appear briefly here and there. Population: 16 in 65, 12 finer (5/15). NGC ID# 23YX, PCGS# 5636

3653 **1903-S MS65 PCGS.** The 1903-S Barber quarter claims a smallish mintage of just over 1 million pieces, making the issue quite rare in MS65 condition. This well-detailed Gem displays lustrous surfaces under shades of gold, lavender, and amber toning. Population: 16 in 65, 12 finer (5/15). NGC ID# 23YX, PCGS# 5636

3654 **1905 MS65 PCGS. CAC.** Golden-brown, aqua, olive, and lavender coloration blankets lustrous surfaces that display well struck design features. A few trivial obverse ticks are not in the least bothersome. Population: 22 in 65 (2 in 65+), 16 finer (5/15). *Ex: Palm Beach Signature (Heritage, 11/2004), lot 6555, which realized $1,207.50.* NGC ID# 23Z2, PCGS# 5639

3655 **1908 MS66 PCGS.** Deep gunmetal-gray, lavender-red, and caramel-gold alternate across this lustrous and unmarked high grade Barber quarter. Certified in an old green label holder. Population: 20 in 66, 2 finer (5/15). *Ex: Long Beach Signature (Heritage, 9/2010), lot 3985, which realized $1,380.* NGC ID# 23ZC, PCGS# 5649

3656 **1912-S MS64 NGC.** From a mintage of just 708,000 pieces, the 1912-S Barber quarter is very-scarce-to-rare in MS64 condition. This attractive Choice example exhibits well-detailed design elements and lustrous surfaces throughout. A few small planchet flaws on Liberty's cheek are the only marks of note. Census: 19 in 64, 21 finer (5/15). NGC ID# 23ZT, PCGS# 5663

3657 **1913-S VG8 PCGS.** The low mintage of just 40,000 pieces makes this San Francisco issue one of a trio of S-Mint "stoppers" in the series. This example is considerably worn but still a nice addition to a circulated set. Dove-gray surfaces show weak but legible letters LI-TY of LIBERTY on the obverse. The reverse is more deeply toned in medium-gray and gold shades, with nearly complete rims but sparse wing detail. NGC ID# 23ZW, PCGS# 5666

3658 **1913-S — Heavily Damaged, Polished — ANACS. VF20 Details.** The challenge of the 1913-S Barber quarter is heightened by the steep price tag that typically accompanies that issue. This is a somewhat more affordable piece for the budget-conscious collector seeking to fill the hole in his date and mintmark set. Olive and gold toning blanket each side. The surfaces are polished to a high gloss, with moderate damage to Liberty's portrait partially smoothed away. NGC ID# 23ZW, PCGS# 5666

1914-D Barber Quarter, MS66+
Brilliant Silver-White Luster

3659 **1914-D MS66+ PCGS. CAC.** Aside from the slightest rounding at star 11 plus minor weakness at the eagle's talons and at the upper-right shield point, this blazing-white quarter is for all purposes pristine. The fields and devices are remarkably free of even the tiniest marks or mentionable flaws. The luster flows across the untoned, frosty-smooth surfaces in waves. Few examples are certified any finer than this Plus-graded Premium Gem. Population: 10 in 66 (1 in 66+), 3 finer (5/15). NGC ID# 23ZY, PCGS# 5668

3660 **1916-D MS66+ NGC.** The 1916-D is one of the most available issues in the Barber quarter series for type purposes, spurred by a mintage in excess of 6.5 million pieces. This Plus-designated example exhibits bold luster and warm wheat-gold toning over each side. The strike is bold and close study with a lens reveals only a few faint slide marks on the shield and the high point of Liberty's cheek. Census: 66 in 66 (3 in 66+, 6 in 66 ★), 13 finer (4/15). NGC ID# 2426, PCGS# 5674

3661 **1916-D MS66+ PCGS.** A Plus designation recognizes exceptionally well-preserved surfaces which allow the thickly frosted mint luster to spiral around each side uninterrupted. The strike is sharp and a blush of pale amber toning along the lower obverse and upper reverse rim is the only suggestion of color. Only 15 coins are numerically finer at PCGS (5/15). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

3662 **1893 PR65 NGC.** Every bit a true Gem, this boldly struck proof exudes eye appeal with modest field-motif contrast that shines through a veil of light golden toning. After the inaugural popularity of the new Barber design had subsided, proof quarter production declined significantly in 1893 to just 792 pieces (down from 1,245 coins the year before). NGC ID# 2428, PCGS# 5679

1900 Barber Quarter, PR67
Only 912 Examples Struck

3663 **1900 PR67 PCGS.** A meager mintage of 912 proof Barber quarters was accomplished at the Philadelphia Mint in 1900. This spectacular Superb Gem exhibits sharply detailed design elements throughout, with well-preserved surfaces that show delightful shades of sea-green, pale gold, and powder-blue toning. The fields are deeply reflective but contrast is minimal. Population: 7 in 67, 1 finer (5/15). NGC ID# 242F, PCGS# 5686

1901 Barber Quarter, PR67+
Lightly Toned

3664 **1901 PR67+ NGC.** Were this turn-of-the-century proof struck a little sharper, it might have garnered a full PR68 grade from NGC; the usual weakness is evident on the eagle's right (facing) shoulder and talons, and to a lesser extent on the highest points of the obverse wreath leaves, but this is really nit-picking, as the overall appeal of this coin is excellent. Deeply mirrored fields yield rose-gold, amber, and mint-green hues, while close study with a glass fails to reveal any contact marks or distracting hairlines. Census: 27 in 67 (1 in 67+), 7 finer (4/15). NGC ID# 242G, PCGS# 5687

1905 Quarter, Toned PR67+

3665 **1905 PR67+ NGC. CAC.** Ex: Eric P. Newman Collection. This high-end Superb Gem displays a fair amount of field-motif contrast for a non-Cameo proof. The strike is strongly brought up over all the design elements, and each side reveals no mentionable distractions. Multicolored toning is somewhat deeper on the reverse. Census: 23 in 67 (1 in 67+), 3 finer (5/15).
Ex: Eric P. Newman Numismatic Education Society. NGC ID# 242L, PCGS# 5691

3666 **1908 PR65 NGC.** Golden-brown, ocean-blue, and olive-green endow the peripheries. The flashy fields and frosty motifs are brilliant. Faint die polish lines beneath Liberty's jaw are as made. Fully struck except on obverse star 3. NGC ID# 242P, PCGS# 5694

3667 **1911 PR66 Cameo PCGS.** The cameo contrast on this Premium Gem proof is eye-catching, warmed by a thin veil of light golden toning. Sharp design definition is present on all relief elements and there are only a few faint lines detectible in the fields. Population: 18 in 66 (2 in 66+) Cameo, 11 finer (5/15). PCGS# 85697

3668 **1914 PR66 NGC.** Gleaming fields and sharp, satiny devices reside beneath a blanket of russet-gold and pale lilac toning. A few faint hairlines are well-masked by the rich patina. Census: 29 in 66, 27 finer (5/15). NGC ID# 242W, PCGS# 5700

3669 **1915 PR64 PCGS.** Brilliant and precisely struck with noticeable but undesignated cameo contrast. A scant 450 proof dimes were issued in 1915, due to declining interest from collectors in the Barber design, in use since 1892. NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

3670 **1917 Type One MS66 Full Head NGC.** The razor-sharp strike of this Premium Gem type coin is complemented by rich, satiny luster and delicate champagne toning. The upper portion of the obverse also displays small splashes of pine-green, russet, and amber-red color. NGC ID# 242Z, PCGS# 5707

3671 **1917 Type One MS66 Full Head PCGS.** The Type One Philadelphia issue is seldom seen with the frosty, glowing luster which this sharp Premium Gem possesses. Warm prairie-gold toning graces each side, with deeper russet overtones present in portions of the peripheral recesses. A few light marks on Liberty's leg are the only mentionable surface flaw. NGC ID# 242Z, PCGS# 5707

3672 **1917 Type One MS66 Full Head PCGS. CAC.** This is a well-struck, frosty Premium Gem with vibrant luster and just a hint of light golden toning. A few insignificant grazes on the torso are all that limit the grade on this eye-appealing Type One representative. NGC ID# 242Z, PCGS# 5707

1917 Type One Quarter, MS67 Full Head
None Finer at Either Service

3673 **1917 Type One MS67 Full Head NGC.** A boldly impressed and exquisitely preserved representative of this ever-popular type issue, frosty with a hint of satin on the obverse. The reverse fields exhibit a degree of orange-peel effect beneath whispers of ice-blue and amber patina. Neither NGC nor PCGS has graded a numerically finer example (5/15).
Ex: Dallas Signature (Heritage, 11/2005), lot 1369; Long Beach Signature (Heritage, 5-6/2007), lot 961. NGC ID# 242Z, PCGS# 5707

3674 **1917-D Type One MS66 PCGS.** An attractive Premium Gem representative of this important type issue, this coin displays well-detailed design elements and vibrant mint luster with a few hints of golden-tan toning. Population: 22 in 66 (2 in 66+), 4 finer (5/15). NGC ID# 2432, PCGS# 5708

3675 **1917-D Type One MS65 Full Head PCGS.** Type One Denver mint 1917 quarters are seen much less often than the modified Type Two design, which were produced to an extent nearly four times the mintage of the Type Ones. Creamy silver-gray surfaces of this example are brightly lustrous and display just a hint of golden toning. All of the shield rivets are present, and the Full Head designation confirms the quality of strike. NGC ID# 2432, PCGS# 5709

3676 **1917-D Type One MS65 Full Head PCGS.** Satiny luster and uniform golden toning set each of this Gem Full Head quarter aglow, while close study of the surfaces fails to reveal any significant abrasions. The Type One Denver issue is found in Gem Full Head grades less than half as often as its Philadelphia counterpart. NGC ID# 2432, PCGS# 5709

3677 **1917-D Type One MS66 Full Head PCGS.** This sharp, satiny Premium Gem exhibits consistent nickel-gray toning, with tinges of olive, gold, and russet in the protected regions. This is about as fine as the '17-D Type One is usually available with Full Head detail, as PCGS rates only 22 such coins numerically higher (5/15). NGC ID# 2432, PCGS# 5709

3678 **1917-D Type One MS66 Full Head PCGS.** Soft golden toning warms the satiny surfaces of this high-end Full Head example. The Denver issue is slightly more difficult to acquire in sharp, high-grade condition than is its Philadelphia counterpart, but this piece is one of the exceptions. The design elements are boldly rendered and the surface texture is mint-fresh. Only a couple tiny ticks below the E in AMERICA garner brief mention. There are 22 numerically finer Full Head coins at PCGS (4/15). NGC ID# 2432, PCGS# 5709

3679 **1917-D Type One MS66+ Full Head PCGS.** This Plus-graded Premium Gem exhibits satiny golden luster with pleasantly unabraded surfaces. The top portion of the date is a little weak, but the coin is otherwise sharply struck. PCGS has seen just 22 finer Full Head representatives (5/15). NGC ID# 2432, PCGS# 5709

3680 **1917-S Type One MS64 Full Head PCGS. CAC.** This is a sharply struck '17-S Type One representative, with pleasantly soft luster residing beneath a blanket of golden-gray and lilac toning. The patina effectively masks a few light abrasions. Surface texture is smooth and satiny on the obverse, and somewhat matte-like on the reverse. NGC ID# 2433, PCGS# 5711

3681 **1917-S Type One MS65 Full Head PCGS. CAC.** Matte-like luster accentuates the design sharpness on this Gem Full Head example, and a small tick on Liberty's knee is the only mentionable abrasion. Pale champagne toning graces each side, deepening to light olive-gold along the upper-right obverse margin. NGC ID# 2433, PCGS# 5711

1918 Quarter, Vibrant MS67
Rare So Fine

3682 **1918 MS67 PCGS. CAC.** This radiantly lustrous Superb Gem is tied with just two others as the finest non-Full Head 1918 quarter at PCGS (5/15). The shield and stars are boldly brought up, as is the leading edge of the eagle's left (facing) wing; Liberty's head is just a little weak at the temple. Warm golden and olive overtones visit the peripheral recesses, but leave the centers seemingly brilliant. No distractions are observed. NGC ID# 2437, PCGS# 5720

1918/7-S Quarter, VF Details
Scarce World War Overdate

3683 **1918/7-S FS-101 — Cleaning — PCGS Genuine. VF Details.** The thick downstroke of the 7 is apparent on this key date quarter. The stone-gray and almond-gold surfaces are moderately subdued and faintly hairlined, but luster emerges from the borders. A hair-thin mark above DOLLAR merits only passing mention. PCGS# 395949 Base PCGS# 5726

3684 **1919-D MS63 PCGS.** Iridescently patinated in jade-green, lilac, and butter-gold shades. Lustrous and well preserved with a bold date and incompleteness on Liberty's sprig and the two shield rivets near the waist. A little-saved branch mint issue. Housed in a green label holder. NGC ID# 243C, PCGS# 5730

3685 **1920-D MS63 PCGS.** The 1920-D is one of the most challenging pre-1925 Type Two Standing Liberty quarters to acquire with a sharp strike. Although not a Full Head, this piece comes close, and also displays unusually sharp shield rivets and central gown details. The tops of the date numerals are weak, as usual. This piece has satiny luster with light golden toning over each side. NGC ID# 243F, PCGS# 5736

3686 **1920-S MS65 PCGS. CAC.** This Gem is unusually sharp for a 1920-S, including bold date numerals, stars, and above-average definition of the shield rivets. Only Liberty's head lacks sufficient detail. The surfaces are largely light golden in color, although small russet overtones are present on the highest points of the figure. Population: 47 in 65, 18 finer (5/15). NGC ID# 243G, PCGS# 5738

1923-S Quarter, MS65
Lightly Toned, Outstanding Quality

3687 **1923-S MS65 PCGS.** Delicate caramel-gold toning adorns this lustrous and splendidly preserved. The base of the sprig is incomplete, and the usual two shield rivets show softness, but the strike is otherwise precise. Boldly clashed near Liberty's legs, with the M in AMERICA visible. An low mintage Pedestal Date branch issue. Encapsulated in an old green label holder. NGC ID# 243K, PCGS# 5744

3688 **1924 MS67 PCGS.** The 1924 is fairly plentiful overall, but it is underrated at the Superb Gem grade level. This piece shows above-average sharpness on the shield and date, and Liberty's head is just a trifle weak at the temple. The surfaces are light golden in color and the obverse shows the rusted-die luster for which this issue is well-known. Population: 12 in 67 (1 in 67+), 2 finer (5/15). NGC ID# 243L, PCGS# 5746

1924 Quarter, Frosty MS67+

3689 **1924 MS67+ NGC. CAC.** Thick, lush mint frost covers each side of this lightly toned Superb Gem 1924 Standing Liberty quarter, which shows a sharp strike throughout with the sole exception of the hairline of Liberty and one or two shield rivets, which are present but incomplete. Wisps of champagne patina complete a marvelous ensemble. Census: 20 in 67 (3 in 67+), 5 finer (4/15). NGC ID# 243L, PCGS# 5746

1924 Quarter, MS66 Full Head Razor-Sharp Throughout

3690 **1924 MS66 Full Head PCGS.** The connoisseur will appreciate this Premium Gem's boldly defined design elements which include the date, shield, eagle's feathers, stars, and of course, Liberty's head. The brilliant, satiny surfaces are devoid of distracting abrasions, and the obverse lacks the heavy die rust that is typically seen on this issue. Population: 45 in 66 (6 in 66+) Full Head, 11 finer (5/15). NGC ID# 243L, PCGS# 5747

3691 **1924-D MS64 Full Head PCGS.** The 1924-D is a challenging date in Full Head, as the typical piece comes with a "dished-out" appearance similar to that seen on most 1926-D quarters. The current example is unusually sharp, not only on the head but also on the shield and stars. Satiny luster reveals few noticeable abrasions when rotated in-hand. NGC ID# 243M, PCGS# 5749

1924-D Quarter, MS65 Full Head Satiny, Lightly Toned Surfaces

3692 **1924-D MS65 Full Head PCGS.** The 1924-D is one of the more challenging issues to locate with Full Head detail in the Standing Liberty quarter series, particularly as fine as Gem quality. This piece shows strong head definition and above-average sharpness on the shield; the leading edge of the eagle's left (facing) wing shows persisting softness. Both sides are lightly toned in dusky olive-gray hues, although close study with a glass finds the surfaces well-preserved. Population: 51 in 65 Full Head, 19 finer (5/15). NGC ID# 243M, PCGS# 5749

3693 **1924-S MS65+ PCGS.** This is a lovely coin, with old-time golden toning and about 80% head definition — an important attribute for this issue which is seldom seen with any mentionable sharpness. Album-toned shades of lilac and lemon-gold further accent the peripheries. Bold date numerals are worthy of additional mention. Population: 53 in 65 (2 in 65+), 36 finer (5/15). NGC ID# 243N, PCGS# 5750

1924-S Quarter, Lightly Toned MS66

3694 **1924-S MS66 NGC.** This satiny Premium Gem shows pale rose-gold toning over each side, and the only mentionable abrasions are a pair of small ticks near Liberty's ankles. Struck from an advanced die state, with clash marks that are partially erased by heavy die polishing which has left numerous striations in the fields. The obverse is cracked through the date, Liberty's branch hand, and the left-hand stars; the reverse is cracked from the rim at 4 o'clock into the eagle's body and wing. A noticeable degree of weakness is present on Liberty's head and the eagle's body. Census: 19 in 66 (1 in 66+), 5 finer (5/15). NGC ID# 243N, PCGS# 5750

3695 **1927 MS66 Full Head NGC.** This Full Head example's attributes include above-average sharpness on the shield, stars, and central gown folds, with frosty, well-preserved surfaces. A soft overlay of champagne-gold toning attests to the originality of the surfaces and increases the visibility of the luster to assure the viewer of the impressive preservation. Deeper russet and amber overtones play in the recesses, primarily on the reverse. Census: 31 in 66 Full Head, 2 finer (4/15). NGC ID# 243U, PCGS# 5761

3696 **1927-D MS65 Full Head PCGS.** A sharp Full Head and above-average definition on the shield rivets give this Gem 1927-D added appeal beyond the obvious condition and the satiny luster. Both sides are light golden in color, with peppered olive overtones. Population: 85 in 65 (4 in 65+) Full Head, 15 finer (5/15). NGC ID# 243V, PCGS# 5763

3697 **1929-D MS64 Full Head PCGS.** Sharply detailed throughout, with Full Head definition, this attractive Choice specimen exhibits well-preserved lustrous surfaces under shades of pale gold and ice-blue toning. Population: 75 in 64 (1 in 64+) Full Head, 54 finer (5/15). NGC ID# 2443, PCGS# 5775

3698 **1929-S MS66 Full Head NGC.** The 1929-S is renowned for excellent, frosty luster, and this Premium Gem example does not disappoint. Liberty's head is complete, and the shield rivets, while not full, are better-defined than usual. Just a hint of light golden toning graces the vibrant surfaces and a little tick on Liberty's knee is the only abrasion of note. NGC lists 32 numerically finer Full Head coins (5/15). NGC ID# 2444, PCGS# 5777

3699 **1929-S MS66 Full Head PCGS. CAC.** The eye appeal of this outstanding Premium Gem is delivered by vibrant, frosty luster shining through original lavender-blue and champagne toning that uniformly graces each side. Liberty's head is bold and the surfaces boast a lack of mentionable abrasions. Only 14 Full Head coins are numerically finer at PCGS (5/15). NGC ID# 2444, PCGS# 5777

WASHINGTON QUARTERS

3700 **1932 MS66+ PCGS. CAC.** This Registry Set contender displays sharp motifs amid frosty, radiant luster. Much of each side shows just a faint golden hue, although the peripheries are more deeply toned in amber and russet. There are only three finer pieces at PCGS (5/15). NGC ID# 2447, PCGS# 5790

3701 **1932-D MS64 PCGS. CAC.** Deep olive and brown toning visits parts of the borders of this lustrous near-Gem. This sharply struck piece has been well cared for. Higher-grade coins are difficult to locate. NGC ID# 2448, PCGS# 5791

3702 **1932-S MS64 PCGS.** This is an affordable example of this popular key date. Both sides are frosty with faintly peppered russet toning over pastel blue and champagne surfaces. A light reed mark in the left obverse field is the chief grade-limiting factor. NGC ID# 2449, PCGS# 5792

1932-S Quarter, Toned MS65

3703 **1932-S MS65 PCGS.** Dappled autumn-brown and emerald-green compete for territory across this thoroughly lustrous and suitably struck Gem. One of the most coveted issues in the series, along with the 1932-D. A thin toning streak on the forehead will identify the present piece. PCGS reports just four numerically finer representatives (5/15).
Ex: Long Beach Signature (Heritage, 5/2008), lot 1375. NGC ID# 2449, PCGS# 5792

1932-S 25C, MS65
Patinated Key Date

3704 **1932-S MS65 NGC.** Mottled aquamarine and amber overtones accent pale champagne toning on each side of this Gem key-date Washington quarter. Sharp definition highlights the central devices and close examination reveals only a few minute ticks that limit the grade. Census: 72 in 65 (1 in 65 ★), 6 finer (4/15). NGC ID# 2449, PCGS# 5792

3705 **1934-D Medium Motto MS66 PCGS.** This satiny Premium Gem boasts sharp central devices, while each side is encompassed in mottled amber and gold toning. The surfaces of this Registry-quality 1934-D are almost completely devoid of abrasions. PCGS lists only seven numerically finer representatives (5/15). NGC ID# 244C, PCGS# 5796

3706 **1934-D Medium Motto MS66 PCGS. CAC.** This Premium Gem 1934-D is intensely lustrous and sharply struck, but the chief hallmark is its vibrant toning. The obverse shows cool lavender-blue in the center with vivid sun-gold and amber around the margins, while the reverse exhibits a similar palette but with the addition of mint-green accents. There are only seven numerically finer pieces at PCGS (5/15). NGC ID# 244C, PCGS# 5796

3707 **1934-D Medium Motto MS66+ PCGS. CAC.** Freckles of apple-green and peach-gold endow the borders of this early branch mint quarter. The strike is sharp, and the lustrous surfaces are virtually pristine. Population: 99 in 66 (8 in 66+), 7 finer (4/15). NGC ID# 244C, PCGS# 5796

3708 **1935-D MS66 PCGS.** A spectacular Premium Gem Washington quarter with well-detailed design elements and slightly subdued mint luster under attractive shades of pink and golden-brown toning. PCGS has graded 21 numerically finer examples (5/15). NGC ID# 244E, PCGS# 5798

3709 **1935-S MS67 PCGS. CAC.** Ex: Michael Fuller Collection. Light olive-green and ice-blue toning endows this thoroughly lustrous, sharply struck, and essentially pristine Superb Gem. Unimprovable quality for the early and low mintage branch mint issue. Population: 36 in 67, none finer (5/15).
Ex: Long Beach Signature (Heritage, 6/2004), lot 6072, which realized $4,312.50. NGC ID# 244F, PCGS# 5799

3710 **1936-D MS66 PCGS. CAC.** This is a scarce key date issue that is rare any finer than the present example. This piece is fully struck and satiny, with lovely dove-gray toning that shows a slight overlay of copper-orange patina on the reverse, and yields to speckled olive and peach toning near the left obverse periphery. Immaculately preserved from coin-to-coin contact, but a wispy fingerprint fragment near the date area denies perfection.
Ex: Dallas Signature (Heritage, 10/2006), lot 1070; Houston Signature (Heritage, 11/2007), lot 60847. NGC ID# 244H, PCGS# 5801

1936-S Quarter, MS67
Vividly Toned

3711 **1936-S MS67 PCGS. CAC.** Deep umber and sun-gold surfaces exhibit pleasant violet and forest-green overtones on the obverse of this Superb Gem 1936-S, while the reverse is more lightly toned in lavender-blue and champagne. The strike is bold and there are no distracting abrasions. Ideal for a high-ranking Registry Set. Population: 37 in 67 (2 in 67+), 0 finer (5/15). NGC ID# 244J, PCGS# 5802

3712 **1937 MS67+ NGC.** This frosty Superb Gem exhibits a splash of vivid amber-gold and olive toning over the right-hand portion of each side, while the eagle's breast feathers and Washington's hair details exhibit unusually sharp definition. There are no distractions of note. Census: 67 in 67 (1 in 67+, 1 in 67 ★), 0 finer (4/15). NGC ID# 244K, PCGS# 5803

3713 **1939-S MS67+ NGC.** Among the finest certified, this Plus-graded Superb Gem 1939-S quarter combines unsurpassed technical merit with pleasing eye appeal and sharply defined motifs. A blush of light golden color accents each side. Census: 42 in 67 (2 in 67+, 2 in 67 ★), 0 finer (4/15). NGC ID# 244T, PCGS# 5810

3714 **1940-S MS67+ PCGS. CAC.** It would be almost impossible to improve upon this outstanding Superb Gem 1940-S. The seemingly perfect surfaces exude mint-fresh, frosty luster with just a suggestion of soft lavender-blue toning overall. A few small olive accents also appear around the outer peripheries. This incredible, blazing coin is nearly half a grade point finer than the piece in the current highest-rated Registry Set. Population: 70 in 67 (5 in 67+), 1 finer (5/15). NGC ID# 244W, PCGS# 5813

3715 **1941 MS67+ PCGS. CAC.** This is a prime Registry Set candidate, as only a single piece is finer at PCGS (5/15). Both sides exhibit intense, frosty luster with a faint peppering of russet overtones in the margins on each side. A few microscopic ticks in the left obverse field are the only grade-limiting factor. NGC ID# 244X, PCGS# 5814

3716 **1941-D MS67 PCGS. CAC.** Awash in cherry-red, orange-gold, sea-green, and slate-gray color. Lustrous and well struck. Pristine except for unobtrusive contact on the eagle's body. Population: 45 in 67 (10 in 67+), 1 finer (5/15). NGC ID# 244Y, PCGS# 5815

1942-D FS-101 Quarter, MS65
Doubled Die Obverse
Single Finest Certified

3717 **1942-D Doubled Die Obverse, FS-101, MS65 NGC.** Very thick letters in the obverse legends confirm this dramatic and conditionally rare *Guide Book* doubled die variety. A lightly toned almond-gold Gem. Highly lustrous and crisply struck with a pristine reverse and unimportant obverse field grazes. A small mark is noted on Washington's jaw. The single finest certified by either major service (11/14). PCGS# 145011 Base PCGS# 95818

3718 **1943-S Doubled Die Obverse, FS-101, MS65 PCGS.** All obverse legends are strongly die doubled, but the spread is most impressive on GOD and TRUST. Brilliant and lustrous with a good strike, a pristine reverse, and only trivial obverse grazes. Population: 22 in 65 (1 in 65+), 10 finer (4/15). PCGS# 145154 Base PCGS# 5823

3719 **1948-S MS67+ NGC.** The eye appeal of this piece is undeniable, and the technical quality is excellent. Radiant, satiny luster illuminates light golden centers which cede to concentric rainbow hues in the margins. This piece is the only Plus-graded MS67 coin at NGC, and just a single finer piece is certified by that service (5/15). NGC ID# 245N, PCGS# 5838

1948-S Washington Quarter, MS67+
Registry Set Essential

3720 **1948-S MS67+ PCGS. CAC.** Light peach, cherry, and olive patina decorates the rim around frosty silver centers on this immaculate Superb Gem 1948-S quarter. The profile of President Washington is pleasingly free of mentionable contact, and the equally well-preserved reverse presents a similar appearance. Population: 73 in 67 (5 in 67+), 1 finer (5/15). NGC ID# 245N, PCGS# 5838

1950-S/D Quarter, MS66
FS-601, Bright Mint Luster

3721 **1950-S/D FS-601 MS66 PCGS.** OMM-1. Ex: Michael Fuller Collection. The curve of a prior mintmark is prominent to the right of the upper loop, and a serif from the D is present in the northwest corner. A beautifully preserved Premium Gem. Any incompleteness of strike is limited to the centers of the RTY in LIBERTY. Blushes of rich honey toning visit uncommonly smooth fields. Population for all S/D quarters: 33 in 66 (3 in 66+), 5 finer (4/15).
Ex: Palm Beach Signature (Heritage, 3/2006), lot 787; Houston Signature (Heritage, 11/2007), lot 60900; PCGS# 145639 Base PCGS# 5845

1952-D Quarter, MS67
Rich Two-Sided Toning

3722 **1952-D MS67 PCGS. CAC.** This Superb Gem 1952-D possesses a wealth of visual attributes, beginning with the beautifully undisturbed surfaces, continuing with the sharp motifs, and ending with eye-catching multicolor toning that casts the satiny surfaces into mottled shades of straw-gold, violet, and forest-green. Among the finest at PCGS and ideal for Registry purposes. Population: 14 in 67, 0 finer (5/15). NGC ID# 2462, PCGS# 5850

1962-D Quarter, Superb Gem
Older Holder, Conditionally Rare

3723 **1962-D MS67 NGC.** Lightly dappled green-gold toning adorns this lustrous and virtually immaculate Superb Gem. Despite a high mintage and the roll collecting fad of the early 1960s, the 1962-D becomes rare at the MS67 level. Encapsulated in a prior generation holder. Census: 24 in 67 (2 in 67 ★), 0 finer (4/15). NGC ID# 246R, PCGS# 5873

1962-D Quarter, MS67
Registry Set Quality

3724 **1962-D MS67 NGC.** An important Registry-quality example of a date that is rarely seen at this grade level. This piece exhibits sharp design elements and satiny luster with a subtle tinge of light golden toning. Deeper olive and russet flecks appear near the borders. Housed in a prior generation holder. Census: 24 in 67 (2 in 67 ★), 0 finer (4/15). NGC ID# 246R, PCGS# 5873

PROOF WASHINGTON QUARTERS

3725 **1938 PR67 NGC. CAC.** The 1938 issue is scarce in high business strike grades (the scarcest Philadelphia issue) and it is equally challenging in high-grade proof format. This Superb Gem proof displays deeply mirrored fields and glossy motifs with smoky amber toning at the rims. The surfaces are immaculately preserved. CAC endorsed. NGC has seen just 13 numerically finer proofs (4/15). NGC ID# 27HR, PCGS# 5977

1940 Quarter, PR67
Just a Touch of Pastel Toning

3726 **1940 PR68 NGC.** Deep mirroring in the fields transitions to rich, satiny luster over the bold devices of this high-end proof Washington quarter. Close examination with a lens fails to reveal even minor flaws, an attribute to which few examples of this issue can lay claim. Subtle champagne and powder-blue hues intermingle over each side. Census: 30 in 68, 0 finer (4/15). NGC ID# 27HT, PCGS# 5979

3727 **1942 PR67+ PCGS. CAC.** The last of the early-year proofs, with a mintage of 21,123 pieces that was generous for its time, but minuscule in the context of the modern series. This deep-mirrored example offers glassy silver surfaces that are essentially perfect in preservation and completely untoned. CAC endorsed, certainly among the finest-known untoned proofs of the issue. Population: 12 in 67+, 8 finer (4/15). NGC ID# 27HV, PCGS# 5981

3728 **1951 PR68 Cameo NGC.** A stone-white and immaculate specimen. The letters and devices are frosty and the fields are glassy. Only a tiny fraction of proof 1951 quarters exhibit significant cameo contrast on both sides. NGC ID# 27HX, PCGS# 85983

3729 **1951 PR68 Cameo NGC.** Darkly mirrored fields contrast with fully impressed and icy designs. An untoned and pristine representative of this lower mintage proof issue. Census: 27 in 68 Cameo (1 in 68 ★ Cameo), 0 finer (5/15). NGC ID# 27HX, PCGS# 85983

3730 **1961 PR69 Deep Cameo PCGS.** An immaculate specimen whose mirrored fields and thickly frosted motifs ensure exceptional eye appeal. Close to brilliant, although a loupe reveals traces of golden patina. Housed in a green label holder. Population: 41 in 69 Deep Cameo, none finer (5/15).
Ex: Dallas Signature (Heritage, 12/2004), lot 6016, which realized $920. NGC ID# 2493, PCGS# 95993

End of Session One

SESSION TWO

COLONIALS

Sommer Islands Twopence, Fair 2
Rare Colonial Issue
Large Star Variety, W-11410

3731 **(1615-16) Sommer Islands Twopence, Fair 2 PCGS. Large Star, W-11410, R.7.** The Sommer Islands (called Bermuda Islands today) were discovered by Juan de Bermudez in 1505 and revisited by him in 1532. On his 1532 visit, Bermudez released a number of hogs and sows into the local habitat, and they proceeded to flourish in the wild for the next hundred years. The ship *Sea Adventurer,* under the command of Sir George Sommers, ran aground on the islands in a hurricane in 1609, and Sommers claimed the islands for England, leaving three men behind when he sailed on to Virginia as the first permanent colonists.

The colony grew over the years and was eventually incorporated under royal charter on June 29, 1615, and a limited coinage of four denominations was authorized. The denominations were the twopence, threepence, sixpence, and shilling. The coins were struck in London in 1615 and transported to the islands in 1616, the first coinage produced for any English speaking region in the New World. The central device on the obverse was a hog and the central design element on the reverse was a sailing ship, which many numismatists believe represents the *Sea Adventurer*. The coins were struck on lightly silvered brass planchets of little intrinsic value and never circulated widely, outside of the islands.

The coins were susceptible to corrosion in the humid tropical climate and almost all examples seen have dark granular surfaces and show considerable wear on both sides, like the present coin. Most of the design elements are difficult to distinguish, but the Roman numeral II in the denomination remains discernible. The first of the two upright members in the denomination appears higher than the second, identifying the Large Star variety. The star can be barely perceived under the hog's belly. Q. David Bowers rates this variety URS-4, 5-8 examples extant. Listed on page 36 of the 2015 *Guide Book*. PCGS# 2

1652 Willow Tree Sixpence
Noe 1-A, VF Details
Important Massachusetts Rarity

3732 **1652 Willow Tree Sixpence — Plugged — NGC Details. VF. Noe 1-A, W-130, Salmon 1-A, High R.6.** 30.8 gn. Only a single Willow Tree sixpence variety is known, Noe 1-A. 14 examples have been confirmed. Regardless of denomination, Willow Tree silver are very rare and desirable. The present sixpence exhibits a slightly off-center strike on both sides, toward the left. Attractively toned, this specimen features hues of gold, sea-green, and sky-blue. Aside from the far right portion, the willow tree design is nicely detailed. The date on the reverse was impacted due to multiple punches on that side, though the majority is legible. Listed on page 38 of the 2015 *Guide Book*. PCGS# 15

1662 Oak Tree Twopence, MS62
Noe-34, Among Finest Known

3733 **1662 Oak Tree Twopence MS62 NGC. Noe-34, W-240, Salmon 1-B, R.5.** Large 2. 10.9 gn. The lengthy horizontal die crack left of the 1 in the date distinguishes Noe-34 from Noe-32 and Noe-33. All three varieties were struck from the same die pair. A well centered example with undisturbed gunmetal-gray surfaces. The tree is intricately brought up, and all letters are crisp and complete. Mildly wavy, as made. A desirable example of the smallest Massachusetts silver denomination, which carries a date ten years later than the threepence, sixpence, and shilling introduced in 1652. Listed on page 38 of the 2016 *Guide Book*. Census: 1 in 62, 1 finer (4/15). *Ex: FUN Signature (Heritage, 1/2009), lot 3532, which realized $9,775*. PCGS# 17

Lord Baltimore Fourpence, Choice VF
Hodder 1-A, Colorful, Sharp Legends

3734 **(1659) Lord Baltimore Fourpence VF35 PCGS. CAC. Hodder 1-A, W-1010, R.6.** The smallest silver denomination struck for the colony of Maryland was the fourpence, or groat. The groats, like their larger fellows, bore the portrait of Cecil Calvert, the second Lord Baltimore and first Lord Proprietor of Maryland. All legends are sharp on the present pleasing example. Free from any visible post-strike marks. A diagonal line on the shield was on the planchet prior to the strike, which shows softness at the centers. Dove-gray fields and motifs are bounded by rich peripheral apple-green and mauve toning. Population: 1 in 35, 4 finer (4/15).
Ex: Loye L. Lauder (Doyle, 12/1983), lot 126. PCGS# 32

Undated Higley Copper, VF20
Broad Axe, VALUE ME AS YOU PLEASE
Freidus 3.2-C

3735 **(1737) Higley Copper, Deer, Broad Axe, VF20 PCGS. CAC. Breen-242, Freidus 3.2-C, W-8260, Low R.7.** Dr. Samuel Higley's father, John Higley, was among the first settlers in Simsbury, Connecticut, then known as Massacoh. The Simsbury countryside included large pine forests and many of the settlers came to the area as a result, as the need for pine byproducts was strong. Before emigrating from England to America, John served as an apprentice to a glove maker. An entrepreneur, once in America he began importing West Indies rum as well as manufacturing tar, turpentine, and pitch. He used the proceeds to purchase substantial parcels of land, becoming the largest landowner in the area. Among his ten children was Samuel Higley. Samuel also acquired land in the Simsbury area, buying 143 acres containing copper mines in 1728. That same year, the Connecticut General Court granted him exclusive rights for ten years to make steel in the colony.

Just about the time his exclusive steel rights were about to expire, Higley apparently began to produce copper tokens. Several different designs were struck, with this being an example of the variety with the legend, "VALUE ME AS YOU PLEASE" on the obverse and a broad axe with "J CUT MY WAY THROUGH" on the reverse. Chocolate-brown and red surfaces provide this well-centered specimen with a lovely appearance. Though the central obverse, in particular, displays pits, they are not overly distracting on this rare piece. A few minor planchet flaws are present.

Higley's land, located in what became East Granbury, later was the home for New Gate Prison, which operated from 1773 to 1827 and was the first State Prison in America. Prisoners, including those loyal to Britain during the Revolutionary War, were housed within the caverns. The property, known today as Old Newgate Prison, became a National Historic Landmark in 1976. The town seal of Simsbury includes an image of a Higley copper. Listed on page 49 of the 2016 *Guide Book*. PCGS# 213

1786 NON VI VIRTUTE VICI Copper
XF40, Very Rare Small Head Variety
Baker-13

3736 **1786 New York Copper, NON VI VIRTUTE VICI, Small Head, Baker-13, XF40 PCGS. CAC.** Ex: F. Dabney Caldwell. The NON VI VIRTUTE VICI coppers are a significant rarity coveted by both Washingtonia and Early American collectors. Breen (1988) and Rulau and Fuld (1999) assert that James F. Atlee, later of Machin's Mills, was the engraver. The Whitman *Encyclopedia* simply states "minter and location unknown."

The legends are in Latin, as was the tradition during the late 18th century. The reverse legend, NEO-EBORACENSIS, is a belabored translation of New York. The obverse legend, NON VI VIRTUTE VICI, means "Not by violence but by excellence have I conquered." The portrait is almost certainly that of George Washington, since no other American in 1786 could command such praise.

Two other NON VI VIRTUTE VICI die pairs are known, the Large Head Baker-12 and the Shield Reverse Baker-13C. Both are extremely rare and neither is listed in the *Guide Book*.

Although Rulau and Ford estimate about 25 specimens are known for the Small Head Baker-13, the variety seldom surfaces. John J. Ford, Jr., had an example, of course, which sold for $37,375 in a 2004 Stack's auction.

The present representative has a better strike than the Ford specimen, particularly at the centers. In fact, the strike is unusually distinct for the variety. The walnut-brown surfaces are smooth and show only a couple of thin marks, located near the profile and the Liberty cap. Close inspection locates a couple of small flan flaws at the top of Washington's queue and the lowered elbow of the seated Justice.

Foree Dabney Caldwell, Jr. (1918-1971) was a World War II Navy veteran and held a law degree from the University of Virginia. His Colonial collection was formed with the assistance of Richard Picker, whose connections presumably helped in obtaining such formidable rarities as the current lot. Listed on page 64 of the 2016 *Guide Book*. Population: 2 in 40, 1 finer (4/15).
Ex: Foree Dabney Caldwell, Jr. Collection (Stack's, 4/1988), lot 2005; Houston Signature (Heritage, 11/2012), lot 3035, which realized $64,625. PCGS# 422

1787 Nova Eborac Copper, MS62 Brown
W-5760, Early Die State

3737 **1787 Nova Eborac Copper, Seated Right, MS62 Brown PCGS. CAC. Breen-987, W-5760, R.4.** Generally chocolate-brown, although the high points displays sea-green. Slightly off-center toward 10 o'clock, but the legends are fully intact. Impressively unabraded and well defined for the variety. The scarce early die state with a shallow crescent-shaped break above the foot, instead of the usual lapped die state that shows a high-relief cud on the reverse between 3 o'clock and 4:30. Nova Eborac is Latin for New York, and identifies the origin of the private post-Revolutionary issue. Listed on page 68 of the 2016 *Guide Book*. PCGS# 475

1788 Vermont Copper, AU58
Bust Right, Ryder-16

3738 **1788 Vermont Copper, Bust Right AU58 PCGS. CAC. RR-16, Bressett 15-S, W-2120, R.1.** An exquisite olive-brown example. Traces of faded mint red cling to the letters in AUCTORI. Free from marks or spots, although the centers are minutely granular where the strike was incomplete. The reverse displays minor strike-throughs (as coined) near Liberty's neck, her extended hand, and the L in LIB. The obverse is slightly misaligned toward 2:30, while the reverse shows ideal centering. Listed on page 72 of the 2016 *Guide Book*. PCGS# 563

1783 Chalmers Shilling, VF25
Short Worm, W-1785

3739 **1783 Chalmers Shilling, Short Worm VF25 NGC. Breen-1011, W-1785, High R.4.** A light cream-gray piece with golden-gray tinges on the reverse center. The birds and the long worm show wear, but are fully outlined. The peripheral legends are bold. A charming representative of this scarce silver private issue. Listed on page 51 of the 2016 *Guide Book*.
Ex: FUN Signature (Heritage, 1/2007), lot 208, which realized $3,910. PCGS# 596

1783 Chalmers Shilling, VF30
Long Worm, W-1790

3740 **1783 Chalmers Shilling, Long Worm VF30 PCGS. Breen-1012, W-1790, R.4.** Tired of dealing with underweight Spanish bits and other cut coins of foreign origin and a general shortage of change, Annapolis silversmith John Chalmers struck silver tokens of varying denominations (threepence, sixpence, and shillings) to facilitate local Maryland commerce. This evenly struck and moderately circulated shilling with the Long Worm design is especially attractive. Original old-silver patina displays glimpses of golden luster amid deep blue accents. All of the devices are clear save for normal wear on the clasped hands. Only a few stray hair-thin lines are seen. Population: 8 in 30, 29 finer (4/15). PCGS# 595

Bar 'Cent' Copper, MS62 Brown
Iconic Early American Type

3741 **(1785) Bar Copper MS62 Brown PCGS.** The original Bar coppers date from around 1785 and greatly resemble buttons from Continental Army uniforms. On the originals as here, a tiny thorn or die spur runs upward from the leg of the 12th bar, and the letter A passes over the S. John Adams Bolen (1826-1907) made restrikes in the 1860s, collectible in their own right and distinguished from the originals by the A passing under, rather than over, the S. The present golden-brown example is an original, identified by the aforementioned spur and the small vertical crack between bars at the reverse center. We note a thin mark near the obverse margin at 11 o'clock and a small obverse area of gray toning near 4:30. Listed on page 74 of the 2016 *Guide Book*. Population: 6 in 62 Brown, 9 finer (4/15). PCGS# 599

HALF CENT

1793 Half Cent, C-1, B-1, XF Details

3742 **1793 C-1, B-1, High R.3 — Environmental Damage — PCGS Genuine. XF Details.** This is a well-detailed, yet, moderately affordable example of this first-year half cent type, with deep olive-brown patina. The variety is attributed by the proximity of the final A in AMERICA to the adjacent wreath stem, but there is extensive reengraving seen on the fraction, ribbon ends, and portions of the peripheral lettering, including LIBERTY on the obverse. Mildly granular surfaces are noted by PCGS. Our EAC grade VF20. PCGS# 35003 Base PCGS# 1000

1793 Chain Cent, VG10 Sheldon-1 AMERI.

3743 **1793 Chain, AMERI., S-1, B-1, R.4, VG10 PCGS.** A pleasing medium brown representative of the introductory large cent variety, distinctive for its abbreviated AMERICA. The most likely explanation is that the die sinker believed that completing the word would reduce the aesthetic appeal of the layout of the peripheral legend. On the present example, all four date digits are apparent and the other peripheral legends are bold. The EN in CENT is faint, as is the numerator. Mildly granular near the RT in LIBERTY, the obverse has a few slender flan striations, and an unobtrusive thin mark crosses the jaw. Nonetheless, the surfaces are exemplary for the designated grade. Our EAC grade Good 6. PCGS# 35432 Base PCGS# 1340

1793 S-1 Chain AMERI. Cent, VF Details

3744 **1793 Chain, AMERI., S-1, B-1, R.4 — Corrosion — NGC Details. VF. Our EAC Grade VG10.** Del Bland graded this piece Fine 15, and Bill Noyes suggests Fine 15 sharpness, net VG7, with average minus surfaces. Bland's grades were assigned in 1991, and Noyes' in 2013. Both sides of this nicely detailed cent exhibit moderate granularity, heavier on the reverse, with intermingled olive and steel-brown surfaces and lighter brown color on much of the obverse portrait. Minuscule pit marks appear in the hair behind the eye and at the end of a hair strand at 7 o'clock. A trivial obverse rim nick is noted at 3:30, and others appear on the reverse at 2 and 7 o'clock. The sharpness grade is VF20 on the obverse, and close to XF40 on the reverse. The Chain AMERI. cents are typically stronger on the reverse so such a seeming disparity in the obverse and reverse grades is expected.
Purchased from New Netherlands Coin Co. in June 1967.
From The Eugene Exman Collection. PCGS# 35432 Base PCGS# 1340

1793 S-3 Chain Cent, AU Details
Late Clashed Dies State

3745 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Plugged — NGC Details. AU. Our EAC Grade Fine 12. We agree with Bill Noyes' sharpness grade of XF40, and assign a slightly more conservative net grade. He called it Net Fine 15 with "Scudzy" surfaces. That description is mandatory in his grading system due to the plug that is located between the hairline and the ER of LIBERTY, with those letters expertly reengraved. The bottoms of OF on the reverse are similarly rebuilt. Del Bland described this piece as XF40 with a hole and didn't speculate on a net grade.

Aside from the repair, the balance of this coin is exceptional, exhibiting average or better surfaces with the sharpness of XF40 or even finer. Both sides are smooth and glossy with a single reverse rim nick at 11:30. The late die state displays prominent clash marks from Liberty's nose to below the bust, reaching the hair over the 17 in the date.

Purchased from W.E. Johnson in 1967.

From The Eugene Exman Collection. PCGS# 35438 Base PCGS# 1341

1793 Wreath Cent, VF20
S-8, B-13, Vine and Bars Edge
Two-Tone Patina

3746 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VF20 PCGS. The Sheldon-8 cent displays a horizontal stem for the obverse leaves parallel to the date with a Tall 7, paired with a reverse defined a large, concave triangular bow positioned high within the wreath. Deep chocolate-brown fields surround lighter medium-brown devices for a pleasing two-tone patina. The surfaces are slightly granular with some moderate porosity on the reverse. The O in ONE and the E in CENT show minor distortion from the diagnostic diagonal bulge through the wreath. Our EAC grade VG10. PCGS# 35456 Base PCGS# 1347

1793 S-8, B-13 Cent, Attractive XF40
Wreath, Vine and Bars Edge

3747 **1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, XF40 PCGS.** Medium mahogany surfaces yield to deeper ebony patina on portions of the upper reverses. The obverse high points are relatively unmarked, although some small ticks appear in the lower-right field before the bust truncation, and a few intermingle with the date digits. Much deep detail remains in Liberty's hair. The rim above the dentils is crimped in a couple of places, and a small planchet flaw appears between BE in LIBERTY. The reverse shows the bisecting diagonal die crack plainly from the T in STATES, though EN in CENT, to the right lower wreath area. An attractive and problem-free example of this popular first-year type. Our EAC grade VF25. PCGS# 35456 Base PCGS# 1347

1793 S-9 Wreath Cent, VF35
Important Early Die State

3748 **1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, VF35 NGC. Our EAC Grade VF20.** The sharpness is slightly finer than the net grade, perhaps VF25, although Noyes suggests VF20 sharpness and net, in agreement with Bland's grade. Most observers would call this piece a perfect dies coin, although a faint trace of the Die State II crack is visible upon close examination. The pleasing walnut-brown surfaces show a few scattered marks with faint old silvering evident on the obverse. A minor reverse mark obliterates the numerator, accounting for the slight grade-deduction. The strike is nicely centered and the overall eye-appeal is exceptional for the grade. *Purchased from Kellogs (St. Louis, 1960).* *From The Eugene Exman Collection.* PCGS# 35459 Base PCGS# 1347

1793 Wreath Cent, MS65 Brown
Vine and Bars Edge
Condition Census S-9 Cent

3749 **1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, MS65 Brown PCGS Secure.** This coin is unpictured in the Noyes reference, although it is listed in its proper place in the Census at number 4 for the Sheldon-9 variety, awaiting photography. Few 1793 large cents of any variety can exceed the eye appeal and lustrous surfaces of this lovely Gem cent. More than 55 years ago it appeared in the Stack's Philip G. Strauss Collection sale, where it received a lengthy description for those days:

> "UNCIRCULATED. Lustrous chestnut brown, well struck and centered, full border beading on each side. Reverse die break from rim through CA and right stem to right ribbon end. Beautiful, well-nigh flawless surfaces, with adhesives of mint color on the reverse. Here is a cent to dream on. The three qualities — sharpness, surface, color — that, when present, confer premium value over and above book value upon an early large cent in this condition are here blended in perfect aesthetic harmony."

Later, the coin was part of the E. Yale Clarke and the Reed Hawn collections, where it received equally (if not so eloquent) glowing accolades. Noyes grades the coin MS62(60) Choice in his most recent Census listing.

In hand, the coin is every bit a Gem, and even under a strong glass there are few imperfections to note. Most are Mint-caused and related to Die State, which closely matches Breen Die State IV. Faint die cracks on the portrait are seen on the neck, cheek, and temple. The reverse die crack at CA of AMERICA is bold and extends from the edge to the right ribbon.

Some inconsequential microgranularity is visible under magnification — beneath OF, within the upper wreath leaves, and sparingly around the 3 in the date, although die rust is a possibility for the minor roughness. The strike is amazingly sharp throughout in spite of swelling around the lower right wreath. Glimpses of mint red still appear beneath the glossy, light steel-brown surfaces.

The Breen reference suggests 22,000 pieces were struck from the die pair, making S-9 by far the most available 1793 large cent variety. The condition rarity of this coin makes the mintage merely a point of interest. For advanced type collectors who need a high-grade Vine and Bars Edge representative, this example is a stellar candidate. We expect large cent specialists to vigorously defend their claim to this Condition Census cent. Our EAC grade MS62.

1793 S-14 Cent, VF25
The Bisecting Crack

3750 **1793 Liberty Cap, S-14, B-17, Low R.5, VF25 NGC. Our EAC Grade Fine 12.** This is an exceptional 1793 Liberty Cap cent that Del Bland conservatively grades VG10. We agree with the assessment of Bill Noyes who says Fine 15 sharpness, net Fine 12. Both sides of this olive and golden-tan cent have scattered marks that are entirely trivial. The border beads are well inside the edge, especially on the reverse, although they are weak in places. The Bisecting Crack is constant on all known examples, with no other die defects visible on this piece, indicating an early die state. Current estimates suggest that only 60 to 70 examples of S-14 are known, and most are lower grades. Perhaps 15 to 18 finer examples survive.
Purchased from House of Stuart, Ltd. (Kansas City).
From The Eugene Exman Collection. PCGS# 35492 Base PCGS# 1359

1794 S-17a Cent, Fine 12
Pleasing Head of '93 Variety

3751 **1794 Head of 1793, S-17a, B-1a, Low R.5, Fine 12 NGC. Our EAC Grade VG8.** The first Head of '93 variety, with the edge device of 1793 showing the leaf after DOLLAR pointing down in relation to the letters. This is the only collectible variety of the die pair. We concur with Bill Noyes that this example shows the sharpness of Fine 15, and we agree with his net grade of VG8. Del Bland suggests net VG10. The die state is difficult to determine through the fine granularity on the dark olive surfaces. The devices are light tan and minor rim nicks are evident at 7 o'clock on the obverse and 2 o'clock on the reverse. A highly attractive cent despite imperfect centering.
Purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35504 Base PCGS# 1362

1794 Liberty Cap Cent, XF Details
Head of 1793, S-20b

3752 **1794 Head of 1793, S-20b, B-4b, High R.4 — Tooled — NGC Details. XF. Our EAC Grade VF25.** Breen Die State II. Edge II, with the point and stem of the leaf after dollar pointing up. Del Bland grades this coin VF30, while Bill Noyes assigns a sharpness grade of VF25 and a net grade of VF20 with average surfaces. Our evaluation is sharpness of VF35 and net grade VF25. The design elements retain much interior detail and the pleasing brown surfaces are free of problems, aside from the noted tooling. B. Max Mehl noted, "Purchased by Dr. Allenburger from S.H. Chapman many years ago as 'one of the finest known of this variety.'"
Ex: Samuel Hudson Chapman; Dr. Christian Allenburger Collection (B. Max Mehl, 3/1948), lot 333; Roy E. Naftzger; Dorothy I. Paschal.

1794 Liberty Cap Cent, XF45
Head of 1794, S-21

3753 **1794 Head of 1794, S-21, B-5, R.3, XF45 NGC. Our EAC Grade VF25.** Breen Die State III. The famous "Flat Pole" variety, with the pole recut and broadened at the end. Del Bland grades this coin VF25. We agree with Bill Noyes that it has the sharpness of a VF30 example and a net grade of VF25. Noyes assigns the glossy chocolate-brown surfaces an average plus grade. The design elements are sharply impressed and retain much interior detail. The reverse is well-centered and exhibits complete dentilation, but the dentils only show at the bottom on the obverse. A small planchet flaw at the lowest curl serves as a pedigree marker.
Purchased from WEJ.
From The Eugene Exman Collection. PCGS# 35528 Base PCGS# 901374

1794 S-26 Cent, XF45
Head of 1794, Late Die State

3754 **1794 Head of 1794, S-26, B-16, R.2, XF45 NGC. Our EAC Grade VF25.** Breen Die State VII. The numerals 7 and 9 are widely spaced in the date and a pronounced die flaw shows at the left side of O in OF, identifying the S-26 variety. Del Bland grades this specimen VF30 and we agree with Bill Noyes that it shows VF30 sharpness. Noyes gives it a net grade of VF20, with average surfaces, while we net grade this piece as VF25. The design element are sharply detailed, despite the many clash marks and advanced die breaks on the reverse. The smooth chocolate-brown surfaces show only minor abrasions.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35543 Base PCGS# 901374

1794 Large Cent, AU55+
Head of 1794, S-28

3755 **1794 Head of 1794, S-28, B-10, R.2, AU55+ NGC. Our EAC Grade VF30.** Breen Die State VI. Five locks of Liberty's hair end in a straight vertical line and the wreath shows a single leaf at I in AMERICA, identifying the S-28 variety. Probably abut 15,000 specimens of this variety were struck on March 5, and the two following days. Del Bland graded this piece as VF30 in 1991 and both Bill Noyes and Heritage (Mark Borckardt) agree on VF30 for the net grade. We also agree with Noyes' assessment that the coin has XF40 sharpness, and Noyes rates the surfaces as average. The pleasing brown surfaces are lightly abraded and the design elements are sharply rendered. A planchet flaw in the right obverse field makes an excellent pedigree marker.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35549 Base PCGS# 901374

1794 Liberty Cap Cent, AU55
Condition Census S-29

3756 **1794 Head of 1794, S-29, B-11, R.2, AU55 NGC. Our EAC Grade XF45.** Breen Die State IV. Obverse 9, with the five locks of hair ending in a straight vertical line, Reverse F, with long tails to the right ribbon end and R in AMERICA. The "Tailed" reverse is one of the most easily recognized dies of the series. The S-29 variety probably accounts for 16,000 coins struck on March 10. Del Bland evaluated this coin as AU50 in 1991. More recently, Bill Noyes assigned this piece a net grade of XF45, with sharpness of AU50 and average surfaces. We agree with Noyes on all counts. The design elements are sharply detailed, despite a number of die cracks and clash marks, and the pleasing surfaces are lightly abraded, with mixed blue-steel and brown patina. This coin is listed in Del Bland's Condition Census for the variety.
Ex: Texas collection; L.R. Davis McKinney, Jr.; Auction #22 (House of Davis McKinney, 1/1964), lot 221.
From The Eugene Exman Collection. PCGS# 35552 Base PCGS# 901374

1794 Liberty Cap Cent, MS60 Brown
Head of 1794, S-30

3757 **1794 Head of 1794, S-30, B-12, R.1, MS60 Brown NGC. Our EAC Grade XF40.** Breen Die State IV. A nearly vertical chip in the left obverse field below the cap and the "Tailed" R and right ribbon-end reverse identify the variety as S-30, initially called the "Amatory Face" by Maris and the "First Marred Field" by later collectors. In 1991, Del Bland graded this coin XF40. Later, Bill Noyes gave it net grade of VF35, with the sharpness of an AU55 example with average minus surfaces. We agree with Bland's net grade of XF40 and Noyes sharpness of AU55. The design elements are sharply detailed, with dramatic clash marks above Liberty's head and in the field before her face. The reverse shows prominent clash marks in the wreath and denomination and a pronounced die crack through R in AMERICA. The lightly marked surfaces show a mix of steel-blue and brown patina, with faint traces of original red. Some circular planchet flaws in the field and Liberty's cheek easily identify this coin for pedigree purposes.
Ex: Ellsworth Collection; Mathewson Collection; purchased from Copley Coin Company in May of 1955.
From The Eugene Exman Collection. PCGS# 35555 Base PCGS# 901374

1794 Large Cent, MS61 Brown
Head of 1794, S-31

3758 **1794 Head of 1794, S-31, B-13, R.1, MS61 Brown NGC. Our EAC Grade AU50.** Breen Die State II. The Obverse 10 die was heavily reworked to remove clash marks and a flaw on Liberty's neck. The vertical chip in the left obverse field is still prominent, making the die easily recognizable, and the Reverse G is easy to spot because of the extremely long fraction bar. The extensive reworking of the obverse die was unusual, and may indicate a shortage of die steel at the time these coins were struck. Del Bland graded this example AU55, matching the sharpness grade assigned by Bill Noyes in 2013, with which we agree. We also concur with Noyes' net grade of AU50, and he evaluates the surfaces as average plus. The design elements are strongly impressed, but some hair detail is incomplete, due to the extensive die polishing. Hints of violet and blue-steel highlight the lightly marked brown surfaces.
Ex: Auction #22 (House of Davis McKinney, 1/1964),lot 220.
From The Eugene Exman Collection. PCGS# 35558 Base PCGS# 901374

1794 Cent, Head of '94, Good Details
Rare S-33 Die Pairing, 'Wheel Spoke' Reverse

3759 **1794 Head of 1794, S-33, B-19, R.6 — Repaired — NGC Details. Good. Our EAC Grade Fair 2.** The right obverse field and portrait are extensively smoothed; the remainder of the obverse and the entire reverse are heavily granular, preventing positive identification of the die state, although the advancement of cracks is at least Breen's Die State IV. All known examples of this variety are extensively circulated, and most show other impairments. This auburn-brown example retains clear legends and the central motifs are boldly outlined. Sharpness at least Good 4, but rated Fair 2 because of the surface roughness. Bill Noyes also called this piece Fair 2, but rated the sharpness Good 5. Del Bland offers a slightly more generous assessment of AG3, understandable given the clarity of the legends.
Purchased from Moore.
From The Eugene Exman Collection.

1794 Liberty Cap Cent, VF Details
Head of 1794, Rare S-37

3760 **1794 Head of 1794, S-37, B-24, High R.6 —Corrosion — NGC Details. VF. Our EAC Grade VG8.** Breen Die State II. The widely spaced 1 in the date and the single berry left of the bow on the reverse identify this rare variety. The obverse die failed quickly, accounting for the elusive nature of the S-37. Del Bland graded this coin VG8 in 1991, and we concur with both him and Bill Noyes in assigning that as the net grade. Noyes grades this piece VF25 for sharpness, and we agree, with average minus surfaces. The obverse die was heavily polished, resulting in some incomplete detail, and the dark brown surfaces are extensively corroded. This variety is often called the Steigerwalt variety, as it was discovered by Charles Steigerwalt in 1900.
Ex: Roe E. Naftzger; Dorothy Paschal.
From The Eugene Exman Collection. PCGS# 35576 Base PCGS# 901374

1794 S-39 Cent, Head of '94, XF40
Strong Condition Census Example

3761 **1794 Head of 1794, S-39, B-27, R.6, XF40 NGC. Our EAC Grade VF30.** Breen Die State II, reverse cracked to left of fraction. This is a smooth, eye-appealing example with deep brown fields and lighter olive relief elements. A couple large die chips in the left obverse field are diagnostic of this obverse which is shared with Sheldon-38, -40, and -NC.2. A single small dig in the field near Liberty's nose is the only mentionable imperfection. We rate this piece VF30 with XF40 sharpness, slightly finer than Bill Noyes' assessment of VF25 with XF45 sharpness and below-average surfaces. Del Bland called this coin VF30, as well. A Condition Census example of this rare die pairing.
From Ebenezer Gilbert, Jr.; Thomas L. Elder; John P. Young; purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35582 Base PCGS# 901374

1794 S-42 Cent, Head of '94, AU50
Pleasing Color and Surfaces

3762 **1794 Head of 1794, S-42, B-29, R.4, AU50 NGC. Our EAC Grade VF30.** Breen Die State II, lightly clashed. This is a challenging variety, particularly in high grades. Only a few finer pieces are known, including, among a couple others, coins pedigreed to Parmelee, Gilbert, Newcomb, and a Mint State coin plated in Lester Merkin's March 1968 public auction sale, believed to be the finest known. We rate this example VF30, with VF35 sharpness; a lovely, essentially problem-free coin with smooth medium brown surfaces and a well-executed strike; a few minute ticks on Liberty's cheek stand out only in the absence of more prominent flaws. Del Bland called this coin VF35, while Bill Noyes assigned a grade of VF25 with VF35 sharpness and average surfaces.
From the David U. Proskey Collection; acquired by Henry C. Hines (1916); Dr. William H. Sheldon; purchased from Dorothy I. Paschal (1971).
From The Eugene Exman Collection. PCGS# 35591 Base PCGS# 901374

1794 S-48 Cent, VG Details
Long-Famous Starred Reverse

3763 1794 Starred Reverse, S-48, B-38, R.5 — Damaged — NGC Details. VG. Our EAC Grade Good 4. The famous Starred Reverse variety, an item of rarity and intrigue which, per S.H. Chapman, was discovered by his brother Henry, circa 1876; however, Walter Breen notes that a 1907 Lyman Low catalog suggested A.J. Gilbert had an example prior to 1850 (that catalog is not available for confirmation). In the December 1927 sale of George A. Gillette's large cents, Henry Chapman reaffirms regarding the Starred Reverse die pairing: "I was the first to discover this variety."

The obverse of this piece has Fine 12 sharpness, although the reverse is substantially more worn in an uneven manner characteristic of coins from a late die state during which portions of the tail die buckled. We agree with Del Bland's overall grade of Good 4. Bill Noyes called this piece Good 5 with VG7 sharpness and average surfaces. Both sides are deep brown and the obverse shows light, scattered ticks and a few deeper hits behind Liberty's cap on the neck. The right reverse rim is weak.
Purchased from Moore.
From The Eugene Exman Collection.

1794 S-50, Cent, AU Details
Glossy Surfaces, Head of '94

3764 1794 Head of 1794, S-50, B-43, R.5 — Reverse Rim Damage — NGC Details. AU. Our EAC Grade VF20. Breen Die State III. Sheldon-50 is rare in and of itself, but this late die state, cracked from the 4 in the date through the pole, is exceedingly so. This coin has glossy light brown surfaces, with a bold, well-centered die impression. A couple of small rim bumps are noted on the reverse at 4 and 6 o'clock. We concur with Bill Noyes' grade of VF20, although we rate the sharpness at VF35, instead of Noyes' XF40. Del Bland called this coin VF30 in 1991. Overall, the eye appeal is considerable for a Details-graded Sheldon-50 representative.
From The Eugene Exman Collection. PCGS# 35612 Base PCGS# 901374

1794 Cent, Head of '94, VF Details
Rare S-53 Variety

3765 1794 Head of 1794, S-53, B-45, R.6 — Obverse Damage — NGC Details. VF. Our EAC Grade Good 6. Sheldon-53 is a rare variety and almost all known examples are well-worn or otherwise impaired. This piece has the sharpness of VG10 coin, but we grade it Good 6 in light of a few old scratches and several light ticks that appear on the obverse; the reverse is mildly granular in the recesses. Both sides show deep auburn-brown color and the legends are clear. Both Del Bland and Bill Noyes awarded this piece a Good 6 grade, Noyes recognizing VG10 sharpness.
Purchased from Moore.
From The Eugene Exman Collection.

1794 Head of '94 Cent, XF45
S-56, 'Office Boy' Reverse

3766 1794 Head of 1794, S-56, B-48, R.3, XF45 NGC. Our EAC Grade VF20. Breen Die State I. Sheldon-56 is the only use of the famous "Office Boy" reverse, although this head die was also employed for Sheldon-54 and -55. The VF35 grade awarded this piece by Del Bland is consistent with the sharpness assessed by Bill Noyes and ourselves. Noyes' gave this coin a net grade of VF25, slightly more generous than our VF20. There is a small planchet void above the NE in ONE, and there are several tiny ticks on Liberty's cheek, otherwise smooth surfaces. Both sides show an even and well-executed strike. Hints of olive and lilac are revealed over otherwise medium brown patina. The H and D in HUNDRED are filled with yellow ink (by H.K. Downing). Plated in the 1952 ANA sale.
From the Bluestone Collection; ANA / Downing Collection (New Netherlands, 8/1952), lot 1649; Dr. William H. Sheldon; purchased from Dorothy I. Paschal.
From The Eugene Exman Collection. PCGS# 35630 Base PCGS# 901374

1794 S-60 Cent, AU50
Narrow A's, Glossy Surfaces

3767 1794 Head of 1794, S-60, B-52, R.3, AU50 NGC. Our EAC Grade VF25. The distinctive Narrow A's appear on the reverse legend, a recognizable diagnostic that does not occur on other cents. Glossiness remains across the dark chocolate-brown surfaces of this pleasing example, which displays strong die clashing behind Liberty's head as do most representatives of variety. We rate the sharpness of this cent as XF40 with a net VF25, similar to Bill Noyes' assessment of XF45/net VF25 with slightly below average surfaces. The surface downgrade relates to a rim bump above M in AMERICA and additional minor rim irregularities. Del Bland suggests a VF30 grade. Even so, sharp detail remains throughout, making this attractive Sheldon-60 cent sure to please its new owner.
Purchased from Abner Kreisberg 3/25/1958.
From The Eugene Exman Collection. PCGS# 35642 Base PCGS# 901374

1794 S-71 Cent, AU55
Head of 1795, Smooth and Glossy

3768 1794 Head of 1795, S-71, B-63, R.2, AU55 NGC. Our EAC Grade VF25. A few small marks are scattered across the obverse of this attractive cent, with a small planchet fissure in the dentils beneath 1 of the date. Prominent die clashing on the obverse includes an incused image of AME in front of Liberty's face. A die crack travels from below the cap top along the border to the top of LIB. Another crack crosses the tip of the pole. No regrinding of the obverse die is evident, confirming the Breen Die State III. The reverse die appears perfect with no clashing at ERICA, while deep-brown surfaces show occasional faint glimpses of orange luster beneath the toning. Del Bland graded this coin VF35. More recently, the Noyes rating was VF25 sharpness with a net VF20 grade and average surfaces. In our opinion, the coin grades slightly higher at VF30 sharpness and a net VF25 designation — a visually and technically pleasing example of the Sheldon-71 variety.
Purchased from Moore.
From The Eugene Exman Collection. PCGS# 35696 Base PCGS# 1365

1795 Plain Edge Cent, AU53
S-77, Ample Luster

3769 1795 Plain Edge, S-77, B-6, R.3, AU53 NGC. A pleasing tan-brown example of a variety usually seen with darker surfaces. The obverse exhibits minor flan striations, as coined, and we note a thin mark near the L in LIBERTY and a few small knocks on the reverse rim. The strike shows softness on the ST in STATES, which is also moderately granular. Our EAC grade VF30.
Ex: Orlando FUN Signature (Heritage, 1/2007), lot 359, which realized $3,565. PCGS# 35726 Base PCGS# 1380

1798 Large Cent, AU58
S-187, Near Census-Level Example

3770 **1798 Second Hair Style, S-187, B-40, R.1, AU58 NGC. Our EAC Grade XF45.** A faint, curving die crack branches out in the obverse field opposite Liberty's nose to form an additional crack before reaching the edge, and the secondary crack travels further south to reach the edge opposite the drapery. These two cracks are characteristic of all S-187 die states. A few tiny die chips sit in the field near slightly above Liberty's eye, and additional cracks above and below CA of AMERICA verify the Breen Die State II. Purple highlights float across deep olive-brown surfaces on both sides of this appealing, minimally marked cent. The surfaces are smooth and hard, with only slight roughness around the C of AMERICA but no further distractions. Del Bland assigned an AU50 grade to the coin. Bill Noyes suggests XF45 sharpness with a net grade of VF35. We believe that to be slightly conservative, and assign AU50 sharpness with a net XF45 grade. Relatively few examples of Sheldon-187 are known any finer.
From Brown's (Edinbourgh) on 10/14/1955.
From The Eugene Exman Collection. PCGS# 36128 Base PCGS# 1434

1799/8 Large Cent, XF Details
Sought-After Overdate, S-188

3771 **1799/8 S-188, B-2, R.4 — Damaged — NGC Details. XF. Our EAC Grade Good 6.** Breen Die State II. The overdated obverse is easily recognized, and two pairs of leaves with no stems on the right (facing) branch of the wreath distinguish the reverse die. Celebrated as an elusive issue since the earliest days of the hobby, collectors prize the 1799 large cent in all grades and conditions. Del Bland assigned this coin a grade of Good 5 in 1991. More recently, Bill Noyes graded this coin VF25 for sharpness, with a net grade of Good 5, with scudzy surfaces. We evaluate the sharpness slightly higher at VF30, with a net grade of Good 6. The obverse of this coin shows several deep pits at the rim and in the field, near L in LIBERTY. A large dent is seen at the junction of the hair and drapery, and some smaller pits are evident near Liberty's nose. On a positive note, the hair retains much interior detail and the date is bold. The noted damage is very old and the dark olive-brown patina is quite pleasing.
Ex: Raymond Chatham; Public Auction Sale (Lester Merkin, 9/1970), lot 39.
From The Eugene Exman Collection. PCGS# 36131 Base PCGS# 1446

1799 S-189, B-3 Cent, Fine 12
Normal Date

3772 **1799 S-189, B-3, R.2, Fine 12 NGC.** Imperfect reverse centering prevents an exact determination of the die state of this key-date cent, although it is likely a later state, as the die chip between E in ONE and T in CENT is prominent. The obverse exhibits a bold date and LIBERTY, quite an important consideration when seeking an example of this issue. The surfaces exhibit an attractive blend of golden-tan, olive, and steel-brown with scattered surface nicks but no individual marks of significance. This piece should be considered problem-free for the grade level. Our EAC grade VG8. PCGS# 36140 Base PCGS# 1443

1805 Sheldon-267 Cent, AU58
Well-Centered and Nicely Preserved

3773 **1805 S-267, B-1, R.1, AU58 NGC.** The leaf pair left of the last S in STATES is diagnostic. Mahogany-steel color with overtones of olive and good luster are hallmarks of this scarcely circulated cent, showing good centering along with flowlines in the fields. Both sides are essentially free of abrasions, a nice example of the variety. Our EAC grade XF45. PCGS# 36427 Base PCGS# 1510

1808 S-277 Cent, AU55
Thirteen Stars Showing

3774 **1808 S-277, B-1, R.2, AU55 NGC. Our EAC Grade XF40.** Axial misalignment of the dies to the southwest and a major die break from the edge above D in UNITED to the second S in STATES combine to create the Sheldon-277 "Twelve Star" variety, although the current example retains star 1 and avoids the moniker. Later die states show star 1 entirely absent and star 2 partially missing. This attractive, reddish-chocolate cent is a sharp example of Breen Die State IV, with multiple clash marks on the obverse and reverse and the bold crack from D to S fully developed. The reverse legend at STATES and star 1 remain complete, although the star is flat and has lost its central radials. Marks are limited to a few shallow abrasions and a short scrape at star 6. Del Bland assigned an AU55 grade to this coin. The Noyes sharpness grade is AU50 and a net grade of VF35 with average-minus surfaces noted. Our assessment of the surface quality is somewhat higher with an AU50 sharpness rating and a net XF40 grade.
From The Eugene Exman Collection. PCGS# 36457 Base PCGS# 1543

1857 Flying Eagle Cent, Sharp MS66
Impressive Surface Quality

3775 **1857 MS66 PCGS.** The Flying Eagle cent of 1857 was the Mint's first attempt at regular mass coinage with a nickel alloy (12% nickel, 88% copper), which proved significantly more difficult to fully strike up did than pure copper or alloys that contained mostly soft silver and gold bullion. The design layout accentuated the problem, as the eagle's head and tailfeathers were directly opposite the high points of the reverse wreath. The outer edge of the planchet received the die pressure last as the metal flowed into the die recesses. Thus, sharply struck, high-grade 1857 Flying Eagle cents are exceedingly difficult to locate.

This Premium Gem representative is ranked with 17 others as the finest at PCGS; NGC has also not seen any coins finer (4/15). The branches of the wreath and the bowknot are brought up to a sharpness that is downright rare on this issue, and miraculously, the eagle's head and tailfeathers are not compromised. The surfaces are beautifully preserved and frosty with warm bronze-gold luster. A tiny mint-made planchet flaw in the lower-left obverse field is the only mentionable imperfection on this spectacular type coin. NGC ID# 2276, PCGS# 2016

1858 Flying Eagle Cent, MS66
Luminous Large Letter Example

3776 **1858 Large Letters MS66 PCGS.** High Leaves Reverse, Closed E in ONE. The 1858 Flying Eagle cent is widely available in most grades, fueled by a mintage of 24.6 million coins, but the population plummets at the Premium Gem grade level and only a single finer piece is reported on the certified population reports. This boldly struck and carefully preserved representative displays rich coppery-gold hues over satiny mint luster. No major abrasions are observed, and there are only a few tiny, scattered specks discernible with a glass. Exceptional quality, ideal for type or date representation. Population: 29 in 66 (1 in 66+), 1 finer (5/15). NGC ID# 2277, PCGS# 2019

PROOF INDIAN CENTS

1860 Indian Cent, PR66 Cameo
Rare With Field-Motif Contrast

3777 **1860 PR66 Cameo PCGS. CAC.** Cameo examples of the 1860 proof Indian cent are rare; PCGS has seen only four such coins, including one PR64 and three Premium Gems, one here offered (4/15). Both sides show crisp detail and glowing orange-gold surfaces. Highly reflective fields provide pleasing contrast, and there are no distractions. PCGS# 82253

1864 Bronze No L Cent, PR64 Red Cameo
Appealing One-Year Type Coin

3778 **1864 Bronze No L PR64 Red Cameo PCGS. CAC.** Rick Snow estimates that 300 of this one-year-of-type issue were struck, rather than the 150+ estimate in the *Guide Book*. It is the combination of No L and bronze composition that makes this a one-year type, as the L initial would remain through the end of the series. This fresh-looking coin shows good contrast over copper-red and orange-red surfaces with a bold strike, no carbon, and good eye appeal. Population: 8 in 64 Cameo, 6 finer (4/15). PCGS# 82278

1877 Cent, Attractive PR65 Red and Brown

3779 **1877 PR65 Red and Brown PCGS.** Mottled lilac and copper-purple hues infuse the surfaces of this crisply struck Gem proof 1877 cent, a piece showing few post-Mint abrasions save for a single tick on the Indian's cheek. The reverse adds glints of blue on the high points, consistent with the Red and Brown color assessment. An extremely attractive example of this key date. Population: 74 in 65 Red and Brown, 6 finer (4/15). NGC ID# 229W, PCGS# 2319

1878 Cent, PR66 Red Cameo
Uncommon Contrast

3780 **1878 PR66 Red Cameo PCGS.** Though few proof Indian cents ever were made to a Cameo standard and even fewer kept it after more than a century of potential toning, this Premium Gem Cameo has defied the odds. Fresh copper-orange surfaces offer clear contrast and only minor spotting near the devices. Population: 7 in 66 Red Cameo, 0 finer (5/15). PCGS# 82323

1888 Cent, PR66 Red
Gorgeous Color

3781 **1888 PR66 Red PCGS. CAC.** With 4,582 pieces struck, the proof 1888 cent has the second-highest mintage in its series, behind only the 1883. (For comparison, the highest mintage for a matte proof Lincoln cent was 4,118 examples.) Despite this hefty initial output, though, few examples have survived in excellent condition, particularly with their original Red surfaces intact. This Premium Gem glows with gorgeous yellow-to-orange luster. While the reverse shows a few flyspecks, the obverse is virtually pristine and sharply struck. A great Registry coin. Population: 2 in 66 Red, 0 finer (5/15). NGC ID# 22AA, PCGS# 2353

1909-S VDB Lincoln Cent, MS66+ Red
Glowing Golden Surfaces

3782 **1909-S VDB MS66+ Red PCGS.** The 1909-S VDB Lincoln cent is an iconic issue, listed among Garrett and Guth's *100 Greatest U.S. Coins* and ranking as one of the most sought-after of all 20th century key dates. The survival rate is high enough that the date is usually obtainable, at least in lower grades; Premium Gem examples are notably scarce and anything finer is a major rarity. This Plus-designated full Red piece displays uninhibited, bronze-gold luster over satiny, almost matte-like surfaces. There are no distracting abrasions and only a few microscopic specks in the right obverse field are discernible with a 10x loupe. PCGS has seen only 11 numerically finer submissions (4/15). NGC ID# 22B2, PCGS# 2428

1915 Cent, MS67 Red
Sharp, Registry Set Quality

3783 **1915 MS67 Red PCGS.** While the 1909-S VDB and other low-mintage keys are widely recognized, few nonspecialists are aware of the conditional rarity of many other Lincoln cent issues in the finer full Red grades. The 1915 is just such a date. The availability of full Red Mint State coins declines significantly above the Gem level, and in Superb Gem condition, this issue is one of the more challenging for Registry Set collectors to acquire. The present piece is delightfully sharp with thick, satiny luster that glows in shades of coppery-orange and bronze-gold. No mentionable carbon or other surface flaws are present. Population: 10 in 67 Red, 1 finer (4/15). NGC ID# 22BK, PCGS# 2479

1915-D Cent, MS66 Red
Color and Condition Rarity

3784 **1915-D MS66 Red PCGS. CAC.** The obverse is boldly detailed while the reverse of this lovely Premium Gem shows just a touch of peripheral weakness. Both sides have satin luster with brilliant orange mint color, faintly streaked by time with a few flecks. Though the previous year's Denver cent issue gets far more attention, Lincoln specialists know the challenge the 1915-D poses in high grades. Population: 28 in 66 Red, 1 finer (5/15). NGC ID# 22BL, PCGS# 2482

1922 No D, Strong Reverse Cent, MS63 Brown
Seldom Seen So Fine

3785 **1922 No D, Strong Reverse, FS-401, MS63 Brown PCGS.** Die Pair 2, showing the sharp reverse (on the wheat ears especially, but throughout) and the second 2 in the date sharper than the first. The WE is mushier than IN GOD, all the letters in TRUST are sharp, and the L in LIBERTY blends into the rim. This high-grade Select example is a medium nut-brown piece with a couple of minor ticks on Lincoln's profile, but no major marks or other impairments. The reverse is relatively unmarked as well, showing full detail in the wheat ears and excellent eye appeal throughout. This variety seldom appears in so fine a state of preservation. The last 1922 No D, Strong Reverse example in this grade we offered, in our Long Beach Signature (Heritage, 6/2014), lot 4313, brought $20,709. PCGS# 37676 Base PCGS# 3285

1927-S Cent, MS65 Red
Registry-Worthy Rarity

3786 **1927-S MS65 Red PCGS.** Better-defined than the norm and largely unturned, this Red Gem with crisp wheat ears looks little like other examples from the same issue. Orange colors are lighter on the luminous obverse, though that side also shows a spot behind Lincoln's head. Nonetheless, a notable condition rarity. Population: 17 in 65 Red, 0 finer (5/15). NGC ID# 22CP, PCGS# 2584

1945-D Cent, Miraculous MS68 Red
Struck From Recycled Shellcase Alloy

3787 **1945-D MS68 Red PCGS.** This is a common coin in a most uncommon state of preservation, the sole finest certified at PCGS from the original mintage exceeding 266 million coins. The 1944 and 1945 Lincoln cent issues from all three mints were struck from recycled munitions (shell) cases in the proportion of 70%, to which enough virgin copper was added to bring the alloy up to 95% copper, with the rest zinc. This resulted in many cents from both years showing streaky planchets, spotting, or both. And finally, most examples simply show poor quality, whether from contact, mushy strikes, or the other problems cited. This miraculous example of the 1945-D cent, graded MS68 Red, has escaped all those mediocre outcomes, however, showing a great strike, bold luster and color, and a complete absence of any mentionable impairment. A Registry Set essential. Population: 1 in 68 Red, 0 finer (5/15). NGC ID# 22EH, PCGS# 2737

1955 Doubled Die Cent, MS64 Red and Brown
Attractive and Problem-Free

3788 **1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC.** The surfaces appear just barely "over the border" from Red by and large, and, more importantly, there is no mentionable carbon apparent. Only a couple of small field ticks on the obverse seem well in line with the grade. The eye appeal and CAC endorsement are both pluses here. An issue seldom seen in full Red at PCGS. Among Red and Brown examples, PCGS reports only seven submissions finer (4/15). PCGS# 37911 Base PCGS# 2826

1955 Doubled Die Cent, MS65 Red
Seldom Seen in This Grade

3789 **1955 Doubled Die Obverse, FS-101, MS65 Red NGC.** The adjectives "1955 Doubled Die Obverse," "MS65," and "Red" so seldom occur together that dedicated Lincoln cent collectors are bound to sit up and take notice at a coin such as this one, certified MS65 Red by NGC. The surfaces are smooth, medium copper-red on each side and devoid of mentionable distractions of any sort. Generous luster shines forth, complementing a bold strike and top-notch eye appeal. Registry Set collectors will be all over this coin — the last Gem Red NGC example at public auction was a Goldbergs offering in June 2014, lot 159, which realized $25,960. PCGS# 37912 Base PCGS# 2827

1972 Doubled Die Obverse Cent, MS67 Red
'Most Popular' FS-101 Variety

3790 **1972 Doubled Die Obverse, FS-101, MS67 Red PCGS.** Besides the blatant obverse doubling on the date, LIBERTY, and IN GOD WE TRUST, this "most popular" FS-101 doubled die variety shows a small die gouge on the reverse rim above the D in UNITED. Beautiful, crisp orange-red color and pristine preservation appear. PCGS reports only one MS68 finer of the base variety (4/15). PCGS# 38013 Base PCGS# 2950

1972 Doubled Die Obverse, MS67 Red
A *Guide Book* Classic

3791 **1972 Doubled Die Obverse, FS-101, MS67 Red NGC.** One of the iconic Lincoln cent doubled dies and among the strongest of the Memorial era, the 1972 Doubled Die Obverse, FS-101 is a *Guide Book* classic. This Red Superb Gem shows a range of subtle colors from pink to rose-violet without ever falling into Brown territory. Magnificently preserved. For the variety, Census: 12 in 67 Red, 0 finer (4/15). PCGS# 38013 Base PCGS# 2950

1972 Cent, MS67 Red
Doubled Die Obverse

3792 **1972 Doubled Die Obverse, FS-101, MS67 Red PCGS.** A widely sought *Guide Book* variety, the 1972 double die obverse cent is one of the most significant mint errors in the Lincoln cent series. This Registry-quality Superb Gem yields glossy copper-red luster on the obverse, with a tinge of bronze in the central reverse. Trivial contact on Lincoln's jaw appears to be the only surface flaw. Population: 31 in 67 Red, 1 finer (4/15). PCGS# 38013 Base PCGS# 2950

1865 Two Cent Piece, MS67 Red Among the Finest Two Cent Pieces Known

3793 **1865 Fancy 5 MS67 Red NGC.** This is a landmark coin in the two cent series. The 1865 date is not notably scarce in the absolute sense (the issue had a mintage of more than 13.6 million coins), but this Superb Gem blazer is one of only six full Red MS67 coins certified by NGC and PCGS combined *for the entire series*. NGC lists two MS67 Red examples of this issue and two more so-graded examples of the 1864 Large Motto issue; PCGS lists just a single 1865 representative in this grade and another 1864 Large Motto. Could there be duplication, even in these paltry numbers? Superb Gem two cent pieces in the Brown and Red and Brown color categories at both services add only seven addition MS67-graded coins to the census, pointing to the extreme rarity of any two cent piece in this grade.

This is only the fourth time in more than two decades we have offered an MS67 example of the 1865; moreover, it is only the third such offering of a full Red example, and this is only the second individual coin we have handled in this grade. The other equally graded piece (a PCGS coin) garnered $25,850 in our 2014 FUN Signature sale. This piece is vibrantly lustrous and beautifully preserved. Crisp coppery-gold luster adorns each side. A heavy, retained cud is evident along the upper-right obverse border. PCGS# 38258 Base PCGS# 3584

1872 Two Cent, Seldom-Seen MS65 Red

3794 **1872 MS65 Red NGC.** The entire two cent series lasted less than a decade from 1864 through 1873, but the 1873 issue was proof-only, first Originals, then "alleged" Restrikes, per the *Guide Book*. This last circulation-strike issue in the two cent series saw a meager mintage of only 65,000 coins (and perhaps 1,000 proofs), and only a scant few survive today as fine as this Gem Red example. The orange-red surfaces show good luster and few marks amid a good strike and overall excellent eye appeal. No mentionable carbon appears, and the top of the U(NITED) shows a straight-line die crack, with other cracks appearing near the bow area. Census: 2 in 65 Red, 1 finer (4/15). NGC ID# 22NG, PCGS# 3614

PROOF TWO CENT PIECES

1869 Two Cent Piece, PR64 Red Cameo
The Sole Cameo at PCGS

3795 **1869 PR64 Red Cameo PCGS.** The fields on this Choice Cameo proof are impressively deep, with a degree of mirroring that is seldom seen on the two cent issue. Satiny design elements are in sharp relief. Both sides show rich coppery-orange patina with attractive plum overtones on portions of the relief elements. Vivid eye appeal. This is the *only* Cameo certified by PCGS; NGC shows two Cameos, one PR65 Red and Brown and one PR65 Red (4/15). PCGS# 83641

1873 Closed 3 Two Cent, PR66 Brown
Deep Multihued Patina

3796 **1873 Closed 3 PR66 Brown PCGS. CAC.** This glossy Closed 3 two cent proof showcases deep auburn-brown surfaces with hidden flashes of lilac, plum, and sea-green that are revealed when tilted beneath a light; the occasional glimpse of original red is also visible in the peripheral recesses. The design elements are fully rendered and there are no distracting marks in the reflective fields. Population: 8 in 66 Brown, 0 finer (4/15). NGC ID# 2753, PCGS# 3651

THREE CENT SILVER

1851 Three Cent Silver, MS67
Sharp Shield

3797 **1851 MS67 NGC. CAC.** The 1851 three cent silver is distinct as the first issue in this underappreciated series, and is also available in Mint State for type representation. This piece is among just a few examples that rank as the finest certified, and is an important acquisition for the advanced enthusiast. The strike is far above average, particular in regards to the obverse shield which is boldly defined. Frosty luster attests to the originality of subtle ice-blue and champagne hues, while a deeper amber-brown crescent is also seen along the upper-right obverse rim. Census: 9 in 67, 0 finer (4/15). NGC ID# 22YX, PCGS# 3664

1851-O Three Cent Silver, MS66
Silk-Like Shimmering Luster

3798 **1851-O MS66 PCGS.** This attractive piece is among the finest certified at PCGS, an important ranking for a representative of the only branch mint issue in the series. Frosty mint luster yields just a hint of pale champagne color, and close study with a loupe finds the surfaces largely devoid of contact. Some striking weakness is present on the shield, as is expected for the issue. Population: 28 in 66 (2 in 66+), 0 finer (4/15). NGC ID# 22YY, PCGS# 3665

1852 Silver Three Cent, MS67
Outstanding Surfaces

3799 **1852 MS67 PCGS.** Superb Gem silver three cents are scarce regardless of issue. This 1852 representative is awash in frosty lavender-blue and pale champagne luster, with seemingly perfect surface preservation. Lightly clashed, with minor striking weakness on the central shield, as usual. Population: 19 in 67, 2 finer (5/15). NGC ID# 22YZ, PCGS# 3666

1852 Three Cent Silver, MS67+
Only Two Finer at PCGS

3800 **1852 MS67+ PCGS. CAC.** A frosted, silver-lilac Superb Gem with jewel-like luster and tremendous eye appeal. The 1852 three cent silver was struck to the tune of 18.6 million pieces, by far the largest mintage for the series. With such a large mintage, it goes without saying the dies were pushed to their limits and few technically superb coins were struck. This little beauty is one of the few ... the sole MS67 PCGS coin to receive the Plus designation, and very nearly in the finest-known category. Population: 20 in 67 (1 in 67+), 2 finer (5/15). NGC ID# 22YZ, PCGS# 3666

1854 Three Cent Silver, MS66
Attractively Toned

3801 **1854 MS66 NGC.** A richly toned Premium Gem from the several-outline design subtype, warmly lustrous beneath champagne and green-gold outer toning that yields to interior blue-gray. A few broad areas show faint striking softness on the reverse, yet the all-around eye appeal is more than Premium Gem-worthy. Census: 4 in 66, 2 finer (4/15). NGC ID# 22Z3, PCGS# 3670

PROOF THREE CENT SILVER

1863 Three Cent Silver, Lightly Toned PR67
Flawless Preservation

3802 **1863 PR67 NGC.** A low-mintage proof date that is rare at this advanced grade level. Lovely sky-blue, peach, yellow, and lilac shades adorn the flawlessly preserved surfaces of this gorgeous Superb Gem. The design motifs are sharply struck, and watery reflectivity emerges from the fields. Census: 8 in 67 (1 in 67 ★), 1 finer (4/15). NGC ID# 22ZP, PCGS# 3712

1865 Three Cent Silver, PR66+
Sole Finest at PCGS, Breen Die State II

3803 **1865 PR66+ PCGS. CAC.** Breen Die State II. This first-year proof three cent silver issue was struck in an estimated amount of 500 pieces in two different die states, according to the Guide Book and Walter Breen's 1988 *Proof Encyclopedia*. This piece shows the diagnostic straight die crack from the rim upward into the lower-left obverse field, left of the date — a phenomenon not usually seen on proof coins, particularly first-year issues. This piece shows beautiful rose, gold, and blue-green patina with no mentionable post-Mint contact. The sole finest graded at PCGS. Population: 18 in 66 (1 in 66+), 0 finer (4/15). NGC ID# 27CB, PCGS# 3715

THREE CENT NICKELS

1876 Three Cent Nickel, MS66
Rare This Fine

3804 **1876 MS66 PCGS.** This issue's limited 162,000-coin mintage spurs its scarcity in the finer Mint State grades. This high-end example displays sharp details, with satiny luster shining through just a blush of light golden toning. A few tiny ticks in the field below STATES appear to be the only discernible surface flaws. Population: 9 in 66, 0 finer (4/15). NGC ID# 275A, PCGS# 3744

1885 Nickel Three Cent, MS66
Boldly Rendered, High-End Example

3805 **1885 MS66 PCGS.** The low three cent nickel mintages of 1880s bottom out in 1885, with a circulation issue production of only 1,000 coins. By this time, the denomination's original purpose — to serve as small change following the Civil War when silver coins were widely hoarded — had passed, and by 1889 the series was discontinued altogether. This Premium Gem 1885 representative does not disappoint in any visual or technical regard. The bold strike is plainly evident on the reverse bowknot and central Roman numeral, and the delicate, frosty surfaces are consistently devoid of abrasions. Just a hint of iridescence accents the silvery-gray patina. Population: 13 in 66 (1 in 66+), 2 finer (4/15). NGC ID# 275G, PCGS# 3753

PROOF THREE CENT NICKELS

1870 Three Cent Nickel, PR67+ Cameo

3806 **1870 PR67+ Cameo NGC.** An untoned stone-gray example of this proof issue of an estimated 1,000 pieces, clearly among the finest, most appealing, and best-contrasted survivors. The immaculate surfaces and complete lack of toning show this stunning piece off to maximum effect, justly deserving the NGC Plus designation. Census: 4 in 67 Cameo (1 in 67+ Cameo, 2 in 67 ★ Cameo), 0 finer (5/15). PCGS# 83766

1875 Three Cent Nickel, PR66 Cameo
Clear Contrast

3807 **1875 PR66 Cameo NGC.** There are two distinct periods of proof three cent nickel production, the low-output time of 1877 and before and the high-output stretch of 1878 and after. This Premium Gem Cameo Proof of an earlier date has gleaming nickel-white surfaces and clear contrast with only a few small spots on the obverse. Census: 7 in 66 Cameo (1 in 66 ★ Cameo), 0 finer (4/15). PCGS# 83771

PROOF SHIELD NICKELS

1867 No Rays Shield Nickel, PR66
Lightly Toned Cameo

3808 **1867 No Rays PR66 Cameo PCGS.** A boldly contrasted Premium Gem Cameo, this No Rays proof Shield nickel further boasts razor-sharp definition on the devices, and offers deep mirroring in the fields beneath a light golden veil. No distracting marks or hairlines are present. Population: 20 in 66 Cameo, 0 finer (4/15). PCGS# 83821

1867 No Rays Shield Nickel, PR66 Cameo
Attractive Early-State Dies

3809 **1867 No Rays PR66 Cameo PCGS.** Reverse Style D, per the Bowers Guide Book of Shield and Liberty Head Nickels, showing stars pointing to the right-bottom serif of the E in STATES and between AM in AMERICA. The obverse die state is early, per Bowers, marginally (and here imperceptibly) different from that used with Reverse Style C, showing stars pointing under the upright of E and the center of A. This would mean this piece is likely an early delivery from the second striking, after the 25 proofs showing Style C had been delivered, and that would explain both the early die state and the cameo contrast remaining from the still-fresh dies. This is an extremely appealing and well-preserved example of this first-year type, showing rose, tan, and saffron patina on surfaces that show considerable mint frost on the devices and well-mirrored fields. A small planchet flaw appears in the lower-left obverse field near the rim. Population: 20 in 66 Cameo, 0 finer (5/15). PCGS# 83821

1871 Shield Nickel, PR67 Cameo
No Cameos Finer

3810 **1871 PR67 Cameo NGC.** This fully detailed Shield nickel has bright mirrors beneath delicate patina. The bright interiors are surrounded by faint golden patina that surrounds the margins. As expected from the grade, there are no obvious contact marks on either side. Census: 7 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (4/15). PCGS# 83825

1877 Shield Nickel, Pastel-Toned PR65 Cameo
Proof-Only Key Issue

3811 **1877 PR65 Cameo PCGS.** A great-looking example of the proof-only Shield nickel key, this Gem proof combines the best of both worlds, excellent field-device contrast with lovely pastel toning in shades of rose and pale ice-blue. A uniformly sharp proof strike adds to the attraction here. Population: 43 in 65 Cameo, 46 finer (4/15). PCGS# 83831

LIBERTY NICKELS

1885 Liberty Nickel, MS66
Registry Set Quality

3812 **1885 MS66 PCGS.** Radiant luster highlights seemingly pristine surfaces on this golden-toned key-date Liberty nickel. Strike deficiency is evident on the lower-left portion of the wreath, as well as the corresponding obverse stars, not unusual for the issue. Both dies are severely cracked around the periphery, most notably on the reverse from the rim at 7:30 through the wreath bow. Advanced by a low mintage (fewer than 1.5 million coins) and a high attrition rate, the 1885 Liberty nickel is the biggest key date in the series, even if closely followed by the 1886 and 1912-S. The challenge of finding high-grade Uncirculated examples is such that many collectors opt for the more available proof variant to represent the date. However, nothing can replace the satisfaction of hearing the auctioneer call "Sold" and realizing that you just acquired a significant condition rarity to which few other collectors can lay claim. Population: 27 in 66 (2 in 66+), 3 finer (4/15). NGC ID# 2773, PCGS# 3846

1886 Nickel, MS65
Popular Key Issue

3813 **1886 MS65 NGC.** The 1886 nickel is an absolute as well as a condition rarity. Only 3.3 million pieces were struck with few set aside at the time of issue, especially in high grade. This Gem has a hint of blue to its light steel-gray patina and deeper colors on the rims. On the obverse, prominent die cracks circle through stars and date. Census: 29 in 65, 3 finer (4/15). NGC ID# 22PK, PCGS# 3847

1888 Nickel, MS66+
Tied for Finest Certified

3814 **1888 MS66+ PCGS. CAC.** The second 8 in the date is recut. Often overlooked by nonspecialists, the 1888 Liberty nickel is significantly more challenging in Mint State than its mintage of more than 10 million coins would suggest. In Premium Gem condition, the 1888 is every bit as rare as the 1885 and 1912-S; moreover, while the 1885 is represented by a few coins as high as the MS67 grade level, the 1888 is not. The currently offered coin ranks among the finest certified; PCGS lists 21 pieces in MS66, with this piece being one of just two therein awarded a Plus designation (4/15). Radiant, satiny luster glows over both sides, illuminating soft ice-blue and champagne hues. The corn ear to the left of the wreath bow is well-defined and the obverse stars are sharp. A couple faint grazes on Liberty's jaw line appear to be all that preclude a full Superb Gem grade assessment. NGC ID# 2774, PCGS# 3849

1889 Liberty Nickel, MS66+
Tied for Highest Graded at PCGS

3815 **1889 MS66+ PCGS. CAC.** Fully brilliant and radiant, this near-Superb Gem exhibits undisturbed surfaces absent any notable marks. The reverse is lightly toned in champagne, and the dies are perfect. CAC-approval attests to the pleasing appearance, and the lofty technical grade only enhances the overall appeal. PCGS has graded but one other example in MS66+, while NGC has graded two pieces in MS67. Population: 26 in 66 (2 in 66+), 0 finer (5/15). NGC ID# 2775, PCGS# 3850

1896 Nickel, Frosty MS66
Among the Finest Certified

3816 **1896 MS66 PCGS. CAC.** Available in lower grades, the 1896 Liberty nickel becomes conditionally rare as a Premium Gem and is unknown finer. This example displays frosty, radiant luster with a light golden hue over each side. A couple minute ticks near Liberty's chin are all that limit the grade. The corn ear to the left of the wreath bow is weakly defined, as usual, but the obverse shows pleasing sharpness. Population: 21 in 66 (2 in 66+), 0 finer (4/15). NGC ID# 277B, PCGS# 3857

1912-S Liberty Nickel, MS66
First San Francisco Coinage in Nickel

3817 **1912-S MS66 NGC.** The challenge of locating a 1912-S nickel in high grade is accentuated by the issue's tendency to be poorly struck. This was the San Francisco Mint's first attempt at regular production with the hard nickel alloy, and many of the striking problems that affected the Philadelphia Mint in the 1860s were now apparent at the Western facility. This Premium Gem example is typically soft on the corn ear to left of the wreath bow, but the stars and portrait are well-defined. Iridescent golden toning blankets satiny luster on each side, while the overall appearance delivers the mildly glossy patina that is characteristic of this issue. Census: 12 in 66 (1 in 66+, 1 in 66 ★), 0 finer (4/15). NGC ID# 277R, PCGS# 3875

BUFFALO NICKELS

1913 Type One Nickel, MS67+
Incredible Concentric Toning

3818 **1913 Type One MS67+ PCGS. CAC.** Incredible concentric toning includes primarily pale violet, lilac, rose, ice-blue, and amber-gold on this sharply struck and nicely preserved Type One Buffalo nickel. As demanded at this grade level, there are essentially no mentionable signs of contact. Population: 508 in 67 (20 in 67+), 17 finer (5/15). NGC ID# 22PW, PCGS# 3915

1914-S Nickel, Sharp MS66
One Superb Gem Finer at PCGS

3819 **1914-S MS66 PCGS.** The 1914-S benefits from a mintage in excess of 3.4 million coins, but examples are conditionally rare in Premium Gem or better grades. This example displays a level of design sharpness reminiscent of a proof, with satiny golden luster and essentially undisturbed surfaces. The recesses show minor die wear, expected for the issue, and there is a thin crack extending from the rim into the bison's head. Population: 36 in 66 (5 in 66+), 1 finer (5/15). NGC ID# 22R6, PCGS# 3926

1916 Buffalo Nickel, VG10
Affordable Doubled Die Obverse Example

3820 **1916 Doubled Die Obverse, FS-101, VG10 NGC. CAC.** The popularity of the 1916 doubled die obverse nickel closely reflects that of the legendary 1937-D Three Legged variety, but the 1916 is somewhat more difficult to locate in any grade. This well-circulated example displays smooth battleship-gray surfaces with hints of olive in the recesses. The date is worn, but the doubling is clear. PCGS# 145628 Base PCGS# 3931

1920-S Nickel, Toned MS64+
Seldom Seen Finer

3821 **1920-S MS64+ PCGS.** Alternating cascades of nickel-gray and rose enliven the surfaces of this well-preserved 1920-S nickel. Only a few trivial ticks appear on either side, but both dies show advanced erosion in the form of flowlines and a middling strike. Still appealing and difficult to obtain at the full Gem level. Population: 5 in 64+, 20 finer (5/15). NGC ID# 22RS, PCGS# 3946

1923-S Nickel, MS65
Warm, Satiny Surfaces

3822 **1923-S MS65 PCGS.** The 1923-S Buffalo nickel is seldom seen as fine as MS65, and numerically better pieces are rare. This satiny lavender-gold representative is remarkably well-struck given the advanced state of the dies which show extensive erosion in the recesses, not unusual for the issue. No distracting abrasions are observed. Population: 49 in 65 (2 in 65+), 3 finer (4/15). NGC ID# 22RW, PCGS# 3950

1925 Buffalo Nickel, MS67
Superb, Struck From Fresh Dies

3823 **1925 MS67 NGC.** In a word, beautiful. A degree of striking softness is to be expected on this mid-1920s issue, although the present piece is moderately well-defined, particularly on the bison's head and in the other peripheral regions. Die fatigue is not a factor, something that can not be said about almost any other Buffalo nickel from this period. Smooth, satiny luster glows from beneath delicate shades of frost-blue, lavender-gold, and pale emerald-green toning that grace the seemingly flawless surfaces. A truly magnificent coin. Census: 7 in 67, 0 finer (4/15). NGC ID# 22S2, PCGS# 3954

1925 Buffalo Nickel, MS67
Gorgeous Patina

3824 **1925 MS67 NGC.** Many examples of the 1925 nickel show striking softness, a result of die overuse. A touch of this softness and quicksilver luster are among the few traits this remarkable Superb Gem shares with its peers. Bold toning, a mix of blue and violet outer shades with warm pinks and peaches on the interior, makes the eye appeal undeniable. Census: 7 in 67, 0 finer (4/15). NGC ID# 22S2, PCGS# 3954

1926-D Buffalo Nickel, Sharp MS66
Strike and Condition Rarity

3825 **1926-D MS66 PCGS. CAC.** While not the most famous Buffalo nickel issue of the year (the 1926-S takes precedence), the 1926-D is an elusive issue in better-than-Gem grades, especially with the level of detail seen here. The *Guide Book* flags this issue as one where "Uncirculated pieces with full, sharp details are worth considerably more," and this coin's rounded horn testifies to an above-average strike. Only a hint of softness is visible on the bison's shoulder and tail. Luster is bright and faintly frosted with hints of orange at the margins of otherwise nickel-white surfaces. Population: 26 in 66 (3 in 66+), 1 finer (5/15). NGC ID# 22S6, PCGS# 3958

1928 Nickel, MS67
Exceptional Mint Luster

3826 **1928 MS67 PCGS.** Glowing satin luster captivates the eye on each side of this Superb Gem 1928 Buffalo nickel, illuminating lovely ice-blue and pale lavender hues that blend over the surfaces. A glass reveals a couple minute ticks on the Indian's face, not out of line for the grade, and there is expected softness in the extreme centers. Overall, a visually impressive coin and among the finest known. Population: 17 in 67, 0 finer (5/15). NGC ID# 22SB, PCGS# 3963

1931-S Nickel, Beautifully Toned MS67
Tied for Finest Known

3827 **1931-S MS67 PCGS.** With a limited mintage of only 1.2 million coins, the 1931-S is a recognized semikey in the series, but examples in circulated levels and lower Mint State grades can be obtained with patience. However, Superb Gems are exceedingly rare. This magnificent coin is arguably the most eye-appealing of the eight MS67 examples known, which include five coins at PCGS and three at NGC (4/15). Both sides showcase a breathtaking array of lavender and ice-blue hues that transition to rose-gold and mint in the margins. Well-struck and impressively preserved, with delicate, satiny luster. NGC ID# 22SK, PCGS# 3971

1937-D Three-Legged Buffalo, Attractive MS63
Far Finer Than Usual

3828 **1937-D Three-Legged, FS-901, MS63 PCGS.** This Select Mint State Three-Legged nickel is especially well-struck and exhibits lovely, satinlike mint luster. Each side is covered with pale lilac toning and a touch of olive over the high points. Along with the 1918/7-D and the 1916/1916, the 1937-D is the third most popular variety in the Buffalo nickel series. As one might imagine from the late date of issue, it is by far the most available of the three varieties and is occasionally offered at public auction in the better grades of Mint State.
Ex: Ron W. Keeney Collection, Part Two / Denver Signature (Heritage, 8/2006), lot 718. PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS64
Sought-After *Guide Book* Variety

3829 **1937-D Three-Legged, FS-901, MS64 NGC.** Genuine examples of this key *Guide Book* variety can be distinguished by the presence of fine, raised rust lumps in the reverse field from the center of the bison's belly to the ground between the hooves. This example is well-struck, with deep olive-gray toning that lightens to golden iridescence in the centers. A pleasing near-Gem representative. PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

1914 Nickel, Superb PR67
Bold Matte Proof Type Coin

3830 **1914 PR67 PCGS.** Demand for proof Buffalo nickels declined after the inaugural year, and only 1,275 pieces were struck in 1914. This Superb Gem example displays thick matte luster with just a hint of light golden toning over the delicately preserved surfaces. The sharpness of James Earle Fraser's rugged design is such as is impossible to locate on a circulation strike. Population: 84 in 67 (6 in 67+), 11 finer (4/15). NGC ID# 278T, PCGS# 3991

1915 Buffalo Nickel, PR67
Spectacular Matte Proof

3831 **1915 PR67 PCGS. CAC.** Like the matte proof Lincoln cents, the matte proof Buffalo nickels proved unpopular, and mintages continued to slide until the coinage was discontinued in 1916. A mere 1,050 specimens were minted for 1915, and this Superb Gem easily ranks among the best-preserved survivors. The satiny nickel-gray surfaces have hints of blue and gold and are extraordinarily clean. The crisp strike reveals a few die lines below the bison's body. An incredible coin, worthy of a strong bid. Population: 59 in 67 (6 in 67+), 2 finer (4/15).
Ex: Dallas Signature (Heritage, 10/2006), lot 596. NGC ID# 278U, PCGS# 3992

1915 Buffalo Nickel, Superlative PR67

3832 **1915 PR67 PCGS. CAC.** This superlative matte proof appears to have perfect surfaces. The coin sparkles with satiny luster, and each side is covered with a pale overlay of golden toning. As one would expect from a proof strike, the devices are intricately detailed on each side with definition on the Indian's hair and on the bison's head that simply cannot be found on a business strike. Population: 61 in 67 (6 in 67+), 2 finer (5/15).
Ex: Long Beach Signature (Heritage, 6/2006), lot 881; FUN Signature (Heritage, 1/2011), lot 4487. NGC ID# 278U, PCGS# 3992

1937 Buffalo Nickel, Outstanding PR68

3833 **1937 PR68 PCGS. CAC.** Proof Buffalo nickels of 1937, coming from a large mintage exceeding 5,700 pieces, are the most readily available proofs in the series. This is evidenced by the more than 4,000 submissions of this issue seen by PCGS and NGC. Indeed, even PR67 examples can be located with relatively little trouble. PR68 coins, such as the present offering, however, are an entirely different story. The two services have certified just 70 pieces and one finer.

A veneer of soft violet patina lays over both sides, and each exhibits crisply defined design features and is impeccably preserved. While proofs of this year were struck in an all-brilliant finish, the current coin displays modest field-motif contrast, contributing even more to the coin's outstanding eye appeal. Population: 21 in 68, 1 finer (5/15). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

1942-D/D Jefferson Nickel, MS62 Full Steps
Popular D Over Horizontal D Variety

3834 **1942-D D Over Horizontal D, FS-101, MS62 Full Steps PCGS.** The 1942-D Over Horizontal D is the rarest of the major Jefferson nickel *Cherrypickers* varieties in Mint State. This impressive MS62 example exhibits well-detailed design elements and lightly marked lustrous surfaces with hints of pale gold toning on both sides. Population (for the variety): 3 in 62, 18 finer (5/15). PCGS# 38496 Base PCGS# 84015

1944-P Nickel, MS67+ Full Steps
Rich Multicolor Toning

3835 **1944-P MS67+ Full Steps PCGS.** Blended rainbow hues around the peripheries are the hallmark of this Plus-graded Superb Gem, warmed by an overlay of sun-gold and rose toning. The strike is well-executed and the surfaces show only a few minor imperfections upon close study. Registry Set collectors will clamor for this piece, tied for the finest Full Steps representative seen at PCGS. Population: 15 in 67 (2 in 67+) Full Steps, 0 finer (5/15). NGC ID# 22TU, PCGS# 84022

1956 Jefferson Nickel, MS67 Full Steps
Notable Registry Coin

3836 **1956 MS67 Full Steps PCGS.** Though relatively common in almost any other grade, the 1956 nickel is a condition rarity in Full Steps Superb Gem. This sharp example has liquid luster beneath delicate layers of pearl-gray with glimmers of green-gold along the rims. Population: 2 in 67 Full Steps, 0 finer (5/15). NGC ID# 22UY, PCGS# 84059

PROOF JEFFERSON NICKELS

1975-S Nickel, PR70 Deep Cameo
Exceptional Registry Coin

3837 **1975-S PR70 Deep Cameo PCGS.** Nearly 6,000 1975-S nickels have achieved the MS69 Deep Cameo designation, but a mere 16 coins have been deemed unimprovable by PCGS. This example is astonishingly perfect in strike and eye appeal, with the faintest golden hue embellishing the high-contrast motifs and the impenetrably deep silver mirrors. A seldom-seen chance for high-grade nickel collectors to improve their holdings. Population: 16 in 70 Deep Cameo (4/15). NGC ID# 27AN, PCGS# 94208

1976-S Jefferson Nickel, PR70 Deep Cameo
Top Registry Set Contender

3838 **1976-S PR70 Deep Cameo PCGS.** One of the popular issues from the bicentennial year, this nickel is a Registry Set candidate of the highest order given the scant number of pieces awarded a similar grade by PCGS. Untoned and unflawed, the pristine surfaces offer fully struck stark-white motifs on jet-black mirrors. An unimprovable specimen, and a must-see opportunity for the finest nickel collections that lack an example in the ultimate grade. Population: 22 in 70 Deep Cameo (4/15). NGC ID# 27AP, PCGS# 94209

1792 Half Disme, Judd-7, MS64
First Federal Coinage Issue
Exceptionally Sharp Strike

3839 **1792 Half Disme, Judd-7, Pollock-7, R.4, MS64 PCGS Secure.** "Firsts" are noteworthy events often associated with groundbreaking, revolutionary, and innovative ideas or actions. Firsts are given historical significance; they are recorded for future generations to admire and appreciate. That is true of science, technology, and philosophy, among countless other areas of specialization.

Numismatics is no different. First-year issues, the first usage of new techniques, and modern first releases are all of interest to various types of collectors. In the broader sense of American coinage, the 1792 half disme enjoys the distinction of being the first federal issue struck after the passage of the Mint Act of April 2, 1792. The coins not only represent the initial issue authorized by the Constitution, but they are also some of the most important keepsakes from the earliest days of the fledgling United States.

The Mint Act of April 2, 1792

Nearing the end of his first term as president in 1792, George Washington had yet to address one component vital to the promotion of national sovereignty — the creation of a mint and a national coinage system. At the time, a hodgepodge of coins and tokens circulated with little sense of unity or coherence. The provenance of such pieces varied widely, but most came from Britain, the Spanish colonies, various American states, and private individuals. Several proposals for a national coinage had been made by the likes of Robert Morris, Gouverneur Morris, Thomas Jefferson, and Alexander Hamilton, but a national system was only put into effect after the passage of the Mint Act of April 2, 1792.

The Mint Act included a number of key provisions. It established a mint "for the purpose of national coinage" at the seat of government, which was Philadelphia at the time. The Mint Act further specified the denominations to be struck, including their weights, values, and compositions. Mandatory devices were laid out as well. David Rittenhouse, an acclaimed scientist and philosopher, was appointed Director of the Mint by President Washington and tasked with overseeing all business relating to the newly established facility. Rittenhouse was to employ an assayer, engraver, chief coiner, and treasurer at predetermined salaries plus a number of clerks and workmen as he saw fit.

A "Small Beginning"

Things started to fall into place in the months following the passage of the bill. Rittenhouse appointed skilled watchmaker Henry Voigt as chief coiner. Beginning in June 1792, Voigt was working on recruiting able engravers to prepare dies to strike the first coinage issues. To this day the identity of the engraver(s) is not known with absolute certainty. It is believed that Robert Birch was primarily responsible for making the dies, possibly with the help of others.

While the Mint's institutional framework developed steadily through the spring and summer of 1792, the planning and construction of its physical structure were still in their nascent stages. Without an actual Mint building, the first federal coins — the half dismes — had to be struck a few blocks away from the Mint's proposed location in the basement of Trenton saw maker John Harper, who lived at North Sixth and Cherry Streets. Harper was an occasional contractor for the Mint and an associate of Mint Assayer Albion Coxe.

In 2003, the *American Journal of Numismatics* published a landmark article by Joel J. Orosz and Carl R. Herkowitz that provides an in-depth examination of the production of 1792 half dismes based on contemporary records and accounts. George Washington authorized the coins' production on July 9 in a letter to David Rittenhouse. On July 11, 1792 Thomas Jefferson delivered either $75 or $100 (the total varies by source) in silver bullion or specie, likely in the form of Spanish-American dollars and possibly from President Washington himself. Two days later on July 13, 1792, Jefferson wrote in his person account book: "Recd. from the mint 1500 half dimes of the new coinage." The authors explain that the deposit discrepancy could merely be a reflection of spoilage. In other words, $100 in silver may very well have been deposited, leaving just $75 after the bullion was refined and converted into planchets. Whether or not Washington actually provided the silver used to coin the half dismes is not incontrovertibly known, but Orosz and Herkowitz note that much of the evidence suggests Washington was the silver provider. The authors also note that the obverse portrait is almost certainly a generic depiction of Liberty rather than a rendering of Martha Washington.

By autumn 1792, federal coins had been struck and distributed, and the Mint building on North Seventh Street was well underway. Washington commented on the Mint's progress in his fourth annual address on November 6, 1792:

> "In execution of the authority given by the Legislature measures have been taken for engaging some artists from abroad to aid in the establishment of our mint. Others have been employed at home. Provision has been made of the requisite buildings, and these are now putting into proper condition for the purposes of the establishment. There has also been a small beginning in the coinage of half dimes, the want of small coins in circulation calling the first attention to them."

The half dismes of 1792 can be considered small only in terms of their physical stature. Their production may have been regarded as a minor step forward at the time, but today it is arguably one of the most important events in the history of American coinage. The issue ranks 12th in the fourth edition of Garrett and Guth's *100 Greatest U.S. Coins*, and the ever-strong prices coins realize at public auction are incontestable indications of their perceived significance in today's marketplace.

Survivorship and Current Population
The certified population and average certified grade for the 1792 half disme are telling. Survivors, of which approximately 300 pieces are known, can be located in heavily circulated grades through the upper levels of Mint State. Washington and Jefferson distributed many of the coins as gifts and others like David Rittenhouse kept multiple examples as remembrances, likely accounting for the 35 grading events in Uncirculated condition at PCGS and NGC combined. However, per Washington's fourth annual address, the coins were intended for circulation — and circulate they did. 80% of coins reported at PCGS survive in circulated grades with most grading from AG through VF condition.

Much has been made about whether or not the 1792 half disme ought to be considered a pattern or a regular issue. Most numismatists today believe the coins were struck for circulation. The current survivorship, as well as George Washington's own words from November 1792, all point to such a conclusion.

The Present Example
This Choice representative was clearly set aside early on and cherished as a souvenir of America's first coinage. Through which hands this coin passed is a matter of speculation, but the possibilities are nevertheless intriguing. Could it have been a gift from Washington or Jefferson? Unfortunately, such details will likely remain a mystery. What is certain, however, is that this Condition Census example is among an elite group of survivors.

Gunmetal-blue and golden tan shadings prevail over each side with lavender elements complementing the dominant hues. Breen's *Encyclopedia* remarks that even mint condition pieces "will not show full breast or leg feathers," but this coin is exceptional in that regard. The eagle's feathers on both the breast and leg are as sharply defined as one could hope to find for the issue. Liberty's portrait is equally bold. The obverse is well-centered, while the reverse is struck slightly off-center toward 6 o'clock. Light adjustment marks occur on each side, but they are mostly confined to the dentils. This MS64 coin last appeared as lot 2025 in Stack's Bowers Baltimore Auction (3/2013), where it was described as follows:

> "The surfaces are satin smooth, with lustrous fields that flash with some reflectivity when examined ... There are no surface marks worthy of note, and the eye appeal is high for this distinctive coin."

Given this coin's historical significance, outstanding technical quality, and superb eye appeal, we expect it to generate strong competition among advanced specialists seeking an extraordinary example of this important federal issue. Population: 8 in 64, 5 finer (3/15).
Ex: Bartlett Collection (Bowers and Ruddy, 11/1979), lot 2359; Greenwald-Jackson Collections (Bowers and Merena, 9/1995), lot 1177; Rarities Sale (Bowers and Merena, 1/2005), lot 327; Baltimore Auction (Stack's Bowers, 3/2013), lot 2025, which realized $470,000. PCGS# 11020

1794 V-4, LM-4 Half Dime, MS64
Unabraded, Well Struck

3840 **1794 V-4, LM-4, R.4, MS64 PCGS.** A stone-gray near-Gem with blushes of walnut-brown near the peripheries and profile. Essentially free from post-strike abrasions, although the obverse margin exhibits adjustment marks, as coined. The fields display clash marks, and each side has a few delicate die cracks. The 1794 is the scarcer of the two Flowing Hair dates, and was among the first silver issues struck by the fledgling Philadelphia Mint. However, LM-4 was presumably struck in 1795, since die progression indicates it was coined after the rare 1795 LM-1 and LM-2 varieties, which share the same reverse die. For all 1794 die varieties, the PCGS Population is 11 in 64 (2 in 64+), 10 finer (4/15). PCGS# 38584 Base PCGS# 4250

1795 Flowing Hair Half Dime, MS65+
Exceptional V-4, LM-10 Example

3841 **1795 V-4, LM-10 MS65+ PCGS. CAC.** The Logan-McCloskey reference describes a hoard of more than 100 Mint State 1795 Flowing Hair half dimes that was discovered in the 1870s, with many of the coins struck from the LM-8, LM-9, and LM-10 die pairs. Such a discovery would account for nearly half of the total Uncirculated population of 1795 half dimes in all varieties known today, according to the combined Mint State grading events of the two services. Such a situation is not unlike famous shipwreck recoveries, where the availability of conditionally rare dates and issues were altered dramatically in the mid to late 1800s.

While there is no way to determine if the present coin is one of the hoard finds, this high-end Gem has been exceptionally well-preserved. It represents the Valentine 4, LM-10 variety, which ranks among the most available of the ten 1795 die marriages. Valentine called the late die state V-4A, and this coin shows the obvious advanced state of the obverse die with a massive cud above TY of LIBERTY to star 9. Another crack travels from the base of T through the forehead above the eye, and a network of cracks connects the right-hand stars radially and to each other, as well as to the point of the neck. The reverse die is faintly cracked from the top of the left wing to the leaf above the eagle's head.

Iridescence blossoms from the smooth, softly lustrous surfaces with rainbow shades visible at the margins and around the central devices. An overall glossy, deep-silver patina yields to more vibrant colors in the recesses on both sides for a visually well-balanced appearance.

The strike is sharp on Liberty's hair and throughout the stars. Machine doubling is easily visible at the base of the date. The reverse strike reveals feather definition on the breast, although some Mint-applied adjustment marks are not fully eliminated at the eagle's left wing, which lacks feather detail as a result. More adjustment marks are scattered along the bottom rim.

This is the sole Gem 1795 half dime to receive the PCGS Plus designation regardless of variety, and the coin displays the green CAC endorsement label as well. Population (all varieties): 11 in 65 (1 in 65+), 12 finer (4/15). PCGS# 38594 Base PCGS# 4251

1857-O Half Dime, MS67
Only Two Coins Graded Finer

3842 **1857-O MS67 NGC.** This Superb Gem half dime exhibits a brilliant obverse center surrounded by a multi-colored rim. The sharp stars reveal shades of lilac, russet, and blue-green, and the only notable ticks are hidden with the gown. The reverse is richly colored in navy and wine, with highlights of red and gold above HALF DIME. This coin is tied for finest known at NGC, while PCGS has certified a single example in MS67+ and one coin in MS68. Census: 5 in 67, 0 finer (5/15). NGC ID# 233T, PCGS# 4366

1859 Half Dime, Impeccable MS68
One-Year Type Coin, Ex: Gardner

3843 **1859 MS68 PCGS. CAC. V-3.** Ex: Larry Shapiro, Gardner. The 1859 half dime was Mint Assistant Engraver Anthony Paquet's first work to reach actual production. This remodeling of Gobrecht's original design is most often noted for the hollow centers in the stars, a design element not found on any other U.S. coin. Perhaps because the figure of Liberty itself was not well-executed, or because he did not wish another engraver doing his work, Chief Engraver James Longacre remodeled the half dime again in 1860, after only 340,000 pieces of the Paquet design had been struck at the Philadelphia Mint. The uniqueness of this design earns it one-year type status, long an oversight with collectors assembling type sets.

This scintillating Superb Gem is bathed in concentric turquoise, rose-violet, and russet iridescence. Both the strike and surface quality appear to leave little room for improvement. PCGS shows five submissions in the numeric grade of MS68, of which three are Plus-graded coins; NGC reports four MS68 coins (5/15).

Ex: ANA Signature (Heritage, 4/2006), lot 366; Bowers and Merena (2/2007), lot 214. NGC ID# 233W, PCGS# 4371

PROOF SEATED HALF DIMES

1852 Half Dime, Richly Toned PR65
One of Perhaps 10 Proofs Minted

3844 **1852 PR65 PCGS. CAC.** This carefully preserved, richly toned Gem comes from an estimated mintage of a mere 10 proofs. The coins were struck several years prior to Mint Director Snowden's push to popularize proof coinage and make them more widely available to collectors. In 1852, proofs were still produced on an "as-needed" basis, whenever requested by a collector.

Dense, obviously original sea-green and copper-red toning dominates both sides, but iridescent accents of gold and purple-rose are also noteworthy. The design details are razor-sharp, and bright reflectivity becomes evident beneath the deep patina when the piece is rotated under a lamp. A few wispy die striations occur on the obverse and reverse alike (creating the brightness in the fields), but the pleasing surfaces are free of bothersome contact marks. The proof 1852 is a rare coin in any grade. This piece is among the finest known in addition to being the only Gem proof certified by PCGS. NGC has graded two coins at PR65, with one finer. PCGS has also encapsulated a single proof specimen at PR66 (4/15).
Ex: FUN Signature (Heritage, 1/2007), lot 854. NGC ID# 235K, PCGS# 4429

1854 Arrows Seated Half Dime, PR65
V-2, Rare Proof Type, Tied for Finest at PCGS

3845 **1854 Arrows PR65 PCGS. V-2.** A proof 1854 Arrows half dime in Gem condition is usually reserved for only the finest sets, and indeed most examples of this quality can be traced to the one of the historic collections. This example may prove to be such a coin, housed in a green label holder and with a rich, original patina that could only be acquired from many years of careful preservation.

Reflective fields retain their deep mirrors, but they are only revealed when the coin is viewed at the proper angle. Only then are the dramatic cerulean-blue, amber-gold, and mingled red and sea-green shades fully appreciated. There are no bothersome hairlines, marks, or other signs of handling. A limited number of proofs were struck in 1854, with a survivorship of fewer than 20 pieces known today. Population: 6 in 65, 0 finer (5/15). NGC ID# 235S, PCGS# 4432

1855 Arrows Half Dime Proof
V-6, Lightly Toned Gem

3846 **1855 Arrows PR65 NGC. V-6.** The date is low and the arrows are high — characteristics of the V-6 proof dies — and all examples display a shallow void in the rock base above the left arrow, most likely from excessive die polishing. Star 4 is flat, typical of all proofs seen for the issue. A number of lint marks are visible on both sides of the current coin, especially at A in HALF on the reverse and around stars 1 to 4 on the obverse. Other proofs show these as well, although some do not. Either a few proofs were struck on multiple occasions as needed, or the debris fell off the dies (or was removed) at some point during mintage.

All 1855 Arrows proofs have coarsely frosted obverse devices and mirrored fields, as if a rusted obverse die was used with the fields polished for the proof strikings. The reverse is less frosted and the elements are less rough. Both the 1854 and 1855 Arrows proofs were struck in similar numbers and show 15 to 20 surviving examples. While the 1854 issue may be slightly more scarce, both dates are of extreme importance to type and series collectors. The present coin is a glittering Gem proof survivor, with faint ivory-gold patina and highly reflective fields. Census: 4 in 65, 7 finer (4/15). NGC ID# 235T, PCGS# 4433

1860 Half Dime, Untoned PR67
First Year of the Legend Obverse Type

3847 **1860 PR67 NGC. V-3.** An untoned silver-white example of this first-year half dime issue, struck to replace the Stars Obverse half dimes and using the Cereal Wreath reverse, suggested by half dime specialist Harold P. Newlin for some 1859 pattern half dollars (e.g. Judd-247-25 inclusive) and adopted in 1860 for this denomination. This Superb Gem proof shows some die polishing lines but virtually no post-Mint defects. Census: 8 in 67, 0 finer (5/15). NGC ID# 235V, PCGS# 4443

EARLY DIMES

1796 JR-2 Dime, Appealing VF25

3848 **1796 JR-2, R.4, VF25 PCGS.** The date is spaced 1 79 6 and LIBE and RTY are evenly spaced, but the two groups crowd together with E and R touching. Star 15 touches the bust. The reverse shows an inner berry between the leaves and bow on the left, and leaves touch N, T1, E3, and A3. Attractive copper-rose color graces both sides of this moderately circulated first-year dime. A loupe reveals the expected thin marks and wear, the former more prominent on the obverse, but the essential appeal and collectibility remain. A very scarce die marriage. PCGS# 38743 Base PCGS# 4461

1796 Draped Bust Dime, MS63
JR-3, Terminal Die State
Tied for Finest of the Variety

3849 **1796 JR-3, R.5, MS63 NGC.** This renowned dime is pedigreed to the Dr. George P. French, T. James Clarke, and Lester Merkin collections. More recently, it appeared in the John Walter Whitney collection of 1796 coinage. At the time of its appearance in the New Netherlands (47th) sale of the T. James Clarke collection, it was described by Ford and Breen as "unique" in the terminal die state.

Since then, we are aware of just one other coin struck from the terminal die state, with a triangular rim break over the first T in STATES, which has advanced to a full cud. An XF40 example appeared in a Bowers and Merena June 1990 sale, lot 481. Both coins indicate a piece had fallen out of the die, with the dentils missing and, in the case of the present coin, adjustment marks remaining from the raw planchet untouched by the strike of the coin.

The current example is a lustrous, Select coin with silver-gray and multicolor patina. The fields on both sides are semiprooflike beneath deep steel and iridescent toning. Slight weakness on the obverse border left of the date is clearly the result of the reverse rim break. All design details on both sides are more than adequately defined, with nearly full plumage on the eagle, flat only on a few breast feathers. Mint-made adjustment marks appear at the lower-right border and to a lesser extent elsewhere on the reverse.

This coin rivals a second MS63 NGC piece for the finest JR-3 dime, one that we have handled in the past. That coin appeared with us in 2005 and 2007 and last appeared in the Ed Price Collection, [Heritage, 1/2013], lot 5574, certified as JR-3. The Price coin was also struck from a late state of the die, but not quite from the terminal die state as the cud was retained and shows dentils.

The JR-3 variety is the second-rarest of the year, representing only about 5% of all known 1796 dimes. High-grade examples are especially elusive. This coin and the 2005 specimen are essentially tied for top honors in the Condition Census. We are unaware of any finer specimens. Census: 2 in 63, 0 finer (4/15).

Ex: Dr. George P. French; T. James Clarke (New Netherlands, 4/1956), lot 1621; Lester Merkin (Stack's, 11/1994), lot 767; John Whitney Walter (Stack's, 5/1999), lot 1767; Milwaukee ANA Signature (Heritage, 8/2007), lot 1614; David Lawrence (10/2007), lot 5336. PCGS# 38744 Base PCGS# 4461

1796 Draped Bust Dime, JR-4, XF45
Popular First-Year Issue

3850 **1796 JR-4, R.4, XF45 PCGS.** Dimes were struck for circulation for the first time in 1796, although some 1792 patterns are known in copper and silver. The 1796 Draped Bust dime claims a mintage of 22,135 pieces, with 6 die varieties known for the date. This coin represents the popular JR-4 variety, with TY in LIBERTY touching and two berries under the upright of E in UNITED on the reverse.

The present coin is an attractive Choice XF example, with light wear showing on the sharply impressed design elements. The lightly abraded surfaces show much prooflike reflectivity in the fields, under mingled shades of cerulean-blue, lavender-gray, and pale gold toning. Population (for the variety): 1 in 45, 1 finer (4/15). PCGS# 38745 Base PCGS# 4461

1800 Draped Bust Dime, AU58
Rare JR-2 Variety

3851 **1800 JR-2, R.5, AU58 NGC.** Only 21,760 Draped Bust dimes were minted in 1800, with two varieties known for the date. The present coin is a representative of the less available JR-2 variety, characterized by the wide A's in the reverse legend. As a date, the 1800 dime is more elusive than any other early dime issue except the 1804. Coins in AU58 are decidedly rare in today's market. Both varieties included, NGC has certified only four coins in this grade, with just seven numerically finer, while PCGS has seen five examples in AU58, with nine numerically finer (4/15).

The present coin is well-detailed, with only the slightest wear showing on the design high points. Both sides display mottled gunmetal-gray toning, with areas of gold and navy blue. The surfaces are free of adjustment marks, and no mentionable distractions are evident.

Ex: ANA Signature (Heritage, 8/2010), lot 3073. PCGS# 38755 Base PCGS# 4470

1800 Dime, JR-2, MS61
Ex: Green, Newman
Only a Handful Known in Mint State

3852 **1800 JR-2, R.5, MS61 NGC. CAC.** Ex: "Col." E.H.R. Green; Eric P. Newman Collection. Dime production amounted to just 21,760 pieces in 1800, and only two die varieties are known. JR-1 shows the eagle's beak separated from the star, while JR-2 shows the eagle "biting" the star. This variety, JR-2, is slightly rarer than JR-1 (R.5 and R.4 overall, respectively). There are only five or six Mint State 1800 JR-2 dimes known, including two examples from the Ed Price Collection, and this piece from the Eric P. Newman Collection. The finest example, an MS66 PCGS coin, recently sold in the Eugene H. Gardner Collection, Part I (Heritage, 6/2014).

Both sides of this wonderful Uncirculated representative show brilliant ivory surfaces with delicate peripheral iridescence. A few faint hairlines and other trivial marks occur over each side, but they are essentially insignificant considering the rarity of this mint condition survivor. Census (both varieties): 1 in 61, 5 finer (4/15). PCGS# 38755 Base PCGS# 4470

1803 Dime, AU53
Very Scarce JR-4
Advanced Die Cracks

3853 **1803 JR-4, R.5, AU53 PCGS.** Blended cream-gray and lavender toning embrace this satiny and well defined dime. No marks are remotely consequential. A very scarce variety known for a wide 03 in the date and a network of advanced die cracks on the reverse. The die break in the middle of the right (facing) wing adds further numismatic interest. Clashed along the border of the left wing, and near the A in STATES. Among the highest graded examples of JR-4. Ed Price, who assembled the finest collection by variety of Draped Bust dimes, owned an AU55 NGC, although the present piece appears to be its equal. PCGS# 38765 Base PCGS# 4473

BUST DIMES

1829 Large 10C Dime, JR-2, MS67
Tied for Finest Known

3854 **1829 Large 10C, JR-2, R.2, MS67 PCGS. CAC.** Although not truly rare, JR-2 is one of the less often seen 1829 dime varieties in Mint State grades, and it is the only die pairing in the Large 10C type. Of the different denomination size types, the Small 10C is the most frequently encountered in Mint State due largely to a high number of varieties that comprise that type; the Medium 10C type closely follows, with the Large 10C variety (JR-2) rare in Uncirculated condition and the Extra Large 10C variety (JR-1) almost unobtainable at this level.

This magnificent coin is not only one of the finest JR-2 dimes known, but it is also tied with just four others as the finest 1829 dime certified at PCGS, regardless of variety (4/15). Both sides show irregular splashes of deep aquamarine and violet toning over light champagne surfaces, while close study with a loupe fails to reveal any discernible abrasions. Minor striking weakness is noted on the eagle's head and talons and select hair curls, not unusual for the issue and type. An outstanding coin that will impress the most discerning numismatist. PCGS# 38840 Base PCGS# 94511

1835 Dime, JR-5, Gem Mint State
Beautiful Border Toning

3855 **1835 JR-5, R.1, MS65 NGC.** One of the simpler varieties to identify for the year, as the date is shifted left with half the 5 to the left of the curl above. A popular choice for type collectors in all grades, the 1835 JR-1 is available even in Gem, as this survivor proves. Glowing near-silver interiors yield to peripheral gold and blue that are stronger on the reverse. For all 1835 dime varieties, Census: 22 in 65, 5 finer (4/15). PCGS# 38883 Base PCGS# 4527

1835 JR-9 Dime, MS65
Bold Central Detail

3856 **1835 JR-9, R.2, MS65 PCGS.** The 3 in the date is boldly repunched, a diagnostic of the available variety. This highly lustrous dime shows scattered areas of charcoal-gray and russet toning that cover only a portion of the available surfaces, leaving most of the piece untoned and silvery-white. Carefully preserved, with bright, clean, mark-free surfaces. Struck from mildly worn dies, but with strikingly sharp definition in the centers. PCGS# 38887 Base PCGS# 4527

SEATED DIMES

1838 No Drapery, Large Stars Dime
Lightly Toned Superb Gem

3857 **1838 No Drapery, Large Stars MS67 NGC.** The more accessible of two star types for the first year of the Stars on Obverse version of the Liberty Seated dime, represented by an amazing Superb Gem. Creamy luster with a hint of frost ranges from ivory in hue to gold and rose-gray closer to the margins. Census: 9 in 67 (1 in 67+), 2 finer (4/15). NGC ID# 237U, PCGS# 4568

1854 Arrows Dime, MS67
Shattered Obverse Die

3858 **1854 Arrows MS67 NGC. Fortin-104a, R.3.** A Top 100 Fortin Variety. The obverse is shattered, with threadlike die cracks circumnavigating almost the entire periphery. As a date, the 1854 Arrows dime is scarce in Gem condition, and is rarely seen finer. This Superb Gem representative showcases vibrant luster with just a blush of warm golden toning. Boldly struck, despite the late die state. Census: 9 in 67, 1 finer (4/15). NGC ID# 239A, PCGS# 4605

1858 Seated Dime, MS67
Lightly Toned and Luminous

3859 **1858 MS67 NGC. CAC. Fortin-103, R.3.** This high-end example is in a late die state, with minor cracks seen periodically around the reverse periphery, whereas in early die states this reverse is undamaged, as stated by Fortin. The coin is lovely, with excellent preservation and satiny luster that illuminates pale rose-gold and sea-green toning. Liberty's head and the wreath bow show trivial weakness, but this is really inconsequential in comparison to the sheer quality of this coin. Census: 4 in 67, 1 finer (4/15). NGC ID# 238Z, PCGS# 4616

1859-O Dime, Splendidly Toned MS67
One Graded Finer

3860 **1859-O MS67 NGC. CAC. Fortin-103, R.3.** This Superb Gem 1859-O Seated dime is a visual treat for collectors, showing pristine surfaces with spectacular luster. But the hallmark is the amazing toning, a silver-orange obverse center surrounded by lavender rim patina. The reverse displays a bit more subdued lavender and golden-green hues. The strike is pleasingly bold throughout both sides, especially sharp on the obverse star radials.

Despite generous mintage figures, many of these antebellum O-mint Seated coins struck at the New Orleans Mint are far more conditionally elusive than might be thought. The "Queen of the Delta" was a commercial hub and by far the most important port and city in the South at the time, and her coinage was meant to further industry and commerce. Most O-mint silver, like San Francisco gold, circulated extensively in its respective region. Census: 3 in 67, 1 finer (4/15). NGC ID# 2395, PCGS# 4620

1865 Seated Dime, MS66
Only 10,000 Pieces Struck

3861 **1865 MS66 NGC.** A vivid pattern of cobalt-blue and golden-brown toning enhances the well-preserved surfaces of this remarkable Premium Gem. The design elements are sharply detailed and satiny mint luster is evident on both sides. From a minuscule business-strike mintage of 10,000 pieces. Census: 8 in 66 (1 in 66 ★), 10 finer (4/15). NGC ID# 239P, PCGS# 4641

1866 Seated Dime, MS66
Multicolor Toning

3862 **1866 MS66 PCGS. CAC. Fortin-102b, R.6.** The late die state variety of this scarce Legend Obverse Philadelphia issue, with heavy clash marks on the reverse. This piece is boldly struck and exhibits semiprooflike fields on the obverse. Mottle multicolor toning blankets each side in lavender-gold, champagne-gray, blue, and violet hues. Population: 7 in 66, 1 finer (5/15). NGC ID# 239S, PCGS# 4643

1873 Seated Dime, MS66+
Ideal Arrows Type Example

3863 **1873 Arrows MS66+ PCGS. CAC. Fortin-122.** The 1873 Arrows Seated Liberty dime is a popular issue, from a mintage of nearly 2.4 million pieces. The arrows at the date indicate a weight change mandated for most silver denominations in 1873. The arrows were removed after 1874, creating a popular two-year design type. This attractive Premium Gem is lustrous and well-detailed, with a few tiny dark color spots on the obverse. Some light clash marks are evident on the reverse and some minor chatter is evident in the left obverse field. Population: 5 in 66 (1 in 66+), 0 finer (5/15).
Ex: Purchased from Paul Battaglia at Rare Coins of New Hampshire (7/2007). NGC ID# 23BG, PCGS# 4665

1874 Seated Liberty Dime, MS67
Rich Toning

3864 **1874 Arrows MS67 PCGS. Fortin-107.** More than 2.9 million Seated Liberty dimes were struck at the Philadelphia Mint in 1874, and the issue is not difficult to locate in absolute terms. However, the 1874 is a condition rarity at the MS67 grade level. In addition, the 1874 is always in demand as a representative of the short-lived Arrows design. This attractive Superb Gem exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's head. The impeccably preserved surfaces are blanketed in mingled shades of golden-brown and lavender toning, with frosty mint luster underneath. Population: 7 in 67 (2 in 67+), 3 finer (5/15). NGC ID# 23BK, PCGS# 4668

1877-CC Dime, Superb Gem
Clear Condition Rarity

3865 **1877-CC MS67 PCGS.** The 1877-CC dime was one of the most heavily minted minor silver coins in Carson City history and a popular choice for type collectors. Condition rarity does not affect the issue strongly until the Premium Gem level, though Superb Gems like this one clearly qualify. Both sides offer boldly frosted silver mint luster and each side is essentially untoned. Population: 5 in 67, 0 finer (5/15). NGC ID# 23AM, PCGS# 4683

1877-CC Seated Liberty Dime, MS67 ★
Only Three Finer Coins at NGC

3866 **1877-CC MS67 ★ NGC. Fortin Type II -103, R.3.** A magnificent Superb Gem from the famous Carson City Mint, with sharply detailed design elements and vibrant mint luster, under a blend of greenish-gold, dark lavender, silver-gray, and electric-blue toning. The surfaces are free of mentionable distractions and the star designation attests to the outstanding eye appeal. Census: 11 in 67 (1 in 67 ★), 3 finer (4/15). NGC ID# 23AM, PCGS# 4683

1887-S Dime, Sharp MS67
Sole Finest at PCGS

3867 **1887-S MS67 PCGS.** The sharply struck surfaces on this late-series Superb Gem boast untoned silver centers contrasting against rose and cinnamon patina near the rims. The lower reverse adds a touch of indigo to the mix, and both sides exhibit ample eye appeal. Even though the 1887-S dimes were struck to the extent of 4.4 million pieces, this Superb Gem is currently the *sole finest graded* at PCGS (4/15). NGC ID# 23B6, PCGS# 4699

BARBER DIMES

1896-O Barber Dime, MS65
Underappreciated in Gem Condition

3868 **1896-O MS65 NGC.** While the 1895-O (and in the bigger picture, the 1894-S, as well) receives the lion's share of promoters' attention, the 1896-O Barber dime is itself a significant semikey, and in high grades, every bit a rarity as its counterpart of a year before. This Gem example delivers soft, glowing luster with minimal toning to inhibit the cartwheel effect — only a uniform golden hue graces each side. Striking definition is pleasing and we find no mentionable abrasions. Census: 6 in 65, 6 finer (4/15). NGC ID# 23DZ, PCGS# 4810

1897-O Barber Dime, MS66
Low-Mintage Condition Rarity

3869 **1897-O MS66 NGC.** The 1897-O Barber dime issue is among the few sub-1 million-coin mintages in this popular series. The present Premium Gem is an outstanding example, showing brilliant surfaces that display a few subtle hints of color, rich luster, and a beautifully executed strike. The eye appeal is superlative. Light clash marks appear on the reverse. A few minor marks are undistracting. Census: 4 in 66, 2 finer (4/15). PCGS# 4813

1900-S Barber Dime, MS66
Just One Coin Finer

3870 **1900-S MS66 PCGS.** The concluding San Francisco issue of the 19th century, available in many grades, but lacking significant survival above the MS65 level. This Premium Gem example displays notably sharp detail, with strong luster and consistent champagne toning; pale lavender and sea-green hues also make brief appearances around the obverse periphery. A few light disturbances are seen upon close examination, but nothing of mentionable distraction. Population: 9 in 66, 1 finer (4/15). NGC ID# 23EE, PCGS# 4823

1915 Dime, MS67
Frostlike Silver Surfaces
Sole Finest Certified

3871 **1915 MS67 NGC.** A brash swath of olive-brown toning visits the silver-lilac, frosted obverse of this mark-free Superb Gem dime. The reverse repeats the frostlike silver-lilac tones but with just a hint of gold at the borders. Technically, this lustrous dime is near-perfect in its preservation and the assigned grade reflects its quality. Neither service has seen a finer example. Census: 1 in 67, 0 finer (4/15). NGC ID# 23FW, PCGS# 4868

MERCURY DIMES

1916-D Mercury Dime, XF45
Series Key in Collectible Grade

3872 **1916-D XF45 PCGS. CAC.** Representing by the far the lowest mintage in the Mercury dime series, the 1916-D is inevitably the first coin of interest when inspecting a set of these coins that spanned the two World Wars. This example exhibits even coin-gray toning with more intensity over the high points. Richer toning in the protected areas outlines the obverse portrait. There are a couple ticks in the lower left obverse field, while the reverse is markedly abrasion-free for the grade level. This coin would serve as the highlight of nearly any set of these classically designed dimes that replaced the ubiquitous Barber coinage in 1916. NGC ID# 23GY, PCGS# 4906

1916-D Dime, Well-Struck MS62
A Highly Popular Key Date

3873 **1916-D MS62 PCGS.** The 1916-D dime is one of the most coveted key-date twentieth-century coins in American numismatics. It is a first year of issue, low-mintage (264,000 pieces), highly desirable rarity. It is most common in the Very Good to Very Fine grade range. Mint State pieces are difficult to locate, and like the other grade categories, the demand for Uncirculated pieces greatly outstrips supply.

Golden-tan toning runs over both sides of this MS62 example, each of which presents a good amount of luster. The design elements are well-struck, including most of the fasces. The upper diagonal band is bold, the middle bands are a tad short of Full, and the lower diagonal band is weak. Neither side reveals significant marks. Housed in a prior generation holder. Population: 15 in 62, 34 finer (5/15). NGC ID# 23GY, PCGS# 4906

1916-D Dime, AU58 Full Bands
Bright and Lustrous

3874 **1916-D AU58 Full Bands NGC.** One of the most celebrated rarities among 20th century coins, the mintage of just 264,000 pieces is by far the lowest of the series and solidifies the issue's status as not only the key issue of the Mercury dime series, but also earns it the number 65 slot on the Garrett and Guth list of *100 Greatest U.S. Coins*. (Surprisingly, the 1895 Morgan dollar is ranked below it at number 66)!

This sharply struck example is nearly entirely brilliant and lustrous, with silver-white surfaces that are essentially untoned save for a few powder-gray speckles. The Full Bands designation, while normally reserved for Mint State coins, is a nice endorsement of the fully impressed reverse. The strike on the portrait is sharp but not full, with slight blending at the hairline. A few hair-thin lines in the right reverse field are microscopic and do not distract. NGC has certified just 31 coins in this near-Mint grade with the Full Bands designation (4/15). NGC ID# 23GY, PCGS# 4907

1920-S Dime, MS65 Full Bands
Seldom Seen So Sharp

3875 **1920-S MS65 Full Bands PCGS.** The 1920-S Mercury dime is well-known as a condition rarity in the upper Full Bands grades. This Gem representative displays unusually bold definition on the central design elements and the well-preserved surfaces yield soft golden luster with deep olive and russet overtones around the reverse margins. Population: 33 in 65 (1 in 65+) Full Bands, 12 finer (4/15). NGC ID# 23HD, PCGS# 4933

1920-S Dime, Sharp MS65 Full Bands

3876 **1920-S MS65 Full Bands PCGS.** The 1920-S Mercury dime was a workhorse issue in commerce, with few high-grade Uncirculated pieces surviving. This Gem Full Bands representative is fully struck. Satiny champagne luster exhibits tinges of forest-green, olive, and amber around the peripheries, and the overall preservation is outstanding. Numerous parallel die lines in the fields are mint-made. Population: 33 in 65 (1 in 65+) Full Bands, 12 finer (4/15). NGC ID# 23HD, PCGS# 4933

1930 Mercury Dime, MS67 Full Bands
Delicately Toned

3877 **1930 MS67 Full Bands PCGS.** It would be difficult to overstate the degree of eye appeal which this coin delivers when examined in-hand. Frosty luster radiates from beneath soft golden and pale lavender overtones, which allow full display of the boldly rendered design elements. The surface preservation is exceptional to the unaided eye, and this assessment holds up well when viewed under a glass. Population: 17 in 67 (1 in 67+) Full Bands, 0 finer (4/15). NGC ID# 23J5, PCGS# 4979

1937-S Dime, MS68 Full Bands
Census-Topping Example

3878 **1937-S MS68 Full Bands NGC.** Out of more than 9.7 million pieces struck, only two 1937-S dimes have reached the MS68 Full Bands mark in the combined certified population, this NGC coin and another at PCGS (5/15). Bright silver surfaces show small but concentrated accents of bluish toning in outline near Liberty's portrait. On the reverse, a clear line separates the bands. NGC ID# 23JL, PCGS# 5009

1939-D Mercury Dime, MS69 Full Bands
Breath-Taking Color and Quality

3879 **1939-D MS69 Full Bands PCGS.** PCGS has certified only 18 Mercury dimes in MS69, and 17 of them are Full Bands 1939-D examples (4/15). This spectacular beauty is nothing short of captivating, not only in regards to the seemingly perfect, frosty surfaces and the razor-sharp details, but also the incredible multicolor toning that enlivens the surfaces. The obverse showcases vivid ribbons of ruby-red, forest-green, gold, russet, and crimson along the upper and lower margins, with a splash of radiant silver over Liberty's face. The reverse is even more deeply colored, showing swirling shades of the same color palette, but also exhibiting hints of amber and midnight-blue around the peripheries. Staggering quality and eye appeal. Population: 17 in 69 Full Bands, 0 finer (4/15). NGC ID# 23JS, PCGS# 5019

1942/1-D Dime, MS64 Full Bands
Bold Throughout

3880 **1942/1-D FS-101 MS64 Full Bands PCGS.** The overdate feature is bold and the mintmark is clearly defined. This piece shows sharp horizontal and diagonal bands, and is also fully rendered around the peripheral legends. The surfaces are light golden with satiny luster and reveal only a few minor abrasions in keeping with the grade. Population: 37 in 64 Full Bands, 31 finer (5/15). PCGS# 145476 Base PCGS# 5041

PROOF MERCURY DIMES

1937 Mercury Dime, PR68
Vivid Multihued Patina

3881 **1937 PR68 NGC. CAC.** A spectacular, deeply reflective proof Mercury dime, this high-end Superb Gem further showcases intense multicolor toning that reveals deep crimson, sun-gold, violet, and pistachio-green hues in concentric swaths around each side. Fully struck with no discernible imperfections. Census: 39 in 68 (1 in 68+, 2 in 68 ★), 0 finer (4/15). NGC ID# 27DH, PCGS# 5072

1942 Dime, Vividly Toned PR69
Sole PCGS Mercury Dime in This Grade
CoinFacts Plate Coin

3882 **1942 PR69 PCGS. CAC.** Mint records show 22,329 proof dimes were struck in 1942, a year in which proof coins could be ordered individually or as complete sets. All of the proof coins received a Brilliant Proof finish, and true cameo proofs for the year are essentially nonexistent. If purchased as a set or with other coins, each individual coin was packaged in a separate cellophane sleeve, and multiple coins were then stapled together and wrapped in tissue. Mint personnel then shipped the coins in either a box or envelope, depending on the size of the order. It is interesting to speculate how such rudimentary packaging might have resulted in the fantastic toning on this near-perfect Superb Gem dime, and how it escaped unblemished into a collector's hands.

A crescent of fiery red and brilliant gold decorates the rear of Mercury's cap. (Yes, we know it is Liberty, but here it appears to be Mercury, messenger of the gods, in a hurry to deliver an important communication.) Pale jade and sandy-tan shows in other areas of the obverse, with the profile largely untoned otherwise. The eye appeal is simply incredible, as the grade implies. More of the same palette appears on the reverse, even more extensively, and the strike and preservation are absolutely impeccable.

This PR69 Mercury dime with the CAC green approval sticker will be hotly contested at auction. **This is the only PR69 Mercury dime of any date certified at PCGS. There are no others.** A type coin of immense importance. **This piece is also the PCGS CoinFacts plate coin.** Bring your most liberal bids to capture this prize. NGC ID# 27DN, PCGS# 5077

PROOF ROOSEVELT DIME

1973-S Dime, PR70 Deep Cameo
Magnificently Produced Roosevelt Proof

3883 **1973-S PR70 Deep Cameo PCGS.** A glint of gold on the rims frames the intense silver-mirrored fields and white-frosted devices of this immaculate proof dime. There simply are no imperfections or lack of detail to mention. A stellar Registry Set opportunity and one of the few unimprovable candidates for the finest Roosevelt dime set. Population: 25 in 70 Deep Cameo (4/15). NGC ID# 27F8, PCGS# 95251

TWENTY CENT PIECES

1875-CC Twenty Cent, MS66
Only One Coin Numerically Finer

3884 **1875-CC MS66 NGC. BF-2, R.1.** The 1875-CC is immensely popular in all grades as the only collectible Carson City issue in the short-lived twenty cent piece series. Circulated examples are abundant to supply budget-conscious collectors' needs, but Mint State pieces are somewhat more elusive and this issue is downright rare in Gem or finer condition. This incredibly well-preserved, frosty coin is ranked with just four others for second finest at NGC, and is surpassed at that service by only a single MS67 ★; the finest at PCGS are seven submissions in MS66 and one in MS66+ (4/15). This piece displays deep aquamarine toning around the peripheries, with warmer lavender and golden toning in the centers. The border regions are sharply struck, although some minor weakness is seen on the eagle's breast and Liberty's lap. NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent, Splendid MS66
Misplaced Digit in Obverse Denticles

3885 **1875-S MS66 PCGS. BF-15, R.3.** A misplaced 5 appears in the denticles beneath the 7 in the date, and repunching shows as "notching" on the top-right serif of the S mintmark on the reverse, as identified in the new Brunner-Frost *Doubled Dimes* reference. This splendid Premium Gem shows cream-gray patina with faint hints of mauve and ineffably pale blue, nicely struck with minimal abrasions. Population: 63 in 66 (4 in 66+), 5 finer (4/15). NGC ID# 23R7, PCGS# 5298

1876 Twenty Cent, Toned MS66
A Low-Mintage, Scarce Issue

3886 **1876 MS66 PCGS. BF-2, R.2.** This variety is attributed by the date sloping down and positioned about equally distant between the rock and the dentils, and by two raised lumps in the gown over the 6 in the date with a diagonal die line above the lumps. Bluish-green, gold-tan, and lavender patina in the fields highlights the mostly grayish-white central motifs. The design elements are well-struck and both surfaces are nicely preserved. The 1876 is the scarcest and lowest mintage (14,400 pieces) of the regular-issue circulation strikes. Population: 14 in 66, 3 finer (5/15). NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

1877 Twenty Cent Piece, Toned PR62

3887 **1877 PR62 NGC.** At first glance, the patina on this PR62 piece is dusky, though under a light source, the surfaces reveal vibrant blue-green, dusty rose, and green-gold shadings. Scattered hairlines beneath the toning influence the grade. Still, a pleasing survivor from this low-mintage proof-only issue.
Ex: Dallas Signature (Heritage, 10/2008), lot 642. NGC ID# 27H4, PCGS# 5305

1877 Twenty Cent Piece, PR64
Subtle Field-Motif Contrast

3888 **1877 PR64 NGC.** The 1877 boasts the lowest mintage of the proof twenty series at just 510 coins. This deeply mirrored Choice example displays modest cameo contrast amid pale pastel toning that deepens to olive and lilac around the upper-left obverse border, but the intensity is just shy of qualifying for the appropriate designation. The strike is bold and only a few light lines are evident in the fields. Census: 52 in 64 (1 in 64+), 45 finer (4/15). NGC ID# 27H4, PCGS# 5305

EARLY QUARTERS

1796 Quarter Dollar, Fine Details
B-2, Attractively Retoned

3889 **1796 B-2, R.3 — Cleaning — PCGS Genuine. Fine Details.** The 6 in the date is high, the T and Y in LIBERTY do not touch, and the last star is distant from the bust. Despite the cleaning, this piece has retoned in attractive shades of sky-blue, gold-tan, and lavender. The design elements are appropriately defined and are well-centered on the planchet. The only marks present are unobtrusive and within the confines of a coin that has seen moderate circulation. This is a nice example for a type set, the PCGS disclaimer notwithstanding. PCGS# 38920 Base PCGS# 5310

1796 Quarter, B-2, XF45
A One-Year and First-Year Type

3890 **1796 B-2, R.3, XF45 PCGS.** Tompkins Obverse Die State 2, showing part of the hair curl behind star 1 lapped away. This is an example of the B-2 or High 6 die variety, seen more often that the B-1 or Low 6 variety. Star 15 is farther away from the bust tip, The common reverse shows from its die state that the B-2 coins were struck before the B-1 variety, likely in a ratio of about 2:1. This attractive, problem-free example shows dove-gray centers bounded by slate-gray rims with a mere whisper of golden-tan patina on the high points. A couple of insignificant ticks appear in the obverse field before Liberty's nose, but the obverse overall is free of distractions. The reverse shows a similar appearance with a few small, short, charcoal-gray toning streaks. Much pleasing detail remains on the devices, including some minimal feather detail on the eagle's breast and neck, and much in the wings. A great example of this first-year and one-year type. PCGS# 38920 Base PCGS# 5310

1796 Draped Bust Quarter, B-2, MS63
First-Year of Denomination
Low-Mintage, One Year Type Coin

3891 **1796 B-2, R.3, MS63 NGC.** Only 6,146 Draped Bust quarters were struck in 1796 and the issue has been widely sought by collectors of several different disciplines since the earliest days of the hobby. Type collectors have been particularly drawn to this issue as the first year of the denomination and because of its status as a one-year type coin. Date collectors prize the 1796 for its low mintage and it is always in demand as a *Guide Book* variety. Possibly no other issue in American coinage has such broad-based appeal. Fortunately a number of high-quality examples of this iconic issue survive today to meet this heavy demand.

The quarter denomination was not popular in economic circles in the 18th century, so the 1796 did not circulate readily and many examples were preserved in bank vaults,etc., during the early years. Some coins were undoubtedly saved for their novelty value as well. Once coin collecting became popular in this country, around 1857, the 1796 was a prized possession of any collector who could find one. In more recent times, Abe Kosoff tells the story of a group of more than 100 high-quality examples shown to him by dealer James MacAllister, who informed him they were all from the collection of "Colonel" E.H.R. Green. Many of the coins had prooflike surfaces and sharply detailed design elements, like the present coin. It would not be surprising to learn that this coin was once included in that famous hoard.

There are two known varieties of the 1796 quarter. This coin represents the more available B-2 variety, with a high 6 in the date. The design elements are sharply detailed in most areas, with some light doubling on the profile and the eagle's head is flat, as seen on almost all examples of this issue. The well-preserved surfaces show prooflike reflectivity, under attractive shades of magenta, gold, and silver-gray patina. Eye appeal is outstanding. Census: 7 in 63, 14 finer (4/15). PCGS# 38920 Base PCGS# 5310

1807 Quarter, B-1, AU58+
Bright, Lustrous Type Coin

3892 **1807 B-1, R.2, AU58+ PCGS.** The 1807 is one of the more often seen Draped Bust quarter issues, popular among type collectors, but its availability, as with all issues in this early series, declines significantly in the upper AU and Mint State grades. This outstanding piece exhibits just a whisper of friction over the high points of the design, with substantial luster highlighting the bright, silvery surfaces. The border dentils are incomplete around the upper obverse periphery, but the strike is otherwise well-executed. Population: 14 in 58 (1 in 58+), 36 finer (4/15). PCGS# 38939 Base PCGS# 5316

BUST QUARTERS

1818 B-3 Quarter, MS64
Lovely Tan-Brown Toning

3893 **1818 B-3, R.3, MS64 NGC.** Tompkins Die State 2/2. Medium golden-brown toning endows this lustrous and unmarked near-Gem. The borders are well struck, but the centers show selected softness. B-3 is the second use of the 1818/5 overdate obverse die, although the underdigit 5 is not readily evident on the present piece. A fairly late die state with clash marks and cracks on the reverse. PCGS# 411648 Base PCGS# 5323

1818 B-10 Quarter, MS63+

3894 **1818 B-10, R.3, MS63+ NGC.** Tompkins Die State 3/2. Deep forest-green and gunmetal-gray toning blankets this satiny and inoffensively abraded representative. Double-clashed from the scroll above the date, and also double-clashed from the top of the cap near 25 C. Among the finest examples of this moderately scarce Browning variety. PCGS# 38951 Base PCGS# 5322

1820 Quarter, B-4, Toned MS62
Semiprooflike Fields

3895 **1820 Small 0, B-4, R.2, MS62 NGC. CAC.** B-4 is one of the more often seen of the five 1820 quarter varieties, but it is still scarce in Mint State. This example is notable for its semiprooflike fields — particularly on the obverse — and its natural olive-gray and golden toning that yields tinges of rose and teal when tilted in-hand. The eagle's talons are poorly defined, but the stars, border denticles, and obverse portrait are boldly struck. All varieties included, NGC shows four pieces in MS62 and 21 numerically finer (4/15). PCGS# 38958 Base PCGS# 5328

1822 Capped Bust Quarter, B-1, MS67
Single-Finest Certified
Recently Rediscovered Example

3896 **1822 B-1, R.2, MS67 PCGS.** A small mintage of 64,080 Capped Bust quarters was accomplished in 1822, with just two die varieties known for the date. This coin represents the more available B-1 variety, easily recognized by the Square Base 2 in the denomination. The scarce B-2 variety displays a blundered 25/5/50 denomination, and employs a Curl Base 2 numeral punch. A single obverse die was used to strike the entire production run and all coins seen were struck from perfect dies.

The Capped Bust quarters were first studied and attributed by die varieties in the 1870s, by Captain John W. Haseltine and John Colvin Randall. In his famous Type Table catalog from November 1881, Haseltine described the 1822 B-1 quarter in lot 1330 as:

> "1822; No. 1; upper left star points to the junction of the upper curl with the band on the forehead; rev., P and I in 'Pluribus' are slightly to the left of being under the centres of S and second T in 'States' very fine; scarce."

The lot realized $3.40, a strong price for the time. More recent sales include the spectacular MS64 ★ NGC example from the "Colonel" Green-Eric P. Newman Collections (Heritage, 11/2013), lot 33168, which realized $25,850. That coin was billed as the finest known business-strike 1822 B-1 quarter at the time, but this piece easily eclipses it.

The present coin has been off-the-market for decades and is not included in any recent Condition Census. It is the single-finest certified example at either of the leading grading services, with no serious challenger. We believe it is the Anderson Dupont example, last sold in lot 1796 of that Stack's sale in November of 1954, but the low-quality of the image in that appearance makes plate matching problematic. Like most examples seen, this coin shows just a touch of softness on some stars and the eagle's claw, but the eagle's feathers and Liberty's hair and drapery are boldly rendered. The impeccably preserved surfaces radiate vibrant mint luster, under spectacular shades of gold, lavender, and silver-gray toning. Eye appeal is terrific. This coin is a Registry Set essential. Population: 1 in 67, 0 finer (4/15). PCGS# 38969 Base PCGS# 5332

1824/2 Quarter, B-1, AU55
Rarely Seen This Fine

3897 **1824/2 B-1, R.3, AU55 NGC.** B-1 is the only die variety for the 1824 quarter, employing an overdated obverse with an underlying 2 evident in the recesses of the 4. The 1824/2 quarter is a recognized scarcity in all grades, but is sometimes available in lower circulated levels; cleaned or otherwise damaged pieces in this grade range are seemingly abundant. In XF, this issue becomes distinctively rare, and AU coins are exceedingly so; only five Mint State pieces are reported by NGC and PCGS combined, the finest being a sole Gem example at NGC, possibly the same as the Eliasberg Gem, formerly from the John G. Mills Collection.

This piece shows hints of luster in the peripheral recesses, with pale lavender-gray toning that shows the occasional splash of amber-gold, olive, and aquamarine color. The strike is even and the devices exhibit just slight high-point wear. A pleasing, upper-end example of this conditionally rare issue. PCGS# 38972 Base PCGS# 5335

1824/2 B-1 Quarter, Near-Mint
Conditionally Rare, Few Marks

3898 **1824/2 B-1, R.3, AU58 NGC.** Rich navy-blue and olive-green toning encompasses this nicely struck and lightly abraded near-Mint example. Slight wear is apparent on Liberty's forehead and the crest of the eagle's wings. The 2 underdigit is visible as a spur beneath the left foot of the 4, and a curl below the right foot. The outer curve of the 2 is perceptible over the diagonal of the 4. The sole 1824-dated die marriage, and scarcer than suggested by its *Guide Book* mintage of 168,000 pieces. Most survivors are well circulated, and examples have been certified in grades as low as Fair 2. Census: 4 in 58, 3 finer (4/15). PCGS# 38972 Base PCGS# 5335

1828 Quarter, Superb Prooflike MS67
Sole Finest B-4 Example Known
Unsurpassed Technical Merit

3899 **1828 B-4, R.3, MS67 NGC.** This landmark 1828 quarter is the *finest B-4 representative known by two full grade points*, and it closely rivals the Green/Newman MS67 ★ B-3 coin as the finest 1828 quarter, period. Like the Newman B-3 example, this piece has been off the market for years; a thorough examination of plated auction catalogs for the last few decades failed to turn up an appearance of this coin. It was unknown to the authors of *Early Quarter Dollars of the United States*, and therefore is absent from their roster of Condition Census examples; without a doubt, this piece is finer than all the coins listed therein.

The B-4 variety is more plentiful than B-2 and -3, but it is significantly scarcer than B-1. It is the only use of both sides; on the obverse, star 1 is set closer to the dentils than to the bust, and the on the reverse, the branch stems terminates above the center of the C in 25C., and the scroll ends beneath the far right edge of the first A in AMERICA.

This piece is clearly from an early die state, devoid of die rust or other erosion, and exhibiting a flashy prooflike sheen in the fields. Prooflike qualities are not uncommon on B-4 representatives as this die pair was also used to strike the few known proofs of this date. This piece is not a proof, but the striking quality is nonetheless far superior to that of most other examples of the issue. In addition to the reflective fields, the devices rise sharply in relief and the peripheral stars exhibit full centrils. The arrowheads, olive leaves, and eagle's talons are uncommonly bold, and the scroll is squared around all but the lower central edge. A blanket of pastel lavender, sky-blue, and mint-gold toning graces each side, highlighting the relief details and accentuating the mirrored recesses. We would not be surprised to one day learn that this piece traded as a proof in the past, prior to being certified as a circulation strike by NGC, although its status as one of the finest 1828 circulation strikes known — and by a large margin — is arguably more important. This is the kind of coin most numismatists dream of owning, but in all honesty do not really think exists. PCGS# 38978 Base PCGS# 5342

1831 B-2 Quarter, MS63
Small Letters, Attractive Toning

3900 **1831 Small Letters, B-2, R.2, MS63 PCGS.** Tompkins Die State 2/3. Cream-gray and chestnut centers are bounded by iridescent peripheral bands of sea-green, cherry-red, and peach-gold. Smooth aside from a pair of hair-thin marks east of the branch stem. The strike is sharp except on the final star. A colorful and beautiful Capped Bust type coin. PCGS# 38981 Base PCGS# 5348

1831 Quarter, MS63
B-4, Small Letters

3901 **1831 Small Letters, B-4, R.1, MS63 PCGS.** The 5 in the denomination is recut on this available variety, a diagnostic shared with B-3 which also employs this reverse; a die crack is seen from the rim up through the (25)C. This Mint State representative is sharply rendered on the interior relief elements, as well as around the peripheries. Satiny luster underlies dusky lavender-gray toning, while deeper teal and olive-gold overtones accent the upper reverse and overflow onto portions of the obverse periphery. Population: 61 in 64 (3 in 64+), 18 finer (4/15). PCGS# 38983 Base PCGS# 5348

1831 Quarter, B-4, MS64
Alluring Reflectivity

3902 **1831 Small Letters, B-4, R.1, MS64 PCGS.** Sunset gold fields offer the clear reflection of a crystal pond, while deeper ocean-blue and russet toning encases the boundaries. Impeccable sharpness accentuates the likeness of Liberty and beautifully renders the eagle's plumage and talons. A few light marks in the obverse fields limit the grade, but the eye appeal is seemingly unaffected. Population: 61 in 64 (3 in 64+), 18 finer (4/15). PCGS# 38983 Base PCGS# 5348

SEATED QUARTERS

1840-O No Drapery Quarter, MS63
Blundered Date

3903 **1840-O No Drapery MS63 PCGS. Briggs 2-B.** Of interest to the Briggs variety enthusiast, the 0 in the date is triple punched on this obverse, a quick-identification diagnostic. As a date, the 1840-O No Drapery issue is usually available in circulated condition, but Mint State pieces are rare across the board. This Select example is deeply toned olive-gray, with subtle golden luster revealed when turned beneath a light. Most of the details are sharp, although roller marks from the drawing process stretch horizontally across the central regions. Population: 9 in 63, 2 finer (4/15). NGC ID# 23SG, PCGS# 5393

1853 No Arrows Quarter, MS67
Among the Finest at PCGS
In an Old Green Holder

3904 **1853 No Arrows MS67 PCGS. CAC. Briggs 1-A.** For Seated Liberty quarters, there is a barrier in 1853 which defines the availability of many No Motto issues. No Arrows issues, particularly those from the late 1840s to early 1850s, suffered from extensive hoarding and melting as a result of their heavy silver weight, and are collectively difficult to locate, particularly in high grade. By contrast, many of the With Arrows issues from 1853 on, struck with a slightly lighter silver weight, are readily available. Most 1853 quarters were coined after the weight change, but the Philadelphia Mint struck 44,200 No Arrows coins early in the year. With such a small mintage, it is not surprising that this issue is a major rarity in high grades today.

Recutting on the 53 in the date is diagnostic of this No Arrows die pair, and the present Superb Gem representative exhibits this clearly. Seemingly flawless surfaces glow beneath pale lavender-gray toning which accentuates the sharply rendered design elements. CAC-approved in an old green label holder. Population: 3 in 67 (1 in 67+), 0 finer (4/15). NGC ID# 23TA, PCGS# 5421

1854 Arrows Quarter, MS65
Excellent Surface Quality

3905 **1854 Arrows MS65 PCGS.** It is difficult to find grade-limiting abrasions on this piece, although close study with a lens reveals a few signs of minor contact on the high points of the obverse figure, as well as in the reverse field below the eagle's left (facing) wing. Luster is strong and satiny. Pale wheat-gold and deeper russet toning accentuates the sharp devices. The 1854 is the most plentiful With Arrows, No Rays issue from the No Motto period, ideal for type representation. Population: 13 in 65 (1 in 65+), 12 finer (4/15). NGC ID# 23U6, PCGS# 5432

1857 Quarter, MS67
Remarkable Color and Preservation

3906 **1857 MS67 PCGS. CAC. Briggs 2-B.** Briggs lists seven die pairs for this high-mintage issue (more than 9.6 million pieces), plus one pair of proof dies. The only die marriage that is considered rare is Briggs 6-F, which shows the reverse die clashed with the reverse of a Flying Eagle cent, but the more plentiful varieties are collectively popular for type purposes. This piece showcases needle-sharp design definition in all regions, with a bold wire rim around most of both sides. Glowing, frosty mint bloom emanates from beneath hues of orange-gold, champagne, and sea-green on the obverse, with forest-green, amber, and ice-blue over the reverse. The preservation is remarkable, giving this high-end Superb Gem an exceptional degree of eye appeal. Population: 7 in 67, 1 finer (5/15). NGC ID# 23TE, PCGS# 5442

1862 Seated Quarter, MS67
Combined Population Four With One Finer

3907 **1862 MS67 NGC.** Most silver issues from the Civil War years are low-mintage rarities. However, the 1862 quarter had a mintage of 932,000 coins, and survivors are best labeled scarce, except in grades better than MS65, where the label "rare" clearly applies.

Virtual perfection is the best way to describe this incredible specimen. Both sides have trivial marks that require magnification to view. The surfaces have frosty luster with bold design features, and the surfaces exhibit incredible iridescent toning. Considering the beauty of this piece, it is hard to fathom a finer certified coin. Census: 1 in 67, 1 finer (4/15).

Ex: Summer FUN (Heritage, 7/2011), lot 3501. NGC ID# 23TV, PCGS# 5456

1867-S Seated Liberty Quarter, MS64
None Finer at PCGS

3908 **1867-S MS64 PCGS. Briggs 1-A.** From a mintage of just 48,000 pieces, the 1867-S Seated Liberty quarter is an elusive issue in all grades, and Mint State examples are rare. The present coin is an attractive Choice specimen, with just a touch of softness on Liberty's bodice and some stars. The lower obverse dentils show evidence of heavy die polishing, a feature always seen on this issue, according to Larry Briggs. The well-preserved surfaces are blanketed in shades of golden-brown, lavender, and gray patina, with patches of amber on the reverse. Slightly subdued mint luster shines through the toning. Population: 2 in 64, 0 finer (5/15). NGC ID# 23UE, PCGS# 5471

1870 Quarter, Well-Preserved MS66
Interesting Briggs 1-A Die Marriage

3909 **1870 MS66 PCGS. Briggs 1-A.** Gold and rose patina prevails against accents of smoke-gray on this well-preserved Premium Gem 1870 quarter. The only mentionable post-Mint impairments are a few marks on Liberty's chin, neck, and lower hair. The Briggs 1-A die pairing shows the right-side stars recut and heavy die rust on the figure of Liberty, along with extensive die-polishing lines in the fields (which are *not* but sometimes mistaken for hairlines from cleaning). More recutting shows on the reverse on several letters in the legend, and more die-polishing is evident. An interesting high-grade example of this small mintage, put at 86,400 circulation strikes. Population: 4 in 66, 0 finer (5/15). NGC ID# 23UK, PCGS# 5476

1872-S Quarter, Choice AU
Seldom Seen Finer

3910 **1872-S AU55 PCGS.** Low mintage plus high attrition equals rarity. This formula works for hundreds of issues, particularly West Coast minor silver that served a clear need in California commerce but seldom was struck in sufficient quantities. The 1872-S quarter is no exception, and even in lightly circulated grades it is a clear condition rarity. This Choice AU example retains considerable luster despite light wear. Much of the original silver color shines through, particularly on the reverse, while gunmetal-blue and sea-green dapples also are prominent. Population: 2 in 55, 5 finer (5/15). NGC ID# 23UT, PCGS# 5483

1874-S Arrows Quarter, Top-Grade MS67

3911 **1874-S Arrows MS67 PCGS.** Although it does not have the highest mintage in the With Motto, With Arrows quarter series, the 1874-S is the most accessible issue in near-Gem and better grades, a status that is most clear in MS66 condition where 1874-S examples outnumber all others in the PCGS *Population Report* by a ratio of 33 to 22. Said ratio is 4 to 1 in MS67 (5/15), emphasizing the condition rarity not only of this issue but the whole type.

A notable hoard of 80-100 1874-S quarters was discovered in 1949 at a West Coast bank, and it is the source of most Mint State coins for the issue. This Superb Gem's strike is bold, with just a touch of softness on the star between Liberty's head and cap. Gently frosted devices have a strong swirl to the luster with light gold-to-peach overtones across a medium-silver base. Neither PCGS nor NGC has certified a finer example. Population: 4 in 67, 0 finer (5/15). NGC ID# 23VY, PCGS# 5495

1884 Quarter, MS67+ The Sole Finest Known

3912 **1884 MS67+ PCGS. CAC.** Late-dated Seated quarters in the highest grades are more often encountered in proof than in Uncirculated condition, and this Superb Gem is a pleasant exception. Even, blue-gray toning covers the obverse, fading to gold among the stars. The spot-free fields are ice-smooth, and the strike fully impressed the stars and dentils. The reverse is more richly toned with shades of pink and blue, with lemon at the rims. The strike is again strong, articulating even the feather shafts. The CAC-approval verifies the overall aesthetic appeal. This is the only MS67+ piece graded at either PCGS or NGC. Population: 16 in 67 (1 in 67+, the present coin), 0 finer (5/15). NGC ID# 23VG, PCGS# 5516

1888 Seated Quarter, MS67
Crisp Luster

3913 **1888 MS67 NGC. Briggs 1-A.** The given mintage for this issue is only 10,001 coins, which drives constant demand in all grades. This Superb Gem representative reveals radiant luster when turned in-hand, all at once illuminating rich amber-gold, sea-green, and olive-gray toning which blends over each side. Sharpness is pleasing and the only discernible surfaces flaws are a few signs of light contact on the eagle's feathers. Census: 15 in 67 (2 in 67+, 2 in 67 ★), 5 finer (4/15). NGC ID# 23VL, PCGS# 5520

1890 Quarter, MS68
Attractive Iridescent Example

3914 **1890 MS68 NGC.** A varied spectrum of color rings the obverse periphery of this Superb Gem, with blue-green and deep golden shades surrounding an antique gray center. The more deeply toned reverse reveals intense aqua at the center with magenta at the rim, especially at the lower portion. The undisturbed surfaces emit generous luster and the eye appeal is strong. Philadelphia Seated quarters were struck in low quantities beginning in 1879, and emissions were minimal until 1890. Seated quarters as a whole are a daunting series to tackle, but this 11-year run is a collectible subset, and this quarter would be a most enterprising start. This coin is tied for the highest graded, with NGC reporting five coins in MS68 with no examples higher. The PCGS population lists a single piece at the MS68 level, and no finer examples (5/15). NGC ID# 23VP, PCGS# 5523

1849 Quarter, PR65
Only Six Confirmed Examples

3915 **1849 PR65 PCGS. Briggs 4-C.** Rich ocean-blue toning dominates this fully struck specimen, although the borders display narrow bands of peach and straw-gold. In his Seated quarter *Encyclopedia*, Larry Briggs states that the very rare 1846 through 1849 proof quarters share the same reverse die, identified by the extension of the vertical shield lines below the shield and through several horizontal lines. The lowest horizontal line extends into the left (facing) wing.

Heritage catalogers have identified the following 1849 proofs:

1. PR66 PCGS. William Dickinson Collection (Chapman Brothers, 3/1894); J.M. Clapp; J.H. Clapp. Clapp estate, 1942; Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1445; Heritage (2/1999), lot 5915.
2. PR65 PCGS. J. Colvin Randall Collection; John Work Garrett Collection, Johns Hopkins University (Stack's, 3/1976), lot 160; Kenneth C. Long Estate (Bowers and Merena, 5/1995), lot 1089; Phil Kaufman Collection, Part Three (Heritage, 4/2008), lot 2390; Greensboro Collection, Part III (Heritage, 4/2013), lot 4221; FUN Signature (Heritage, 1/2014), lot 5219.
3. PR65 PCGS. The present coin, prior pedigree unknown.
4. Gem Proof. R. Green (10/11/1949); John Jay Pittman (David Akers, 5/1998), lot 1315.
5. PR65/64. Norweb Collection (Bowers and Merena, 3/1988), lot 1585.
6. PR63 PCGS. FUN Signature (Heritage, 1/1998), lot 6781.

Additional Appearances
A. Lorin Parmelee Collection (New York Stamp & Coin, 1/1890).
B. H.P. Smith Collection (Chapman Brothers, 1906).
C. Matthew Stickney Collection (Chapman Brothers, 1907).
D. George Earle Collection (Henry Chapman, 6/1912).
E. Jerome Kern (B. Max Mehl, 5/1950), lot 1440. NGC ID# 23WC, PCGS# 5543

1857 Quarter, PR66
Tied for Finest Certified

3916 **1857 PR66 NGC.** Deeply reflective fields shine brightly through reddish-golden central toning that turns faintly blue around the margins. As expected of this Premium Gem proof, all of the devices are fully brought up. CoinFacts estimates that perhaps 30 to 40 proof 1857 quarters survive (despite a total of 69 pieces at NGC and PCGS combined). This is the last issue before the Mint began striking minor and silver proof coinage in larger quantities for distribution to the public in 1858. This example is tied with three other PR66 coins at NGC, while PCGS reports three coins at the PR65 level. There are no finer submissions at either service (4/15). NGC ID# 23WJ, PCGS# 5553

1885 Quarter, PR67 Cameo
Peripheral Toning

3917 **1885 PR67 Cameo PCGS. CAC. Briggs 3-B.** Deep, glassy fields are seemingly perfect on each side of this Superb Gem proof, while the sharp, frosty devices offer stark contrast on each side. The centers are brilliant, and the peripheries exhibit deeper gold, amber, and hints of ocean-blue toning. Population: 10 in 67 Cameo, 2 finer (4/15). PCGS# 85586

1886 Quarter, PR66+ Cameo
Breathtakingly Beautiful Coin

3918 **1886 PR66+ Cameo PCGS. CAC.** The center obverse is mostly untoned silver-white, the center reverse a bit less so, but both sides show a generous arc of cobalt-blue and copper-walnut patina, a breathtakingly beautiful coin given the deep field-device contrast and excellent preservation also present. One of the low-mintage 1880s emissions, struck in the amount of 886 proof coins. Population: 10 in 66 (3 in 66+) Cameo, 7 finer (5/15). PCGS# 85587

BARBER QUARTERS

1898-S Quarter, Sharp MS65+
Two Finer at PCGS, Ex: Clapp-Eliasberg

3919 **1898-S MS65+ PCGS.** Ex: Eliasberg. Rose-gray and scattered slate-gray patina compete for territory on this relatively unmarked 1898-S Barber quarter, a better-date issue seldom seen so fine. There are few marks of any consequence, and the strike is quite sharp, with the exception of a couple of the stars on the reverse, above the eagle. An extremely appealing and lustrous example. Population: 7 in 65 (1 in 65+), 2 finer (5/15).
Ex: Purchased by John M. Clapp directly from the San Francisco Mint in November 1898; John H. Clapp; Clapp estate to Louis E. Eliasberg, Sr. (1942); Eliasberg Collection (Bowers and Merena, 4/1997), lot 1566. NGC ID# 23YF, PCGS# 5621

1899-S Barber Quarter, MS67
Only One Finer Coin at PCGS

3920 **1899-S MS67 PCGS.** The 1899-S Barber quarter is a low-mintage issue (only 708,000 pieces struck) and is notably scarce in all Mint State grades; Superb Gem examples, however, are decidedly rare. This delightful Superb Gem is almost in a class by itself; the strike is razor-sharp throughout. Radiant, frosty mint luster is awash in rich lavender and orange-gold hues on the obverse, while the reverse displays varying shades of olive-gold. An essentially perfect coin in every respect. Population: 3 in 67, 1 finer (5/15).
Ex: Pre-Long Beach Sale (Superior Galleries, 10/2000), lot 3200.
NGC ID# 23YJ, PCGS# 5624

1911-D Quarter, MS65
None Finer at NGC

3921 **1911-D MS65 NGC.** With a mintage falling short of 1 million pieces, the 1911-D Barber quarter is understandably rare in Gem or finer condition. This representative is boldly defined on the eagle's talons and shield, and the surfaces yield satiny luster with lightly peppered golden toning overall. Census: 5 in 65, 0 finer (4/15).
NGC ID# 23ZP, PCGS# 5660

1912-S Quarter, MS67
Near-Finest Known Example

3922 **1912-S MS67 PCGS.** This lightly toned Superb Gem exhibits delicate golden shades on the obverse with hints of blue and green in the fields. The reverse of this lustrous quarter dollar is nearly brilliant and both obverse and reverse surfaces are smooth, as expected for the grade. Exceeded by only one piece at either PCGS or NGC, this is nearly the finest coin that a collector may obtain. PCGS notes three examples at MS67, with a single coin at MS68. The NGC census is two pieces in MS67 and one example in MS68 (5/15). NGC ID# 23ZT, PCGS# 5663

1913-S Quarter, Lightly Toned MS66
Capstone Key

3923 **1913-S MS66 PCGS.** Many collectors view the 1913-S Barber quarter as a "stopper," an obstacle necessary to hurdle to complete the date and mintmark set. Others, however, approach this elusive issue as a challenge and nothing more than a test of patience. High-grade examples survive, it just requires persistence to locate and acquire them. This offering is an event where a collector's endurance will pay off. Rarely is such a fine example of this key issue encountered, and only in a great while is anything "better" seen. In terms of quality, one must study this piece with 10x magnification to discern what separates it from its few Superb Gem counterparts: a couple tiny ticks on Liberty's cheek. Subtle pastel and light golden hues grace the satiny surfaces, and the design elements are boldly brought up. Population: 12 in 66 (2 in 66+), 5 finer (4/15). NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTERS

1895 Quarter Dollar, PR68 Cameo
Sharply Struck Example

3924 **1895 PR68 Cameo NGC.** The Philadelphia Mint produced some of its best proof coinage in the 1890s, and this sharply struck quarter stands head and shoulders above a strong class. The obverse stars reveal pinpoint definition with deeply impressed centers, while the reverse exhibits articulated lines within the feathers and tail. A single lint mark is neatly hidden within the outline of the cheek, and the white-on-black devices and fields fully qualify for the Cameo designation. Census: 18 in 68 Cameo (4 in 68 ★ Cameo, 1 in 68+★ Cameo), 1 finer (5/15). PCGS# 85681

1898 Quarter, Toned PR67

3925 **1898 PR67 PCGS. CAC.** Fully rendered design elements rise above deep, glassy fields on each side of this Superb Gem proof. A Cameo designation might have been warranted, were it not for a veneer of dusky sun-gold, lavender, and lilac-gray toning which attests to the originality of the surfaces. Population: 18 in 67, 5 finer (4/15). NGC ID# 242D, PCGS# 5684

1904 Quarter, Colorful PR68
A Proof of Nearly Unimprovable Quality

3926 **1904 PR68 NGC.** Dappled shades of green and lilac toning color the pristine surfaces of this delightful Barber quarter with intermittent orange, russet, and ice-blue hues. The design elements are typically razor-sharp, and the fields are deeply reflective beneath the patina. From a tiny proof mintage of 670 pieces. It is virtually impossible to fathom a finer representative, yet NGC shows a single submission in PR69. Census: 5 in 68 (1 in 68 ★), 1 finer (4/15). NGC ID# 242K, PCGS# 5690

1916 Standing Liberty Quarter, MS63+
Refreshingly Vibrant Luster

3927 **1916 MS63+ NGC.** The 1916 Standing Liberty quarter is widely recognized as a major series key, but in the grand scheme of things, the true challenge is not so much locating or acquiring an example, but finding one with pleasing luster. Of all the issues in this heavily collected series, none exhibit such routinely poor surface quality as the 1916. Luster was somewhat subdued to begin with, and even a light dip or other cleaning technique (seemingly imparted on the 1916 more often than on other dates) will dull the surfaces and give the coin a "greasy" or washed-out appearance. That is where this Select example stands out. The essentially brilliant, well-cared for surfaces are unusually vibrant, showing die-fresh luster and a corresponding degree of eye appeal that is rarely seen. A few light stacking marks on Liberty's figure are all that limit the grade. Striking sharpness is pleasing for the issue, if still predictably soft on Liberty's head and the shield. NGC ID# 242Y, PCGS# 5704

1918-D Quarter, MS66 Full Head
Original Champagne-Tinted Luster

3928 **1918-D MS66 Full Head NGC.** Glowing golden luster and a sharp Full Head are the hallmarks of this Premium Gem 1918-D quarter, although exceptionally well-preserved surfaces also contribute to the eye appeal. The usual striking deficiency is noted on the shield rivets and Liberty's central gown folds, to be expected on this issue. Census: 9 in 66 (1 in 66 ★) Full Head, 0 finer (4/15). NGC ID# 2438, PCGS# 5723

1918/7-S Quarter, Lightly Toned AU58 Delightfully Original Surfaces

3929 **1918/7-S FS-101 AU58 PCGS.** An uncleaned, genuinely lustrous example of the 1918/7-S quarter is a marvel to behold, if for no other reason than it might be the only such example seen for years afterward. Like its 1916 counterpart, the overdate is always seen poorly struck. This characteristic has a way of hiding light high-point friction if the original mint surface is removed, and leads many would-be coin doctors to dip or otherwise clean their examples to the detriment of the overall eye appeal. The number of otherwise high-grade 1918/7-S quarters that have been dipped or artificially brightened in an attempt to get them into Mint State-designated holders comprises a significant portion of the available population, and an original coin such this pastel-toned example is a rare sight. A trace of friction along the ridge of Liberty's leg identifies the grade, but leaves the recesses aglow with satiny luster that highlights the pale patina. The central definition is predictably poor, but the specialist will appreciate the sharp date and unusually well-defined head detail which shows all three olive leaves and a minute earhole. PCGS# 395949 Base PCGS# 5726

1919-S Quarter, Elusive MS64 Full Head

3930 **1919-S MS64 Full Head PCGS.** The lustrous surfaces on this Choice Full Head example show a light overlay of golden patina with excellent eye appeal. The strike meets and exceeds the requirements for Full Head, showing three olive sprigs, a near-complete hairline, and a perceptible earhole. There are few marks seen for the grade, although we note a dark toning spot above the W(E). The 1919-S is an elusive issue in high-grade Full Head, despite the healthy mintage exceeding 1.8 million pieces. A nice coin with much cachet and collectibility. Population: 28 in 64 (6 in 64+) Full Head, 19 finer (5/15) NGC ID# 243D, PCGS# 5733

1920-D Quarter, Frosty MS67
Tied for Finest Non-Full Head

3931 **1920-D MS67 PCGS.** The 1920-D is one of the most underrated dates in the Standing Liberty quarter series. It is not considered a key issue in the absolute sense, and therefore it is often overlooked by nonspecialists who focus on the more traditional rarities such as the 1916, 1923-S, and 1927-S. The 1920-D, however, is a condition rarity in Premium Gem or finer condition, and it is inherently difficult to locate well-struck. This Superb Gem representative possesses a wealth of eye appeal, fueled by exceptionally well-preserved ice-blue and champagne surfaces. The strike is far above average, and Liberty's head is just a trifle away from being full. Population: 3 in 67, 0 finer (4/15). NGC ID# 243F, PCGS# 5736

1923-S Quarter, MS65+
Exceptional Two-Sided Toning

3932 **1923-S MS65+ PCGS.** Throughout the series, the Standing Liberty quarters are challenging to find with lustrous, attractive toning. The scarce 1923-S is especially so. This example is a stunning exception, where rainbow toning visits both sides complemented by penetrating mint luster. The deepest shades are reserved for the border, which display cyan-blue, ruby-red, and lime-green colors over rich, ivory-gold luster. The reverse is iridescent, where lilac, pink, and sea-green hues meld over the satiny silver surfaces. The strike is sharp for the issue — not quite a Full Head, but close enough for the facial features to be discerned. The shield shows minor central blending of detail. A high-end Gem, sure to be of keen interest to any Standing Liberty specialist. Population: 3 in 65+, 38 finer (5/15). NGC ID# 243K, PCGS# 5744

1927-D Quarter, MS66 Full Head
Underappreciated This Fine

3933 **1927-D MS66 Full Head NGC.** An acquaintance of this cataloger used to jokingly refer to the 1927-D Standing Liberty quarter as "The Poor Man's '27-S," but in all seriousness, it is its own rarity in high grades. *Coins Magazine* contributor Mike Thorne has expressed a degree of admiration for the '27-D, rightfully suggesting it an underrated issue in high grade, at least when compared to its San Francisco counterpart. Full Head representatives are seldom seen in Gem condition, and finer pieces are far rarer than current price levels would indicate. This outstanding Full Head piece is awash in satiny ice-blue luster that reveals hints of champagne when tilted beneath a light. The shield rivets and the lowest two obverse stars are weak, as usual, but the undeniable originality of this coin ranks it among the finer '27-D representatives this cataloger has seen. NGC ID# 243V, PCGS# 5763

1929-D Quarter, MS65 Full Head
Light, Even Toning

3934 **1929-D MS65 Full Head PCGS.** Among late-date Standing Liberty quarters, the 1929-D stands out as an unusually challenging issue to locate in Full Head grades, particularly in Gem or finer condition. This representative displays above-average detail, with satiny luster that shines through consistent olive-gold and bluish-gray toning on each side. Population: 42 in 65 Full Head, 12 finer (4/15). NGC ID# 2443, PCGS# 5775

1932 Washington Quarter, MS67
Stunning Surface Quality

3935 **1932 MS67 NGC.** Among most Washington quarter issues there is a certain grade level below which the date is plentiful but above which the certified population of survivors plunges precipitously. For the 1932, this grade level is MS67. NGC and PCGS each report only three coins in this lofty grade, with none finer (4/15). Moreover, these finest-knowns are essentially guaranteed to draw substantial demand from Registry Set enthusiasts. The current NGC Set Registry (4/15) lists 412 different sets for the 1932 to 1964 circulation issue series. Only *six* of those set owners will be able to acquire a finest-known example of this first-year Philadelphia issue. Thus, the present offering should not be taken lightly. This piece shows radiant, seemingly flawless luster with traces of light golden color which heighten the eye appeal. Well-struck and simply magnificent. NGC ID# 2447, PCGS# 5790

1932-D Washington Quarter, MS66
A Landmark Offering
Only the Second Premium Gem Ever Offered

3936 **1932-D MS66 PCGS.** The offering of this coin is far and away one of the most important events that Washington quarter collectors will experience. The 1932-D is widely known as the scarcer of the two first-year keys, particularly in high grades, but this landmark coin ranks with just two others as the *finest known*. Its only rivals are another MS66 coin at PCGS and a single numerically equal example reported by NGC. The NGC coin has never been seen at auction, although it is possible the coin is in the current highest-ranking NGC Registry Set; confirmation is not currently possible, however, and it is equally possible that the coin has been crossed and is no longer in the NGC MS66 holder.

The other PCGS coin has only appeared at auction twice, and the collecting fervor it has generated each time has been worth keeping for the record books. Its first offering was in our August 2001 ANA Signature sale where it realized an incredible $89,125. Later, it appeared in Bowers and Merena's April 2008 Chicago Rarities Sale and garnered a staggering bid of $143,750, a record price for any Washington quarter.

This magnificent, recently certified counterpart to the aforementioned example is here making its debut appearance. The Registry Set boost that this coin would provide is unequaled, especially in light of the fact that none of the current highest-ranking Registry Sets contain a 1932-D finer than MS65, and most house examples of significantly lower grades. The other PCGS MS66 coin went to a tightly held, private collection, and does not appear in the PCGS Set Registry.

This piece exhibits delicate, largely flawless satin surfaces with original luster residing beneath a thin veil of pale pastel toning. Only a microscopic tick hidden in Washington's hair is at all worthy of mention, even if only for the sake of accuracy. The design elements are boldly rendered and the overall eye appeal is excellent. The 1932-D is the biggest key date in the entire Washington quarter series, and this magnificent coin is well-deserving of the title: "King of the Washington Quarters." Given the previous track record of the issue in this unsurpassed grade, we anticipate a truly exciting event when this coin crosses the auction block. NGC ID# 2448, PCGS# 5791

1934-D Medium Motto Quarter, MS67
Lightly Toned

3937 **1934-D Medium Motto MS67 NGC.** The motto IN GOD WE TRUST is clear, neither faint nor conspicuously heavy. This Superb Gem's watery luster brims beneath a faint layer of patina that is largely silver-blue but shows touches of champagne, olive, and golden-brown closer to the rims. Neither NGC nor PCGS has graded an MS68 Medium Motto example (5/15). NGC ID# 244C, PCGS# 5796

1937 Washington Quarter, MS68
Single-Finest Certified Example

3938 **1937 MS68 NGC.** This magnificent coin is the single-finest certified 1937 Washington quarter at either of the leading grading services (5/15). The design elements are sharply detailed and the impeccably preserved surfaces radiate vibrant mint luster on both sides. A few hints of golden-tan toning visit the mostly brilliant surfaces and eye appeal is terrific. NGC ID# 244K, PCGS# 5803

PROOF WASHINGTON QUARTERS

1936 Washington Quarter, PR67
First Proof Issue for the Design

3939 **1936 PR67 PCGS.** The initial proof Washington quarter issue saw just 3,837 pieces struck, this Superb Gem among them. Both sides have strong mirrors, though that of the obverse is stronger and contrast is minimal. Occasional faint dapples of milky color visit otherwise silver surfaces. Population: 9 in 67, 0 finer (5/15). NGC ID# 27HN, PCGS# 5975

1936 Quarter, Superb Gem Proof
Minuscule Mintage

3940 **1936 PR67 NGC.** Fewer than 4,000 proof 1936 Washington quarters were struck and only a handful qualify as Superb Gems today. This PR67 piece is partly toned blue-to-gold, the former color most visible as an obverse overtone and the latter as an arc on the bottom reverse, but considerable silver shines through. Census: 25 in 67 (1 in 67 ★), 0 finer (4/15). NGC ID# 27HN, PCGS# 5975

1941 Washington Quarter, Rim-Toned PR68

3941 **1941 PR68 PCGS. CAC.** A pale pastel wash of ice-blue and rose accents the rims and contrasts nicely against the brilliant quicksilver centers of this immaculate Superb Gem proof 1941 quarter, one of the few finest survivors of the issue of 15,000-plus proof coins. The color on the reverse adds a bit of pale gray and olive. The strike is impeccable. Population: 5 in 68, 0 finer (5/15). NGC ID# 27HU, PCGS# 5980

1942 Quarter, PR68
Tied for Finest at PCGS

3942 **1942 PR68 PCGS. CAC.** This is an almost perfectly preserved, original proof, ideal for the Registry Set collector. Both sides show dusky golden-gray toning over deep, glassy fields, with vivid crescents of olive-gold and crimson along the upper and lower peripheries. Tied with seven others for the finest at PCGS (4/15). Population: 8 in 68, 0 finer (5/15). NGC ID# 27HV, PCGS# 5981

1952 Quarter, PR68 Ultra Cameo
Stunning Contrast

3943 1952 PR68 Ultra Cameo NGC. Though most early-1950s proof coins fell well short of the Cameo ideal, this coin earned its Ultra Cameo designation in convincing fashion. Glassy, minimally toned mirrors set off the frost of sharply struck devices, particularly the portrait. Brilliant throughout. Census: 5 in 68 Ultra Cameo (2 in 68 ★ Ultra Cameo), 0 finer (4/15). NGC ID# 248X, PCGS# 95984

1974-S Quarter, PR70 Deep Cameo
Registry Set Essential

3944 1974-S PR70 Deep Cameo PCGS. This gorgeous Registry Set contender is one of just 17 1974-S proof Washington quarters at PCGS with the coveted PR70 Deep Cameo grade, essential for a competitive Registry Set. The visual appeal perfectly parallels the surface quality, delivering stark white-on-black contrast with a few flecks of light golden toning. NGC ID# 27JE, PCGS# 96006

EARLY HALF DOLLARS

1794 Half Dollar, O-101a, VG10
Classic First-Year Issue

3945 1794 O-101a, High R.3, VG10 NGC. This is an evenly worn, original example of this first-year half dollar issue, showing consistent olive and gunmetal-gray toning that lightens to golden-gray over the relief elements. The borders are complete and the date is clear. Some crisscrossing adjustment marks are present on the obverse portrait. This late die state variant of O-101 is heavily cracked through the F in OF and from the rim to the left of the first S in STATES. PCGS# 39201 Base PCGS# 6051

1795 2 Leaves Half, O-105, XF40

3946 1795 2 Leaves, O-105, High R.3, XF40 NGC. The die marriage is easily recognized by the two points of star 1 solidly touching the lowest curl, and the reverse showing 10 berries left, seven right. This evenly worn and relatively unmarked example shows medium-gray field and silver high points with good overall eye appeal. PCGS# 39220 Base PCGS# 6052

1795 2 Leaves Half, O-105a, XF45
Eye-Appealing Example

3947 1795 2 Leaves, O-105a, R.4, XF45 PCGS. The berries are arrange 10 left, seven right on the reverse. Two points of star 1 touch the lowest curl, and a die crack descends from the rim to the top of the B in LIBERTY. Most of the left-side stars on the obverse are connected by die cracks. This Choice XF 2 Leaves half dollar shows some planchet microporosity visible in the fields, but attractive ivory-white color accented with rose, blue, and slate-gray is partial compensation. A few thin scrapes and ticks blend in with some planchet adjustment marks visible on the reverse. A very scarce- in-demand variety that should do well at auction, given the high eye appeal of this example. PCGS# 39221 Base PCGS# 6052

1795 O-121 Half, XF45
Y Punched Over a Star
Ex: Robinson S. Brown, Jr. Collection

3948 **1795 2 Leaves, Y Over Star, O-121, High R.4, XF45 NGC. CAC.** Ex: Brown. This relatively plentiful variety is also one of the most distinctive, with the Y in LIBERTY punched over a misplaced star. This Choice XF specimen has pleasing gray surfaces with lovely cobalt-blue and iridescent toning. The fields are lightly sprinkled with small marks, only one of which is of singular note, located across and into the field below the eagle's neck. From the collection of Robinson S. Brown, Jr. While much better known as a large cent collector, Brown also was an avid collector of early half dollars by die varieties.
Ex: Central States Signature (Heritage, 4/2012), lot 4363. PCGS# 39256 Base PCGS# 6052

1806 Pointed 6, No Stem Half Dollar
AU55, O-109

3949 **1806 Pointed 6, No Stem AU55 NGC. O-109, R.1.** Die clashing appears on each side of this lustrous Choice AU Bust half, but as yet no sign of the late-state die crack from star 12 toward Liberty's neck that would yield the 109a, a very scarce state. A handful of small scrapes in the obverse fields are undistracting. The surfaces are frosty silver-gold. PCGS# 39310 Base PCGS# 6073

1806 Half Dollar, AU55+
O-111a, 6 Over Inverted 6
Rarely Seen This High-Grade

3950 **1806 6 Over Inverted 6, O-111a, R.4, AU55+ NGC.** An intriguing *Guide Book* variety; the 6 in the date was entered into the die upside down and then corrected, giving the appearance of an 1806/9 overdate. The underdigit is plain to the unaided eye. This variety is scarce in all grades, but becomes genuinely rare in XF and better condition, and is almost unobtainable in Mint State. This Plus-designated Choice AU piece is a late die state example, with a radial crack through the 8 in the date on the obverse and a large rim cud over the TED in UNITED on the reverse. Noticeable luster remains in the recesses, and the only trace of toning is seen in a thin glaze of light champagne color that accents each side. This is the only O-111a example certified and attributed by NGC in AU, with just one numerically finer (4/15); a few other similarly graded pieces may exist but are not currently attributed for variety and die state. PCGS# 39337 Base PCGS# 6078

1806 O-115 Half Dollar, AU55
Ideal Type Candidate

3951 **1806 Pointed 6, Stem, O-115, R.1, AU55 PCGS.** Like most or all O-115 half dollars, this one has heavy die cracks through the date and stars, and the recut base of the first T in STATES confirms the O-115 attribution. This attractive Choice AU specimen has nearly full luster with light wear and weak strike details on the shoulder and upper hair strands. Lovely blue and iridescent toning enhances the eye appeal. PCGS# 39317 Base PCGS# 6071

1807 Draped Bust Half, MS62
Gorgeous Album Toning, O-105

3952 **1807 Draped Bust, O-105, R.1, MS62 NGC.** This high-luster, richly toned Draped Bust half is an ideal candidate for any early half or type collector. Liberty's hair strands are individually sharp and capture the luster to its full extent. Each of the obverse stars is fully formed except for stars 11 to 13, which are characteristically flat, but the bust drapery is sharp. The eagle is well-struck and full-feathered. While not mark-free, abrasions on the coin are limited to a minor scrape on Liberty's neck and scattered delicate lines in the obverse field. There are no adjustment marks. Die clashing is evident in the form of "waves" over the date. By far, the main attraction is the gorgeous album toning, with vivid, orange-gold colors framed by gunbarrel-blue margins. Census (all varieties): 23 in 62 (1 in 62+), 40 finer (4/15). PCGS# 39343 Base PCGS# 6079

1807 Half Dollar, O-107a, Unc Details
Deeply Toned

3953 **1807 Draped Bust, O-107a, High R.4 — Cleaning — PCGS Genuine. Unc Details.** The late die state variant of O-107, characterized by a prominent die crack that nearly circumnavigates the reverse periphery. The coin is evenly struck, with complete dentils on each side, although there is some minor weakness on the hair curls over Liberty's temple. Deep blue-gray and aquamarine hues encompass the reverse but leave a window of bright golden color in the central obverse. PCGS# 39347 Base PCGS# 6079

BUST HALF DOLLARS

1807 Capped Bust Half, MS61
Large Stars, 50 Over 20, O-112

3954 **1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, MS61 NGC.** Consistent rose-gray patina appears over both sides of this popular Guide Book-variety coin, which in addition is a first-year type coin of the new John Reich Capped Bust design. The surfaces are minimally abraded for the grade on this appealing coin. Some minor strike weakness appears in the center reverse, as typical for the issue. PCGS# 39356 Base PCGS# 6086

1807 Capped Bust Half, AU55
O-114, Large Stars

3955 **1807 Capped Bust, Large Stars, O-114, R.3, AU55 NGC.** Die lumps beneath the 7 in the date aid in attribution of this elusive variety; this piece is in an early die state, before the heavy cracks develop on each side. Bright, steel-gray luster illuminates the fields, while there is slight amber-colored friction over the high points of the relief elements. The strike is a trifle soft on PLURIBUS, not unusual for the issue. PCGS# 39361 Base PCGS# 6088

1810 Half Dollar, O-109, MS64
Upper-End Surface Quality

3956 **1810 O-109, R.3, MS64 PCGS. CAC.** This is an early die state example, with the reverse just beginning to crack near the (UNITE)D S(TATES). The obverse shows shield clash marks near Liberty's ear, while the reverse exhibits a partial outline of the obverse portrait. Remarkably well-preserved surfaces yield soft, satiny luster beneath a thick blanket of deep lavender-gray toning. A few obverse stars and the reverse arrowheads are not fully defined, but the central devices are bold. Struck from mildly rotated dies. Population: 7 in 64, 0 finer (4/15). PCGS# 39418 Base PCGS# 6095

1811/10 Half Dollar, O-102, MS63
Brilliant, Frosty Surfaces

3957 **1811/10 O-102, R.4, MS63 PCGS. CAC.** This is the second use of this obverse and die fatigue is extensive, particularly around the borders. The left-hand stars are sharp, but they are weak on the right, as is diagnostic of this variety. This piece is fully brilliant, with intense, frosty luster. A few light grazes interrupt the cartwheel effect, as the grade allows. Population: 5 in 63 (1 in 63+), 4 finer (4/15). PCGS# 39422 Base PCGS# 6099

1812 Half Dollar, O-103, MS64
Lustrous Type Coin

3958 **1812 Large 8, O-103, R.1, MS64 PCGS. CAC.** An available variety, O-103 is readily identified by several vertical die lines in the field below the eagle's head and a thin horizontal die line to the right of the clasp on the obverse. Also characteristic of this variety is notably sharp stars on the left, but inherently weak stars on the right, a feature shared by the present offering. The central devices on this piece are well-struck and the surfaces are free of major abrasions. Strong luster remains beneath the warm golden toning over each side. Population: 60 in 64 (2 in 64+), 24 finer (4/15). PCGS# 39446 Base PCGS# 6100

1812 Bust Half, MS65
O-105', No Obverse Die Cracks
Rare Earliest Die State

3959 **1812 Large 8, O-105', R.7, MS65 PCGS.** While the Overton-105 variety is readily available even in high grades, virtually all known examples show a die crack at 81 of the date. Multiple die cracks are visible on all mid-to-later die states. Many collectors have never seen an O-105 half with out one or more die cracks on the obverse. Stephen Herrman's Spring 2015 edition *Auction & Mail Bid Prices Realized* has a separate listing for the variety in its prime, uncracked state, and shows a Condition Census for the O-105' prime die state as a single coin — the Ex: Hilgard coin, graded XF45. Herrman notes beneath the listing, "105' die state probably R7." In the Editor's Notes, he cautions "Time will tell how rare these die states really are." We agree.

That said, this O-105' example shows no obverse die crack(s) and it is obviously an early strike. The fields are semiprooflike and contrast nicely with the frost-white motifs. The strike is tack-sharp on the central elements and on the right-hand stars, while stars 1 to 7 are less boldly impressed and lack their central definition. Only minor marks are present, including a pinprick depression on Liberty's cheek. Pleasing light-gold toning deepens at the margins, with deep-blue and red-gold accents serving as exclamation points for the lovely Gem surfaces and outstanding eye appeal. The coin ranks high among all O-105 representatives regardless of die state, but in its prime condition this rare example is clearly unmatched. PCGS# 39449 Base PCGS# 6100

1812 Half Dollar, O-107, MS65
Old-Time Toning

3960 **1812 Large 8, O-107, R.1, MS65 NGC.** An available Large 8 variety, but rarely encountered at the Gem grade level. This representative is in an early die state, without the later-appearing lump in the reverse field adjacent to the eagle's left (facing) wing. A small tine off the upper-right corner of the shield confirms the attribution of the die, while the obverse shows a distinct date placement: the 1 high, with all four numerals leaning noticeably left. Visual attributes of this piece include rich, satiny luster with warm amber-gold toning that deepens to show small violet and blue tinges near the borders. Several right-hand stars are soft, but the strike is otherwise sharp. Census of all Large 8 varieties: 14 in 65, 17 finer (4/15). PCGS# 39452 Base PCGS# 6100

1815/2 Half Dollar, AU Details
O-101a, Cracked Reverse

3961 **1815/2 O-101a, R.3 — Improperly Cleaned — NGC Details. AU.** A prominent reverse die crack through the denomination, arrowheads, and into AMERICA identifies the late die state variant of this only known 1815 half dollar variety, which had a mintage of only 47,150 pieces. This example shows a well-executed strike with just minor wear over the high points of the devices. The surfaces are unnaturally bright silver in color due to cleaning, although the overdate feature is clear. PCGS# 39492 Base PCGS# 6108

1829/7 Half Dollar, O-102, MS65
Important *Guide Book* Variety

3962 **1829/7 O-102, R.2, MS65 NGC.** This highly popular *Guide Book* variety draws a significant premium over the normal date variant in all grades, but it becomes genuinely rare at the Choice grade level, and its availability further declines with each succeeding grade. O-102 is one of two die marriages that employ the overdated obverse, the other being O-101; the two pairings are readily differentiated by the 5 in the reverse denomination — on O-101, it has a full upper flag and on O-102, it has a broken "stair-step" flag. O-102 is slightly scarcer, and the finest NGC has attributed are two Gem examples, one here offered, while the finest O-102 representative attributed at PCGS is a single MS64 coin; for both overdate varieties combined, NGC has seen just seven MS65, and a single MS66+ finer (4/15). This satiny example is sharply rendered on the devices, and possesses rich, satiny luster. Warm sun-gold and pale lavender hues blend over each side. Close study with a glass fails to reveal any significant flaws. PCGS# 39809 Base PCGS# 6155

REEDED EDGE HALF DOLLARS

1837 Reeded Edge Half, GR-22, MS65
First-Generation Holder

3963 **1837 GR-22, R.2, MS65 PCGS. CAC.** Pearlescent silver luster glows beneath a soft-gray patina with reddish-gold accents at the margins of this appealing Reeded Edge half. The coin is sharply struck at the centers, although diagnostic die fatigue causes weakness in some of the stars and at the cap. Likewise, the tops of CE in CENTS are weak from peripheral die wear.

The GR-22 variety is known for subtle die clashing, seen on this coin beneath Liberty's chin and at the peak of the right (facing) wing. Weakness at the reverse dentils suggests a late die state. Dick Graham's 2012 reference lists the Condition Census for the variety, with two MS65 coins included within the top six "finest known." Housed in a first-generation PCGS holder with CAC endorsement. Population (All varieties): 21 in 65 (1 in 65+), 8 finer (4/15). PCGS# 531071 Base PCGS# 6176

1839 Reeded Edge Half Dollar, Fine Details
GR-1, Small Letters
Extremely Rare Variety

3964 **1839 Capped Bust, Reeded Edge, Small Letters, GR-1, R.7 — Filed Rims — PCGS Genuine. Fine Details.** With the obvious exception of the 1838-O, the 1839 Reeded Edge Small Letters half is the key to the series for variety, type, and *Guide Book* collectors alike. The Dick Graham *Reeded Edge Half Dollars* reference provides a detailed census with photos for all but two of the 10 known examples of the rare GR-1 variety. The present coin does not appear to match any of those, so it may indeed be an 11th representative.

Several of the known examples have damage, cleaning, or other impairments. The present coin is no exception, net-graded for Filed Rims. The coin shows a handful of small rim nicks as well as evidence of cleaning, although rim filing is not immediately apparent. Bright silver-gray color covers both sides with numerous light abrasions.

Dick Graham succinctly says, "if you find one in any condition and can afford it by all means seize the opportunity to purchase it." The GR-1 remains one of the most interesting Bust half varieties and it is of high numismatic importance — struck with a reverse pattern die characteristic of the later Seated halves — and it is seldom available to collectors in any condition. Listed on page 201 of the 2016 *Guide Book*.

1840-(O) Seated Half, MS62
WB-101, No Mintmark Variety
Scarce in Mint State

3965 **1840-(O) Medium Letters, WB-101, Die Pair 4, R.3, MS62 NGC.** The Missing O mintmark variety is, in fact, a "mule" of dies from two different coinage series (a Seated half obverse with an 1839 (type of 1838) Reeded Edge Bust half reverse). Two 1840 New Orleans varieties have this distinction — Die Pair 4, represented by the present coin — and Die Pair 12, in which the heavily cracked reverse was again pressed into service (after lapping) and paired with a new obverse die.

Either variety is rare in Mint State. This sharply struck example is especially attractive, with soft peach-gold luster beneath lilac overtones. The 8 is slightly repunched northeast, and an amazing network of radial die cracks traverse the reverse. The cracks exceed the Bugert reference photo both in number and extent.

Census (Missing O varieties): 3 in 62, 4 finer (4/15). PCGS# 572003 Base PCGS# 6233

1842-O WB-101 Seated Half, AU58
Rare Small Date, Small Letters Variety
Ex: Terrell, Pryor

3966 **1842-O Small Date, Small Letters, WB-101, Die Pair 2, R.5. AU58 PCGS.** Ex: Pryor Collection. Two die pairs were used to strike the rare Small Date, Small Letters 1842-O halves. The obverse die is the same for both varieties. The reverse die is determined by position of the Large O mintmark, which is either high and to the left, or low and to the right. This example is the latter, with the mintmark centered beneath the junction of the branch and the feather, aligned with the right edge of the F of HALF.

For many years, this coin was the finest-certified example (as described in the 1973 Terrell sale and the 1996 James Bennett Pryor appearances). Today, two Mint State examples are known — one at NGC (the Gardner coin), and the other at PCGS (the former Eliasberg coin). Among a handful of near-Mint specimens, the current coin offers a splendid pedigree and unquestioned originality. The strike is sharp on all of the motifs, with slight blending of the eagle's highest feather tips and leftmost talon, plus minor signs of brief circulation. Soft luster is nearly complete beneath light, fawn-gold toning. Housed in a green label holder from the Pryor sale. Population: 2 in 58, 1 finer (4/15).

Ex: The Terrell Collection (American Auction Association, 5/1973), lot 479; James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 106.

From The Dr. Harry Salyards Collection. PCGS# 572015 Base PCGS# 6238

1846 Over Horizontal 6 Half, MS63
WB-104, FS-301
Tied for Finest at PCGS

3967 **1846 6 Over Horizontal 6, WB-104, FS-301, MS63 PCGS. CAC.** A sharp, wonderfully original example of this always-popular Mint blunder, one of the most spectacular recut dates of the series and in all of numismatics. In addition to the 6 Over Horizontal 6 feature, the coin displays double rim cuds below the date and a strong die crack above UNIT(ED). The toning on this coin is terrific. Peach-gold and lilac shades show sea-green accents in the date area on the obverse. The reverse adds ample lavender shades to the palette. Boldly struck, the coin is softly lustrous beneath the thick, frosty patina. Population: 4 in 63, 0 finer (5/15). PCGS# 409888 Base PCGS# 6254

1847/(6) Half Dollar, AU58
WB-102, FS-301, Late Die State

3968 **1847/(6) WB-102, FS-301, Late Die State, AU58 PCGS.** Early die state examples of WB-102 are easily identified by remnants of an 1847/1846 overdate, but this feature quickly fades with die wear and lapping. Late die state examples, even with the overdate feature now missing, can be identified by strong die doubling on the obverse shield and LIBERTY, as well as by the high position of the primary date. The present coin shows subtle semiprooflike mirroring in the fields, and the reverse is extensively cracked throughout the peripheral legends. The strike is sharply rendered and there is only a trace of friction over the high points of the central devices, with a few faint lines in the fields. Splashes of sea-green and olive toning accent the pale champagne-gray color over each side. Population: 1 in 58, 3 finer (4/15).
From The Dr. Harry Salyards Collection. PCGS# 537379 Base PCGS# 6258

1850-O Half Dollar, MS65
Deeply Toned, Exceptionally Clean O-Mint

3969 **1850-O WB-101, Die Pair-Unlisted, MS65 NGC.** Ex: "Col." E.H.R. Green. There are few Gems known of the 1850-O half dollar, in spite of its generous mintage of more than 2.4 million pieces. This is a deeply patinated example that shows medium gray patina across each side with golden-red glowing just beneath, all backlit by rich mint luster. Well, but not quite fully struck, there are no obvious abrasions on either side. The die diagnostics do not appear to match any of the 14 varieties in Bill Bugert's reference. The mintmark placement is similar to that of Bugert's Reverse D, but this piece lacks the lumps in the olive leaves that are present on Die Pairs 4 and 6. The obverse date position is similar to that of Bugert's obverse 4, but a trifle further right; the head die is also cracked through all obverse stars, as well as diagonally through Liberty's foot. There do not appear to be any other distinguishable characteristics. Census: 6 in 65, 1 finer (4/15).
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $3.00; Eric P. Newman Numismatic Education Society. PCGS# 572076 Base PCGS# 6265

1851-O Half Dollar, Colorful MS65 One Finer at PCGS

3970 **1851-O WB-101, Die Pair WB-4, R.3. MS65 PCGS.** The die crack from star 5 to the rim and the high mintmark diagnose this available die pair. The preservation of this piece is uncommon as a date, however; PCGS reports only four in MS65 with a single MS66 finer (5/15). The distraction-free surfaces are covered in patina with a palette comprising gold, mauve, cobalt-blue, and rose in a beautiful display. The strike is quite sharp on all the obverse stars as well as Liberty's head, the shield, gown, and rock, and the eagle's feathers on the reverse. An appealing (and virtually unimprovable) example from this mintage of 402,000 pieces. Population (all varieties): 4 in 65, 2 finer (5/15). PCGS# 572082 Base PCGS# 6267

1852-O Half Dollar, MS61 Challenging O-Mint Issue

3971 **1852-O WB-101, Die Pair 1, R.4, MS61 PCGS.** The 1852-O is a seldom seen Seated half issue that is rare in Mint State. A limited mintage of only 144,000 coins was accomplished with just two die pairs, and each variety is notably scarce today. This is an important Mint State representative, which has received much acclaim in its previous auction listings. Both sides are boldly die clashed, but the design definition is equally sharp. Satiny surfaces yield warm champagne toning, with deeper hints of amber and gold over much of the obverse peripheries. A small cut near star 1 is the only abrasion of note. Population: 1 in 61, 7 finer (4/15).
Ex: Massachusetts Historical Society Collection (Stack's, 3/1973), lot 597; March Sale (Stack's, 3/1984), lot 686; Robert W. Schwan Collection (Bowers and Merena, 10/2000), lot 1301.
From The Dr. Harry Salyards Collection. PCGS# 572084 Base PCGS# 6269

1853-O Arrows and Rays Half, MS63 Briefly Produced in New Orleans

3972 **1853-O Arrows and Rays, WB-101, Die Pair 21, R.3, MS63 NGC.** The 1853-O is the scarcer of the two issues that comprise the sought-after Arrow and Rays type, especially in Mint State, where this issue is rare, and its Philadelphia counterpart is available through the Choice grade level. This Select representative delivers bold detail with soft, satiny luster shining through deep olive-gray and champagne toning. No significant abrasions are observed upon close examination. Census: 11 in 63, 9 finer (4/15). PCGS# 572086 Base PCGS# 6276

1854-O Seated Half, MS65
Frosty Cartwheel Luster

3973 **1854-O Arrows, WB-101, Die Pair 1, R.2, MS65 NGC.** The date is broadly doubled, indicating an early die state although diagnostic die cracks from a later die state exist on both the obverse and reverse, suggesting the coin was struck before any relapping or polishing of the obverse die. The strike is bold with just nominal weakness at the eagle's left (facing) talon. Strong mint luster radiates in cartwheels over silver-white surfaces interspersed with areas of amber and russet-gold toning. Census: 13 in 65, 10 finer (5/15). PCGS# 572088 Base PCGS# 6280

1854-O Arrows Half, MS65
WB-101, Crumbled Obverse Die

3974 **1854-O Arrows, WB-101, Die Pair 37, Lloyd-905, R.3, MS65 NGC.** This is one of the most intriguing die varieties for the 1854-O issue; the tail die exhibits extensive, heavy die lines, particularly around the peripheral legends, while the obverse is heavily deteriorated around the figure of Liberty and shows extensive crumbling around the date. The present example is well-struck, with satiny luster that displays soft golden hues around the margins. Light contact on the high points of Liberty precludes a finer grade. Census: 13 in 65, 10 finer (4/15). PCGS# 572088 Base PCGS# 6280

1854-O Arrows Half, Impressive MS65

3975 **1854-O Arrows, WB-101, Die Pair 11, R.3, MS65 NGC.** The 1854-O Arrows Seated Liberty half dollar was produced in large numbers and is a favorite with type collectors because of the short-lived Arrows design. This impressive Gem offers well-detailed design elements with a network of die cracks through the stars on the right obverse that identify Die Pair 11. The well-preserved lustrous surfaces are visited by shades of golden-tan and lavender-gray toning. For the issue, Census: 13 in 65, 10 finer (5/15). PCGS# 572088 Base PCGS# 6280

1857-S Half Dollar, MS63
Rare This Fine, Blundered Date

3976 **1857-S Medium S, Blundered Date, WB-103, Die Pair 3, R.4, MS63 NGC.** Only four die pairs are known for the 1857-S half dollar; all are scarce to rare, with WB-103 being one of the more often seen. This variety is easily identified by the blundered date, which shows remnants of an errant 1 in the field to the left of the primary. As a date, the 1857-S half dollar is a significant rarity in Mint State, this stemming from a limited mintage of only 158,000 coins. NGC shows only 13 Uncirculated representatives, including one MS61, 10 MS62, and two MS63 tied for the finest (4/15). This example displays soft, satiny luster beneath consistent golden-gray toning that effectively masks any grade-limiting disturbances in the fields. Bold rendering of the design elements delivers exceptional sharpness throughout the stars, gown, shield, and reverse eagle. An excellent example of this challenging No Motto San Francisco issue. PCGS# 572107 Base PCGS# 6292

1858-O Half Dollar, MS65
Conditionally Rare

3977 **1858-O WB-101, Die Pair 14, R.3, MS65 NGC.** Despite having nearly twice the mintage (almost 7.3 million versus less than 4.3 million coins), the 1858-O half dollar is scarcer in the finer Mint State grades than is its Philadelphia counterpart. This Gem representative displays glowing luster beneath a blanket of light golden toning, while hints of olive, lavender, and russet are also evident in the peripheral recesses. The strike is sharp and there are no mentionable abrasions. Census: 4 in 65, 3 finer (4/15). PCGS# 572116 Base PCGS# 6294

1859-S Seated Half, MS64
WB-101, Large S Mintmark

3978 **1859-S Large S, WB-101, Die Pair 3, R.3, MS64 NGC.** Brilliant, frosted silver surfaces show areas of deep charcoal and gold toning, but for the most part this half can be appreciated for its underlying silver luster. A near-Gem half from a technical perspective, with no marks to mention and a razor-sharp strike on the stars and central motifs. The remnant curve of a misplaced 9 is faintly visible in the rock edge above the primary 9. Census: 9 in 64 (2 in 64+), 6 finer (4/15). PCGS# 524237 Base PCGS# 6298

1870-CC WB-101 Seated Half, VF25
Natural Golden-Brown Patina

3979 **1870-CC WB-101, Die Pair 2, R.5, VF25 PCGS.** The surviving population of 1870-CC half dollars is estimated to be around 200 pieces in all grades, of which all but a handful are circulated to one extent or another — mostly heavily so — and many pieces are impaired. The first-year mintage of 54,617 pieces was placed into Western commerce immediately. Most coins were lost to attrition, and few examples were saved amid general disinterest among early collectors for mintmarked issues.

From a mintage standpoint, both the half dollar and the silver dollar are reasonably plentiful in comparison to the other denominations struck in Carson City during the opening session of production. Even so, coins with fully natural, unimpaired surfaces like this piece are not easy to locate. Both sides have delightful silver-gray surfaces with golden-brown toning. LIBERTY is weak at BER. The only blemish is a minute area of lighter toning on the rim near star 3 where a bump may have occurred, although there is no apparent disturbance of the rim or dentils. Population (all varieties): 4 in 25, 59 finer (4/15).

Ex: FUN Signature (Heritage, 1/2007), lot 4480; Doug Winter; The Beau Clerc Collection (Heritage, 9/2007), lot 1556; Tony Terranova. From The Dr. Harry Salyards Collection. PCGS# 572190 Base PCGS# 6328

1873 WB-101 Seated Half, VF30
Rare No Arrows, Open 3 Variety

3980 **1873 No Arrows, Open 3, WB-101, VF30 PCGS.** No Arrows, Open 3. After purchasing the rare Seated half variety as a raw coin from J.J. Teaparty in 1999, our consignor relates the following backstory:

> "Liz Coggan purchased this coin at the Drawbridge Show, Cincinnati, September 11-12, 1999, from another dealer — who had bought it as a common date — but she was circumspect with me as to whether the **other** dealer or **she** had done the cherrypicking. No matter. It is indeed "gorgeous and original," as she described it when she called me on September 13. When I showed it to Tom Reynolds on October 15, 1999 he agreed that it was at least VF30 and at that time was among the top dozen or so for this very tough variety!"

PCGS obviously agreed with the assessment, and the coin now resides in a VF30 holder. LIBERTY is complete on the obverse shield, with only slight weakness of the E. Traces of gunmetal blue augment the golden-brown toning that blankets both sides. Only minor ticks remain, softened by moderate circulation, and the strike remains strong for the grade. The rims are perfect with full dentils on both sides. Heavy die lumps on Liberty's upper torso are an important confirmation for the variety.

Many advanced collections lack this rare and important No Arrows, Open 3 variety. We expect intense competition for this attractive, mid-grade example — an ideal collector coin. PCGS and NGC combined show a only 55 grading events in all grades. PCGS population: 4 in 30, 12 finer (4/15).

Ex: Drawbridge Show (unknown dealer, 9/1999); J.J. Teaparty (9/1999).

From The Dr. Harry Salyards Collection. PCGS# 572206 Base PCGS# 6337

1873 Arrows Half, MS65
Semiprooflike Fields

3981 **1873 Large Arrows, WB-106, MS65 NGC.** All With Arrows 1873 half dollars were struck with the Open 3 logotype in the date, but pieces are known with both large and small arrows to either side of the date. The Large Arrows variant is historically more plentiful, but its availability declines significantly in Gem condition. This semiprooflike example displays shades of rose-gold and violet toning in the central regions with deeper aquamarine around the peripheries. The strike is sharp. Trivial stacking marks on the high points of Liberty identify the grade. Census of all With Arrows varieties: 6 in 65, 3 finer (4/15). PCGS# 572211 Base PCGS# 6343

1873-CC With Arrows Seated Half, AU58
Large CC, Recut '1' in Date

3982 **1873-CC Arrows, Large CC, WB-unlisted, Die Pair 7, R.4, AU58 NGC.** Large CC mintmark. Open 3. The date is further right for this die marriage than any other 1873-CC With Arrows variety. The 1 in the date is repunched ever-so-slightly south, visible above the right base. As the sole use of the obverse die, the die pair is relatively easy to confirm. The reverse die is transitional with three other Carson City issues (1871, 1872, and 1876).

The Coin Act of 1873 mandated a slight increase in planchet weight indicated by arrowheads on either side of the date to signify the weight change. The current example is sharply struck with slight wear on the high points. Nearly full mint luster remains beneath champagne-gold toning and faint deep-blue accents. Only widely dispersed shallow abrasions and tiny nicks are visible with a glass. Both Seated half and type collectors seek the scarce Carson City date, and this near-Mint example will work nicely in any circulated or Mint State set. Census: 8 in 58, 17 finer (4/15).
Ex: Baltimore Auction (Stack's Bowers, 11/2012), lot 1741.
From The Dr. Harry Salyards Collection. PCGS# 572216 Base PCGS# 6344

1875-S Half Dollar, MS66
Only Two Coins Numerically Finer

3983 **1875-S Very Small S, WB-101, Die Pair 7, R.3, MS66 PCGS. CAC.** "Superb quality for the grade" is a phrase which comes to mind when this coin is viewed in hand. Well-struck design elements and glowing, satiny luster are only the tip of the iceberg, as beneath the light golden patina there are almost no abrasions — only a few faint grazes are revealed when tilted at just the right angle beneath a light. The 1875-S half dollar is seldom offered at this grade level, and finer pieces are almost unobtainable. The advanced collector should not let this piece pass by. Population: 25 in 66 (1 in 66+), 1 finer (4/15). PCGS# 572229 Base PCGS# 6351

1876-CC Half Dollar, Toned MS65
Ex: "Col." Green - Newman

3984 **1876-CC Large CC, WB-103, Die Pair 2, R.3, MS65 NGC.** Ex: "Col." Green, Eric P. Newman. A fine example of the WB-2 die pairing. The reverse die crack along the top of (AME)RICA is especially pronounced on this piece, as is the vertical die line behind the eye of Liberty. This Carson City half dollar displays layers of thick gray and faint rose toning overall with a strong presence of blue beneath. The underlying mint luster is especially pronounced and is not subdued by the layers of color. The strike details are complete throughout and there are no noticeable abrasions present on this extraordinary CC half dollar. Census: 13 in 65 (2 in 65+), 5 finer (4/15). PCGS# 572240 Base PCGS# 6353

1878-CC Seated Half, Unc Details
WB-101, Full Luster Remains

3985 **1878-CC WB-101, Die Pair 1, R.4 — Scratched — NCS. Unc Details.** At first glance, this is a lovely Mint State example with full cartwheel luster, a penetrating strike, and attractive peripheral golden-brown toning. A few clusters of pinscratches are noted on the field near the eagle — specifically at either side of the eagle's neck, and in the notch under the eagle's right (facing) wing — from an attempt to remove a few green flecks. The obverse displays faint abrasions in the right obverse field and near the date. A rare Carson City issue, since its production was interrupted to resume silver dollar coinage.
Ex: Charles H. Patten Collection (Stack's, 5/1973), lot 419; Dalton Family Collection (Stack's, 12/1975), lot 590; George "Buddy" Byers Collection (Stack's, 10/2006), lot 1270; FUN Signature (Heritage, 1/2007), lot 4495; lot 1575; lot 688.
From The Dr. Harry Salyards Collection.

1878-S Half Dollar, Gleaming AU55
Unrivaled Series Rarity

3986 **1878-S WB-101, Die Pair 1, R.5, AU55 PCGS Secure.** The 1878-S is the Seated half dollar series' contribution to the roster of paramount 19th century rarities, far and away the most challenging issue in the 1839 to 1891 half dollar coinage. Its rarity stems from a combination of a low 12,000-coin mintage and an extremely high attrition rate, two factors which owe their influence to the Bland-Allison Act, passed by congress on February 28, 1878, over President Hayes' veto, mandating the production of millions of silver dollars that would feature designs by Mint Assistant Engraver, George T. Morgan. The Annual Report of the Director of the Mint for the fiscal year ending June 30, 1878, stated in part:

> "At the date of the authorization of the standard silver dollar there was on hand in the Treasury and mints in fractional silver coins $6,253,624.76; and the demand for these coins being light, this amount was regarded as sufficient to meet any probable demand for some time to come, and the coinage of fractional silver was temporarily suspended and preparations made to work the mints to their full capacity in striking the dollar."

Bullion purchases for the coinage of silver dollars commenced in March at a rate of a little more than $1.17 per ounce, a trifle above the current London rate of 53.1208 pence which was equivalent to just more than $1.16 per ounce American. This purchase rate would produce a marginal profit for the government with each silver dollar containing only about $0.90 worth of silver. However, silver interests near the West Coast branch mints initially refused to supply the requested bullion to the government at the London rate, and instead demanded additional profit equal to the cost of having foreign silver shipped to San Francisco. These hard-ball terms were rejected by the Mint, but silver dollar coinage in San Francisco was nonetheless commenced, just at a rate no greater than allowed by bullion stores already on hand. Without any excess silver stock, any possibility of additional half dollar coinage during the year was eradicated, and those minor silver coins already on hand were distributed as need into the channels of commerce for the next several years.

It is estimated that only about 60 examples of the 1878-S half dollar survive in all grades, with just 54 coins individually accounted for by Bill Bugert. These range in condition from AG to Mint State, the higher-grade pieces by far the most highly coveted. This Choice AU representative survives with gleaming prooflike fields, as is expected for an issue with such a small mintage, and retains almost complete detail on the relief elements. Light golden tints accent the bright, steel-gray surfaces, and a few lines are evident in the fields, not unusual for the grade. A comparable example of this final S-mint Seated half may not be offered publicly for quite some time. The interested specialist should not let this significant 19th century rarity pass by. Population: 1 in 55, 14 finer (4/15). PCGS# 572258 Base PCGS# 6360

1879 Seated Half, MS67
Glistening Surfaces

3987 **1879 Closed Bud, WB-102, MS67 NGC.** The 1879 is the first of the low-mintage Philadelphia issues that comprise the tail end of the Seated half dollar series. Only 4,800 pieces were struck, but enough survive that this issue is moderately collectible in Mint State. This Superb Gem representative displays beautiful semiprooflike mirrors around well-struck, frosty devices. A melange of natural toning blankets each side, the obverse in olive, gold, and pale lavender-gray and the the reverse in deeper ocean-blue, violet, amber-gold. Census: 11 in 67 (3 in 67 ★), 1 finer (4/15). PCGS# 572260 Base PCGS# 6361

1887 Half Dollar, Rim-Toned MS66
5,000 Circulation Strikes Coined

3988 **1887 WB-101 MS66 PCGS.** A beautiful rim-toned Premium Gem example of this low-mintage date, struck to the extent of 5,000 circulation strikes only. Gold, cinnamon, and powder-blue decorate the margins and contrast nicely against untoned silver-white centers, and the surfaces overall are free of major distractions. Population: 12 in 66, 5 finer (4/15). PCGS# 572272 Base PCGS# 6369

1891 Half Dollar, Premium Gem
Last of the Seated Series

3989 **1891 WB-101 MS66 PCGS. CAC.** Although not designated as such, this Premium Gem example from the last issue of Liberty Seated half dollars exhibits prooflike surfaces with strongly mirrored fields. Faint tan and gray toning graces each side. The strike is sharp overall, though with minor incompleteness at the upper obverse and the lower portion of the eagle. Population: 13 in 66 (3 in 66+), 2 finer (5/15). PCGS# 572276 Base PCGS# 6373

PROOF SEATED HALF DOLLARS

1857 Seated Half, Toned PR65
Unrecorded Mintage

3990 **1857 PR65 PCGS. WB-101.** The number of proof Seated half dollars struck in 1857 is unknown, as this was the final year of production before the Mint began keeping records of regular proof coinage. Beginning in 1858, proof sets and individual coins were marketed publicly and as a result, mintage figures began climbing substantially. The 1857, then, is the final proof issue from the so-called "early" era, and is always in high demand. This Gem example is one of only 30 to 40 representatives believed known. Both sides showcase deeply reflective fields beneath a blanket of blended lavender-gray and dusky gold toning. The eagle's left (facing) talons and leg feathers are not quite full, but the remaining design elements are boldly rendered. Population: 3 in 65, 0 finer (4/15). NGC ID# 27TG, PCGS# 6411

1865 Seated Half, PR65 Cameo

3991 **1865 PR65 Cameo NGC.** Pink-champagne and gold patina cedes at the lower reverse to deep lilac and purple-violet hues, yet the centers are largely untoned silver-white and nicely frosted, sufficiently so for a Cameo designation. The surfaces show a sharp proof strike and good preservation throughout. Excellent eye appeal for this proof emission of only 500 coins. Census: 9 in 65 Cameo (1 in 65+ Cameo), 11 finer (4/15). PCGS# 86419

1872 Seated Half, PR65 Cameo
Lightly Toned, Starkly Contrasted

3992 **1872 PR65 Cameo PCGS. CAC.** A fairly generous proof mintage of 950 Seated Liberty half dollars was struck in 1872, but few survivors can match the quality of this spectacular Gem. This coin exhibits razor-sharp details on all design elements, and the frosty devices contrast boldly with the deeply reflective fields. The surfaces are mostly brilliant, but the fields are visited by hints of gold and lavender toning. Population: 7 in 65 (1 in 65+) Cameo, 2 finer (4/15).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3721. PCGS# 86430

1873 No Arrows Half, PR66
WB-102, Closed 3

3993 **1873 No Arrows PR66 NGC. CAC.** The Closed 3 date logotype represents the 600 proofs struck as listed in the *Guide Book*, although a single No Arrows proof reportedly exists with an Open 3 as confirmed in the Wiley-Bugert reference. (All 1873 With Arrows proofs have the Open 3). This beautiful near-Gem example is richly toned with steel-blue at the borders, magenta and violet accents, and hues of amber-gold at the centers. Deeply mirrored fields surround the frosted central motifs, but contrast is minimized by the intense toning. A splendid, lustrous Premium Gem proof, with few finer at either service. Census: 22 in 66 (2 in 66 ★), 3 finer (4/15). NGC ID# 27U8, PCGS# 6431

1874 Arrows Half Dollar, Contrasted PR65

3994 **1874 Arrows PR65 NGC.** Although undesignated, this piece is clearly a Cameo proof with nice field-to-device contrast. The ivory-white surfaces show a hint of gray, accompanied by peripheral blue and iridescent toning on both sides. Minor strike weakness shows at the lower reverse. Census: 15 in 65, 9 finer (4/15). NGC ID# 27UV, PCGS# 6435

1874 Arrows Seated Half, PR64 Cameo
WB-101, Desirable Small Arrows Design

3995 **1874 Arrows PR64 Cameo PCGS. WB-101.** Collectors of Seated halves by die variety are often frustrated when searching for the Small Arrows variety in business strike format. As a result, proofs of the issue are in hot demand because they share the same obverse die. This near-Gem proof example will be at home in any high-grade set. Brilliant silver-white and untoned, the frosted motifs contrast boldly with the mirrored surfaces and display the Small Arrows feature to its best advantage. A few delicate lines are visible, but the strike could not be sharper. Scarce in this grade, format, and variety. Population: 28 in 64 (1 in 64+) Cameo, 5 finer (5/15). PCGS# 86435

1891 Half Dollar, PR67
Beautifully Toned Final-Year Example

3996 **1891 PR67 NGC.** Medium toning competes against deeply mirrored fields on this beautiful final-year proof half dollar from the Seated Liberty series, one of only 600 pieces struck. Pale aqua and mint central toning cedes to light rose around the rims, and the proof strike is, as one would expect, razor-sharp. NGC has encapsulated just four proofs in this remarkable grade with a single submission finer. The finest coin at PCGS is a comparable Superb Gem example (5/15). NGC ID# 27UT, PCGS# 6452

1892 Micro O Half Dollar, Good 6
FS-501, Key Variety in the Barber Series

3997 **1892 Micro O, FS-501, Good 6 PCGS.** In circulated grades, the 1892-O is one of the major key dates among regular issue Barber half dollars. Yet, it seems common relative to the rarity of the Micro O variety, created when the die engraver incorrectly used a mintmark punch intended for a quarter. This example displays distinct stars and bold peripheral legends. Liberty's jawline, ear, and wreath are fairly strong, and the letters L and TY of LIBERTY show, as do most of those on the reverse motto. The lighter motifs stand out from the deeper gray fields, especially on the obverse. Small scattered marks are fewer and less severe than expected for a coin in this grade. Population: 4 in 6, 25 finer (4/15). PCGS# 391216 Base PCGS# 6463

1894 Half Dollar, Sharp MS67
An Important Condition Rarity
The Single Finest at NGC

3998 **1894 MS67 NGC.** The 1894 Barber half dollar, coming from a mintage exceeding 1.1 million pieces, can be located in the lower- to mid-level Uncirculated grades with a degree of searching. Superb Gems such as the present coin, however, are significant condition rarities. Indeed, the current offering is the single finest at NGC. PCGS has graded one MS67 and one MS67+ (5/15). Cobalt-blue, lavender, and orange-gold toning clings to the obverse margin and become more extensive and deeper in hue on the reverse. The design elements are sharply struck throughout. The Barber half specialist will find this to be an outstanding coin. NGC ID# 24LN, PCGS# 6468

1896-S Half Dollar, MS65
Upper-End for the Grade

3999 **1896-S MS65 PCGS.** This Gem Barber half is almost devoid of abrasions, with soft, satiny luster illuminating a thin blanket of light golden toning which allows occasional glimpses of deeper olive and russet around the peripheries. A few faint roller marks on Liberty's cheek are mint-made and do not affect the grade. The eagle's talons are sharp, but some minor weakness persists on the upper-right corner of the shield. Population: 10 in 65, 5 finer (4/15). NGC ID# 24LX, PCGS# 6476

1903 Half Dollar, MS65
Tied for Finest at NGC

4000 **1903 MS65 NGC.** Barber half dollars were workhorse coins in commerce, and few were set aside by collectors. As a result, most dates in the series are conditionally rare in Gem or finer grades, even the 1903, which had a substantial mintage of nearly 2.3 million coins. This piece displays satiny luster with just a hint of pale golden color over each side. Close scrutiny with a lens reveals just trivial contact on Liberty's cheek, consistent with the grade, and the only mentionable striking weakness is seen on the eagle's right (facing) talons and the clutched arrow fletchings, as usual. Census: 7 in 65, 0 finer (4/15). NGC ID# 24MJ, PCGS# 6495

1906-O Barber Half, Impeccable MS66+
Sole Finest at NGC

4001 **1906-O MS66+ NGC. CAC.** Pale burgundy, rose, and ice-blue tones alternate with coin-gray areas on this beautiful and essentially pristine Premium Gem 1906-O Barber half. Both the strike and the subsequent preservation are well-nigh impeccable. Even the upper-right shield corner on the reverse is fairly well brought up, if not completely so. Census: 6 in 66 (1 in 66+), 0 finer (4/15). NGC ID# 24MW, PCGS# 6506

1908-O Half Dollar, MS67
Notable Condition Rarity

4002 **1908-O MS67 NGC.** The penultimate New Orleans half dollar issue was struck in quantity (more than 5 million pieces) but is a clear condition rarity in Superb Gem. This MS67 example is well-defined for the issue and has generous luster lighting up predominantly blue-toned surfaces with hints of violet and olive. Census: 6 in 67, 1 finer (4/15). NGC ID# 24N6, PCGS# 6514

1908-S Barber Half, Spectacular MS67
One Point Finer Than the Duckor Coin

4003 **1908-S MS67 PCGS.** Spectacular patina includes pale ice-blue and rose over the portrait, with glimmers of pale burgundy as accents on this Superb Gem 1908-S Barber half dollar. The strike is impeccably sharp up to and including the peripheral stars on the obverse and (nearly all of) the upper-right shield corner on the reverse. This piece is one of only two in this Superb Gem grade at PCGS, and none are finer (5/15). The Dr. and Mrs. Steven L. Duckor Collection example was one of the three MS66 PCGS examples graded at that time [Heritage, 8/2010, lot 3226]. This piece is currently the PCGS CoinFacts plate coin, the sole MS67 depicted there. NGC ID# 24N7, PCGS# 6515

1910-S Half Dollar, MS66+
Worthy Condition Rarity

4004 **1910-S MS66+ PCGS.** The Barber half dollar series is underappreciated as a whole and semikey condition rarities in particular can be remarkable bargains. This MS66+ example comes from a San Francisco issue with a mintage of under 2 million pieces. Bold silver luster has a touch of olive-gold at the lower obverse and the rims. Population: 16 in 66 (2 in 66+), 4 finer (5/15). NGC ID# 24NC, PCGS# 6520

PROOF BARBER HALF DOLLARS

1892 Half Dollar, PR66 Cameo
Striking Eye Appeal

4005 **1892 PR66 Cameo PCGS.** The Barber half dollar series has its fair share of admirers and critics in terms of aesthetic merit, but this Premium Gem proof is undeniably attractive. Golden toned, deeply mirrored fields provide a glassy backdrop for the bold, heavily frosted design elements. A linear strike-through (mint-made) is seen behind Liberty's eye. Population: 22 in 66 Cameo, 7 finer (4/15). PCGS# 86539

1892 Barber Half, Contrasted PR66 Cameo

4006 **1892 PR66 Cameo PCGS. CAC.** This fully struck Premium Gem proof 1892 Barber half shows none of the strike weakness usually (nearly always) seen on circulation strikes of whatever date and mint within the series. The deep, prevailing rose patina contends against occasional glints of blue and aqua, and sufficient contrast is present between frosted devices and reflective fields for a Cameo designation. A couple of dark toning spots appear on Liberty's chin. Population: 22 in 66 Cameo, 7 finer (4/15). PCGS# 86539

1894 Barber Half, Well-Preserved PR67

4007 **1894 PR67 PCGS.** This third-year issue for the Barber design shows a dramatically reduced mintage for proofs of only 972 pieces, and a subsequent reduction in the number of high-grade pieces that were preserved. This is an exceptionally well-preserved example whose mirrored fields still flash strongly through the concentric multicolored toning seen on each side. The frosted devices are abundantly evident through the toning. Population: 10 in 67, 0 finer (5/15). NGC ID# 24NW, PCGS# 6541

1897 Barber Half, PR65 Cameo
Nice Eye Appeal

4008 **1897 PR65 Cameo PCGS. CAC.** A crescent of rainbow toning curls around the vanilla-gold interior surfaces of this deep-mirrored Gem proof half. Liberty's portrait is frost-white and flawless. The same faint toning covers most of the reverse although somewhat deeper near the margins. The eagle contrasts nicely with the glassy, reflective fields. A touch of weakness at the upper-right shield corner does not diminish the appeal. Population: 16 in 65 (1 in 65+) Cameo, 20 finer (5/15). PCGS# 86544

1910 Half Dollar, PR67
Modest Field-Device Contrast

4009 **1910 PR67 PCGS.** This gleaming proof exhibits significant cameo contrast on the reverse, but the obverse is just a little to monotone to quality for the designation. The design elements are well-defined and the preservation is notable. Each side shows a light glaze of champagne toning. Population: 13 in 67 (1 in 67+), 2 finer (4/15). NGC ID# 24PE, PCGS# 6557

WALKING LIBERTY HALF DOLLARS

1916-S Walking Liberty Half, Frosty MS65

4010 **1916-S MS65 PCGS. CAC.** Splendid, thick mint frost liberally coats the surfaces on each side of this Gem strike, complementing silver-white surfaces that show just a glint of gold near the obverse rim. The strike is quite well-executed, showing good detail on problematic areas including Liberty's head and hand, along with the eagle's central breast and trailing right (facing) leg. Population: 97 in 65 (1 in 65+), 14 finer (5/15). NGC ID# 24PN, PCGS# 6568

1917-D Obverse Half Dollar, MS66 Tied for Finest

4011 **1917-D Obverse MS66 NGC.** Early Walkers are inherently difficult to acquire in high grade; take your pick at random of any issue before about 1929 and the scarcity of Premium Gem or finer representatives will more than likely prove to be a significant hindrance on the completing of a set. This is especially true of the 1917-D. Both the Obverse Mintmark and Reverse Mintmark variants are extremely rare in MS66, and the former is unknown finer. This is a mint-fresh, vibrantly lustrous example, ranking among the finest seen by either leading service. Partial thumb separation of Liberty's branch hand confirms the sharp strike and only a few faint grazes in the right obverse field limit the technical quality. Traces of light golden toning are the only suggestion of color on this magnificent early Walker. Census: 4 in 66, 0 finer (4/15). NGC ID# 24PR, PCGS# 6570

1921-S Half Dollar
AU Sharpness

4012 **1921-S — Improperly Cleaned — NGC Details. AU.** A series key whenever found in grades above XF, the demand for this low-mintage San Francisco date half always exceeds the supply. While net-graded for cleaning, the satin-smooth surfaces show no serious ill-effects or overt hairlines even under magnification. Rather, the silvery surfaces are untoned and a bit subdued, with only incidental glimpses of mint luster remaining. Light wear softens the high points. NGC ID# 24R8, PCGS# 6585

1933-S Walking Liberty Half, MS67
Among the Finest Certified

4013 **1933-S MS67 PCGS. CAC.** The Philadelphia issues from this period are plentiful in Mint State due to many original rolls and bags of the dates being reserved from circulation at the time of issue. The 1933-S was not as fortunate. David Hall knows of only a few rolls that existed at one point, and has never seen one himself. As result, the certified population of this date declines sharply in MS66, and Superb Gems are major rarities. This example is boldly struck, with complete thumb separation and crisp gown stripes. The original, frosty surfaces show areas of dusky lavender-gray and pale gold toning, but exhibit deeper olive, gold, and russet crescents around the right margins. Abrasions are almost nonexistent and the eye appeal is superb. Population: 13 in 67, 0 finer (5/15). NGC ID# 24RE, PCGS# 6591

1936-S Half Dollar, Exceptional MS67

4014 **1936-S MS67 PCGS.** The 1936-S Walking Liberty half dollar is one of the better-struck S-mint issues in the series, but finding an attractive, high-grade example is inhibited by the scarcity of such coins in relation to the Philadelphia and Denver issues of the period. The present coin is exceptional in both preservation and design sharpness. Liberty's branch hand and the eagle's right (facing) leg are fully detailed, and the satiny surfaces are devoid of all but a couple insignificant ticks on the obverse sun. The coin is largely untoned, save for a hint of iridescence seen when turned beneath a light. The certified population of this issue plummets in MS67. This piece ranks as an important opportunity for the advanced Walking Liberty half collector or Registry Set specialist. Population: 11 in 67, 0 finer (5/15). NGC ID# 24RP, PCGS# 6600

1938-D Half Dollar, Superb Gem Low-Mintage Later Date

4015 **1938-D MS67 NGC.** The most notable low-mintage date in the later Walking Liberty half dollar series, the 1938-D saw fewer than half a million pieces struck. This Superb Gem was among them, set apart even then by a strike with separation on the branch hand and above-average detail on the eagle's feathers. Silver luster is largely undimmed with only a few spots of reddish-gold dappled behind the eagle's fore wing and faint rim toning on the obverse. Census: 23 in 67 (4 in 67 ★), 0 finer (4/15). NGC ID# 24RV, PCGS# 6605

1938-D Half Dollar, Superb Gem Low-Mintage Denver Key

4016 **1938-D MS67 PCGS.** Demand for new half dollars in the Denver Mint's area of responsibility was not high during the Great Depression, and the 1938-D issue's mintage of under half a million pieces shows how far previous supply had exceeded that demand. This Superb Gem is well-struck for the period with Liberty's branch hand showing a separate thumb. Frosty luster is largely silver save for the faintest touch of reddish-brown at the rims. Magnificently preserved. Population: 41 in 67 (3 in 67+), 0 finer (5/15). NGC ID# 24RV, PCGS# 6605

1938-D Walking Liberty Half, MS67 Ivory-White Surfaces, Top Eye Appeal

4017 **1938-D MS67 PCGS. CAC.** Fans of the late-series or "short set" Walking Liberty half dollars have a special affinity for the 1938-D, the lowest-mintage issue among the later years. This Superb Gem example exhibits ivory-white surfaces with pale tan rim patina and top-notch preservation. A sharply struck piece, this coin shows a partial split thumb. Population: 41 in 67 (3 in 67+), 0 finer (4/15). NGC ID# 24RV, PCGS# 6605

1940-S Half Dollar, MS67
None Certified Finer

4018 **1940-S MS67 PCGS.** The 1940-S half dollar does not attract immediate notice from the *Guide Book* browser, but Registry collectors know how difficult this date is in Superb Gem, and neither NGC nor PCGS has certified an MS68 representative of the issue (5/15). This silver-centered piece with golden-tan borders has excellent surface preservation. The outer toning is broader and deeper on the reverse. While the obverse has a pillowy appearance and is sharply defined, the reverse offers good delineation of feathers except on the eagle's right (facing) leg, which is bald as usual. NGC ID# 24S2, PCGS# 6610

1940-S Walking Liberty Half, MS67+
Elegant Original Color
Tied for Finest Certified

4019 **1940-S MS67+ PCGS. CAC.** An entrancing beauty, this magnificent late-series San Francisco Walker yields a combination of eye appeal and technical quality that is rarely seen, even for the "available" 1940s issues. Fluid ribbons of sun-gold, violet, pine-green, and russet toning grace the obverse periphery from 12 to 6 o'clock and spill over onto corresponding portions of the extreme outer reverse rim. The remainder of each side is aglow in soft champagne and ice-blue highlights, and the underlying surfaces are largely devoid of interruption. Pleasing head detail and partial thumb separation complete the visual attributes.

As a date, the 1940-S is no more rare than many other branch mint issues from this period, but its availability plummets dramatically at the MS67 grade level. PCGS lists only 12 pieces in this grade, with the current coin being one of only three awarded the added Plus designation; the finest at NGC are 11 MS67 coins (4/15). NGC ID# 24S2, PCGS# 6610

1942-S Half Dollar, Sharply Struck MS67
Bright Mint Luster

4020 **1942-S MS67 NGC.** Though the Walking Liberty half dollar series stretches for more than three decades, a more popular mode of collecting is the "Short Set," which stretches from either 1940 or 1941 to 1947 according to taste. Though the Short Set lacks the absolute rarities of the series, it still poses immense challenges for collectors with a taste for condition and strike rarity. The 1942-S is one such challenge, an issue with more than 12.7 pieces minted and yet fewer than two dozen certified as Superb Gem with none numerically finer (5/15). This example's broad silver-blue luster lends it shining eye appeal and an uncommonly strong strike. NGC ID# 24S8, PCGS# 6617

1943-D Walking Liberty Half, MS68
Extremely Rare This Fine

4021 **1943-D MS68 NGC.** Superb Gem Walking Liberty halves are encountered with mild frequency, particularly from the later issues in the series, but seldom is an MS68 representative offered, at auction or elsewhere. This 1943-D example is one of just six coins so-graded at NGC, with none finer; the finest at PCGS are just two pieces in this grade. Moreover, there is only a single coin numerically finer (an MS69 NGC 1940 representative) *in the entire series*. This piece radiates brilliant, frosty luster and showcases above-average striking definition, including partial thumb separation on Liberty's branch hand. Close study with a glass finds only a few minor ticks in inconspicuous places, although this is really nitpicking a magnificent coin. NGC ID# 24SA, PCGS# 6619

1947-D Walking Liberty Half, MS67
Magnificent Dual-Sided Toning

4022 **1947-D MS67 PCGS. CAC.** The grade on this final-year Denver issue representative is indeed impressive, but the color is the chief enticement. Both sides show primarily iridescent lavender-blue and pastel-gray hues, but much of each periphery is enlivened with fiery sun-gold and amber toning such as is imparted by an old album. Liberty's branch hand shows complete thumb separation, while a few small ticks on the leg limit the grade. Population: 24 in 67, 0 finer (4/15). NGC ID# 24SN, PCGS# 6631

PROOF WALKING LIBERTY HALF DOLLAR

1936 Walker, PR67
Beautiful Peripheral Toning

4023 **1936 PR67 PCGS. CAC.** The 1936 is the most challenging issue in the proof Walking Liberty half dollar series. Examples are rare as fine as PR67, and anything better is almost unobtainable. This highly reflective representative showcases full rendering of the design elements and deep, glassy mirroring in the fields. Original surfaces yield pastel blue and gold toning over much of each side, but the chief draw on the eye is a narrow crescent of vivid forest-green, violet, and sun-gold that surrounds the obverse periphery from 5 to 1 o'clock and spills over briefly onto the corresponding reverse rim. Population: 35 in 67, 1 finer (5/15). NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLARS

1949-S Franklin Half Dollar, MS67
Sharp Full Bell Lines

4024 **1949-S MS67 Full Bell Lines NGC.** Examples of the 1949-S Franklin half dollar with Full Bell Lines definition are available in many grades if quality is not a concern, but step up to the Superb Gem level and finding a representative of this issue will prove extremely difficult. This piece displays soft golden toning that deepens to olive, amber, and cherry-red near the borders, while a finely dappled blanket of additional overtones in similar colors is cast over each side. The strike is bold and we note significant semiprooflike mirroring in the fields. Census: 5 in 67 (1 in 67 ★) Full Bell Lines, 0 finer (4/15). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

1949-S Franklin Half, MS67 Full Bell Lines
Stunning Mint Set Toning

4025 **1949-S MS67 Full Bell Lines NGC.** Stunning mint set toning encompasses both sides of this immaculate Superb Gem in shades of olive, ochre, orange, red, and brown, much lovelier than any attempt at description could be. Both sides are remarkably free of any abrasions that would preclude the MS67 grade level, and the lines on the Liberty Bell are simply "all there." The many Baby Boomer numismatists working on their birth-year 1949 Registry Sets are well aware that the 1949-S Franklin half in MS67 Full Bell Lines is only occasionally available — to be precise, there are five at NGC and six at PCGS to choose from (/5/15). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

1952-S Half Dollar, MS66+ Full Bell Lines
Peripherally Toned

4026 **1952-S MS66+ Full Bell Lines PCGS. CAC.** The Franklin half dollar is notorious for soft strikes and Full Bell Line examples of certain issues are nigh-impossible to find in high grades. This S-mint Franklin has silver interiors with russet, blue-gray, and gunmetal peripheral toning. The bell's lines are clear, though its inscription is not. Population: 52 in 66 (7 in 66+) Full Bell Lines, 2 finer (5/15). NGC ID# 24T5, PCGS# 86663

1962 Franklin Half, MS66 Full Bell Lines
Penultimate Philadelphia Issue

4027 **1962 MS66 Full Bell Lines NGC.** The Franklin half dollar might have gone on for many years past 1962, but that year turned out to be the penultimate one for the design as the denomination was chosen to memorialize the assassinated John F. Kennedy. This uncommonly well-struck Premium Gem with Full Bell Lines has understated yet colorful patina ranging from powder-blue to rose-violet over vibrantly lustrous surfaces. Census: 2 in 66 Full Bell Lines, 0 finer (4/15). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half, PR67 Cameo
Brilliant, Contrasted Surfaces

4028 **1950 PR67 Cameo NGC.** An ideal candidate for an untoned set of proof Franklin halves. The brilliant, mirrored surfaces are deeply reflective and provide a nice counterpoint to the frosted motifs. Unlike many of the 1950 proofs, there are no distracting hairlines from overzealous die polishing. A sharp strike and unmarked elements complement the Superb Gem fields. Just a single cameo proof is ranked numerically finer by both services combined. Census: 14 in 67 Cameo (3 in 67 ★ Cameo, 1 in 67+★ Cameo), 1 finer (5/15). NGC ID# 27VA, PCGS# 86691

1951 Franklin Half, Impeccable PR68
Beautiful Rim Toning

4029 **1951 PR68 PCGS.** Impeccable preservation complements the beautiful rim toning more prominent on the obverse, copper-rust and ocean-blue, with smaller daubs on the reverse. Each side is miraculously free of mentionable contact, seldom seen on this early proof Franklin issue. PCGS reports only two submissions in this top grade (5/15). NGC ID# 27VB, PCGS# 6692

1951 Franklin Half, PR67 Cameo
Registry Set Quality

4030 **1951 PR67 Cameo PCGS. CAC.** Among the finest Cameos certified, this Superb Gem 1951 proof Franklin half dollar exhibits brilliant, reflective fields around boldly rendered, softly frosted relief elements. Close study reveals a few faint polishing lines on the obverse portrait (mint-made), but there are no discernible post-mint imperfections. Population: 21 in 67 Cameo, 0 finer (4/15). NGC ID# 27VB, PCGS# 86692

1952 Half Dollar, PR66 Ultra Cameo
Condition and Contrast Rarity

4031 **1952 PR66 Ultra Cameo NGC.** Cameo contrast is inconsistent on proofs from 1950 through 1970, but this PR66 Ultra Cameo Franklin half has it in spades. Patina is minimal on frosted devices and watery fields alike. NGC has graded just eight PR66 Ultra Cameo examples and only five Ultra Cameos finer (5/15). NGC ID# 27VC, PCGS# 96693

1952 Franklin Half, PR66 Deep Cameo
Brightly Reflective

4032 **1952 PR66 Deep Cameo PCGS. CAC.** The untoned surfaces show intense contrast to produce the inimitable jet-black-against-silver-white contrast that collectors of Deep Cameo coinage so value. Of the 82,000-Ish proofs of this issue struck, PCGS reports only nine Deep Cameo examples in this grade (one a PR66+), and one PR67 finer (5/15). NGC ID# 27VC, PCGS# 96693

EARLY DOLLARS

1795 Flowing Hair Dollar, XF40
B-7, BB-18; Light, Colorful Toning

4033 **1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, XF40 NGC.** Bowers Die State I. Mint luster remains across the fields and devices of this attractively toned Flowing Hair dollar. Variegated shades of lilac, cerulean-blue, lemon-yellow, and amber-gold cover both sides, with considerable detail remaining despite the moderate wear from circulation. A glass reveals no marks of any consequence on the obverse, and abrasions on the reverse are limited to sporadic Mint-related adjustment marks that angle across the eagle's legs, while a few other faint lines cross the border near STATES. The B-7, BB-18 variety is popular for the Head of '94 portrait and the Three Leaves reverse. With bold, unblemished rims and dentils, this is an ideal collector-grade early dollar with plenty of eye appeal. PCGS# 39973 Base PCGS# 6852

1795 Flowing Hair Dollar, VF25
Silver Plug, B-1, BB-21
Visible on Both Sides

4034 **1795 Flowing Hair, Two Leaves, Silver Plug, B-1, BB-21, R.2, VF25 PCGS.** While the BB-21 variety is readily available among the 19 different Flowing Hair die pairs, it is notably scarce with the Mint-applied silver plug to adjust planchet weight. The Mint experimented with various ways to bring planchets to standard weight, with the ubiquitous file marks on early coinage bearing witness to one method of removing extra weight on overweight planchets.

Underweight planchets were a different problem. Either they were returned to the melting pot, or, for a brief period in 1794 and especially 1795, some were brought up to standard by drilling a hole and inserting a silver plug to adjust the weight of the raw planchet. The planchet was then struck, and — depending on the quality of strike — the silver plug would be either invisible, barely detectable, or a curious circular anomaly that was readily apparent. Today's collectors prefer the latter, but either through wear or happenstance the plug often requires careful scrutiny to be identified.

Even after the plug was inserted, planchets were seldom the correct weight. Most would be heavy and require further adjusting with a file, such as the present coin. It shows the outline of a circular plug on both sides, as well as adjustment marks on the bottom obverse border beneath the date. The plug is clearly visible on the reverse, but less so on the obverse unless aided by a glass. This attractive VF dollar offers smooth, problem-free surfaces with silver-gray patina, strong rims and pleasing detail on the devices. Population: 6 in 25, 25 finer (4/15). PCGS# 39994 Base PCGS# 6854

1795 Flowing Hair Dollar, XF45
B-6, BB-25, Three Leaves

4035 **1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, XF45 PCGS.** The sharpness of the strike — better than is usually seen on this variety — is evident in the boldness of remaining detail on this Choice XF Flowing Hair type coin, despite light circulation. The denticles grow minutely weak at the lower obverse and upper reverse rims, as usual, but the stars are crisp and the central devices yield strong detail in the hair curls and eagle's feathers. Adjustment marks occasionally interrupt the reverse periphery and appear briefly on the eagle's breast, but leave the obverse untouched. Both sides show consistent steel-gray patina with overtones of light golden color. BB-25 is typically seen only in VF and lower grades, and is notably scarce in XF condition; AU or better representatives are genuinely rare. PCGS# 39975 Base PCGS# 6852

1795 Flowing Hair Dollar, Choice VF
B-5, BB-27

4036 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF35 PCGS.** This-oh-so-close-to-XF example of the most available early dollar die variety should make a fine acquisition for some astute bidder. Considerable luster resides under a moderate layer of gray-green patina. A loupe reveals a few stray marks, but the only one seen otherwise is a straight scrape across the eagle's midsection. PCGS# 39977 Base PCGS# 6852

1795 Flowing Hair Dollar, XF40
B-5, BB-27, Three Leaves

4037 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 NGC.** Die State III. BB-27 is an available Flowing Hair variety, ideal for type representation. This XF example exhibits beautiful, original patina in deep gunmetal and olive-gray hues, with lighter tan-gray shades also seen over the relief elements. The borders are strong, devoid of adjustment marks, and the central devices show unusually bold definition, particularly on the eagle's body and head. A smooth, problem-free type coin. Housed in a prior generation holder. PCGS# 39977 Base PCGS# 6852

1795 Flowing Hair Dollar, XF40
B-5, BB-27, Three Leaves

4038 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 ANACS.** Die State II. The surfaces of this lightly circulated BB-27 representative show original olive-gray, gold, and lilac patina. The strike is evenly executed and the central devices are boldly defined, showing only minor wear over the high points. The eagle's head is sharp. Light adjustment marks appear frequently around the reverse periphery, but do not intrude upon the interior. PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27, Flowing Hair Dollar, XF40
Always Popular Type Coin

4039 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 PCGS.** Bowers-Borckardt Die State II. The BB-27 variety is a favorite choice of type collectors because attractive mid-grade examples, like the present coin, are not difficult to locate. This popular variety is most often identified by the diagonal "bar" in the obverse field, near the top curl of Liberty's hair. Like most examples of the BB-27, this coin shows some weakness on the details of the central devices. Q. David Bowers believes this was caused by the high relief of Liberty's profile, which caused this motif to wear down quickly. The peripheral design elements show little wear, and the surfaces are remarkably free of contact marks. Pleasing blue-steel patina blankets both sides, with attractive highlights of gold. PCGS# 39977 Base PCGS# 6852

1795 Flowing Hair Dollar, Choice XF
Three Leaves Type, B-5, BB-27

4040 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 NGC.** Bowers-Borckardt Die State II with the die crack from the left stem reaching toward the rim but not yet to it. The B-5 or BB-27 is the most common (but still immensely desirable) Three Leaves variety with the diagonal bar in the left obverse field, level with the top strand of hair. This variety is seen nearly as often as every other die marriage combined, and as such it is the ideal candidate for a type collection. Both sides have exquisite gold and iridescent toning over satiny luster, and aside from a rim bump near 2 o'clock on the obverse, the coin is well-preserved for the grade. *Ex: Summer FUN Signature (Heritage, 6/2010), lot 3778; Central States Signature (Heritage, 4/2012), lot 4838.* PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Flowing Hair Dollar, MS62
Extremely Sharp Three Leaves Type

4041 **1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, MS62 PCGS.** Bowers Die State III. A textbook example of the die state, with a faint die crack running from the end of the stem to the edge, combined with an unusually bold strike at the centers. This Mint State dollar is remarkably well-struck both on the central motifs and also at the margins, where every star center is defined and the legends are uniformly bold. The coin is well-centered with uniformly strong dentils and rims.

Despite being the most common 1795 die pair by far, the BB-27 is scarce in Mint State — as are all Flowing Hair dollars. The dies were prepared with deeply impressed central motifs, which produced dollars of high relief on the portrait and eagle, which was both a blessing and a curse. Although a few fully struck coins display wonderful detail on Liberty's hair and (rarely) on the eagle's breast, more often weakness of strike blunts those same details. The high relief was especially susceptible to wear from circulation. As a result, most BB-27 examples lack detail in the hair strands and nearly all show a flat spot on the eagle's breast.

This coin is an exception. It displays Liberty's entire high-profile portrait to full advantage, and the eagle's rounded breast is full-feathered with a mere hint of blending at the highest point. Soft luster shines through iridescent toning on both sides, with sage and olive-gold patina on the obverse, and more intense rich, rainbow hues of blue, violet, magenta, gold, and forest-green on the reverse. A few inconsequential marks require a glass to see, as do microscopic lumps from die rust that are visible beneath the bust truncation and near the ribbon ends on the reverse. There are no adjustment marks anywhere on the coin.

Type collectors and early dollar enthusiasts should take special note of this extremely sharp Mint State example. Population (all Three Leaves varieties): 6 in 62, 14 finer (4/15). PCGS# 39977 Base PCGS# 6852

1795 Off-Center Draped Bust Dollar, AU50 Sharp B-14, BB-51 Example

4042 **1795 Draped Bust, Off-Center, B-14, BB-51, R.2, AU50 NGC.** Die State I. Attribution of this die marriage is made simple by the position of Liberty's highest hair curl, directly beneath the B in LIBERTY. Only one other variety is known for the 1795 Draped Bust dollar: B-15, BB-52, which has the highest hair curl directly below E in LIBERTY. The current variety is off-center, with Liberty's bust placed too far left by the die maker. It is said that the model for the obverse portrait was Anne Bingham, a prominent Philadelphia socialite who was renowned for her beauty.

This lovely, richly toned representative displays a deep layer of even rose-brown across each side. The design elements are generally well-produced, although typical softness occurs on the eagle's head and breast feathers, and on the lower right reverse dentils. Shallow adjustment marks appear near the right obverse periphery, extending over stars 9 through 12, which may account for partial incompleteness in those stars' centers. High-point wear is even and minimal, and surface marks are few. A pair of minuscule marks just to the right of the eagle's beak should prove reliable as pedigree identifiers.

Ex: ANA Signature (Heritage, 7/2008), lot 1732; Long Beach Signature (Heritage, 5/2012), lot 3906. PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Centered Dollar B-15, BB-52, Sharp XF40

4043 **1795 Draped Bust, Centered, B-15, BB-52, R.2, XF40 PCGS.** Die State V. This impressively detailed first year Draped Bust dollar retains most of the eagle's breast feathers, with slight friction evident only on the very center of the breast, leg, and neck; Liberty's cheek and drapery are similarly well-detailed for the XF level. The golden-brown surfaces are glossy and relatively unmarked. A pair of tiny edge marks are noted on the reverse at 4 o'clock. Bust dollar collections by *Guide Book* variety are increasingly popular.

Ex: Long Beach Signature (Heritage, 9/2005), lot 3647. PCGS# 39995 Base PCGS# 6858

1795 B-15, BB-52 Dollar, XF45 Centered Draped Bust

4044 **1795 Draped Bust, Centered, B-15, BB-52, R.2, XF45 PCGS.** Bowers Die State IV. This olive-green first-year Draped Bust dollar displays plentiful indications of luster within the wreath, legends, wings, and curls. Protected regions display cobalt-blue and cherry-red toning. The usually encountered die state with a narrow extension above the rectangular die break in Liberty's hair. PCGS# 39995 Base PCGS# 6858

1795 Draped Bust Dollar, MS63
B-15, BB-52, Centered Bust

4045 **1795 Draped Bust, Centered, B-15, BB-52, R.2. MS63 PCGS Secure.** Despite the fine work by portrait artist Gilbert Stuart and Mint Engraver Robert Scot (with the possible assistance of John Eckstein), the Mint decided the bust portrait was placed too far left in the original Draped Bust dollar design (BB-51), which gave the coin an unbalanced, crowded appearance on the left side of the obverse. There is no doubt the Centered Bust portrait of BB-52 is a more pleasing rendition of the motif. The position of the stars and the date in relation to the portrait provide a simpler way of distinguishing the two varieties, since the date is much closer to the bottom curl on BB-52 and star 1 does not touch the curl.

The Centered Bust variety is somewhat scarcer than the Off-Center Bust in terms of estimated mintage. The BB-52 is decidedly scarcer in Mint State. David Bowers suggests the striking of presentation pieces may be the reason more high-grade Off-Center Bust dollars are known, which provides further confirmation that the off-center variety was struck first. Our own auction archive reflects the infrequent appearance of Uncirculated Centered Bust dollars.

Both the obverse and reverse of this wonderfully preserved Small Eagle dollar show a trace of reflectivity beneath lovely lilac and antique-gold toning, with occasional pale violet peripheral accents. A short, paper-thin abrasion on the bust is virtually the only obverse mark on the smooth surfaces. The strike is simply extraordinary for the issue, with stars that display full radial lines and hair curls that are crisp and well separated. Even the eagle's feathers are quite bold except over the center of the breast and on the legs. A small cluster of adjustment marks appear diagonally over the center of the eagle, the most prominent of which extends across the top of the breast to the eagle's head.

Of the few Mint State BB-52 dollars we have been fortunate to offer over the past decade, only a single example (an MS65 PCGS coin) exceeds the quality and the appeal of this magnificent early dollar. PCGS# 39995 Base PCGS# 6858

1796 B-4, BB-61 Dollar, AU53
Small Date, Large Letters

4046 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU53 NGC. Bowers Die State I with three detached forehead curls. This variety and the 1796 B-6, BB-64 are listed in the *Guide Book* as "1796 Small Date, Large Letters." There are only three examples known (to this cataloger) of the Rarity-8 1796 Bolender-6 marriage, so a Bolender-4 is the only practical alternative for those who collect by *Guide Book* variety. This is a partially lustrous representative with light to medium powder-blue and chestnut-gold toning. The sole mentionable abrasions are a line in the right obverse field near Liberty's mouth, and a thin vertical mark on Liberty's chest.
Ex: Albany Collection (Heritage, 9/2002), lot 7755; St. Louis Central States Signature (Heritage, 5/2005), lot 7558, which realized $13,800.
PCGS# 40000 Base PCGS# 6860

1797 Draped Bust Dollar, VF30
10x6 Stars, B-3, BB-71

4047 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF30 NGC. Bowers-Borckardt Die State I. The arrangement of the obverse stars in a 10x6 pattern indicate the BB-71 variety. Moderate even wear shows on the pleasing surfaces, with a few minor abrasions, but no adjustment marks. Attractive gray patina visits both sides, with hints of gold and blue. PCGS# 40004 Base PCGS# 6865

1798 Small Eagle Dollar, B-1, BB-82, VF20
Attractive, Unabraded Example of the Type

4048 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, VF20 PCGS. Bowers Die State II, showing an incomplete lowest hair curl and numerous die cracks on the reverse, most prominently from a dentil to the second T in STATES to a leaf. Rose-gray surfaces show grade-consistent wear throughout, but each side is refreshingly free of mentionable abrasions, planchet adjustment marks, or other distractions. A nice example of the Small Eagle reverse type for early dollar or type collectors. PCGS# 40006 Base PCGS# 6867

1798 Small Eagle, 13 Stars Dollar, XF45
B-1, BB-82, Colorful Surfaces

4049 **1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF45 PCGS.** Bowers Die State III, showing lapping on the lowest hair curl and a die crack from the left-bottom serif of the N in UNITED running upward through the wreath and berry. The 1798 Small Eagle, 13 Stars is a great choice for collectors to represent the Small Eagle reverse subtype among the silver dollars, as it, along with the 15 Stars 1798 Small Eagle (B-2, BB-81) are among the more plentiful Small Eagle varieties. They are also last-year type issues, as later in the year the Heraldic Eagle reverse would supplant the design. A lovely melange of colors appears on each side of this Choice XF example, walnut-brown, pale blue, gold, and rose predominating. The surfaces are well-struck and uniformly free of major marks or planchet adjustments. The attractive original surface color is a plus. PCGS# 40006 Base PCGS# 6867

1798 Draped Bust Dollar, XF45
Popular 13 Stars, B-1, BB-82

4050 **1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF45 PCGS. CAC.** Bowers-Borckardt Die State III. Only two varieties are known for the 1798 Draped Bust dollar with the Small Eagle reverse. This coin represents the slightly more available BB-82 variety, with 13 obverse stars and large letters in the reverse legend. The obverse die was used again to strike the BB-91 variety of 1798, while the reverse was also used to strike the 1797 BB-73 issue.

The present coin is an attractive Choice XF specimen that exhibits light wear on the strongly impressed design elements and lightly abraded mouse-gray surfaces, with hints of lavender patina. A spidery die crack extends from the left base of N in UNITED through the branch. Population (for the variety): 3 in 45, 5 finer (4/15). PCGS# 40006 Base PCGS# 6867

1798 Draped Bust Dollar, XF45
Scarce B-31, BB-115 Die Pair

4051 **1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.4, XF45 NGC.** Bowers Die State IV. Struck from a late state of the dies, with heavy die cracks clearly visible on both sides at the margins and around the legends. The BB-115 die pair is elusive both in an absolute and conditional sense. Few examples exist in any grade, and Choice XF examples such as the present coin are close to the Condition Census for the variety. A speckling of slate-gray toning joins undertones of champagne-gold, with glimpses of silver luster beneath the light patina. A few scattered abrasions confirm the assigned grade. PCGS# 40032 Base PCGS# 6873

1798 Large Eagle, Pointed 9 Dollar, XF45
Very Scarce B-31, BB-115 Variety

4052 **1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.4, XF45 PCGS.** Bowers-Borckardt Die State IV or possibly beyond, as the "heavy die crack" just to the right of the O in OF on the reverse is approaching a full-on break. Faint luster still glimmers through the rich patina on this Choice XF example, lighting up the blue and rose-silver outer tones as well as the gold-to-gray of the interiors. PCGS# 40032 Base PCGS# 6873

1799/8 B-3, BB-141 Draped Bust Dollar, XF45
'Hidden Stars' 15 Stars Reverse

4053 **1799/8 15 Stars Reverse, B-3, BB-141, R.3, XF45 PCGS.** Bowers Die State IV. BB-141 is the first use of the 1799/8 obverse for the year. The die is shared with varieties BB-142 and BB-143 to create a total of three overdated die marriages in 1799. While the overdate is easily recognized, the reverse of BB-141 is, if anything, more interesting than the obverse. A die cutter's error in placing the field stars resulted in two extra stars cut into the field (15 stars vs. the specified 13 stars). To cover up the blunder, the leftmost and rightmost clouds were enlarged to conceal two of the stars, but the hidden stars' lower points remained visible. A corrected reverse was soon employed (no word on the die cutter's fate).

This attractive, sharply struck example of the 15 Star reverse displays golden highlights over natural, medium-silver surfaces. The coin shows virtually no marks or abrasions other than a pair of Mint-caused planchet defects — one beneath 1 of the date, and the other at 5 o'clock on the reverse. A small dig near the second 9 in the date is not too distracting. Population (for the variety): 1 in 45, 12 finer (5/15). PCGS# 40064 Base PCGS# 6883

1799/8 Silver Dollar, B-3, BB-141, MS63+
Condition Census Example

4054 **1799/8 15 Stars Reverse, B-3, BB-141, R.3, MS63+ NGC.** The 1799/8 BB-141 variety is quickly distinguished by the overdate and the two star points extending from the reverse clouds at the left and right. The 15 Stars Reverse is thought to be an engraver's error, with 13 stars intended. Upon realizing his mistake, the engraver expanded the left and rightmost clouds in an attempt to efface the additional stars. The recovery was not completely successful, and as a result this variety is sufficiently distinct to merit its own *Guide Book* listing. This piece is a lovely example with original gray color and light blue highlights in the protected areas. A couple ticks in the obverse right field do not detract, and the strike reveals defined hair curls. The reverse is gray with hints of gold and crimson at the periphery. Bowers' *Silver Dollars and Trade Dollars of the United States* (1993) lists 14 Uncirculated examples, of which this piece is surely one of the most aesthetically appealing. Census: 1 in 63 (1 in 63+), 5 finer (4/15). PCGS# 40064 Base PCGS# 6883

1799 Bust Dollar, MS61
B-12, BB-160; No Berries, Star 1 Distant

4055 **1799 7x6 Stars, B-12, BB-160, R.3, MS61 NGC.** An intermediate die state between Bowers Die State II and III, with the crack from the foot of 1 extending to the right below 7 and another from the rim to the bottom edge of the bust, but no crack is seen between the drapery and star 13, nor any other cracks among the obverse stars. The reverse die was reground on different occasions during its many uses (BB-158 to BB-161), removing any trace of berries except for a faint pair of empty stems. The field star below the first cloud (furthest left) is small and spindly, formerly known as the "runt star" among early collectors.

This example is the former Howard Rounds Newcomb and "Col." E.H.R. Green coin, and comes with a small original box in which it was stored for many years, where it likely acquired its dramatically beautiful deep-blue, lilac, and peach-gold toning. The surfaces retain their prooflike character and luster beneath the intense patina. Sharply struck, the original appeal and splendid pedigree make this an important representative of the variety for the advanced collector. PCGS# 40051 Base PCGS# 6878

1799 Draped Bust Dollar, XF45
B-11, BB-161, 7x6 Stars Obverse

4056 **1799 7x6 Stars, B-11, BB-161, R.3, XF45 PCGS.** Die State IV, unlisted. The reverse cracks have advanced considerably, and a new, lump-like die break is evident on the bottom edge of the eagle's beak. The strike quality on this coin is excellent, evenly executed with strong definition on the central devices and in the border regions. Light wear accounts for the grade, but the finer details are surprisingly well-defined for the XF level. A lack of adjustment marks further heightens the visual appeal. Deep gunmetal-gray patina yields hints of gold and olive when tilted in-hand, and the overall quality for the grade is outstanding. PCGS# 40052 Base PCGS# 6878

1799 Draped Bust Dollar, XF45
B-14, BB-167

4057 **1799 7x6 Stars, B-14, BB-167, R.3, XF45 PCGS.** Die State II. There are several tiny die chips in the upper-right obverse field, and star 13 is near to, but does not touch the bust. This early Draped Bust dollar has shades of light to medium-gray color noted in the fields and over the central devices, and deep charcoal-green and cobalt-blue iridescence near the peripheries. Evenly worn across the highpoints, with a few minuscule marks and faint hairlines noted on both sides.
Ex: Long Beach Signature (Heritage, 5/2008), lot 867. PCGS# 40058 Base PCGS# 6878

1800 Draped Bust Dollar, AU58
B-16, BB-187, Ex: Queller

4058 **1800 B-16, BB-187, R.2, AU58 NGC.** Bowers-Borckardt Die State III. The obverse shows an arcing die crack through the crook of the neck, into the right field and to star 10. Clash marks appear above stars 3 through 6, and on the reverse the roughness between ES has developed into a periodlike crack between the letter tops.

Although this is a fairly common variety within the context of early dollars, this piece is far and away finer in terms of overall eye appeal than the usually seen specimen. Just a trace of rub is visible on the obverse highpoints, and gorgeous orange-gold and ice-blue patina coats the still-lustrous surfaces on both sides. A premium coin worthy of a premium bid. Census (for the variety): 2 in 58, 1 finer (4/15).
Ex: Stack's (privately); Queller Family Collection (Heritage, 4/2008), lot 2067 PCGS# 40073 Base PCGS# 6887

1800 Dollar, B-17, BB-196, MS64
Finest Certified of the 12 Arrows Variety
Stunning Originality

4059 **1800 12 Arrows, B-17, BB-196, R.1, MS64 NGC.** The 1800 Draped Bust dollars offer an interesting subset of *Guide Book* varieties for collectors including the well-known "Dotted Date" and "Americai" die marriages. The 12 Arrows Variety has its own listing, too, on page 219 of the 2016 *Guide Book*, adding to the importance and collector appeal of the variety. BB-196 is the sole representative of the 12 Arrows reverse. The obverse die is unique to the BB-196 die pair, too, and it is distinctive for the distance of star 1 from Liberty's curls and a similar gap from star 7 to the L of LIBERTY — the only 1800 variety with such a compactly centered star arrangement.

The present coin displays all the signs of being tucked away since it the day it was struck. Original, deeply ingrained toning blankets both sides in shades of deep gunmetal-blue and coppery-gold with subtle lavender accents, with the toning patterns identical for both the obverse and reverse. Soft luster glows from beneath the stunning patina, which could only have been acquired during many years of careful preservation, perhaps in a coin box or an early coin board or album.

Like most examples of the variety, die clashing imparts a "collar" along Liberty's neck. A trio of radial die cracks from the left edge identify this piece as produced from the latest state of the dies (Bowers Die State IV). Even so, the coin shows a sharp strike on all the obverse and reverse elements. The surfaces are essentially unmarked, save for a minor rim irregularity above the L that pedigrees the piece.

The Bowers 2013 *Encyclopedia of United States Silver Dollars* describes the BB-196 12 Arrows variety as "not unusual to encounter in EF. AU specimens are in the rare category, and Mint State coins are exceedingly rare." Supporting the statement, the list of Notable Specimens contains just five examples, led by a pair of MS63 NGC coins. At MS64 NGC, the current near-Gem dollar must be considered the finest-known for the variety according to the population data as well as the authoritative Bowers reference. PCGS# 40079 Base PCGS# 6890

1802 Draped Bust Dollar, AU55
Lightly Toned B-6, BB-241 Example

4060 **1802 Narrow Date, B-6, BB-241, R.1, AU55 PCGS.** Die State III. This attractive piece is aglow with warm golden toning that accentuates subtle reflectivity in the reverse fields. The strike is even and well-centered with complete dentils on each side. Sharp stars and boldly rendered interior motifs further contribute to the technical quality, while slight amber toning over the highest points of the devices denotes trivial friction which precludes a Mint State grade. Evidence of die lapping in Liberty's back hair curls confirms the late die state, as is usually seen on BB-241. This die pairing is the most available Draped Bust variety in high grades, an ideal acquisition for the type enthusiast. PCGS# 40088 Base PCGS# 6895

1802 Dollar, B-6, BB-241, AU58
Sharp, Deeply Toned

4061 **1802 Narrow Date, B-6, BB-241, R.1, AU58 NGC.** Die State III, as usual, with die lapping evident in the hair curls. BB-241 exists in moderate numbers in AU and lower Mint State grades, but the rarity of most other die pairings in this grade range puts increased demand on BB-241 by type collectors seeking a single high-end Draped Bust dollar. This example is a firmly graded, original representative. Both sides exhibit deep gunmetal-gray toning, but the design elements display seemingly untouched high points — the overall sharpness is superb for an AU coin. Border dentils are complete on each side and the design elements are boldly brought up. There are no distracting adjustment marks and the surfaces are pleasantly smooth. PCGS# 40088 Base PCGS# 6895

1803 Small 3 Dollar, B-4, BB-254, AU53 Top-Notch Eye Appeal

4062 **1803 Small 3, B-4, BB-254, R.3, AU53 PCGS.** Bowers Die State I, as always. This is one of the Small 3 die varieties showing a long top to the 3, with 1 in the date touching a curl and star 15 nearly touching the bust. The leftmost arrow is just barely under the left serif of N in UNITED. This AU53 example is largely untoned ivory-white with a touch of rose here and there. Scattered marks are minor, save for a single vertical mark on Liberty's neck. The strike is soft on the lower bust on the obverse and some of the stars on the reverse, but the eye appeal remains top-notch. PCGS# 40099 Base PCGS# 6900

GOBRECHT DOLLARS

1836 Gobrecht Dollar, Proof Details Judd-60, Die Alignment I

4063 **1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Rim Repair — Proof. NGC Details.** Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). The angling die clash line above the eagle's wing is readily apparent, indicating this piece was produced in the last half of the final week of December 1836. Minor rim repair was done in order to minimize the effects of several rim bumps and nicks. The repair is not immediately apparent to the unaided eye, and the coin certainly presents well in-hand. The fields are moderately reflective, as one expects from all Original 1836 dollars, and there is a slightly hazy deep blue and yellow-gold patina present on each side — the reverse being several shades lighter and brighter in appearance. As expected, there are a few small contact marks in the fields, but none are of individual importance or worthy of mention. PCGS# 11225

1836 Gobrecht Dollar, AU Details
Judd-60, Die Alignment IV

4064 **1836 Original Gobrecht Dollar, Judd-60, R.1, Medal Alignment — Smoothed — PCGS Genuine. Proof, AU Details.** Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite the F in OF after a medal turn). The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. The diagonal die clash mark above the eagle's wing is barely visible with magnification. The surfaces are slightly granular, Yet is spite of this the fields are still moderately bright and semireflective. There are no traces of actual wear over the devices, and the strike details are completely brought up, even the foot and sandal of Liberty are fully defined. Even, light golden-rose toning is seen across each side.

Seated Liberty, C. Gobrecht, drawing in ink.

1839 Gobrecht Dollar, PR65
Probably the Finest Known Die Alignment III Judd-104

4065 **1839 Name Omitted, Judd-104 Restrike, Pollock-116, R.3, PR65 NGC.** Silver. Reeded Edge. Die Alignment III (head of Liberty opposite the N in ONE after a coin turn). Die State b. The level (or even slightly downward sloping) angle of the eagle on the reverse is a common trait seen on virtually all Die Alignment III dollars, including all the copper strikings produced from the late 1850s through the 1870s. To the best of our knowledge all Die Alignment III dollars are from this later restriking period and all exhibit the characteristic die cracks on the peripheral reverse lettering. As such, Die Alignment III dollars all have unquestioned mirroring in the fields, unlike their "proof" counterparts actually struck in the 1830s.

The reverse shows die cracks connecting the tops of TE, the tops of MERI (actually beginning just left of M but not quite to A), and the bottoms of LAR. Die Alignment III 1839 dollars are many times rarer than Die Alignment IV pieces, with only about a dozen examples believed known, according to Saul Teichman of USPatterns.com. As mentioned, this is an unquestioned proof. Gobrecht dollars from 1836 have traditionally been termed proof strikings, but they lack the convincing depth of mirroring associated with true proof strikings. The only unquestioned proof 1836 is the Korein-47 coin, now in the ANS. The fabric of this coin is clearly that of an actual proof from the late-1850s (or later).

Just the slightest ring of iridescent toning surrounds the margins on each side with a pale layer of golden-rose patina in the center (but the coin essentially presents as brilliant). A few hairlines are present from an old cleaning, but there are no readily identifiable pedigree markers on either side. This is an exceptionally rare Gobrecht dollar, and in this die alignment it may very well be the finest known. It is certainly the finest Die Alignment III we have handled. PCGS# 11446

SEATED DOLLARS

1845 Seated Dollar, AU58
Some Luster Remaining

4066 **1845 AU58 PCGS. CAC.** This nearly Uncirculated 1845 Seated dollar retains hints of semiprooflike mirroring in the fields, while the design elements are well-struck and show only minor high-point friction. Light golden toning accents each side. A low mintage of only 24,500 coins contributes to this issue's scarcity in AU and Mint State grades. Population: 12 in 58, 13 finer (4/15). NGC ID# 24YF, PCGS# 6931

1845 Seated Dollar, MS61
Rarely Offered in Mint State

4067 **1845 MS61 NGC.** The 1845 Seated dollar comes in with a scant mintage of only 24,500 pieces, affecting the availability of Mint State survivors which are rare in any grade. This MS61 example is essentially brilliant, with satiny luster and semireflective fields. Trivial weakness is noted on the upper edge of the eagle's left (facing) wing, but the design elements are otherwise well brought up. Light, scattered abrasions contribute to the grade. Census: 8 in 61, 9 finer (4/15). NGC ID# 24YF, PCGS# 6931

1854 Seated Dollar, XF45
Scarce in Any Grade

4068 **1854 XF45 PCGS.** Slate-gray to dove-gray patina appears on each side of this Choice XF 1854 Seated dollar. The scant mintage of 33,140 pieces makes the issue scarce in any grade. The 1853 silver-content changes for minor coins ensured that the Seated dollars, left at the old standard, would not circulate, but rather be hoarded and/or melted. This piece shows a peppering of mostly light abrasions and a decent strike. Population: 17 in 45, 74 finer (4/15). NGC ID# 24YT, PCGS# 6942

1867 Seated Dollar, MS64
Semiprooflike Fields

4069 **1867 MS64 NGC.** Most Seated dollars from the 1860s are elusive in high grades, partly a result of limited mintage figures during and immediately after the Civil War. Hoarding and melting took its toll on the population as well, and high-end survivors are widely sought-after. This Choice 1867 representative displays bold devices set against beautiful semiprooflike mirrors. A few small grazes are present, but none are individually distracting. Traces of light amber-gold toning grace the peripheral regions. Census: 9 in 64, 3 finer (4/15). NGC ID# 24ZA, PCGS# 6960

1872-CC Seated Dollar, AU50
Just 3,150 Pieces Struck

4070 **1872-CC AU50 PCGS.** A single die pair was used to strike the reported mintage of 3,150 pieces, which circulated widely after the value of silver content declined below face value in 1873. This example displays a uniform glossiness over semiprooflike surfaces. Traces of orange-gold luster remain in the recesses of the olive-brown fields and devices with a few blue accents. Small marks and abrasions from storage and circulation appear on both sides. Slight weakness of strike on the obverse stars and Liberty's head are normal for this Carson City issue. Population: 17 in 50 (1 in 50+), 43 finer (4/15). NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

1859 Seated Dollar, Attractively Toned PR64

4071 **1859 PR64 NGC.** Not nearly as elusive as other proofs from the 1850s, the 1859 issue was produced in bulk rather than made-to-order as a result of the Mint's effort to commercialize the making of proofs for the public. 800 pieces were struck, of which as many as 450 pieces were melted as unsold (actually, unwanted) at the end of the year. Proofs were available for the last time in 1859 at face value, and a premium was charged starting in 1860 according to recent research by John Dannreuther. This example is lustrous and deeply mirrored, with variegated toning of blue, violet, bronze-gold, and reddish-gold over both sides. A few delicate marks and hairlines are hidden in the toning. NGC ID# 252D, PCGS# 7002

1864 Dollar, PR63 Deep Cameo
The Only Deep Cameo Certified

4072 **1864 PR63 Deep Cameo PCGS.** The proof 1864 Seated dollar, with a mintage of only 470 pieces, is rarely encountered with a Cameo designation, and this Select representative is the *only* Deep Cameo certified by either leading service (4/15), making it fundamentally in a class by itself. The strike is boldly executed and the field-device contrast is stark. A light golden glaze accents each side. PCGS# 97007

1865 Seated Dollar, Gem Proof
Richly Toned

4073 **1865 PR65 NGC.** The 1865 Seated dollar proofs were the last official issue of the No Motto design, as the famous 1866 No Motto Seated dollars were struck clandestinely. Only 500 of the proofs were struck and high-grade representatives are conditionally challenging. This Gem proof has elegant patina, largely blue on the obverse with a more even blend of peach-silver and sea shades on the reverse. Both sides also offer touches of rose. A crisply detailed and captivating coin well-suited to a variety of date and type sets. Census: 32 in 65 (2 in 65+), 13 finer (4/15). NGC ID# 252K, PCGS# 7008

1869 Seated Dollar, PR64 Cameo
Lightly Toned and Deeply Mirrored

4074 **1869 PR64 Cameo PCGS. CAC.** In 1869, the Mint took little care to produce proofs with frosted devices, and as a result, Cameo representatives of the proof 1869 Seated dollar are in the distinct minority. This near-Gem example displays profoundly deep mirroring in the fields and ample frost over the sharply defined relief elements. Shades of lavender-gray and ocean-blue toning accent portions of each side, attesting to the originality of the surfaces. Population: 16 in 64 Cameo, 7 finer (5/15). PCGS# 87017

1872 Seated Dollar, PR65
Just One Proof Finer at PCGS

4075 **1872 PR65 PCGS.** A beautiful proof dollar with natural proof set toning and a razor-sharp strike on both sides. The obverse displays full cameo contrast between the frosted figure of Liberty and the deep-mirror fields. Dramatic tones of neon-blue and peach-gold shimmer with mint luster. The reverse is less contrasted but equally resplendent in shades of blue, violet, and gold. Population: 21 in 65 (1 in 65+), 1 finer (5/15). NGC ID# 252U, PCGS# 7020

1873 Seated Dollar, PR65
Undesignated Contrast

4076 **1873 PR65 NGC.** Proof Seated dollar production amounted to only 600 coins in 1873, the final year of production. Trade dollar coinage took over and saw the striking of an additional 865 proofs of that design. This Seated Liberty representative is a beautiful Gem, showcasing warm golden toning that deepens to amber around the borders. Boldly struck with minimal hairlines. Modest field-device contrast heightens the visual appeal. Census: 16 in 65, 5 finer (4/15). NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

1877-S Trade Dollar, MS65
Rare This Fine

4077 **1877-S MS65 NGC.** Even the single highest mintage of the series, more than 9.5 million pieces, is not enough to keep the 1877-S Trade dollar from being a condition rarity in Gem. This colorful example has warm luster through peach and blue patina of varying intensities. Well-struck throughout. Census: 29 in 65, 6 finer (4/15). NGC ID# 253E, PCGS# 7046

1877-S Trade Dollar, MS65
Strong for the Grade

4078 **1877-S MS65 NGC.** Large S. Trade dollars are systematically difficult to locate in Gem or finer condition, and even the otherwise available 1877-S bows to this rule. This MS65 representative is fully deserving of the assigned grade, showing complete detail and remarkably well-preserved surfaces, with particular notice given to them fields which are unusually clean. Radiant luster dances beneath a veil of light golden toning, delivering a high degree of eye appeal when held in-hand. Census: 29 in 65, 6 finer (4/15). NGC ID# 253E, PCGS# 7046

1877-S Trade Dollar, Appealing MS65
Top-Notch Type Coin

4079 **1877-S MS65 NGC.** The copious mintage exceeding 9.5 million pieces makes the 1877-S Trade dollar an ideal coin for type-collecting purposes, and the present Gem offers generous eye appeal and beaming luster on well-struck surfaces that are largely untoned, save for wisps of cinnamon and pearl-gray patina. Far finer than the usually seen AU examples of this issue, plentiful in circulated grades. Census: 29 in 65, 6 finer (5/15). NGC ID# 253E, PCGS# 7046

1878-CC Trade Dollar, AU58
Key to the Series

4080 **1878-CC AU58 NGC.** A low initial mintage of 97,000 1878-CC Trade dollars was reduced even further when 44,148 dollars, mostly consisting of the 1878-CC, were melted on July 19 of the same year. The issue is the rarest in the series in circulated condition, and only 350 coins are thought to survive across the entire grade spectrum. This near-Uncirculated example features medium gray toning over each side with olive and russet peripheral shadings. Well-struck with a trace of friction over the devices. A small reeding mark is seen above Liberty's thigh. Census: 10 in 58, 28 finer (5/15). NGC ID# 253F, PCGS# 7047

PROOF TRADE DOLLARS

1879 Trade Dollar, PR64+
Old-Time Patina

4081 **1879 PR64+ NGC. CAC.** Aside from the almost unobtainable 1884 and 1885, which were not official issues, the proof Trade dollar series does not contain any real "stoppers," making a complete date set fully pursuable by patient collectors. The 1879 is the second proof-only Philadelphia issue, and production spiked to 1,541 pieces (up from 900 coins in 1878). This is a collectible near-Gem example with deep original toning that displays warm sun-gold color in the centers and deeper violet, lilac, and aquamarine around the peripheries. Sharp design elements further contribute to the visual appeal. NGC ID# 27YR, PCGS# 7059

1882 Trade Dollar, PR65 Cameo
Enticing Eye Appeal

4082 **1882 PR65 Cameo NGC.** Cameo representatives of this late-series proof-only issue are elusive in all grades, but become truly rare at the Gem level. This piece exhibits distinct contrast with a faint glaze of pale champagne toning that deepens ever so slightly toward the peripheries. The strike is sharp and the surfaces are devoid of distractions. Census: 32 in 65 Cameo (4 in 65 ★ Cameo), 16 finer (4/15). PCGS# 87062

1883 Trade Dollar, Brilliant PR64 Cameo

4083 **1883 PR64 Cameo PCGS. CAC.** Aside from a few prohibitively rare 1884 and 1885-dated proofs which turned up in private hands after the turn of the century, the 1883 is the final issue in the proof Trade dollar series. This Choice Cameo example displays brilliant cameo contrast, accentuated by bold design definition and deeply reflective fields. Close study with a glass reveals only a few faint hairlines, hidden from the naked eye. Population: 34 in 64 (2 in 64+) Cameo, 29 finer (4/15). PCGS# 87063

MORGAN DOLLARS

1879-CC Dollar, Lightly Toned MS62

4084 **1879-CC MS62 NGC.** A degree of semiprooflike reflectivity accentuates the radiant, frosty luster that rolls over each side of this well-struck 1879-CC Morgan dollar. Hints of rose-gold grace the peripheries and a light champagne hue visits the central regions. Light grazes on Liberty's cheek limit the grade. This issue is one of the more challenging dates in the Carson City short set to locate in Mint State. NGC ID# 253T, PCGS# 7086

1879-CC Silver Dollar, Key MS62
Good Eye Appeal

4085 **1879-CC MS62 NGC.** Normal Mintmark. The surfaces of this key-date dollar are highly reflective and show rich luster throughout both sides, silver-gray accented by amber-gold and rose patina, thicker at the rims. Liberty's cheek shows a few minor scrapes and a couple of larger ones that determine the grade, but this piece shows much eye appeal and will prove appealing to many potential bidders. NGC ID# 253T, PCGS# 7086

1879-CC Morgan, Untoned MS63
Reflective and Appealing

4086 **1879-CC MS63 PCGS.** Normal CC. Considerable prooflike reflectivity emanates from the untoned silver-white surfaces on each side of this Select key-date Morgan dollar. The distributed abrasions are minor for the grade, and the eye appeal is top-notch. The status of this issue as the first of three great and popular Carson City keys makes it important for collectors to obtain a nice one. Consider yourself invited. NGC ID# 253T, PCGS# 7086

1879-CC Morgan, MS64
Seldom Seen Finer

4087 **1879-CC MS64 NGC.** The 1879-CC Morgan is one of the more challenging Carson City issues overall, second only to the key-date 1889-CC. This Choice example displays brilliant, frosty luster. A few light abrasions in the left obverse field are the only noticeable surfaces flaws, although some of the usual striking softness is mentioned on the eagle's breast and the hair above Liberty's ear. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, MS62
Capped Die, VAM-3,

4088 **1879-CC Capped Die, VAM-3, MS62 NGC.** A Top 100 Variety. Chipping of the die around a large mintmark punched over a smaller one renders the entire mintmark area rough and unmistakable as the Capped Die variety. A brilliant and thickly frosted example, untoned, with no major distractions and a decent strike. Lustrous although a touch subdued, with a scattering of ticklike marks accounting for the grade. Always popular for the variety and as the second-scarcest Carson City issue. PCGS# 133869 Base PCGS# 7088

1879-S Silver Dollar, MS68
Superb Type Coin

4089 **1879-S MS68 PCGS. CAC.** The 1879-S is an available issue in the Morgan dollar series, almost on par with the 1880-S and 1881-S in regards to popularity as a type coin. This MS68 representative showcases a level of sheer quality and eye appeal that is largely unobtainable on anything but the so-called "common dates." The strike is bold and the brilliant, frosty surfaces are aglow with intense, seemingly flawless luster. A CAC endorsement confirms the lofty state of the preservation, and there are no numerically finer representatives (4/15). NGC ID# 253X, PCGS# 7092

1880-CC Silver Dollar, Untoned MS67
Tied for Finest Graded

4090 **1880-CC MS67 NGC.** This untoned silver-white Superb Gem 1880-CC dollar shows essentially pristine preservation throughout both sides, complementing the bold, frosty luster and top-notch eye appeal. Only the most trivial signs of contact appear, and they are largely removed from the prime focal points. A nice, clean cheek on Liberty and a sharp strike are among other virtues. Tied for the finest graded. Census: 22 in 67, 0 finer (4/15). NGC ID# 2542, PCGS# 7100

1881 Morgan Dollar, MS65 Deep Mirror Prooflike
None Finer at Either Service

4091 **1881 MS65 Deep Mirror Prooflike NGC.** The untoned surfaces are silver-gray and profoundly contrasted between nicely frosted devices and reflective, mirrored fields. A couple of minor grazes on Liberty's lower cheek and a small dig on the neck determine the grade but fail to defeat the broad eye appeal. Few examples of this mintage of 9.1 million-plus coins can approach the quality of this piece. Census: 12 in 65 Deep Mirror Prooflike, 0 finer (5/15). NGC ID# 2546, PCGS# 97125

1881-CC Morgan Dollar, MS67
Radiant Mint Bloom

4092 **1881-CC MS67 PCGS.** Thick, glowing mint frost is reminiscent of freshly fallen snow over the ice-white, delicately preserved surfaces of this outstanding Superb Gem. The design elements are fully rendered and the level of eye appeal is incredible. The 1881-CC was well-represented in the GSA sales of the 1970s, but high-end examples remain elusive. PCGS has seen only four numerically finer submissions (4/15). NGC ID# 2547, PCGS# 7126

1881-CC Dollar, VAM-2
MS66 Deep Mirror Prooflike

4093 **1881-CC MS66 Deep Mirror Prooflike PCGS. CAC. VAM-2.** The second 8 in the date "has die chips in a band across middle inside of upper loop," per VAMworld.com. Bill Fivaz is credited with the 1972 VAM discovery. This is a brightly mirrored high-grade Carson City dollar with minimal toning and only inconsequential contact. NGC ID# 2547, PCGS# 97127

1881-O Morgan, MS66
Near-Finest Known Example

4094 **1881-O MS66 PCGS.** Treasury releases in the 1950s and 1960s created a large pool of Uncirculated 1881-O silver dollars, but the issue remains rare above the Gem level. The obverse of this brilliant example exhibits thick frost with smooth fields. The neckline reveals a trio of minor bagmarks, but the focal point of the cheek is clean. The reverse is equally flashy as the textured eagle contrasts with lustrous, unbroken surfaces. Neither PCGS or NGC has graded an example at the MS67 level, and such an event would draw substantial market attention. Population: 26 in 66 (3 in 66+), 0 finer (5/15). NGC ID# 2548, PCGS# 7128

1881-S Dollar, MS68 ★
Incredible Multicolor Iridescence

4095 **1881-S MS68 ★ NGC.** NGC has rightly mounted this coin back-to-front inside the encapsulation to stress the incredible iridescent rainbow toning on the reverse, which includes bands of canary-yellow, ice-blue, cherry-red, and aqua. The obverse is completely color-free, providing a startling contrast, and both sides are remarkably free of observable contact. Among the finest certified at NGC (4/15).
Ex: Central States Signature (Heritage, 4-5/2009), lot 2995; Chicago Signature (8/2011), lot 4517. NGC ID# 2549, PCGS# 7130

1882-CC Morgan, MS66 Deep Mirror Prooflike
Dazzling Cameo Contrast

4096 **1882-CC MS66 Deep Mirror Prooflike PCGS. CAC.** The Deep Mirror Prooflike population of 1882-CC Morgan dollars thins considerably in Gem and finer grades, and these coins are among the most highly sought-after of the issue. This piece showcases stark white-on-black contrast between the sharp, frost-white devices and the glass-black mirroring in the fields. A couple faint grazes on the cheek are all that limit the grade. Population: 73 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (5/15). NGC ID# 254B, PCGS# 97135

GSA DOLLARS

1883-CC Morgan Dollar, MS67+
GSA Hoard Example

4097 **1883-CC GSA MS67+ NGC.** Hundreds of thousands of Carson City Morgan dollars were stored for decades in Treasury vaults before surfacing in the Treasury releases and GSA sales in the 1960s and '70s. This delightful example is one of the finest surviving examples of the 1883 issue.

Band certified in the original black label GSA holder, this high-end Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved brilliant surfaces radiate vibrant mint luster on both sides. Eye appeal is truly outstanding. Census: 33 in 67 (3 in 67+, 3 in 67 ★), 0 finer (4/15). PCGS# 518869 Base PCGS# 407144

1883-CC Silver Dollar, MS66+
Stark Cameo Deep Mirror Prooflike

4098 **1883-CC MS66+ Deep Mirror Prooflike PCGS. CAC. VAM-5.** Deep Mirror Prooflike Morgan dollars are iconic coins and have long been regarded by many as the epitome of perfection in this highly collected series. The present piece displays full cameo contrast with sharp, frosty devices and impressively deep mirroring in the fields. A faint suggestion of light golden toning is revealed when tilted in-hand, although abrasions remain almost indiscernible. Numerous light die lines in the fields on the reverse are diagnostic of VAM-5. PCGS lists only two finer pieces in the Deep Mirror Prooflike category (4/15). NGC ID# 254H, PCGS# 97145

1883-O Morgan Dollar, MS66 Deep Mirror Prooflike
Untoned and Sharply Impressed

4099 **1883-O MS66 Deep Mirror Prooflike PCGS.** The beautifully frosted devices on this untoned Premium Gem contrast nicely against reflective fields. Liberty's cheek is free of major marks but shows a couple of small luster grazes. The strike is better-impressed than most of this issue. The 1883-O is seldom seen in this grade with Deep Mirror Prooflike designation, and never finer. Population: 16 in 66 Deep Mirror Prooflike, 0 finer (5/15). NGC ID# 254J, PCGS# 97147

1884-CC Silver Dollar, MS67 Prooflike
Brilliant Cameo Appearance

4100 **1884-CC MS67 Prooflike NGC.** The 1884-CC is one of the most plentiful issues in the Carson City short set, but contrasted examples are major rarities at the Superb Gem grade level. This gleaming cameo shows frost-white devices set against deeply mirrored fields, with overall beautifully unabraded surfaces. Well-struck and eye-appealing. Census: 8 in 67 (1 in 67+) Prooflike, 0 finer (4/15). NGC ID# 254M, PCGS# 7153

1884-S Morgan Dollar, MS61
Elusive Issue in High Grade

4101 **1884-S MS61 PCGS.** Despite the nominal mintage of 3.2 million pieces, the 1884-S Morgan dollar is one of the more challenging issues of the series in high grade. Most of the mintage was released into circulation at the time of issue and few high-quality examples were saved by contemporary collectors. While worn circulated pieces are relatively easy to locate today, Mint State examples are elusive at all levels.

The present coin is a scarce MS61 specimen, with well-detailed design elements that show just a trace of softness on the hair above the ear. A scattering of minor contact marks is evident on both sides and frosty mint luster shines through shades of dusky gold and lavender-gray toning. NGC ID# 254P, PCGS# 7156

1885-CC Dollar, MS67
Snow-White and Remarkably Clean

4102 **1885-CC MS67 NGC.** A pristine Gem that shows boldly struck devices and gleaming luster. The eye appeal is greatly enhanced by the gorgeous quality of the surfaces, which show nary a nick or mark even with the assistance of a strong glass. Precious few are found so well-preserved, and this one is calculated to impress. Census: 86 in 67 (5 in 67 ★), 5 finer (4/15).
Ex: FUN Signature (Heritage, 1/2005), lot 11329. NGC ID# 254S, PCGS# 7160

1885-CC Morgan, MS66+ Prooflike
Top-Notch Eye Appeal

4103 **1885-CC MS66+ Prooflike PCGS. CAC.** High-grade examples of this issue survived well into the 20th century to be dispersed in the great Treasury hoards. This piece shows excellent preservation and a sharp strike over well-contrasted surfaces with a light pinkish-gold tone, far finer than most examples seen. A great-looking Carson City Morgan. Population: 45 in 66 (4 in 66+) Prooflike, 2 finer (4/15). This is one of only seven in the MS66 grade level with the CAC green approval sticker. NGC ID# 254S, PCGS# 7161

1885-CC Morgan Dollar, Stunning MS67 Prooflike

4104 **1885-CC MS67 Prooflike NGC.** Pristine preservation appears on the untoned surfaces of this Superb Gem, showing blazing luster and deep silver-on-black contrast between the frosty devices and jet-black, reflective fields. This coin will see intense competition from the many Morgan dollar collectors who prefer untoned coins (and possibly quite a few who prefer toned coins but appreciate stunning eye appeal). Census: 4 in 67 Prooflike, 0 finer (4/15). NGC ID# 254S, PCGS# 7161

1885-S Silver Dollar, MS66
Major Condition Rarity

4105 **1885-S MS66 PCGS.** This is an important offering, as the rarity of the 1885-S Morgan dollar in MS66 is such that a collector may go a long time and never see one offered; finer pieces are almost unobtainable. This example displays intense, frosty luster with well-struck devices and remarkably few abrasions. Appears brilliant at a gander, but reveals a hint of light golden toning upon further study. Population: 39 in 66 (1 in 66+), 2 finer (4/15). NGC ID# 254U, PCGS# 7164

1886 Morgan Dollar, MS68
Condition Rarity Meets Eye Appeal

4106 **1886 MS68 NGC.** While Morgan dollar dates such as the 1881-S might be available for a price in MS68, the 1886 is a significantly rarer coin at that grade level despite a mintage of almost 20 million pieces. This MS68 survivor has bold cartwheel luster and gorgeous patina, concentrated plum and peach in an arc at the upper left obverse with a more even silver-blue tint elsewhere. Census: 29 in 68 (3 in 68+, 2 in 68 ★), 0 finer (4/15). NGC ID# 254V, PCGS# 7166

1886-O Dollar, Near-Gem
Extremely Rare Any Finer

4107 **1886-O MS64 PCGS.** One of the clearest cases of condition rarity in the Morgan dollar series, the 1886-O goes from a common coin in worn grades to scarce in Choice and an extreme rarity in Gem. This near-Gem has glimmering silver luster cartwheeling across each side and scattered dots of smoke-gray along the reverse margins. PCGS has graded just three numerically finer examples (5/15). NGC ID# 254W, PCGS# 7168

1888-S Morgan, MS66
Important Condition Rarity

4108 **1888-S MS66 PCGS.** From a mintage of just 657,000 pieces, most surviving Mint State examples of the 1888-S dollar fall into the MS63 to MS64 grade range, with Premium Gem survivors downright rare and finer specimens prohibitively rare.

This is a truly remarkable coin, showcasing an uncharacteristically needle-sharp strike and strong eye appeal. The reverse displays light golden peripheral toning surrounding brilliant, semiprooflike fields, while the obverse exhibits deep, iridescent hues of violet, magenta, teal-blue, aquamarine, and amber-rose. Significant mint luster shines through the frosted patina, and close examination reveals no detracting surface abrasions. Population: 27 in 66 (2 in 66+), 3 finer (4/15). NGC ID# 2557, PCGS# 7186

1889-CC Dollar, AU50
An Important Key Date

4109 **1889-CC AU50 NGC.** The 1889-CC dollar is one of the significant keys to the Morgan series, and among Carson City issues is, according to Bowers (2004), the most elusive. Moreover, he contends that: "In comparison to the demand for them, examples are rare in all grades." The silver-gray surfaces of this AU piece are imbued with hints of light gold, and retain traces of luster in the recessed areas. The design elements are generally well-defined for the issue, including a modicum of detail in the hair over Liberty's ear. Distributed light marks are visible over each side. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, Lightly Toned AU53

4110 **1889-CC AU53 NGC.** Subtle color includes untoned silver-gray areas contrasting against small patches of gold and rose on this still-lustrous key-date Morgan dollar. The reverse adds a few hints of deeper brownish patina. Only minor marks are scattered about each side, none overt, creating a pleasing aura of originality and good preservation. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Well-Struck AU58
Bright, Semiprooflike Fields

4111 **1889-CC AU58 PCGS. CAC.** Only 350,000 dollars were struck at the Carson City Mint in 1889, a figure low even by Carson City standards. Michael Standish (2014) writes: "This was due to the fact that the mint wasn't fully operational until October 10." This near-Mint example retains considerable luster on its essentially untoned surfaces. The design elements are well-struck, indeed better so than usually occurs on this date. The hair above Liberty's ear and the eagle's breast feathers display decent detail. A few scattered marks are in concert with the grade designation. NGC ID# 2559, PCGS# 7190

GSA DOLLAR

1890-CC GSA Dollar, MS62
Scarce Carson City Emission

4112 1890-CC GSA MS62 NGC. A better-date Carson City GSA dollar that offers dynamic luster and a bold strike. Light wheat-gold toning visits the left obverse margin. Small marks are distributed, but none are offensive. A box and certificate accompany the lot, but the certificate number has been clipped and the two halves of the box are separated. PCGS# 518878 Base PCGS# 407198

MORGAN DOLLARS

1891-S Morgan, MS66
Conditionally Scarce Example

4113 1891-S MS66 PCGS. CAC. Morgan dollars are ever-popular with collectors, and for good reason, as they represent an irresistible combination of physical size, market availability, and high states of preservation. Advanced specialists are not left behind, and condition scarcities such as the present example challenge even the leading Registry Set builders. This a brilliant Premium Gem shows smooth surfaces that reveal only minimal chatter in the left obverse field. PCGS has graded but eight finer examples in MS67, while the NGC *Census* reports two pieces in MS67. Population: 85 in 66 (7 in 66+), 8 finer (5/15). NGC ID# 255K, PCGS# 7210

1892-S Morgan Dollar, Untoned AU55
Popular Key Date

4114 1892-S AU55 PCGS. This untoned silver-white Choice AU 1892-S Morgan dollar is certified in a PCGS green-label holder, showing lots of eye appeal and much luster remaining. A few dark toning flecks are amid the denticles on the reverse, but there are no major surface marks or other distractions. This attractive key-date silver dollar should do well at the auction. Most surviving examples of this issue show major impairments or liberal wear, as the average grade of *certified coins* is only XF40 — meaning, for every AU55 such as this piece, there is a counterbalancing VF25 piece somewhere! NGC ID# 255P, PCGS# 7218

1893 Morgan Dollar, MS65+
Low-Mintage, Semikey Issue

4115 **1893 MS65+ NGC.** Demand always outstrips the supply of 1893 dollars, which were produced with a low mintage at just 378,000 pieces. The rarity of the 1893 San Francisco and New Orleans issues adds to the pressure from date collectors. This example is amazingly toned and sharply struck. Dappled tones of cobalt-blue and ruby-red reach from the obverse border to the portrait, with golden luster shining through. The reverse displays caramel-gold border toning with a creamy-silver center. Few examples of the Philadelphia issue ever exceed MS65 in grade — just 10 pieces in MS66 and none finer is the total population of certified coins any finer by PCGS and NGC combined. NGC Census: 4 in 65+, 4 finer (4/15). NGC ID# 255R, PCGS# 7220

1893-CC Silver Dollar, MS61
Green Label Holder

4116 **1893-CC MS61 PCGS. CAC.** Radiant, silvery-white luster illuminates above-average design definition on this final-year Carson City dollar. Light, scattered abrasions, primarily on the obverse, define the grade, but none are singularly detracting. Lightly clashed on each side. CAC-approved in a green label holder. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Effulgent Cartwheel Luster

4117 **1893-CC MS63 PCGS.** Effulgent cartwheel luster runs over surfaces that are largely untoned, save for a blush of rose in the centers, more perceptible on the reverse. The grade is determined more by luster grazes on Liberty and in the fields than by mentionable abrasions. Good eye appeal prevails overall, even though the strike through the centers is a tad deficient. This last-year Carson City Morgan issue is elusive in higher Mint State grades. NGC ID# 255S, PCGS# 7222

1893-CC Morgan, Toned MS64
Final-Year Carson City Issue

4118 **1893-CC MS64 PCGS.** The 1893-CC was the final silver dollar issued at the famous Carson City Mint, and is widely popular among numismatists both young and old. Most examples, however, are heavily abraded, as Bowers elaborates on in *A Guide Book of Morgan Silver Dollars:* "A piece MS63 or finer, with minimum bagmarks, is a numismatic find and is very special. Discount poor strikes and 'baggy' coins, and you'll find that remaining pieces in the marketplace are few and far between."

This example exhibits vivid blue-gray and aquamarine hues around the margins, with pale lavender-gray in the centers, while strong luster cartwheels beneath the patina. The strike is pleasing, and any grade-limiting abrasions are well-hidden by the rich coloration. PCGS has certified only 13 numerically finer representatives (4/15). NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Well-Struck MS64+
The Last Carson City Morgan

4119 **1893-CC MS64+ NGC. CAC.** The 1893-CC is the last of the Carson City Morgans, and is very popular as such. The near-Gem level of preservation is the finest grade that will likely be encountered by most collectors, as NGC and PCGS have certified fewer than 30 examples grading higher (5/15). The lustrous surfaces of this MS64+ coin are essentially brilliant and are devoid of the significant contact marks that often occur on this issue. Additionally, the design elements are well-struck, including the hair over Liberty's ear. The CAC sticker affirms the above-average eye appeal. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS62 Prooflike
Seldom Found This Reflective

4120 **1893-CC MS62 Prooflike PCGS.** Unmistakable mirroring in the fields ranks this piece in a distinct minority of 1893-CC dollars awarded a Prooflike designation by PCGS. Traces of light golden color preclude full mint brilliance, but leave the frosty devices with subtle cameo contrast. Weakly struck in the centers, as usual, with grade-consistent abrasions on the obverse. Population: 64 in 62 Prooflike, 25 finer (4/15). NGC ID# 255S, PCGS# 7223

1893-O Morgan Dollar, Untoned MS62

4121 **1893-O MS62 PCGS.** Certified in an old PCGS green-label holder with untoned surfaces and brimming with luster and eye appeal, this MS62 1893-O Morgan dollar shows a few ticks and marks on Liberty's cheek and elsewhere that determine the grade. Minor strike softness in the usual areas of each side, along with light die clashing visible on the reverse, are neither distracting nor surprising. NGC ID# 255T, PCGS# 7224

1893-S Morgan, Attractive Choice VF

4122 **1893-S VF35 PCGS.** The surfaces on this Choice VF 1893-S dollar show a typical satiny texture, untoned silver-white in the centers with tinges of rose and gold near the rims. A few stray marks are as expected, but there are no blatant abrasions. The profile of Liberty shows particularly good preservation. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Pleasing XF45
A Coveted Key-Date Issue

4123 **1893-S XF45 PCGS.** The light gray surfaces of this Choice XF key-date Morgan exhibit appropriately defined design elements. The few scattered minute marks are in keeping with a large silver coin that has experienced light circulation. All in all, this is a pleasing example of this key date issue.

In a March 24, 2015 *Numismatic News* article, Paul Green conjectures that many 1893-S dollars were released into circulation around San Francisco at the time of issue, while "tens of thousands were released sometime after 1925 in the Rocky Mountain states." In any event, the 1893-S is a popular date on the want list not only of Morgan specialists but of general collectors who desire this coveted rarity. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Details
Always In Demand

4124 **1893-S — Obverse Improperly Cleaned — NGC Details. AU.** Mint luster appears at the obverse margin and it is more prevalent on the reverse of this net-graded key San Francisco dollar. The obverse cleaning was light, with just faint swirling lines visible on the interior fields, allowing the minor abrasions and a touch of wear to define the AU sharpness designation. The reverse seems unbothered or nearly so, with rounding of the eagle's breast from light circulation and a few grade-consistent stray marks. This is a worthwhile coin for those needing the issue, because considerable appeal remains despite the unobtrusive cleaning.

1893-S Morgan Dollar, AU58
Lightly Toned and Scarcely Circulated

4125 **1893-S AU58 NGC.** If the proof 1895 is the king of the Morgan dollar series, then the low-mintage 1893-S is the prince — equally as desirable and always in demand. The desirability of this issue is such that most collectors have to settle for low-grade and/or impaired specimens. For advanced collectors, however, this wonderfully original near-Mint State example will offer a tantalizing opportunity. Both sides are partially toned in mottled olive-gold and sunset-red shades complementing appreciable areas of coin-gray remaining. A few minor abrasions are scattered about, but none are overt or distracting. The strike is quite sharp overall on surfaces that show minimal light wear, only evident on the hair over the ear and on the eagle's breast.

Ex: Central States Signature (Heritage, 5/2005), lot 9841, which brought $33,925. NGC ID# 255U, PCGS# 7226

1894-O Morgan Dollar, MS64+
Unusually High Quality and Eye Appeal

4126 **1894-O MS64+ PCGS. CAC.** From a smallish mintage of 1.7 million pieces, the 1894-O Morgan dollar is one of the most challenging issues of the series in high-grade. The 1894-O is almost always seen with a weak strike, surface marks are often a problem, and lower quality examples have uniformly dull mint luster. This high-end Choice example is a happy exception to the rule, as it features a much better-than-average strike, with just a trace of the usual softness on the hair above the ear, well-preserved brilliant surfaces, and vibrant mint luster on both sides. Eye appeal is truly outstanding. PCGS has graded 11 numerically finer examples (4/15). NGC ID# 255W, PCGS# 7230

1895-O Morgan Dollar, Lustrous AU58

4127 **1895-O AU58 PCGS.** This is a "slider Uncirculated" coin that would likely have passed for Mint State in the days before third-party authentication and certification. Minimal wear appears on the high points, and the surfaces are largely untoned and brimming with luster. The 1895-O Morgan dollar is elusive in any grade; circulated pieces up to VF35-XF40 are seen most often. NGC ID# 255Y, PCGS# 7236

1895-O Morgan, Minimally Marked AU58

4128 **1895-O AU58 PCGS.** An AU58 example of this date is "just right" for many collectors, as a Mint State example with minimal abrasions is going to cost 3x-5x as much. This silver-white piece shows top-notch eye appeal and wear that is barely perceptible on the high points. Liberty's cheek is nicely preserved. This piece would fit well into a mostly Mint State fine Morgan dollar collection. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, MS60
Semiprooflike, Appealing for the Grade

4129 **1895-O MS60 NGC.** It would be difficult to imagine a more attractive coin for the MS60 grade level, the scarcity of the issue notwithstanding. This 1895-O Morgan dollar is better struck than one would expect for this New Orleans issue, and delivers surprisingly prominent semiprooflike mirroring in the fields. There are no obtrusive abrasions, contrary to the typically cited criteria for the grade, but we do note numerous light grazes on the cheek and adjacent field that are revealed upon close examination; their blanket-like nature accounts for the limited grade. The 1895-O had a mintage of only 450,000 coins, which is scant in the context of the series which is renowned for coinages that stretch well into the millions annually. Mint State examples of this issue are particularly scarce, and experience heavy demand from the many collectors who pursue this vast and impressive series. NGC ID# 255Y, PCGS# 7236

1895-S Morgan Dollar, MS63
Lightly Toned and Semiprooflike

4130 **1895-S MS63 NGC.** Mintage of the 1895-S was limited to 400,000 pieces in the wake of the repealed Sherman Silver Purchase Act, but it is still the most-available issue for the year and a prime target for Morgan date collectors. The fields of this Select Uncirculated example show semiprooflike reflectivity that contrasts with frosted motifs. Some lightly mottled almond-gold toning adds originality to the brilliant silver luster beaming beneath. A few minor abrasions and an average strike define the assigned grade. NGC ID# 255Z, PCGS# 7238

1895-S Dollar, MS63
Strong Mint Luster

4131 **1895-S MS63 PCGS.** The sharp cartwheel luster is suggestive of a higher grade, but a few too many bagmarks define the Select Uncirculated designation. To the coin's credit, the marks stand out against the semireflective surfaces and crisply frosted central devices perhaps more than they would on a coin of lesser Mint freshness. Just 400,000 pieces were struck, making this a desirable semi-key issue (and the most available representative of the year for date collectors). NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, MS64
Choice for the Grade

4132 **1895-S MS64 PCGS.** The eye appeal of this semiprooflike Choice 1895-S Morgan dollar surpasses that of most other numerically equal examples. Minor softness is evident on the hair above Liberty's ear, but the overall definition is above-average for the issue. Only a few light grazes on Liberty's lower cheek limit the grade, while traces of light golden toning are discernible upon closer examination. PCGS lists only 40 numerically finer representatives (4/15). NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS64
Modest Field Mirroring

4133 **1895-S MS64 PCGS.** Semiprooflike fields are evident beneath a light golden overlay of toning, while the satiny devices reveal only minor abrasions. The usual striking softness is seen on the eagle's breast and the hair above Liberty's ear. The 1895-S Morgan is an elusive issue in pleasing Mint State condition, rarely seen finer than the present example. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS65
Alluring Luminance

4134 **1895-S MS65 PCGS.** With the sole exception of the 1899, which is actually available in Mint State, the 1895-S is the last of the really low-mintage dates in the Morgan dollar series. Only 400,000 pieces were struck, and most were distributed into circulation in the 19th century. Mint State survivors are occasionally seen, many having survived in Treasury vaults until the 1940s and 1950s when a few bags were released to the public, but almost all are heavily abraded. This is a rare Gem example, and there are only a small handful of finer pieces known. The surfaces possess a distinct originality that grows on the viewer the longer one studies this coin. Sharp, frosty design elements seem to glow, standing out from the semiprooflike fields. A hint of light golden toning is present over each side, but deeper olive and russet overtones are also observed in the peripheral regions. No major abrasions are present and the eye appeal is truly gratifying. This is a coin that almost necessitates in-person viewing to grasp its visual attributes. Population: 38 in 65 (2 in 65+), 2 finer (4/15). NGC ID# 255Z, PCGS# 7238

1896-O Dollar, Attractive MS63
Condition Rarity in the Series

4135 **1896-O MS63 NGC.** A well-recognized conditional rarity within the Morgan dollar series. This 1896-O boasts untoned, attractive silver-white, frosty luster with a few scattered marks consistent with the grade. Much eye appeal is nonetheless present, and an example in any higher Mint State grade will be far more elusive. NGC reports only 14 numerically finer (4/15). NGC ID# 2563, PCGS# 7242

1896-O Dollar, Above-Average MS63

4136 **1896-O MS63 PCGS.** Most of the nearly 5 million-piece production of the 1896-O Morgan dollar must have been released into circulation. Worn examples are common, but Mint State coins are not all that available. Those that are seen grade mostly MS60 to MS63, and PCGS and NGC have seen just 47 submissions finer than MS63 (5/15). Moreover, Wayne Miller wrote: "No other Morgan dollar is as consistently deficient in luster, strike, and degree of surface abrasions as the 1896-O."

The present Select offering transcends this profile, at least to some degree. Its silver-gray obverse surfaces and reddish-golden reverse display good luster, and its design elements, while not fully struck, exhibit better-than-average detail. The hair above Liberty's ear, for example, reveals more definition than one might expect on this issue. Finally, while both sides show grade-determining marks, these are far fewer and less severe than typically occur. NGC ID# 2563, PCGS# 7242

1896-S Dollar, MS64
Notably Smooth Surfaces

4137 **1896-S MS64 PCGS.** For Choice the grade level, it would be difficult to beat this example in terms of quality. A well-struck coin yields vibrant, satiny luster with warm tan-gold toning that lightens slightly across the reverse. Distracting abrasions are almost nonexistent, although some light lines on the cheek contribute to the grade. Finer pieces are seldom seen. NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS64
Challenging Issue in High Grade

4138 **1896-S MS64 PCGS.** Despite a mintage in excess of 5 million pieces, the 1896-S Morgan dollar is seldom encountered in high grade. This attractive Choice example is well-detailed and lustrous, with hints of golden-tan toning and only minor signs of contact. Housed in a green label holder. PCGS has graded 83 numerically finer examples (5/15). NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS65
Conditionally Scarce Example

4139 **1896-S MS65 PCGS.** Like many Morgans, the 1896-S is plentiful in Uncirculated condition but becomes challenging in Gem and above. Treasury releases ensured an ample supply of survivors, but few match the quality of this Gem example. This coin exhibits especially clean fields, with only minor curved strike-through above the cap and below B of PLURIBUS. The strike at the center of the obverse is a touch soft, with roller marks evident on the hair and temple. Both sides are largely brilliant with russet and blue-green at the rims. The reverse reveals light chatter above the motto, and there is a light die crack joining the peripheral letters. This piece is scarce at the MS65 level, and the populations of finer examples are all in the single digits. Population: 79 in 65 (5 in 65+), 4 finer (5/15). NGC ID# 2564, PCGS# 7244

1897 Morgan Dollar, Untoned MS66 Prooflike

4140 **1897 MS66 Prooflike PCGS.** Untoned surfaces on this nicely preserved piece are silver-white, nicely frosted on the devices and highly reflective in the fields. A few small ticks show on Liberty's cheek and neck. This issue seldom is seen with sufficient field-device contrast for the Prooflike designation, making this sharply struck coin an exceptional example. Population: 13 in 66 (2 in 66+) Prooflike, 0 finer (5/15). NGC ID# 2565, PCGS# 7247

1898 Morgan Dollar, Rim-Toned MS67

4141 **1898 MS67 PCGS.** A nice clean cheek on Liberty (and in the fields generally) are accompanied by untoned, frosty silver centers with a hint of tan-gold patina around the rims. The peripheral color is a tad more extensive on the reverse. A sharply struck and thoroughly appealing coin. Population: 85 in 67 (3 in 67+), 0 finer (4/15). NGC ID# 2568, PCGS# 7252

1901 Silver Dollar, MS62
Unusually Smooth Surfaces

4142 **1901 MS62 PCGS.** The 1901 is one of the most challenging 20th century Morgan dollars in high grade. The Pittman Act of 1918 took its toll on this issue, but large quantities were also paid out into circulation. It is a seldom occurrence that a pleasing Mint State example is encountered. This essentially untoned MS62 coin is surprisingly well-preserved for the grade; Liberty's cheek shows light contact, but there are no individually detracting abrasions. Light striking weakness is noted on the eagle's breast and the hair above Liberty's ear, as usual. NGC ID# 256J, PCGS# 7272

1903-O Morgan Dollar
Seldom-Seen MS66 Prooflike

4143 **1903-O MS66 Prooflike PCGS. CAC.** Generous field-device contrast prevails over surfaces that are deeply reflective and show little more than a trace of color. Liberty's cheek is smooth, save for a single small tick. Even though the formerly rare 1903-O Morgan dollar flowed by the thousands from Treasury coffers in the 1960s, few Prooflike examples were among them. This sharply struck Premium Gem is far finer than most of its cohort. Population: 5 in 66 (1 in 66+) Prooflike, 0 finer (4/15). One of three in this grade with the CAC green approval sticker. NGC ID# 256S, PCGS# 7287

1904-S Silver Dollar, Satiny MS64+

4144 **1904-S MS64+ PCGS. CAC.** The 1904-S is one of the most challenging Morgan dollar issues from the 20th century, notably scarce in Gem or better grades. This Plus-designated near-Gem is devoid of major distractions and exhibits satiny luster beneath mottled amber and gold toning on the obverse and a light champagne hue on the reverse. Some of the usual striking weakness is mentioned on the eagle's breast and the hair above Liberty's ear. NGC ID# 256W, PCGS# 7294

1904-S Dollar, Lightly Toned MS66
Extremely Rare So Fine

4145 **1904-S MS66 NGC.** Unlike its New Orleans-issued counterpart, the 1904-S Morgan dollar was not heavily represented in Treasury vaults when bags of silver dollars were retrieved in the 1960s, and no reference to this date is found in connection with the Redfield Hoard of the 1970s. Mint State examples are encountered with less frequency than the certified population reports would suggest, and this issue is a major series rarity in MS66 or better condition. This NGC-encapsulated example possesses outstanding quality for the issue, including above-average luster and unusually sharp design definition. There are a few tiny ticks on Liberty's cheek, but the surfaces are otherwise undisturbed. Transitional shades of lavender-gold and violet toning add a degree of color to the satiny surfaces. Census: 6 in 66 (1 in 66 ★), 1 finer (4/15). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1880 Morgan Dollar, PR66+ Cameo
Attractive, Heavily Contrasted Example

4146 **1880 PR66+ Cameo NGC.** A popular speculation in Trade dollars, which were only produced in proof format in 1880, caused an increased demand for proof sets that year. As a result, the Morgan dollar proof mintage was a generous 1,355 pieces. This high-end Premium Gem displays sharply detailed design elements, with richly frosted devices that contrast boldly with the deeply mirrored fields. Census: 37 in 66 Cameo (2 in 66+ Cameo, 1 in 66 ★ Cameo, 1 in 66+★ Cameo), 44 finer (4/15). PCGS# 87315

1884 Morgan, Bold PR65 Cameo
Rare Rim Clipped Planchet Error

4147 **1884 PR65 Cameo PCGS.** To error collectors — and perhaps to some Morgan dollar collectors — proof Morgan dollars must be viewed as the *crème de la crème* of collecting. If proof Morgans are rare, which they indubitably are, then proof Morgan errors are immeasurably rarer. The present coin is such a "blue moon" coin: It not only is a lovely, well-mirrored and thickly frosted proof dollar, but it is also a naked-eye error coin, showing a visible rim clip at 4 o'clock on the obverse, and correspondingly at 2 o'clock on the reverse. The PCGS slab obligingly spells out "Mint Error — Rim Clipped Planchet," just in case someone might not pick up the error at first glance (which is doubtful). A light tinge of amber and blue graces the obverse periphery, and the perspicacious viewer may also detect the faintest hint of pale lilac on the reverse. PCGS has graded six examples of this issue in PR65 Cameo (one in PR65+ Cameo), with 11 finer — although those other pieces are likely not errors (4/15).
Ex: Dallas Signature (Heritage, 10/2006), lot 2340. PCGS# 87319

1885 Morgan, PR66 Cameo
Delicate Champagne Toning

4148 **1885 PR66 Cameo PCGS.** A gold-tinted, starkly contrast proof, this carefully preserved Premium Gem also boasts sharp definition of the design elements and deep mirroring in the fields. The 1885 had a fairly substantial mintage in the context of Morgan dollars (930 coins), but Cameo representatives are rarely seen this fine. Population: 20 in 66 (2 in 66+) Cameo, 1 finer (4/15). PCGS# 87320

1896 Dollar, PR66 Cameo
Sharp, Contrasted Devices

4149 **1896 PR66 Cameo NGC.** Significant cameo contrast accentuates the bold detail on each side of this Premium Gem proof, while the mirrored fields offer a crystal-clear reflection. Soft champagne toning deepens toward the peripheries, masking a few trivial hairlines in the recesses. Census: 13 in 66 Cameo, 23 finer (4/15). PCGS# 87331

1897 Dollar, Premium Gem Proof
Obverse Contrast, Reverse Toning

4150 **1897 PR66 PCGS.** The three-year span from 1896 to 1898 is famous for exquisite proof U.S. coinage, and this gorgeous Premium Gem from the middle year fits the description. While the bold electric-blue main toning and aqua crackle of the reverse precludes Cameo status for the coin, the obverse with its largely silver interior and muted-rainbow peripheral bands offers clear contrast. Population: 18 in 66, 12 finer (5/15). NGC ID# 27ZV, PCGS# 7332

1899 Silver Dollar, PR67
Deep Original Toning

4151 **1899 PR67 NGC.** The 1899 is a popular date due to the scarcity of circulation-strike examples. This Superb Gem proof exhibits deeply reflective fields and fully rendered, satiny devices, but the chief enticement is by far the rich, original toning that blankets each side in deep sun-gold, violet, ocean-blue, and olive-green hues. Census: 13 in 67 (1 in 67+), 5 finer (4/15). NGC ID# 27ZX, PCGS# 7334

1899 Dollar, Magnificent PR68 Obtained Directly From the Mint

4152 **1899 PR68 NGC.** Ex: Eliasberg. Very few U.S. coins exhibit the untampered originality of this wonderfully preserved proof. The cataloger in the Eliasberg Collection was careful to note that this was an early striking and the striations over each side are Mint-made, not hairlines. The striated dies produced a deeply mirrored coin, and the devices are lightly frosted. The center of the obverse is essentially brilliant with russet patina at the margin, while the reverse has more pronounced champagne-russet coloration. A few Mint-made planchet flaws can be found with a magnifier, the most obvious located in the right obverse field, but we do not see any post-striking defects.
Purchased directly from the Mint by J.M. Clapp, December 1899; John H. Clapp; Clapp estate, 1942; to Louis E. Eliasberg, Sr.; Eliasberg II (Bowers and Merena, 4/1997), lot 2310; FUN Signature (Heritage, 1/2012), lot 3377. NGC ID# 27ZX, PCGS# 7334

1901 Dollar, PR65 Cameo Excellent 20th Century Type Coin

4153 **1901 PR65 Cameo NGC.** As high-end circulation strikes are rare and out of reach for most collectors, proof 1901 Morgan dollars are widely acquired for type or date representation. This Gem example displays stark field-motif contrast with just a hint of light golden toning around the extreme outer peripheries. Only a few faint hairlines are discernible upon close examination. Census: 8 in 65 Cameo, 10 finer (4/15). PCGS# 87336

1921 Zerbe Proof Morgan Dollar, PR65 VAM-1AG, Sharp With Reflective Fields

4154 **1921 Zerbe PR65 NGC. VAM-1AG.** While the definitive answers are few about the exact nature of the Zerbe proofs, high-grade examples such as this coin provide an up-close view of what stirs the debate. Were they really struck in proof format? For former ANA President Farran Zerbe? The present coin certainly resembles a proof more than a prooflike circulation strike. Liberty's hair and cap are razor sharp, but the eagle shows minor blending on the legs and breast. Die polish lines conform to the VAM-1AG criteria. The iridescent fields are fully prooflike with orange, red, blue, and gold hues. The rims are high and sharp throughout. Both services recognize the existence of the proofs, estimating 100 to 125 pieces known. Census: 12 in 65 (1 in 65 ★, 1 in 65+★), 8 finer (4/15). NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

1922-S Peace Dollar, MS66
Among the Finest Certified

4155 **1922-S MS66 NGC.** The 1922-S is available in lower grades, but the collector seeking a Registry-quality example will encountered a trying challenge; Gems are seldom seen and the finest pieces known are less than two dozen coins certified at the MS66 level. This is a frosty, original representative with just a tinge of warm golden toning around the peripheries. Well-struck, with only trivial contact on Liberty's cheek precluding an even finer grade. Census: 16 in 66, 0 finer (4/15). NGC ID# 257E, PCGS# 7359

1923-D Silver Dollar, MS66+
The Sole Finest at NGC

4156 **1923-D MS66+ NGC.** The 1923-D is known as one of the more challenging dates from the early part of the series, seldom seen in MS66 and prohibitively rare finer. This piece is arguably the sole finest obtainable in an NGC holder, being the only one of 29 MS66 coins awarded a Plus designation, with none finer (4/15). Bold design elements reside amid the frosty, golden-gray surfaces, while each side also exhibits overtones of deeper sun-gold and lilac color. A few faint grazes on the cheek are all that define the grade. NGC ID# 257G, PCGS# 7361

1924-S Peace Dollar, MS65
Scarce This Fine

4157 **1924-S MS65 PCGS.** The 1924-S is a slightly better date in Mint State, but it becomes genuinely scarce at the Gem level and is extremely rare any finer. This example displays radiant, frosty luster with just a hint of pale champagne toning. The design elements are well-defined and there are no obtrusive abrasions. Population: 79 in 65 (1 in 65+), 5 finer (4/15). NGC ID# 257K, PCGS# 7364

1925 Peace Dollar, MS67
Only One Coin Numerically Finer at PCGS

4158 **1925 MS67 PCGS. CAC.** The 1925 Peace dollar is the most often certified date in the series at the Superb Gem grade level, ideal for type representation. A lack of any mentionable abrasions is the hallmark of this example, although the viewer also enjoys the well-struck devices and soft, satiny luster that shines through medium champagne-gold toning that deepens slightly toward the rims. Population: 99 in 67 (1 in 67+), 1 finer (4/15). NGC ID# 257L, PCGS# 7365

1925-S Peace Dollar, MS65
Just One Coin Numerically Finer

4159 **1925-S MS65 NGC.** The 1925-S is one of the biggest condition rarities in the Peace dollar series. Choice examples are seen with mild frequency, but Gems are rare in comparison to the demand for them; finer representatives are almost nonexistent. This issue is rarer in high grade than the also elusive 1924-S, and is about on par with the 1928-S; moreover, all three of these dates are far and away scarcer than the key 1928 in Gem condition. This 1925-S representative displays delightfully frosty luster with just a light golden hue overall; dappled olive and russet overtones further accent the reverse. Trivial striking weakness is noted in the central regions, but abrasions are at a strict minimum. Census: 66 in 65 (2 in 65+), 1 finer (4/15). NGC ID# 257M, PCGS# 7366

1928-S Peace Dollar, MS65
Major Rarity This Fine

4160 **1928-S MS65 NGC.** Of the two 1928 Peace dollar issues, the Philadelphia is the favored coin due to its low mintage of little more than 360,000 pieces — the smallest figure in the series; however, the 1928-S is arguably the more important rarity in high grades. Examples of this date can be located with ease through the Choice level, but in Gem condition, the 1928-S becomes one of the rarest issues in the series, far more so than the 1928. NGC has seen only 42 representatives in this grade, and just one piece numerically finer (4/15). The present example shows softly frosted luster shining through medium golden-gray patina that yields are few deeper amber accents in the peripheral recesses. Some minor striking weakness is evident on the eagle's wing feathers, not unusual for the issue. NGC ID# 257W, PCGS# 7374

1934-S Peace Dollar, MS64
In-Demand Key Date

4161 **1934-S MS64 PCGS.** Light caramel-gold patina visits the right obverse of this carefully preserved and extremely lustrous key date dollar, but the surfaces are primarily untoned. The strike is sharp throughout. Although several other issues have lower mintages, including the first-year 1921, the 1934-S is the scarcest in Mint State.
Ex: Dallas Signature (11/2007), lot 1458; Long Beach Signature (Heritage, 2/2009), lot 2069. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, MS65
Lightly Toned, Frosty Surfaces

4162 **1934-S MS65 PCGS.** The 1934-S Peace dollar is a challenging issue in Gem condition, and finer pieces are rarely encountered. This intensely frosty example displays radiant, gold-tinted luster and boldly rendered design elements. A tiny planchet void on Liberty's chin is mint-made and should not be mistaken for an abrasion, of which there are almost none. PCGS lists only 28 numerically finer representatives (4/15). NGC ID# 257Z, PCGS# 7377

1935 Dollar, Radiant MS66+
Tied for Finest at PCGS

4163 **1935 MS66+ PCGS. CAC.** The lofty MS66+ grade assignment is a dead-accurate representation of this coin's preservation, as the only disruptions in the vibrant, frosty surfaces are a few almost indiscernible grazes that only become detectable with 10x magnification. Fully brilliant luster accentuates the sharply rendered design elements and the overall eye appeal is nothing short of impressive for a Peace dollar. PCGS has not seen any finer representatives (4/15). NGC ID# 2582, PCGS# 7378

PROOF EISENHOWER DOLLARS

1973-S Eisenhower Dollar, Clad Bold PR70 Deep Cameo

4164 **1973-S Clad PR70 Deep Cameo PCGS.** This is a spectacular proof 1973-S clad Eisenhower dollar and one of just 10 Registry-quality Deep Cameos at PCGS in PR70. Quick-silver fields provide a mirrored, watery backdrop for the crisp, frosty design elements, and the corresponding eye appeal is unsurpassed. Just a trace of light golden toning graces the relief elements. NGC ID# 282A, PCGS# 97430

1974-S Clad Eisenhower Dollar Registry-Quality PR70 Deep Cameo

4165 **1974-S Clad PR70 Deep Cameo PCGS.** In a series as short as the Eisenhower dollars, upgrading just one coin can significantly increase the ranking of a collector's Registry Set. This is an opportunity of the sort that comes along only once in a great while, restricted by the sheer rarity of coins such as this perfectly preserved Deep Cameo Ike. This is *one of only five* 1974-S proof Eisenhower dollars at PCGS in the coveted PR67 Deep Cameo grade (4/15). The design elements are fully rendered and the stark white-on-black contrast is accentuated by just a hint of light golden color throughout the mirrors and the frosty relief elements. A beautiful, unimprovable Registry coin. NGC ID# 282B, PCGS# 97432

1853 Gold Dollar, MS66
Classic Type Coin

4166 **1853 MS66 NGC.** The 1853 gold dollar is the ideal type candidate, available with ease in lower grades for the budget-conscious collector, and obtainable for a price in higher grades for the more ambitious enthusiast. This Premium Gem example definitely falls into the latter category; the strike is boldly executed, and the frosty yellow-gold surfaces are devoid of any readily detectable disturbances. An original, high-quality type coin. Census: 41 in 66 (2 in 66+), 8 finer (4/15). NGC ID# 25BU, PCGS# 7521

1853-D Gold Dollar, MS62
Well-Struck Dahlonega Type Coin

4167 **1853-D MS62 NGC. Variety 5-G.** The 1853-D is one of the more easily obtainable gold dollars from the Dahlonega Mint in Uncirculated grades, although the issue is not quite as available as the certified population totals would suggest. This piece is unusually well-struck for the issue, although some weakness persists on the upper part of Liberty's hair bun. The stars are sharp and the surfaces are free of major distractions. Straw-gold luster accentuates the partially reflective fields and the overall eye appeal is excellent for the grade and issue. Census: 13 in 62, 10 finer (4/15). NGC ID# 25BW, PCGS# 7523

1853-D Gold Dollar, MS63
Reflective, Honey-Gold Surfaces
Rare This Well-Preserved

4168 **1853-D MS63 PCGS. Variety 5-G.** Collectors seeking high technical quality in a D-mint gold dollar have extremely limited options. The 1853-D is one of the more often seen Dahlonega issues in Mint State (the 1849-D is slightly more available), but eye appeal is usually lacking, even on pieces that are, numerically, among the finer-known gold dollars from this mint. This issue had a mintage of only 6,583 pieces. Doug Winter estimates more than a dozen Uncirculated examples are known (a moderately large figure for a Dahlonega issue), many of which have come to light in recent years; still, there are fewer examples of this date in Mint State than there are of its Charlotte counterpart, which is recognized as a condition rarity at this level.

This piece is arguably one of the nicest 1853-D gold dollars known. Original honey-gold surfaces display subtle reflectivity in the fields, and there are few grade-limiting abrasions. The top of Liberty's hair bun and portions of the denticles are a trifle soft, as expected, but the central relief elements and the stars are boldly rendered. If only one gold dollar is desired from the Dahlonega Mint, this lovely coin is hard to beat. Population: 5 in 63, 3 finer (4/15). NGC ID# 25BW, PCGS# 7523

1854 Type Two Gold Dollar, Key MS65+

4169 **1854 Type Two MS65+ PCGS.** Moving from smallest to largest, the 1854 and 1855 Type Two gold dollars are the first of the "stopper" coins in high Mint State for a fine type collection. Although there are several other mintmarked Type Two gold dollar issues, they will cost a premium over the two P-mints, whose virtually identical mintages of 780,000-plus coins each bestow type status on them. This MS65+ example of the 1854 shows marvelous luster over reddish-orange surfaces that are exceedingly well-struck. A curious trio of intersecting thin marks on Liberty's face are the only mentionable contact. Some crumbling of the dies is noted around DOLLAR on the reverse, and a bit of planchet roughness on the lower obverse. Population: 54 in 65 (4 in 65+), 14 finer (5/15). NGC ID# 25C3, PCGS# 7531

1855-C Gold Dollar, XF40
Key Charlotte Issue

4170 **1855-C XF40 NGC. Variety 2.** A rare Charlotte issue, limited in availability by a mintage of just 9,803 pieces. However, the 1855-C is subject to greater demand since it is the sole C-mint date with a Type Two (small head) obverse. Other than the non-collectible 1849-C Open Wreath gold dollar, the 1855-C is the key to a Charlotte Mint type set. The present wheat-gold piece has moderate wear on the curls and wreath. The luminous surfaces exhibit clash marks but are only lightly abraded. Traces of luster remain. NGC ID# 25C5, PCGS# 7533

1855-C Gold Dollar, AU50
Sole Type Two Charlotte Issue

4171 **1855-C AU50 NGC. Variety 2.** Charlotte gold dollar coinage yielded only 9,803 pieces in 1855, this being the only issue of the Type Two design from this mint. Doug Winter estimates that fewer than 350 pieces are extant, primarily restricted to the VF and XF grade range. About Uncirculated representatives are scarce, and Mint State pieces are out of reach for most collectors. This example shows deep olive-gold patina with minimal wear over the high points of the design. The centers are lightly struck, as usual for this issue. NGC ID# 25C5, PCGS# 7533

1855-C Gold Dollar, AU55
Scarcer Variety 1

4172 **1855-C AU55 NGC. Variety 1.** This is the rarer of the two known 1855-C gold dollar varieties, with the date positioned a trifle further left. This issue is typically seen with a soft, incomplete portrait on the obverse, and even minor wear can make the coin appear well-circulated to the novice. This Choice AU representative shows little actual friction, and retains hints of luster in the recesses. Weakness on the central reverse is characteristic of this die pairing. A pleasing green-gold example. Census: 34 in 55, 53 finer (4/15). NGC ID# 25C5, PCGS# 7533

1857-S Gold Dollar, MS61
Very Rare in Uncirculated Grades

4173 **1857-S MS61 NGC.** A challenging San Francisco issue, the 1857-S claims a mintage of only 10,000 pieces. Mint State examples are very rare and underappreciated compared to the more popular Charlotte and Dahlonega issues from this period. This piece is well-struck with bright, softly frosted luster over wheat-gold surfaces. A few light scattered abrasions limit the grade, but they do not diminish the significance of this early S-mint rarity. Census: 9 in 61, 6 finer (5/15). NGC ID# 25CG, PCGS# 7547

1858-S Gold Dollar, MS61
Low-Mintage Condition Rarity

4174 **1858-S MS61 NGC.** The 1858-S has a mintage of only 10,000 pieces and is an important condition rarity in AU and Mint State. This piece possesses full, shimmering mint luster and exhibits a hint of reflectivity on the obverse with rich reddish-gold patina throughout. There are no obvious blemishes on either side, just some minor scuffiness that is confined mostly to the obverse. Census: 8 in 61, 3 finer (5/15).
Ex: Long Beach Signature (Heritage, 9/2006), lot 3072. NGC ID# 25CK, PCGS# 7550

1858-S Gold Dollar, Sharply Struck MS62

4175 **1858-S MS62 PCGS.** As the 10,000-piece mintage might suggest, the 1858-S gold dollar is difficult to acquire in all grades. In Mint State, the date is a major rarity. The yellow-gold surfaces of this MS62 example display hints of rose on the reverse, and each side shows moderate contrast between the fields and devices. The design elements are sharply struck, characteristic of the issue. Both sides are nicely preserved. We mention a small mark in the field under Liberty's chin solely for identification purposes. Population: 2 in 62, 3 finer (4/15). NGC ID# 25CK, PCGS# 7550

1859-C Gold Dollar, AU58
A Low-Mintage, Scarce Issue

4176 **1859-C AU58 NGC. Variety 1.** The only known die pair. The 1859-C is the final gold dollar struck at the Charlotte Mint, showing a small mintage of 5,235 pieces. This issue has the dubious distinction of being among the worst struck dollars at this mint. The greenish-gold surfaces of this near-Mint example display luster in the recessed areas and are minimally abraded. The strike is more or less typical, with Liberty's hair showing weakness. The letters in LIBERTY show prominently, however, and the plumes are better-defined than ordinarily seen. The reverse wreath is relatively strong as is the denomination, date, and mintmark. The O in DOLLAR barely shows, and the dentilation on both sides is typically weak.

The 1859-C is very scarce in all grades, and Mint State coins are elusive. NGC and PCGS have graded only 36 pieces in mint condition, none finer than MS63. This is an excellent opportunity for the gold dollar specialist to acquire this infrequently seen issue. Census: 29 in 58, 23 finer (5/15). NGC ID# 25CM, PCGS# 7552

1859-C Gold Dollar, MS63
The Sole Finest at NGC

4177 **1859-C MS63 NGC. Variety 1.** The 1859-C is the final gold dollar issued at the Charlotte Mint. Production totaled only 5,235 coins, and it is believed that fewer than 250 examples survive in all grades, mostly in XF and lower levels; AU coins are scarce and Uncirculated pieces are major rarities.

More high-grade pieces trade hands now than has been the case in years past, not because more coins have been discovered, but because graders have correctly begun to compensate for the inherently poor strike that always affects this issue. Every known example of the 1859-C gold dollar shows considerable softness on both sides to an extent discernible with the naked eye. As is seen on the currently offered example, the border denticles are mushy and the central regions lack sharp definition. Mild planchet irregularity is observed in parts of the reverse field, as made. These attributes define the issue, and are not to be mistaken for coin-specific flaws. This piece is Uncirculated and possesses satiny olive-gold luster. No major abrasions are observed. The specialist will admire this coin for what it is: the *sole finest* at NGC (4/15). NGC ID# 25CM, PCGS# 7552

1860-D Gold Dollar, Lovely AU50
In an Old Green Holder
Gold CAC Label

4178 **1860-D AU50 PCGS. Gold CAC. Variety 12-P.** This is a highlight coin in the current offering of gold dollars. The 1860-D is significantly more elusive in AU and better grades than the certified populations would suggest; coinage amounted to only 1,566 pieces, and fewer than 125 examples are believed extant in all grades. This issue is also known for being one of the weakest, if not *the* weakest, strike in the entire Dahlonega series. The present example, housed in an old green label holder, is typical in this regard, and the general softness of the details likely accounts for the rather harsh AU50 grade awarded by PCGS; the CAC gold label recognizes an absence of almost any wear, while the luminous fields exhibit rich honey-gold luster. Population: 11 in 50, 44 finer (4/15). NGC ID# 25CS, PCGS# 7556

1867 Gold Dollar, Sharp and Rare MS66

4179 **1867 MS66 PCGS.** The 1867 gold dollar is an elusive issue from a small business-strike mintage of 5,200 pieces. Probably no more than 75-110 examples are extant in all Mint State grades, and circulated specimens are quite scarce as well. The true rarity of this date is generally unappreciated outside of series specialists. High-grade business-strike examples have often been mistaken for proofs in auction descriptions.

The present delightful Premium Gem offers sharply detailed design elements and some interesting clash marks on both sides. The prooflike yellow-gold surfaces are well-preserved and show no large or distracting flaws. Population: 4 in 66, 1 finer (5/15). NGC ID# 25D3, PCGS# 7566

1868 Gold Dollar, Contrasted MS66
Ex: Harry W. Bass, Jr.

4180 **1868 MS66 PCGS.** Ex: Bass. Every bit the "sparkling **gem**" it was described as in the 1985 Paramount sale, this gleaming bit of gold is boldly struck with frosty devices that deliver noticeable cameo contrast against the prooflike fields. Swirling hues of yellow and orange-gold accentuate each side, and the corresponding eye appeal is fully gratifying. Population: 5 in 66, 6 finer (5/15).
Ex: Auction '85 (Paramount, 7/1985), lot 1388, which realized $4,620; Harry W. Bass, Jr. Collection, Part II (Bowers and Merena, 10/1999), lot 170. NGC ID# 25D4, PCGS# 7567

1880 Gold Dollar, Top-Notch MS67+

4181 **1880 MS67+ PCGS. CAC.** The blond-gold surfaces show only the most minute lintmarks amid glorious luster complementing a bold strike, clearly one of the finest survivors of the tiny mintage of 1,600 circulation strikes. Fantastic eye appeal is the order of the day on this top-notch late-series gold dollar. Population: 6 in 67+, 28 finer (4/15). NGC ID# 25DJ, PCGS# 7581

1880 Gold Dollar, MS68
Collectible Low-Mintage Issue

4182 **1880 MS68 NGC.** The assigned grade about sums up this coin's magnificent quality and eye appeal, corroborating the sharp die impression and the beautifully imparted semiprooflike fields that gleam with warm honey and yellow-gold hues. An excellent type coin from a late-series mintage of only 1,600 pieces. Census: 23 in 68 (3 in 68 ★), 1 finer (4/15). NGC ID# 25DJ, PCGS# 7581

1884 Gold Dollar, MS67
Semiprooflike Fields

4183 **1884 MS67 PCGS. CAC.** The 1884 is one of the less often seen late-series issues, and is rare as fine as the MS67 level. This piece displays crisp yellow-gold surfaces, with deeply reflective fields and sharp, frosty design elements. A lack of noticeable flaws confirms the lofty grade, and the overall eye appeal is exceptional. Population: 19 in 67 (2 in 67+), 7 finer (4/15). NGC ID# 25DN, PCGS# 7585

1885 Gold Dollar, MS68
Tied for Finest Known

4184 **1885 MS68 NGC.** Interestingly, the 1885 gold dollar had one of the higher mintage figures of the period at 11,156 pieces, but is seen in high grade less often than most of its 1880s counterparts. This Superb Gem example is among the finest seen by either NGC or PCGS. Semiprooflike fields and warm honey gold color complement the carefully preserved surfaces and well-defined motifs. Numerous faint die striations in the fields should not be mistaken for hairline blemishes. A small alloy spot is noted near the AM in AMERICA. Census: 5 in 68, 0 finer (4/15). NGC ID# 25DP, PCGS# 7586

PROOF GOLD DOLLARS

1858 Gold Dollar, PR66+ ★ Ultra Cameo
The Sole Finest Known
Fewer Than 18 Pieces Believed Known

4185 **1858 PR66+ ★ Ultra Cameo NGC.** Although Mint records are lacking, it is estimated the proof 1858 gold dollar had a limited mintage of only about 25 coins. Survival estimates are generally in the 15 to 18-coin range, although Garrett and Guth suggest as many as 20 pieces are known. Regardless of the precise number, this issue is far rarer than has been suggested by certified population data which records 31 appearances at NGC and PCGS combined. Virgil Brand had three specimens in his collection and Harry W. Bass, Jr. accumulated four. This is not a reflection of availability, but rather of rarity; these numismatists recognized the scarcity of the issue and sought to acquire as many pieces as possible.

This spectacular piece is the sole finest example known, vaulted above a couple other PR66 Ultra/Deep Cameos by the coveted Plus and Star designations, two achievements to which no other Premium Gem representatives of this issue can lay claim. The coin in the Smithsonian Institution does not compare, grading just PR64 Deep Cameo, per Garrett and Guth. This piece exhibits stark field-device contrast and showcases lovely yellow-gold color. The deep mirrors show a couple mint-made strike-throughs, but the visual quality is uninhibited. Census: 2 in 66 Ultra Cameo (1 in 66+★ Ultra Cameo), 0 finer (4/15). NGC ID# 25DZ, PCGS# 97608

1881 Gold Dollar, PR64 Cameo
Paltry 87-Coin Mintage

4186 **1881 PR64 Cameo NGC.** Despite the prevalence of fully prooflike circulation strike 1881 gold dollars, the Mint only struck a small quantity of 87 proofs (40 to 50 pieces survive). The former are often mistaken for the latter, but proofs can be distinguished by a small unfinished area in the die between the lower part of the D in DOLLAR and the left wreath. Dramatic field-device contrast is the hallmark of this Choice example with frosty devices surrounded by jet-black fields. A few tiny contact marks limit the grade. Census: 7 in 64 Cameo, 5 finer (4/15). NGC ID# 25ES, PCGS# 87631

1888 Gold Dollar, PR66 Cameo
Challenging in Proof Format

4187 **1888 PR66 Cameo PCGS.** Proof gold dollar mintages spiked during the tail end of the series, making these issues popular among enthusiasts who find the prohibitively rare early dates to be out of reach. The 1888 had a production total of 1,079 pieces, somewhat less than the 1,779-coin mintage of the following year. Surviving examples are occasionally encountered, but rarely in Premium Gem condition. This outstanding Cameo is boldly struck, with deep, glassy fields and stark motif contrast. Close study of the fields reveals a few expected hairlines, but nothing out of line for the grade. Population: 7 in 66 Cameo, 0 finer (4/15). NGC ID# 25EY, PCGS# 87638

EARLY QUARTER EAGLES

1798 Quarter Eagle, BD-2, AU Sharpness Rich, Original Patina

4188 **1798 Five Berries, BD-2, R.5 — Graffiti — PCGS Genuine. AU Details.** Bass-Dannreuther Die State a. Both varieties of the 1798 quarter eagle are rare, although BD-2 is the slightly more plentiful. John Dannreuther estimates this variety had a mintage of somewhere between 480 and 838 coins, and that only 45 or 55 examples survive in all grades. By contrast, BD-1 survives in numbers no greater than 25 or 30 pieces. Any example of this issue is a rarity, regardless of condition or variety.

The present BD-2 representative has some faint, barely legible lettering scratched into the left obverse field (looks like Z62, but it is very faint), although to draw attention to it is really nitpicking an otherwise outstanding example of this early gold rarity. The surfaces are original, showcasing deep coppery-gold hues in the protected regions and the usual olive-gold color elsewhere. The border dentils and stars a sharp and only trivial softness is seen in the extreme central reverse. There are many numerically graded examples on the market which do not possess the eye appeal delivered by this coin. A true bargain in a Details holder. PCGS# 45505 Base PCGS# 7649

1806/4 Quarter Eagle, AU Details BD-1, 8x5 Stars

4189 **1806/4 8x5 Stars, BD-1, High R.4 — Improperly Cleaned — NGC Details. AU.** Bass-Dannreuther Die State b/b. BD-1 is the more plentiful of the two 1806 varieties, but it is still itself scarce, with only 75 to 90 examples believed extant. The underlying 4 is plainly evident in the lower loop of the 6 in the date. The other 1806 variety, BD-2, is an 1806/5 overdate. This piece is evenly struck, but with moderate central weakness and some light adjustment marks on the obverse portrait. Bright, green-gold patina is the norm for each side. PCGS# 45512 Base PCGS# 7654

CLASSIC QUARTER EAGLES

1834 Quarter Eagle, MS62 Prooflike Pleasing Eye Appeal, Variety 1

4190 **1834 Small Head, Breen-6138, Variety 1, R.1, MS62 Prooflike NGC.** A lovely Classic Head type coin, this Mint State 1834 is unusually well-struck on the shield and eagle's talons, and displays crisp peripheral stars. Warm straw-gold surfaces show substantial semiprooflike mirroring in the fields, and a single mark midway between star 3 and Liberty's mouth is the only flaw of note. NGC has awarded a Prooflike designation to only 14 coins, including five in this grade (one in MS62+ Prooflike) and nine finer (4/15). PCGS# 77692

1839-C Two and a Half, AU55 Elusive Early Charlotte Issue

4191 **1839-C Breen-6150, Winter-2, Variety 22, VP-001, R.4, AU55 NGC.** This die pairing shows bold repunching on the 39 in the date. As an issue, the 1839-C quarter eagle is the slightly more available of the two Classic Head issues from this mint. This piece shows only slight high-point wear, with medium green-gold patina overall. A few hints of luster remain in the peripheral recesses. NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

1842-D Quarter Eagle, AU55
Challenging Dahlonega Issue

4192 **1842-D AU55 NGC. Variety 3-F.** An intermediate die state, with faint remnants of the repunched date feature visible beneath the 1 and 8, but not as bold as is seen on early die state representatives. As might be expected for an issue with a mintage of only 4,643 pieces, the 1842-D quarter eagle is scarce in all grades; Doug Winter estimates as few as 85 to 105 examples are extant, most of which grade just VF or XF and have rather insipid eye appeal. About Uncirculated representatives are rare, and this issue is almost unobtainable in properly graded Mint State. The current coin is a bright green-gold representative with sharp AU55 detail. A lone mark on Liberty's throat is the only mentionable abrasion. Census: 11 in 55, 13 finer (4/15). NGC ID# 25GJ, PCGS# 7725

1843-O Quarter Eagle, MS63
Small Date, Original Surfaces

4193 **1843-O Small Date, Crosslet 4, Variety 2, MS63 PCGS.** Lapped obverse stars. The Small Date 1843-O quarter eagle is more available in Mint State than its Large Date counterpart, but in MS63, the rarity of the issue in general prevails, and this date is extremely difficult to locate. The currently offered example displays original green-gold luster, with a few light abrasions that define the grade. The central eagle and the hair curls around Liberty's face are weakly struck, as is typical of this branch mint issue. Population: 9 in 63 (1 in 63+), 6 finer (4/15). NGC ID# 2874, PCGS# 7731

1843-O Quarter Eagle, MS61
Large Date, Rare This Fine

4194 **1843-O Large Date, Plain 4, Variety 1, MS61 PCGS.** The mintmark is recut north on this *Guide Book* variety. The 1843-O quarter eagle's mintage is divided between the Small Date and Large Date versions, with the Large Date claiming the significantly lower production total (76,000 versus 288,002 coins). This Mint State representative shows minimal abrasions for the grade, with bright yellow-gold luster overall. The eagle's left (facing) leg is mildly soft, but the obverse portrait and stars are sharp. A shallow, mint-made planchet void is noted near star 4. Population: 7 in 61, 5 finer (4/15). NGC ID# 25GS, PCGS# 7732

1844 Quarter Eagle, Rare MS60 Example

4195 **1844 MS60 PCGS.** This rare-date survivor from the issue of 6,784 pieces is strictly Uncirculated and show considerable eye appeal on orange-gold surfaces; however, a good-sized gouge on the bridge of Liberty's nose, along with a couple of small scrapes on the jawline, go far toward explaining the grade. The peripheral stars are sharply struck, while some weakness shows in the centers of each side. The reverse on its own would grade considerably higher. Population: 2 in 60, 1 finer (5/15). NGC ID# 25GT, PCGS# 7734

1848-D Quarter Eagle, Sharply Struck AU58
Well-Preserved Example

4196 **1848-D AU58 PCGS. CAC. Variety 10-N,** showing the bottom-left corner of the mintmark a tad farther removed from the diagonal of the fraction line than on the scarcer Variety 10-M. Deep reddish-orange patina complements lighter gold color on this lovely and lightly circulated example. The 1848-D quarter eagle was struck to the extent of 13,771 pieces during the heyday of the Dahlonega Mint, before the California Gold Rush and the Civil War shifted the geography of gold coinage westward in the United States. The surfaces on this AU58 example are sharply struck and nicely preserved, a great-looking example of the issue. Population: 30 in 58, 20 finer (5/15). NGC ID# 25HC, PCGS# 7751

1853 Quarter Eagle, MS66
Tied for Finest Known

4197 **1853 MS66 PCGS.** This Premium Gem quarter eagle is a splendid representation of the type, as ample luster creates a marbled texture over the yellow-gold surfaces. The impressive strike reveals full star centers, and on the reverse the depth of the central figure boldly contrasts with the smooth fields. Quarter eagles are not often collected by date and mintmark, and as a result type collectors have more opportunity to acquire the highest graded examples. The present coin is such an occasion, and the winning bidder will own a coin exceeded by no others. The PCGS population is two coins in MS66 with no pieces finer, while the NGC census is a single example at the MS66 level (5/15). NGC ID# 25HV, PCGS# 7767

1857-S Two and a Half, Beautiful MS61
Low Mintage of 69,200 Pieces

4198 **1857-S MS61 PCGS.** Certified in a PCGS green-label holder, this 1857-S quarter shows a nice bold strike, but some microporosity shows on the planchet, and there are small abrasions scattered hither and yon. Beautiful orange-gold color and good luster are pluses on this low-mintage antebellum S-mint coin, struck to the extent of only 69,200 pieces. Population: 3 in 61, 8 finer (4/15). NGC ID# 25JF, PCGS# 7785

1860-C Quarter Eagle, MS61
Fully Lustrous Example

4199 **1860-C MS61 PCGS. Variety 1.** A sole die combination was all that was needed (or *available* might be a better term) to strike the 7,469 quarter eagles from Charlotte in 1860. No quarter eagles were struck in 1861, and by 1862 the Civil War was raging, so the 1860-C quarter eagles appear to have circulated extensively; the average certified survivor is a tad less than AU50. Scattered ticks and marks are small but fairly widespread on this coin, which nonetheless boasts full luster on attractive orange-gold surfaces. The strike is typical for the issue, showing some weakness on the eagle's left (facing) leg. Population: 4 in 61, 0 finer (4/15). NGC ID# 25JT, PCGS# 7792

1884 Quarter Eagle, MS65
Prooflike Fields
Tied for Finest Known

4200 **1884 MS65 NGC. CAC.** Were it not for the MS65 grade on the holder, this Gem 1884 quarter eagle might appear to the novice to be a proof. Quarter eagle mintage figures during this period were so low (just 1,950 coins for the 1884), that the working dies never fully lost their initial polish and many of the high-end circulation strike survivors have a distinctive prooflike appearance. The deep mirroring on this lovely piece transitions just slightly to more satiny luster near the outer peripheries to confirm the NGC designation. Nonetheless, the design elements are razor-sharp and both sides exhibit modest field-motif contrast. A few light lines in the fields appear to be all that preclude an even finer grade. The surfaces are consistently orange-gold, although a small alloy spot is mentioned near the F in OF. A small nearby planchet flaw is detected with a glass. Mint State examples of this issue are rare, with the present piece being among the finest. Census: 3 in 65, 0 finer (4/15). NGC ID# 25L8, PCGS# 7836

1890 Quarter Eagle, MS65
Underrated in Gem Condition

4201 **1890 MS65 NGC.** Mint State examples of the 1890 quarter eagle are usually obtainable, at least in lower grades; MS63 and MS64 pieces are scarce, and in Gem condition this issue is a major rarity. The present coin is boldly rendered, with warm honey-gold color and semiprooflike fields. A small graze near Liberty's mouth is the only flaw of note. Census: 9 in 65, 8 finer (4/15). NGC ID# 25LE, PCGS# 7842

1859 Quarter Eagle, PR64 Cameo
Ex: Byron Reed, Extremely Rare New Reverse
One of Two Available to Collectors

4202 **1859 PR64 Cameo NGC.** Ex: Byron Reed Collection. In 1859 a new hub with a slightly different style on the reverse was introduced for quarter eagles, commonly today called New Reverse or Type Two reverse. The new hub featured shorter arrowheads (most easily perceived as being more distant from ICA) with the top two arrowheads separate, while on the Old Reverse/Type One hub the arrowheads are longer and the top two arrowheads touch.

The Old Reverse style hub was nonetheless carried over and occasionally used on quarter eagles dated 1859, 1860, and 1861 *among business strikes*, and the Old Reverse quarter eagles of those dates are actively sought and far rarer than the New Reverse pieces, which clearly constituted the majority of the mintage for each year.

The situation is quite different for the proof 1859 quarter eagles. In the first place, the reported proof production of 80 pieces is irrelevant, as most were clearly melted afterward. The majority of the 10 or so known proof survivors are of the Old Reverse style. Our roster below accounts for 10 or 11 survivors, of which only two are of the New Reverse style.

This is the Byron Reed specimen, a remarkable piece in several respects. It is a coin of remarkable beauty and overall quality. The strike impression is sharp and nearly full, save for slight softness on the first two or three obverse stars. The Y in LIBERTY is recut. The orange-gold devices are richly frosted, and the sea-green fields are watery and pleasingly reflective.

When the coin was sold as part of the Byron Reed Collection by Spink America and Christie's, it was described in the auction catalog as follows:

> "Quarter-Eagle, 1859, type II reverse, arrowheads small and far from CA of AMERICA, *some tiny handling marks and hairlines, Proof with a pleasing cameo effect, just eighty Proofs of the date are thought to have been struck, many of which were later melted as unsold, Breen* (Encyclopedia, 6245), *makes no mention of the Type II reverse Proofs, Akers (Volume II, page 120) noted, 'a small number of Proofs, probably less than ten are known.'"*

Roster of 1859 Proof Quarter Eagles

Old Reverse
1. PR66 PCGS. Old Reverse. Stack's (4/1978), lot 805; Harry W. Bass, Jr. Collection (Bowers and Merena, 5/2000), lot 191; Harry W. Bass, Jr. Collection (Bowers and Merena, 11/2000), lot 201; American Numismatic Rarities (1/2005), lot 865; Heritage (7/2005), lot 10323, $80,500.
2. PR65 Cameo PCGS. Old Reverse. Royal Mint, London; Morton & Eden (3/2013), lot 609, $93,854. In 1859, the British Royal Mint received a double 1859 U.S. proof set. They retained one set of coins in their collection and offered the other set for sale early in 2013 (see next entry).
3. PR65 Cameo PCGS. Probably Old Reverse. Royal Mint, London. Since the British Royal Mint received a double set, and since the piece sold in March 2013 was an example of the Old Reverse, this piece is likely an Old Reverse proof as well.
4. Gem Proof. Old Reverse. F.C.C. Boyd (World's Greatest Collection, Numismatic Gallery, 1/1946), lot 127; Memorable Collection (Numismatic Gallery, 3/1948), lot 118; John Jay Pittman (David Akers, 10/1997), lot 834. Part of a complete 1859 proof set.
5. PR64 Cameo NGC. Old Reverse. David S. Wilson (S.H. Chapman, 3/1907); Clapp Collection (1942); Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 186; Superior (1/1985), lot 1714; Superior (6/1988), lot 6624; Heritage (4/2002), lot 6894.
6. PR64 Deep Cameo. Old Reverse. Smithsonian Institution.
7. PR66 PCGS. Old Reverse. Ed Trompeter (Superior, 2/1992), lot 39; Superior (8/1992), lot 562; Superior (7/1993), lot 851; Bowers and Merena (1/1995), lot 1166; Heritage (8/1996), lot 8212.
8. PR62 PCGS. Old Reverse. Stanley Kesselman (4/5/1971); Harry W. Bass, Jr. (Bowers and Merena, 10/1999), lot 503.

Additional Example
Proof. Old Reverse. Samuel Wolfson Collection (Stack's, 10/1962), lot 179. Plate insufficient to match.

New Reverse
9. Proof. New Reverse. Amon Carter Collection (Stack's, 1/1984), lot 553.
10. PR64 Cameo NGC. New Reverse. Byron Reed Collection (Christie's/Spink America, 10/1996), lot 55. **The present example.**
11. Proof. New Reverse. American Numismatic Society.

Additional Appearances
Reverse style unknown. These pieces are most likely duplicates of coins above.
Proof. William Cutler Atwater (B. Max Mehl, 6/1946), lot 1963. Unplated.

1893 Quarter Eagle, PR66 Deep Cameo Stellar Eye Appeal, Few Technical Rivals

4203 **1893 PR66 Deep Cameo PCGS. CAC.** The proof 1893 quarter eagle had a mintage of 106 pieces, slightly less than production totals would amount to in the following years. No more than 50 to 75 examples survive, and Garrett and Guth suggest the actual number may be even lower, since the certified population of 82 coins is highly inflated by resubmissions. Three examples are permanently off the market, including two in the Smithsonian Institution and another in the ANS. Our Auction Archives show only 16 previous appearances of this issue in more than two decades, and most examples grade PR65 or lower numerically; Premium Gem or finer representatives are extremely rare.

This piece showcases powerful eye appeal with a combination of stark field-device contrast and truly impressive surface preservation. The frosty motifs are fully brought up and there are no blemishes in the fields. A lovely coin that will please even the most discerning collector. Population: 3 in 66 Deep Cameo, 2 finer (5/15). NGC ID# 288G, PCGS# 97919

1898 Quarter Eagle, Attractive PR64 Cameo

4204 **1898 PR64 Cameo NGC.** A total of 136 proof quarter eagles were struck in 1898. NGC and PCGS have certified more than 220 examples, a considerable number in Cameo and Ultra/Deep Cameo formats. Attractive orange-gold color covers this near-Gem Cameo. The design elements are sharply struck and stand out against the mirrored fields. What few marks are present are trivial, especially for the near-Gem designation. Census: 10 in 64 Cameo, 20 finer (5/15). NGC ID# 288M, PCGS# 87924

1900 Quarter Eagle, PR68 Ultra Cameo
Exceptional Proof Type Coin

4205 **1900 PR68 Ultra Cameo NGC.** The fact that NGC has seen three PR69 Ultra Cameo 1900 quarter eagles speaks to the extreme quality of this Philadelphia issue, especially since NGC has seen but six proofs in such a high grade for the entire series. While the current exceptional example is one notch below those fabulous proofs, it is still in rarified air above other Superb Gem coins.

The obverse is virtually perfect, with the deepest imaginable fields and unmarked, frosted devices. Sumptuous sun-gold color shows a lime-green glint. The reverse is every bit as fine, with a pinprick alloy mark beneath the T of UNITED the only mark revealed by a glass. The strike, of course, is full throughout. Census: 12 in 68 Ultra Cameo (2 in 68+ Ultra Cameo, 1 in 68 ★ Ultra Cameo), 3 finer (4/15). NGC ID# 288P, PCGS# 97926

1901 Quarter Eagle, Cameo Proof
High-End Premium Gem

4206 **1901 PR66+ Cameo NGC.** The 1901 issue claims the highest proof mintage of the entire Liberty Head quarter eagle series, and it was the final year of the Mint's emphasis on field-to-motif proof contrast for many years. The "high" mintage is a modest distinction, because a scant 223 pieces comprised the entire proof output. Still, the issue is popular today both for its availability as a type, and for its preferred high-contrast format.

With the sole Plus designation by NGC for the grade, this Premium Gem approaches the Superb category with deeply reflective fields and richly frosted devices. As expected, the strike is needle-sharp and the surfaces are free of any notable distractions. Under magnification, a microscopic group of short, brushlike lines between the portrait and star 4 are only visible at an angle. The eye appeal of this mirrored, contrasted proof is outstanding. Census: 4 in 66 Cameo (1 in 66+ Cameo, 1 in 66 ★ Cameo), 4 finer (4/15). NGC ID# 288R, PCGS# 87927

1902 Quarter Eagle, Sharp PR64

4207 **1902 PR64 NGC.** The orange-gold surfaces on this near-Gem proof boast the expected needle-sharp strike, and only minor signs of contact, including a couple of tiny ticks on Liberty's face, determine the grade. This piece was struck during the year that the Mint went to a no-contrast method of proof manufacturing. An attractive and affordable early-20th century proof Liberty Head quarter eagle. Census: 23 in 64, 21 finer (4/15). NGC ID# 288S, PCGS# 7928

INDIAN QUARTER EAGLES

1911-D Quarter Eagle, MS64
Exceptionally Sharp and Clean Example

4208 **1911-D MS64 NGC.** There are a number of factors that make the 1911-D the most desirable single coin in the Indian Head quarter eagle series. It has the lowest circulation-strike mintage by a large margin (55,680 pieces versus 240,000 for the 1914), it is the first Indian Head quarter eagle to be produced at a mint other Philadelphia, and according to Mike Fuljenz, it has the highest overall rarity of all 15 issues in the series.

The 1911-D is usually very well struck, though some examples possess an extremely weak D mintmark. Such pieces usually trade at a discount compared to pieces on which the mintmark is sharply defined, such as seen here. The surface texture typically seen on this issue is often granular, and the overall luster often a bit subdued. Many 1911-Ds have mint-made copper spots; more so on the reverse, and most reveal scattered abrasions. Those latter attributes are refreshingly absent on this piece. The surfaces are exceptionally clean, the strike is as close to complete as possible, and the color is a muted golden-tan. This is one of the finest MS64 examples we have seen in recent memory. NGC ID# 2894, PCGS# 7943

1914 Two and a Half, MS64
Rich, Frosty Surfaces

4209 **1914 MS64 NGC.** This is a lovely, originally toned Choice example of this conditionally elusive Philadelphia issue. Both sides show warm rose-gold patina with soft olive overtones evident in the fields. The strike is bold throughout. Abrasions are largely nonexistent on the obverse, although the reverse shows a few light flaws in the fields that limit the grade. NGC records 48 numerically finer pieces, examples of which are exceptionally more costly to acquire than the current coin (4/15). NGC ID# 2898, PCGS# 7946

1914-D Quarter Eagle, MS65
Condition Rarity, None Finer at PCGS

4210 **1914-D MS65 PCGS.** The 1914-D quarter eagle can be lost in the shadows of two issues that share part of its identity: the 1911-D and 1914. That is especially true in circulated and lower Uncirculated grades. In MS64 and better condition, however, it vaults into third place as a condition rarity behind only the two previously mentioned issues. This Gem representative has mostly orange-gold color with occasional streaks of lilac interspersed. Softly struck across much of the headdress, otherwise the strike details are sharp, including three full pendants on the necklace. Minimally marked and broadly appealing. Population: 47 in 65, 0 finer (4/15). NGC ID# 2899, PCGS# 7947

1926 Quarter Eagle, MS66
Tied for Finest Known

4211 **1926 MS66 NGC.** Reviled by some at the time of issue for its recessed design, Bela Lyon Pratt's quarter eagle is today celebrated as an artistic renewal of the longstanding 19th century rendering of Liberty. This yellow-gold example reveals hints of pink in the headdress feathers, and the few copper spots are minimal and unobtrusive. The fields are smooth with only scattered ticks. Neither PCGS or NGC have certified an example at the MS66+ level, and this coin is thus tied for the highest graded at either service. Census: 21 in 66, 0 finer (5/15). NGC ID# 289C, PCGS# 7950

1926 Quarter Eagle, MS66
Highest Graded at Either PCGS or NGC

4212 **1926 MS66 NGC.** Indian Head quarter eagles comprise a 15-coin set, and this has been a popular undertaking for many collectors. This piece would be a pleasing start on such a set, with even yellow-gold surfaces and delicate pink on both sides. A few copper spots blend in nicely and there are no abrasions of note. Neither PCGS or NGC has awarded a quarter eagle of this issue with the MS67 grade, and this coin is thus tied for finest known. Census: 21 in 66, 0 finer (5/15). NGC ID# 289C, PCGS# 7950

THREE DOLLAR GOLD PIECES

1854-O Three Dollar, AU53
The Only New Orleans Issue

4213 **1854-O AU53 NGC. Variety 2.** Die lapping is most evident on the bow ribbon. A mintage of 24,000 coins would be low in most series, but it does not necessarily stand out in the context of the three dollar gold series, which boasts numerous sub-5,000-coin mintages. The production total is impressive, however, considering that the 1854-O is the only New Orleans issue in the set. This lightly circulated representative offers pleasing green-gold surface coloration with substantial luster remaining. Typically struck with a bit of high-point rub and minimally scattered abrasions. NGC ID# 25M5, PCGS# 7971

1855 Three Dollar Gold, MS63
Original Surfaces

4214 **1855 MS63 NGC.** The 1855 three dollar gold piece is somewhat scarcer than the frequently seen 1854, 1874, and 1878, but it is still available enough to be suitable for type purposes. This Select example offers shimmering green-gold luster with soft honey overtones. The wreath bow shows the only mentionable striking weakness, and light chatter on the cheek and in the fields defines the grade. Census: 36 in 63 (2 in 63+), 24 finer (4/15). NGC ID# 25M6, PCGS# 7972

1857 Three Dollar, Peach-Gold MS63

4215 **1857 MS63 PCGS.** Only three years after the series' inception, the mintage of the 1857 three dollar gold was down to less than 21,000 pieces, and most of the survivors today are circulated. This Select example offers lovely mint luster on peach-gold surfaces with lilac accents in the peripheral areas. Some light clash marks appear on each side and a few scattered marks, none overt. A high-end example of this early three. Population: 25 in 63 (2 in 63+), 5 finer (5/15). NGC ID# 25MA, PCGS# 7976

1863 Three Dollar Gold, MS61
Seldom Seen in Mint State

4216 **1863 MS61 NGC.** With a mintage of only 5,000 coins, the 1863 three dollar gold piece is, not surprisingly, scarce in any Mint State grade. This representative shows satiny, medium yellow-gold luster, with the wreath bow showing the only mentionable striking weakness. Double clashed on both sides, with a full outline of Liberty's portrait on the reverse. Census: 13 in 61, 38 finer (4/15). NGC ID# 25MJ, PCGS# 7984

1864 Three Dollar, Sharply Struck AU58
A Low-Mintage Issue

4217 **1864 AU58 PCGS.** The 1864 three dollar has a mintage of fewer than 3,000 coins. A large number of these were apparently hoarded, however, due to the uncertainties of the Civil War. The present near-Mint State offering displays yellow-gold surfaces that retain a good amount of luster. The design elements are sharply impressed and just a few minute marks are scattered about. Population: 20 in 58, 38 finer (5/15). NGC ID# 25MK, PCGS# 7985

1866 Three Dollar Gold, MS64
Choice Surfaces

4218 **1866 MS64 PCGS.** Struck shortly after the close of the Civil War, the 1866 three dollar gold piece was not saved in any meaningful quantity by collectors, and thus its low 4,000-coin mintage had more of an affect on high-grade availability than can be said of the mintages of later issues in the series. Mint State survivors are scarce across the board, but are notably rare above the MS62 level. This Choice example knows few finer pieces, and possesses bold eye appeal. The honey-gold surfaces support semiprooflike mirroring in the fields and accentuate the delivery with a lack of noticeable abrasions. The wreath bow is weak, as usual, but the obverse portrait is bold. A heavy double clash is obvious on both sides, with an impression of the S in DOLLARS clearly evident in the obverse field behind Liberty's head. Population: 6 in 64, 5 finer (4/15). NGC ID# 25MM, PCGS# 7987

1867 Three Dollar, Reflective MS63

4219 **1867 MS63 PCGS. CAC.** The 1867 three dollar gold piece comes from a low mintage of 2,600 circulation strikes. PCGS/NGC population reports show most certified coins to be in the About Uncirculated grade range, indicating that the issue likely did not circulate to any great extent. Mint State pieces are extremely rare.

This Select Mint State coin's yellow-gold surfaces exhibit somewhat prooflike fields that contrast against well-struck design elements. Magnification brings out some small handling marks that account for the grade. Population: 3 in 63, 6 finer (4/15).
Ex: FUN Signature (Heritage, 1/2010), lot 2129. NGC ID# 25MN, PCGS# 7988

1879 Three Dollar Gold, MS65
Popular Low-Mintage Issue

4220 **1879 MS65 PCGS.** The three dollar gold piece was never a popular issue and the Philadelphia Mint struck only token mintages of this denomination from 1879 until it was cancelled ten years later. Only 3,000 business-strike examples were produced in 1879, all delivered on December 20, and many of these were subsequently destroyed after the close of the year. In lot 422 of the Thompson and Ely Collections (Henry Chapman, 5/1915), the cataloger noted:

> "1879 Uncirculated. Mint lustre. Only 3,030 coined, and about 2,000 or more of these were melted at the mint."

Chapman's mintage figures included the 30 proofs struck earlier in the year. Fortunately for present-day collectors, a number of high-grade specimens escaped the ravages of circulation, probably initially stored in bank vaults because there was little demand for them in the channels of commerce. When the denomination was discontinued in 1889, the three dollar coins suddenly became popular with collectors and contemporary numismatists began preserving nice examples for future generations.

The present coin is a delightful Gem, with well-preserved yellow-gold surfaces that radiate satiny mint luster on both sides and show attractive orange highlights. The design elements are sharply detailed and eye appeal is quite strong. Population: 39 in 65, 7 finer (5/15). NGC ID# 25N2, PCGS# 8001

1880 Three Dollar Gold, MS62
Semiprooflike Fields

4221 **1880 MS62 PCGS.** By the dawn of the 1880s, the three dollar gold piece had fallen into disuse among the general public. Nevertheless, the Philadelphia Mint would remain loyal to the denomination through 1889 and a steady, if limited, stream of coins would emerge from the presses until the end of the decade. With a paltry mintage of 1,000 business strikes, the 1880 is one of the more desirable issues from this decade. The present coin displays a modest prooflike finish with noticeable reflectivity at certain angles. The color is a curious mixture of copper-gold and orange-gold shades. Lightly marked, as befits the grade, with powerfully defined features.
Ex: Philadelphia Signature (Heritage, 8/2000), lot 7199. NGC ID# 25N3, PCGS# 8002

1883 Three Dollar Gold, MS65
Tied for Finest at NGC

4222 **1883 MS65 NGC.** This Gem 1883 three dollar gold piece ranks among the finer-known survivors from a paltry 900-coin mintage. This issue is known for often exhibiting prooflike fields, and the current piece represents this trait to a noticeable extent. Warm honey-gold patina accents subtle cameo contrast on each side, and the surfaces are delightfully well-preserved. Trivial weakness is noted on the wreath bow, as usual, but the striking definition is above-average overall. The 1883 is one of only three issues in the entire series with a mintage of less than 1,000 coins, although enough Mint State pieces were saved at the time of issue that the date is moderately collectible today. Nonetheless, Gem representatives are major rarities. Census: 8 in 65, 0 finer (4/15). NGC ID# 25N6, PCGS# 8005

1883 Three Dollar, MS62 Prooflike
Only 900 Coins Minted

4223 **1883 MS62 Prooflike NGC.** With a scant mintage of only 900 pieces, the 1883 three dollar gold ranks as one of the most popular dates in the series. NGC has awarded just 12 survivors a Prooflike designation, including four in this grade and three numerically finer (4/15). This piece shows well-struck devices and modest field-motif contrast, with medium yellow-gold color overall. Scattered abrasions define the grade. PCGS# 78005

1888 Three Dollar, Near-Gem
Only 5,000 Coins Struck

4224 **1888 MS64 PCGS.** Despite a small mintage of 5,000 pieces, the 1888 is one of the most accessible issues in the three dollar gold series. Indeed, the majority of examples at PCGS and NGC are in Mint State grades through near-Gem. Even Gems can be acquired with patient searching. Highly attractive, rich orange-gold color adorns the lustrous surfaces of this MS64 offering. The design elements are well-struck except for the usually seen softness in the bow knot. An occasional minor mark precludes Gem classification. NGC ID# 25NB, PCGS# 8010

1889 Three Dollar, Highly Lustrous MS63

4225 **1889 MS63 PCGS.** The unpopular three dollar gold denomination was discontinued after 1889 with a small mintage of 2,300 pieces. Peach-gold and apricot patina resides on the highly lustrous surfaces of this Select specimen, which exhibits well-impressed design elements. A few scattered marks do not detract. NGC ID# 25NC, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECE

1889 Three Dollar, PR65 Deep Cameo
Stellar Final-Year Proof Type Coin

4226 **1889 PR65 Deep Cameo PCGS.** The final proof issue in the three dollar gold series had a rather disappointingly low mintage of only 129 coins, indicative of either lax collector demand or perhaps a lack of awareness on the part of collectors that this *was* the final issue in the series. Surviving examples are scarce in any grade, but are significant rarities with Deep Cameo contrast. PCGS shows only six pieces in this category, including two in PR65 and a single PR66 coin finer; NGC contributes even fewer, with just two Ultra Cameos grading PR65 and PR65+, respectively (4/15). The present piece showcases a remarkable full strike which is accentuated by stark field-motif contrast. A few faint lines in the deeply mirrored honey-gold fields are pleasantly hard to detect. A blatantly eye-appealing Gem proof. NGC ID# 28AY, PCGS# 98053

1879 Flowing Hair Stella, Judd-1635, VF Details
A Rare Collectible Example

4227 **1879 Flowing Hair, Judd-1635, Pollock-1833, R.3 — Repaired — PCGS Genuine. Proof, VF Details.** The four dollar gold pieces, or stellas, struck in 1879 and 1880 are among the most intriguing items in all of American numismatics, but few collectors will ever be able to acquire an example due to a combination of intense competition and limited supply. The 1879 Flowing Hair variety is the most frequently seen, as these were the coins struck in quantity and distributed to Congressman in sets along with an example each of the Goloid Metric Dollars Judd-1617 and -1626 at a cost of $6.10. Later, additional sets were sold to collectors at a cost of $15.00 per set.

S.K. Harzfeld's June 1880 sale offered what is now believed to be have been the first appearance of a stella at auction, included therein as part of a complete three-piece metric pattern set. The set was described as "one of the *original* 15 *sets*, submitted to Congress," and it realized $32.50 — significantly more than the $6.10 Congressmen paid, and more than twice the initial cost of a set to collectors purchasing one directly from the Mint. The intrigue and allure of the gold stella had begun, and it is still strong today.

This impaired example was likely carried either as a pocket piece or in a piece of jewelry, a fate experienced by many examples of Judd-1635. A loupe reveals evidence of expert smoothing of the fields, masked by light wear over the devices and bright green-gold patina on each side. This piece ranks among only a handful of stellas that can in any way be termed "affordable," and represents an unequivocally important opportunity for the budget-conscious collector to acquire an example of this historically significant issue. NGC ID# 28AZ, PCGS# 8057

1879 Flowing Hair Stella, PR64 ★ Cameo
Judd-1635, Historically Important Pattern Issue

4228 **1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR64 ★ Cameo NGC.** The four dollar gold stella stands out as an something of a odd denomination, seemingly of little necessity given the two and a half, three, and five dollar gold coins already in circulation in the final quarter of the 19th century. Yet, the stella was a product of its time, and its history plays an important role in collectors' fascination with the short-lived pattern series.

Whereas other obscure denominations like the two and three cent were authorized in an attempt to satisfy the needs of domestic commerce, the four dollar stella was originally conceived as an international trade coin. The Hon. John A. Kasson, the Minister to Austria at the time, believed a coin of exact value to the Austrian 8 Florin, the French 20 Franc, and other staples of the Latin Monetary Union would strengthen and facilitate commercial ties between the United States and the European countries. Kasson's initial conception was fundamentally altered, however, when Alexander H. Stephens, Chairman of the Committee on Coinage, Weights, and Measures, teamed up with serial inventor and jack-of-all-trades William Wheeler Hubbell of Pennsylvania, patentee of the a goloid composition (an amalgam of gold, silver, and copper). Stephens and Hubbell believed that a four dollar coin could both serve as the ideal international trade coin and, because it was to be struck in goloid, make Hubbell extremely wealthy. The major problem the two men failed to understand was that four dollars did not equate to the 8 Florin or 20 Franc and could thus would have limited, if any, international use. The project failed to meet its objective and was ultimately abandoned.

The Charles Barber-designed Flowing Hair coins of 1879 are the most available of the four stella issues, with "available" being a relative term. The coins were distributed to Congressmen for their approval, and production estimates range from 425 to 725 pieces. Mint records indicate that the actual mintage represents the lowest figure on the spectrum. Either way, collector demand far outweighs the number of surviving representatives, resulting in spirited bidding and high prices when examples cross the block.

Deep mirroring provides the fields with a jet-black appearance that contrasts starkly against the frosty design motifs on this near-Gem stella, accounting for the Cameo designation. NGC has also awarded a Star for aesthetic appeal. Yellow-gold color dominates each side with occasional reddish accents, and a few hair-thin grazes prevent an even higher numeric grade. This is a phenomenal, historically important offering with technical quality and eye appeal to match. Census: 26 in 64 Cameo (1 in 64+ Cameo, 2 in 64 ★ Cameo), 47 finer (5/15).

1880 Flowing Hair Stella, Judd-1657, PR65
One of Only 19 Coins Traced
A Legendary Rarity

4229 **1880 Flowing Hair, Judd-1657, Pollock-1857, R.6, PR65 NGC. CAC.** One of the key individuals involved in the creation of the fabled four dollar denomination was prolific Philadelphia inventor Dr. William Wheeler Hubbell (1821-1902). His personal history is a fascinating one, characterized by high-stakes court trials, scientific discoveries, wartime munitions patents, and culminating with the invention of his well-known goloid alloy.

According to *History of the Hubbell Family*, written by Dr. W.W. Hubbell's son Walter Hubbell in 1881, Wheeler Hubbell studied law in Philadelphia and was admitted to the bar in 1845. As a lawyer, he was involved in numerous patent cases. One of his biggest cases took place in 1853, when Hubbell successfully defended several railroad companies accused of infringing on a specific rail car patent. He received $20,000 as compensation for the case — an impressive sum in the mid-19th century.

Hubbell always managed to keep himself preoccupied. When he was not serving as council in patent court cases, he spent his time devising and patenting his own inventions. Some of his more notable inventions include the explosive shell fuse, the percussion fuse, the solar magnet and solar magnet engine, the section draft pipe for locomotives, the first swinging breech-block, breech-loading firearm, and a curative medicinal practice known as "vivopathy." Dr. Hubbell is perhaps most famous, however, for his goloid patent.

In the mid-1870s, Dr. Hubbell began to study the history of money and the role of gold and silver. On May 22, 1877, he obtained his first patent for goloid (No. 191,146), an amalgam of gold, silver, and copper mixed in specific ratios. The patent, "Improvement in Metal Alloys for Commercial Coin," explains:

> "The invention consists in the discovery and manufacture of a denser, more valuable, or heavier alloy for a given size, adapted to coin dollars, and more difficult to counterfeit; and consists of certain proportions of gold, silver, and copper. The exact and best proportions are one pound of gold, twenty-four pounds of silver, and two and a half pounds of copper. Melt them separately and pour them together, and, in mixing, add one grain of sulphate of sodium or sulphate of potassium to one thousand grains of the metal. The alloy metal is slightly heavier than the mean of the component metals, which makes it peculiarly valuable for coin, not easily counterfeited. At the same time a dollar of the alloy is very much less in size than a silver dollar."

He obtained a second patent in October 1878 (No. 209,263) to adjust the ratios, previously recorded in troy weights, according to the metric system:

> "In this improvement the minimum is fourteen and the maximum is twenty of silver to one of gold, and the gold and silver both in metric measure...The proportions are seventy-five (75) grams in weight of pure gold, one hundred and forty-two and a half (142.5) grams in weight of pure copper, and twelve hundred and seven and a half (1,207.5) grams in weight of pure silver, sufficient to make one hundred dollars."

Inspired by U.S. Minister to Austria John A. Kasson's desire for coin equivalent to the French 20 francs or the Austrian 8 florin, Dr. Hubbell devised an international coinage system using his own goloid alloy. The proposed coins would (supposedly) facilitate currency exchange with European countries and thus alleviate the complexities associated with trade. The proposal impressed the Hon. Alexander H. Stephens, Chairman of the Committee on Coinage, Weights, and Measures. In the House of Representatives Report 203 submitted on February 12, 1880, Stephens provided an overview and explanation of the proposed bills related to the new metric coin system, including the creation of the new four dollar gold coin, and expressed his favorable position regarding the implementation of Dr. Hubbell's goloid alloy:

> "On January 24, 1879, the Secretary of State transmitted to the Secretary of the Treasury, dispatches of date January 3, 1879, from Hon. John A. Kasson, formerly chairman of the Committee Coinage, Weights, and Measures, and at present minister at Vienna, in relation to a coin to express invoice values, in a unit of denomination near to the eight-florin piece, which latter coin had been allowed by Treasury for this purpose, as a commercial convenience.
>
> "These papers were handed over by the committee to Dr. Hubbell, who worked out the problem perfectly in the metric gold coin of 400 cents even value, containing six grams of pure gold, three decigrams of pure silver, and seven decigrams of pure copper, seven grams even in total weight; closely approximating to all the foreign coin of near this denomination, and in all computations convertible into them, and in to other United States coin with a single numeral, four, and absolutely metric in all respects, being one-fifth' of the metric double-eagle."

Hubbell's involvement in the production of the four dollar gold coins, or stellas, was not limited to their metallurgic composition. He played an integral role in their design as well. The motto DEO EST GLORIA was added to the reverse in the place of the usual IN GOD WE TRUST at his suggestion. The reverse was also to include a pentagonal star motif and three iterations of the denomination: ONE STELLA, 400 CENTS, and FOUR DOL. Obverse designs were based on portrait compositions by Charles E. Barber and George T. Morgan, and included the legend 6 G .3 S .7 C 7 GRAMS, stating the component weights of the amalgam. Barber's Flowing Hair design, formally adopted for the stella coins, was based on an earlier 1878 five dollar pattern (Judd-1574) designed by his father William Barber, who had passed away just a few months earlier in August 1879. Coins bearing Barber's Flowing Hair portrait and dated 1879 are the most plentiful in the series. Between 425 and 725 coins were struck, with estimated mintage figures varying from one source to another. The 1880 Flowing Hair stella, along with Morgan's 1879 and 1880 Coiled Hair coins, were struck in highly limited quantities, likely distributed to high-ranking individuals in numismatic circles through well-connected dealers — a common practice among Mint officials at the time. However, a definitive explanation for the coins' production continues to elude scholars. Reasonable mintage estimates range from 15 to 20 examples for both Coiled Hair issues and perhaps as many as 25 coins for the 1880 Flowing Hair issue.

Eventually, the proposed bills pertaining to the implementation of Hubbell's metric coinage system failed to pass muster. The stellas were never produced for circulation and are strictly patterns. Dr. William Wheeler Hubbell, who stood to gain heavily from the production of the stella and other metric coins, accepted defeat and retreated to his 1,000-acre tobacco and grain farm near Lynchburg, Virginia. He died in 1902, leaving behind numerous inventions and an impressive legacy largely defined by the coins that never were.

The 1880 Flowing Hair stella is widely recognized among collectors today as one of the great rarities in American gold coinage. A total of 19 distinct pieces have been traced, and it is estimated that just over 20 examples may survive. The coins seldom appear at public auction, and every occurrence deservedly receives widespread attention. This wonderful example presents an excellent opportunity to obtain a legendary coin, one that is sure to be a highlight of even the most advanced collection.

Each side of this impressive Gem representative displays lustrous orange-gold surfaces with strong detail on the devices and just a trace of softness on the hair over Liberty's ear. The usually seen striations occur diagonally in a southwest to northeast direction on the obverse and in a northwest to southeast direction on the reverse. Pedigree markers take the form of a few small alloy spots throughout rather than distracting contact marks. A few stray ticks are in accordance with the grade, but they do not at all affect appeal of this renowned CAC-approved rarity. Census: 4 in 65, 2 finer (4/15).

Roster of 1880 Flowing Hair Stellas

1. PR67 NGC. Dr. John E. Wilkison; Jeff Browning; Dallas Bank Collection (Stack's/Sotheby's, 10/2001), lot 362; Tacasyl Collection (Bonhams, 9/2013), lot 1010, realized $959,400.

2. PR66 PCGS. Sherwood Boyd; Greater New York Convention Sale (Stack's, 5/1985), lot 1343, realized $63,250; Dr. Jack Adams Collection (Superior, 5/1992), lot 2673, realized $91,850; Central States Signature (Heritage, 4/2015), lot 5300.

3. PR66 NGC. Will Neil Collection (B. Max Mehl, 6/1947), lot 2604 sold as part of a set for $3,850; Grant Pierce; 1976 ANA (Stack's, 8/1976), lot 2920 sold as part of a set for $225,000; Western Collection (Stack's, 12/1981), lot 1138, realized $41,000; Summer FUN Signature (Heritage, 6/2008), lot 1960, realized $431,250; FUN Signature (Heritage 1/2013), lot 5856, realized $440,625.

4. PR65 PCGS. Auction '84 (RARCOA, 7/1984), lot 1913, realized $61,600; Chicago Sale (RARCOA, 8/1991), lot 967, realized $96,250. **The Present Coin.**

5. PR65 NGC. 1974 ANA (Paramount, 8/1974), lot 873, realized $40,000; Public Auction Sale (Stack's, 1/1994), lot 1489; Gold Rush Collection (Heritage, 1/2005), lot 30043, realized $264,500.

6. PR65 NGC. Rio Rancho Collection (Superior, 10/1974), lot 134, realized $35,000; Auction '79 (Stack's, 7/1979), lot 801, realized $50,000; Auction '80 (Superior, 8/1980), lot 386, realized $105,000; Blevins/Bodway Collections (Superior, 6/1988), lot 6731, realized $84,700; Chris Schenkel Collection (Bowers and Merena, 11/1990), lot 508, realized $231,000; Long Beach Signature (Heritage 2/1995), lot 5837, realized $77,000.

7. PR65 NGC. John Work Garrett; Johns Hopkins University; Garrett Collection, Part I (Bowers and Ruddy, 11/1979), lot 432, realized $65,000; Jascha Heifetz Collection (Superior, 10/1989), lot 4297, realized $297,000; Swan/Sweet Collections (Bowers and Merena, 3/2004), lot 2621, realized $310,000; Dallas Signature (Heritage, 11/2006), lot 2153, realized $287,500; Dallas Signature (Heritage, 4/2007), lot 1694, realized $316,250; Husky Collection (Stack's, 6/2008), lot 2051.

8. PR64 PCGS. Jerome Kern; Golden Jubilee Sale (B. Max Mehl, 5/1950), lot 244; Amon Carter, Sr.; Amon Carter, Jr. (Stack's, 1/1984), lot 633, realized $68,750; Ed Trompeter Collection (Superior, 2/1992), lot 135, realized $77,000; Somerset Collection (Bowers and Merena, 5/1992), lot 1470, realized $39,050; Long Beach Signature (Heritage, 9/1998), lot 7106, realized $103,500; 65th Anniversary Sale (Stack's, 10/2000), lot 1624; FUN Signature (Heritage, 1/2001), lot 8171, realized $94,875.

9. PR63 PCGS. October Sale (Superior 10/1990), lot 2074, realized $71,500; Gainsborough II Sale (Superior, 2/1997), lot 2907.

10. PR63 NGC. J.F. Bell (Jacob Shapiro); Memorable Collection (Numismatic Gallery, 3/1948), lot 281; United States Gold, Silver & Copper Coins (Stack's, 3/1999), lot 135; Rarities Sale (Bowers and Merena, 1/2000), lot 351, realized $86,250.

11. PR67. Louis E. Eliasberg, Sr.; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 318, realized $55,000.

12. PR65+. S. Hallock DuPont Collection (Sotheby's, 9/1982), lot 251; Charles Kramer Collection (Stack's/Superior, 11/1988), lot 285, realized $72,600.

13. PR65. Josiah K. Lilly; Smithsonian Institution, grade per Garrett and Guth.

14. Gem Brilliant Proof. Massachusetts Historical Society (Stack's, 10/1970), lot 807, realized $13,000; Stack's FPL Summer 1997 offered as part of a four piece set for $875,000; Americana Sale (Stack's, 1/1998), lot 1498, still part of the set, unsold.

15. Gem Brilliant Proof. Winner F. Delp Collection (Stack's, 11/1972), lot 791, realized $17,000.

16. Gem Brilliant Proof. Samuel McVitty Collection (B. Max Mehl, 3/1938), lot 325; Floyd T. Starr; 65th Anniversary Sale (Stack's, 10/2000), lot 1716.

17. Choice Brilliant Proof. Possibly Belden Roach Collection (B. Max Mehl, 2/1944), lot 803; Auction '80 (Stack's, 8/1980), lot 1451, realized $65,000.

18. Brilliant Proof. Winthrop Collection (Bowers and Ruddy, 9/1975), lot 583, realized $31,000; Gainsborough (Abner Kreisberg, 9/1980), lot 1275, realized $52,000.

19. Brilliant Proof. Auction '89 (Stack's, 7/1989), lot 1930, realized $72,600.

1880 Coiled Hair Stella, PR65
Judd-1660, Only Nine Examples Known
The Neil-Trompeter Coin

4230 **1880 Coiled Hair, Judd-1660, Pollock-1860, R.7, PR65 PCGS. CAC.** The Flowing Hair and Coiled Hair stellas of 1879 and 1880 have captivated the coin collecting community for more than 120 years. The topic has been addressed by scholars as legendary as the coins themselves, and the issue's mythology is often at the forefront of their articles; Michael Hodder's "The Mystery of the Stella Solved" and R.W. Julian's "The Stella: Its History and Mystery" are but two examples of this phenomenon. Indeed, the stellas are curious anomalies in nearly every respect. Their four dollar denomination is unique in American coinage, and everything from their mintages, compositions, and designers has been contested — not to mention the robust debate regarding so-called "originals" versus "restrikes" of the 1879 Flowing Hair type.

Recently, numismatic researcher Roger W. Burdette made another significant contribution to this field of study. His article, "Louis Garnett, Wheeler Hubbell, and the Goloid Fiasco," is part of the Spring 2015 issue of the *Journal of Numismatic Research*. Burdette's study of contemporary Mint records is comprehensive, shedding new light on this otherwise murky area of inquiry. Many of Burdette's findings are indisputable, backed by solid supporting documentation. But, as is the case with nearly every piece of literature related to the stellas, Burdette's work seems to raise as many questions as it answers.

Origins of the Denomination

Who first developed the idea for a four dollar gold coin? Was it John A. Kasson? Was it Dr. William Wheeler Hubbell? Did the two men work together? All of these scenarios have been suggested. In reality, it appears more likely that Kasson unknowingly provided Hubbell with the idea for the stella. Hubbell's inspiration derives from a letter written by Kasson dated January 3, 1879, which passed from the State Department to the Treasury Department to Alexander H. Stephens of the Committee on Coinage, Weights, and Measures. Kasson's letter proposed a new coin to allow invoices to be expressed in 20 francs, 8 florin, and other equivalent denominations part of the Latin Monetary Union:

> "The United States have no coin closely approximating the value of the 20-franc piece. If a new gold coin were authorized by Congress, to be of the exact value of the gold piece already better known throughout Europe and the East than any other singe coin, and this to be issue in substitution for the three-dollar pieces, which should be withdrawn, we should have a standard of money in which not only all custom-house accounts might be accurately kept, but which might gradually become the standard of all international commercial transactions..."

Kasson never specifically mentioned a four dollar coin. He would have realized the uselessness of such a coin given his experience in international relations and monetary standardization: The French 20 francs was equivalent to $3.88, not $4. A four dollar coin would hardly have made exchange easier, hence his insistence on a coin of "exact value."

Alexander H. Stephens seemingly used Kasson's good reputation and twisted his words to push his and Hubbell's agenda (metric coinage in goloid composition). Stephens had been enamored with the inventive Dr. Hubbell since autumn 1877, when Hubbell first proposed his goloid coin idea to the committee Stephens chaired. After receiving Kasson's letter, Stephens immediately turned it over to Hubbell for further investigation. It was Hubbell who ultimately recommended the four dollar denomination, figuring the coins could simultaneously facilitate international trade and make him rich beyond his wildest dreams.

The Engraver(s)

In addition to the confusion regarding the originator of the stella, questions abound pertaining to the issue's engraver(s). Did Charles Barber design both the Flowing Hair and Coiled Hair obverse? Did George T. Morgan design the Coiled Hair obverse? Who designed the reverse? Early auction records are silent on the subject. Apparently, the earliest indication is in the pattern-hub destruction list of 1910. The document, prepared by an aging Charles Barber 30 years removed from the incident, credits himself with all three designs. The Adams-Woodin pattern reference (1913) substantiates Barber's claim. Things get cloudier from there. Bowers, Breen, Judd, Julian, Hodder, and Saul Teichman have credited Charles Barber with the Flowing Hair obverse and George T. Morgan with the Coiled Hair obverse. Curiously, Garrett and Guth argued that Barber was the engraver of both obverse designs in their *Gold Encyclopedia* (2006), while their latest edition of *100 Greatest U.S. Coins* (2014) cites Morgan as the Coiled Hair engraver. Opinions regarding the reverse generally acknowledge Barber, but the engraver is occasionally listed as unknown.

Burdette argues that Barber engraved all three dies. His claim is based on the 1910 hub inventory and the artistic quality of the stella designs. The Flowing Hair pieces were based on the original work of William Barber, who died on August 31, 1879. Charles Barber slightly modified his father's design for the Flowing Hair stellas. Burdette proposes that Barber probably adapted George Morgan's Coiled Hair design, used on the goloid and metric silver dollars (Judd-1654 and Judd-1660), for the Coiled Hair stellas: "The [Coiled Hair] Stella portrait was prepared by Charles Barber as a companion to Morgan's coiled-hair designs." Burdette explains earlier in the same article:

> "The so-called coiled-hair designs for goloid and metric silver dollars are consistent with George Morgan's workmanship. It is likely that early collectors were confused about 'coiled-hair' descriptions and assumed that the Stella of this design was Morgan's and not Barber's work."

Burdette's argument is interesting. The difference between the Coiled Hair dollar designs and the Coiled Hair stella design seems to support Burdette's thesis. Otherwise, Morgan's design would have been used on the stella exactly as it appeared on the goloid and metric silver dollars. However, this scenario raises some important questions. Morgan's Coiled Hair design for the goloid and metric silver dollars differed slightly, so is it surprising that the stella design was also slightly different? Why would Barber create a "companion" design for inclusion in the Morgan goloid set? Why not simply scale down one of Morgan's arguably "superior" Coiled Hair portraits? Burdette posits that Charles Barber probably "assumed control of the department" after the death of his father and decided he would adapt Morgan's design rather than use it as originally conceived. Burdette's theory is plausible, but the dearth of contemporary Mint records prevents any definitive conclusion from being reached.

Mintages and Survival Rates
The production of 1879 Flowing Hair stellas left a relatively detailed paper trail. On October 4, 1879, Mint Director Burchard wrote to Philadelphia Mint Superintendent Archibald L. Snowden, telling him to strike "twenty pieces of each denomination" (the goloid dollar, the stella, and the metric silver dollar). On January 12, 1880, Burchard wrote Snowden again, informing him that Treasury Secretary Sherman desired five additional sets, bringing the total to 25 sets. The sets were distributed to congressmen for $6.10 each. Burchard requested another 100 sets on March 1, followed by 300 more sets on May 10 for a total of 425 sets. Other mintage estimates range from 500 pieces (R. E. Preston of the Mint Bureau) to 600 coins (W. Elliot Woodward) to 725 examples (Jeff Garrett and Ron Guth).

Details regarding the production of 1879 Coiled Hair stellas and both 1880 variants are scant. In fact, there are no Mint records documenting any aspect of their creation. Based on survival rates, it is fair to assume that 15 to 25 of each type were struck. Burdette speculates that the 1879 Coiled Hair stellas were struck in late October or early November 1879. Snowden likely kept the coins "in reserve, in case Stephens did not like the flowing hair [design]. They might also have been reserved for special purposes, such as exchange for coins needed for the Mint Collection or political rewards." As for the 1880-dated stellas, Burdette proposes that Snowden ordered new dies for both designs in 1880 after Burchard refused to sell unsold 1879 Flowing Hair sets to collectors, insisting they were strictly reserved for members of congress.

One thing is certain beyond any reasonable doubt: The 1880 Coiled Hair stella is the rarest of the four issues in the series. Perhaps 10 examples survive, nine of which have been individually identified (see roster below).

Physical Description
A small vertical toning streak extending downward from the star to the D in DOL. most easily identifies this piece as the Neil-Trompeter specimen. Orange-gold coloration paints each side, while the border areas show blushes sunburst-orange patina. A similarly colored alloy spot appears beside the top point of the star. As expected, light striations occur in a vertical fashion over the centers. Proof reflectivity in the fields is substantial, while limited frost over the sharply detailed design elements is insufficient for a Cameo designation. Regardless, the aesthetic appeal of this blatantly original four dollar gold coin is outstanding.

Roster of 1880 Coiled Hair Stellas
1. Delp Specimen. PR67 Cameo NGC. Winner Delp Collection (Stack's, 11/1972), lot 792, realized $35,000; Summer FPL (Stack's, 1997) offered as part of a four-piece set for $875,000; FUN Signature (Heritage, 1/2005), lot 30044, realized $977,500; Tacasyl Collection (Bonhams, 9/2013), lot 1011, realized $2,574,000.
2. DuPont Specimen. PR67 NGC. S. Hallock du Pont Collection (Sotheby's, 9/1982), lot 252, part of a four-piece set of stellas with the coins offered in individual lots, realized $102,300; Chicago Sale (Superior, 8/1991), lot 707, realized $440,000; Central States Signature (Heritage, 4/2015), lot 5301.
3. Trompeter Specimen. PR65 PCGS. Will Neil Collection (B. Max Mehl, 6/1947), lot 2605, sold as part of a set for $3,850; Grant Pierce; 1976 ANA (Stack's, 8/1976), lot 2920, sold as part of a set for $225,000; Western Collection (Stack's, 12/1981), lot 1139, realized $135,000; Ed Trompeter Collection (Superior, 2/1992), lot 136, realized $264,000; Orlando Sale (Superior, 8/1992), lot 599; 60th Anniversary Sale (Stack's, 10/1995), lot 1548, realized $308,000. **The Present Example.**
4. Eliasberg Specimen. PR65. Louis E. Eliasberg, Sr.; Louis E. Eliasberg, Jr.; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 319, realized $99,000; Holecek Family Trust (Stack's, 10/2000), lot 1625.
5. Memorable Specimen. PR64 NGC. Memorable Collection (Numismatic Gallery, 3/1948), lot 282; Public Auction Sale (Stack's, 3/1999), lot 136; Rarities Sale (Bowers and Merena, 1/2000), lot 352.
6. Kern Specimen. PR62 NGC. Golden Jubilee Sale (B. Max Mehl, 5/1950), lot 245, sold as part of a set for $4,100; Amon Carter, Sr.; Amon Carter, Jr.; Carter Family Collection (Stack's, 1/1984), lot 634, realized $72,250; Richmond Collection (David Lawrence, 7/2004), lot 1306; Santa Clara Sale (Superior, 7/2005), lot 425, realized $618,125; FUN Signature (Heritage, 1/2009), lot 4035, realized $575,000; Los Angeles Signature (Heritage, 7/2009), lot 1246, realized $546,250.
7. Davies Specimen. PR61 NGC. Davies-Niewoehner Collections (Paramount, 2/1975), lot 547, realized $67,500; Bowers and Ruddy *Rare Coin Review* #26, p. 64; FUN Signature (Heritage, 1/2000), lot 7519; Robert Swan & Rod Sweet Collections (Bowers and Merena, 3/2004), lot 2620.
8. Dallas Bank. Impaired Proof. Dallas Bank Collection (Sotheby's and Stack's, 10/2000), lot 363.
9. Lilly Specimen. PR64. Josiah K. Lilly; National Numismatic Collection at the Smithsonian Institution, grade per Garrett and Guth.

Additional Appearances
A. Proof. H.P. Smith Collection (S.H. & H. Chapman, 5/1906), lot 1456, part of a three-piece Goloid set, with the coins offered in individual lots.
B. Proof. Dewitt Smith; sold to Virgil Brand in 1908, Brand Journal number 46965.
C. Proof. Edgar Adams; sold to Virgil Brand in 1911, Brand Journal number 57094.
D. Proof. F.C.C Boyd; sold to Virgil Brand in 1921, Brand Journal number 105730.
E. Proof. Albert A. Grinnell Collection (B. Max Mehl, 6/1943), lot 187; Fred E. Olsen Collection (B. Max Mehl, 11/1944), lot 621, part of a four-piece set of stellas with the coins offered in individual lots.
F. Proof. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 323, purchased by Baldwin.
G. Proof. Public Auction Sale (Kreisberg-Schulman, 2/1961), lot 1150, part of a four-piece set of stellas.
H. Proof. Golden Sale of the Century, Part II (Kreisberg-Schulman, 1/1963), lot 1940, part of a four-piece set of stellas, with the coins offered individually.
From The New Orleans Collection, Part Two. NGC ID# 28B4, PCGS# 8060

1795 Small Eagle Five, BD-3, Unc Sharpness
Pleasing First-Year Representative

4231 **1795 Small Eagle, BD-3, High R.3 — Tooled — NGC Details. Unc.** Bass-Dannreuther Die State c/b. There are 12 die pairings that comprise the 1795 Small Eagle five dollar issue, an immensely popular date for type collectors. BD-3 is one of the more plentiful varieties therein, with 175 to 225 examples believed extant. Such a survival rate is scant compared to many middle and late-19th century gold issues, but in the context of early half eagles, BD-3 is fairly plentiful. However, Uncirculated coins are few and far between, and these pieces are in high demand regardless of grade.

The present coin is a sharp, well-made example, with unusually well-defined feather detail on the eagle's breast. The border dentils are complete and the strike is even. Bright, green-gold patina blankets each side. To the unaided eye, this coin appears problem-free, although closer study with a loupe finds expert tooling in the obverse fields in an attempt to smooth out minor abrasions. The overall affect is not obvious and this remains a pleasing Small Eagle type coin. PCGS# 519852 Base PCGS# 8066

1795 Heraldic Eagle Five, Original AU58
Rare BD-14 Variety, Only 14 to 18 Pieces Known
Possibly Unique Terminal Die State Example

4232 **1795 Large Eagle, BD-14, High R.6, AU58 NGC.** Bass-Dannreuther Die State d/d. BD-14 is one of the great rarities of the Draped Bust half eagle type, and has long been recognized as such, even since before die varieties of early half eagles had been significantly studied. Henry Chapman's June 1912 sale of the George Earle Collection identified a Large Eagle 1795 half eagle therein that had a "Close date, but a different die from any preceding. ... Ex. rare. *Plate*." The coin was called "Very Fine," but in the plate looked significantly better by modern grading standards, at least AU. That example of the BD-14 die pairing garnered $125.00, while an equally graded Small Eagle five realized only $31.00.

BD-14 is one of the three odd-ball die pairings for the 1795 half eagle which employ a Large Eagle reverse that was not itself put into production until 1797. Thus, all examples of BD-13, -14, and -15 were coined in either late 1797 or early 1798. Of the three, BD-15 is the most likely to be offered at auction, with as many as 35 pieces extant; BD-14 (here represented) survives in numbers no greater than 14 to 18 pieces, and BD-13 is represented by just a single coin.

The rarity of BD-14 is actually even greater than might be expected, even for its paltry survival rate. An examination of recent auction appearances reveals that possibly as few as seven individual coins have changed hands in the last few decades, including, among others, a piece pedigreed to the Woodin, Newcomer, Green, and King Farouk Collections, and another from J.F. Bell. The "glittering prooflike" coin from Kagin's 50th Anniversary Sale (5/1978), lot 1062, is an earlier appearance of the MS63 Prooflike NGC coin we offered in our June 2004 Signature Sale. Our Permanent Auction Archives contain only six previous appearances of this variety over the span of more than two decades, with just four different coins therein represented. Some of this can be explained by certain coins having fallen into strong hands — the Harry W. Bass, Jr. coin, for example, has been permanently removed from availability, retained for the Core Collection — yet, in the end, the lack of availability for BD-14 comes down to one glaring obstacle: This issue is *unequivocally rare*.

The currently offered coin is something of a Prodigal Son, here returning to the public auction scene for the first time in *more than half a century*, having last appeared as lot 4155 in Federal Brand Enterprises' January 1963 Million Dollar Auction Sale. It is also in a class by itself when compared to other BD-14 representatives, as it is the only example known in the terminal die state, and is quite possible *the only such piece in existence*. It was described in the 1963 Federal Brand sale as having a "die break from Liberty's chin to the edge," and showed, in the plate, a reverse rim cud over ME in AMERICA. This catalog description, as well as a derivative notation in Walter Breen's half eagle monograph, were the entire basis for John Dannreuther's terminal die state diagnostics as published in his 2006 reference work, *Early U.S. Gold Coin Varieties*. Neither he nor Bass had ever personally seen an example of this die state, and no representatives other than the present piece surfaced in our study of plated auction listings. Even the Earle coin was an early die state example.

The surfaces are beautifully original, showing remnants of semiprooflike mirroring in the fields and warm coppery-gold overtones on the high points of the devices, denoting trivial cabinet friction. The strike is evenly executed, but lacking in sharpness in the centers; the upper-left portion of the shield is ill-defined and there are remnants of adjustment marks in Liberty's hair curls. Nonetheless, the eye appeal is exceptional. As described in the 1963 FUN sale, a heavy die crack extends from the rim between star 15 and the bust to Liberty's nose, and a heavy rim cud caps the ME in AMERICA; there are no other discernible die flaws unique to this state. This is an old-time gold rarity of incredible importance to the early gold varieties specialist. We anticipate significant interest in this magnificent numismatic treasure, a coin which is literally offered only once in a lifetime.

Ex: Million Dollar Auction Sale / FUN (Federal Brand Enterprises, 1/1963), lot 4155. PCGS# 519868 Base PCGS# 8075

1796/5 Half Eagle, BD-1, VG10

4233 **1796/5 BD-1, High R.4, VG10 PCGS.** Bass-Dannreuther Die State a/b. Only 6,100 Capped Bust Right half eagles were struck in 1796, with a single die variety known for the date. All the coins were struck using a leftover obverse die from 1795, with the date altered by punching a 6 over the 5. The reverse was also used previously in 1795 to strike the BD-12 variety of that date. Probably no more than 80-100 examples survive today in all grades.

The present coin is evenly worn, with some interior detail in Liberty's hair still intact. The light orange-gold surfaces show some faint planchet adjustment marks on the bust, but only minor abrasions are present. A still-attractive specimen of this scarce issue. Population: 1 in 10, 26 finer (4/15). PCGS# 519862 Base PCGS# 8067

1800 Half Eagle, BD-2, Great-Looking AU53

4234 **1800 BD-2, High R.3, AU53 PCGS.** Bass-Dannreuther Die State c/d; a small die crack connects IB in LIBERTY on the obverse and the right wingtip to the rim on the reverse. This lovely coin is certified in a green-label holder, showing excellent yellow-gold patina on surfaces that are relatively unabraded for the grade and show no planchet adjustment marks. A great-looking example of the date and the BD-2 variety, one of only two readily available die marriages for the 1800. PCGS# 45592 Base PCGS# 8082

1806 Half Eagle, MS64
Lustrous BD-6 Variety, Round Top 6
Just a Handful in Finer Grades

4235 **1806 Knob 6, 7x6 Stars, BD-6, R.2, MS64 NGC.** Bass-Dannreuther Die State d/e. Round Top, Knobbed 6. The late die state is confirmed by an obvious rust lump on R in LIBERTY. A later state exists, where die clashing forewarns a terminal state of the dies, but this coin shows only a few areas of minor clashing. Long a favorite of early gold type collectors, the BD-6 variety is not only the most readily available early half eagle, it is among the most populous of any early gold denomination. Somewhere in the neighborhood of 1,000 pieces exist in all grades.

Even so, near-Gem examples and finer are scarce-to-rare. Only a handful of numerically finer pieces than the present coin exist. Brilliant satiny luster covers both sides of this greenish-gold five, with just a few minor marks that disturb the frosted surfaces. The strike is centrally bold on the obverse but slightly weak at the shield stripes and left eagle's wing as always seen, a function of obverse die in the hammer and the reverse in the anvil position. Census: 36 in 64, 2 finer (4/15). PCGS# 45620 Base PCGS# 8089

1808 Capped Bust Left Five, MS63
Popular BD-4 Variety

4236 **1808 Wide 5D, BD-4, High R.3, MS63 PCGS.** Bass-Dannreuther Die State c/a. A substantial mintage of 55,578 Capped Bust Left half eagles was accomplished in 1808, with four die varieties known for the date. This coin represents the BD-4 variety, with a normal date and a widely spaced 5D in the denomination. BD-4 probably accounted for about 15,000-30,000 pieces of the reported mintage, as it is the most available variety in today's market. The surviving population numbers 175-225 examples in all grades. The obverse die was used previously to coin the 1808 BD-3 variety and the reverse was used again to strike the BD-1 variety of 1809.

The present coin features strongly impressed design elements, but the obverse die was lapped after its previous use, making the details a little thin in places. The vivid orange-gold surfaces are lustrous and lightly marked, with no sign of planchet adjustment marks. Eye appeal is quite strong for this early U.S. gold issue. Housed in a green label holder. Population: 19 in 63, 16 finer (4/15). PCGS# 507605 Base PCGS# 8102

1809/8 Half Eagle, BD-1, Unc Sharpness
Sharp, Some Luster Remaining

4237 **1809/8 BD-1, High R.3 — Improperly Cleaned — NGC Details. Unc.** Bass-Dannreuther Die State b/b. BD-1 is the only known variety of the 1809 half eagle, employing what has generally been touted as an overdated 1808 head die; John Dannreuther suggests the underdigit may actually be a misplaced 9. This unworn example is boldly and evenly struck, with bright green-gold surfaces that yield some luster in the peripheral recesses. Light chatter in the fields in not overly distracting. PCGS# 507603 Base PCGS# 8104

1810 Large Date, Large 5 Half Eagle, MS63
Available BD-4 Variety, Great Type Coin

4238 **1810 Large Date, Large 5, BD-4, R.2, MS63 PCGS.** Bass-Dannreuther Die State c/b, showing a vertical die crack between the 81 to the gown clasp. Ranked only R.2 in rarity, the 1810 Large Date, Large 5 BD-4 variety is among the most common early eagles in terms of both date and variety, making it an obvious, targeted acquisition for type collectors. This is a quintessential Mint State example of the variety, showing generous mint luster on amber-gold surfaces that are attractive, well-struck with the sole exception of the eagle's left (facing) wing, and relatively free of abrasions. A top-drawer example. For the Large Date, Large 5, Population: 38 in 63 (1 in 63+), 36 finer. PCGS# 507598 Base PCGS# 8108

1811 Small 5 Half Eagle, BD-2, AU58
Briefly Circulated Example

4239 **1811 Small 5, BD-2, R.3, AU58 PCGS.** Bass-Dannreuther Die State d/a, showing no clash marks on the reverse. All dates (though not all varieties) of John Reich's Capped Bust Left design are collectible. The 1811 is no exception, though it is certainly scarcer than the 1807 or 1810. The 1811 has two die marriages, and each is separately listed in the *Guide Book* due to different-sized punches used for the 5 in the denomination. This butter-gold representative displays ample luster and is refreshingly void of abrasions. Light rub on the claws and chin confirms momentary circulation. PCGS# 507599 Base PCGS# 8109

1812 Half Eagle, BD-1, AU53
Attractive Wide 5D Example

4240 **1812 BD-1, R.3, AU53 PCGS.** Bass-Dannreuther Die State a/a, unclashed dies. More than 58,000 half eagles were minted in 1812, with two varieties known for the date. The present coin represents the more available BD-1 variety, with a Wide 5D in the denomination. This attractive specimen displays sharp details on the obverse, but the reverse is a little softer and shows more wear. Planchet adjustment marks appear in the center reverse and around the scroll center. The surfaces are lustrous and show only a few minor abrasions.
Ex: Eagle Harbor Collection, Part Three / Long Beach Signature (Heritage, 9/2011), lot 4290. PCGS# 507601 Base PCGS# 8112

1812 Wide 5D Half Eagle, BD-1, AU55
Lightly Worn Example

4241 **1812 BD-1, R.3, AU55 PCGS.** Bass-Dannreuther Die State a/a, no clash marks. The Wide 5D variety, easily distinguished from the only other 1812 marriage, the Narrow 5D BD-2. BD-1 has a bold, curved die line within the eagle's shield and left (facing) wing, as made from an unknown mishap at the First Philadelphia Mint. This almond-gold representative shows light wear on Liberty's curls and the eagle's neck plumage, but luster illuminates the legends, stars, and motifs. Smooth overall with a few faint faded marks on the left obverse field. PCGS# 507601 Base PCGS# 8112

1812 Half Eagle, MS61
Underrated BD-2 Variety

4242 **1812 Narrow 5D, BD-2, High R.4, MS61 PCGS.** Bass-Dannreuther Die State c/a. BD-2 is by far the scarcer of the two 1812 half eagle varieties. Attribution is easily accomplished by examining the denomination on the reverse: BD-1 shows the 5D widely spaced, while BD-2 shows a much closer relation. A common obverse was used for both marriages and is seen here in its later use. John Dannreuther writes of BD-2: "This scarce variety is unappreciated, as the date is quite available and little attention has been paid to this combination." With only 80 to 100 examples believed extant in all grades, this Uncirculated representative is of heightened importance. The strike is even and well-executed. The border denticles are complete, although minor adjustment marks remain along the left obverse periphery. Lustrous yellow-gold surfaces reveal only light chatter in the exposed areas that limits the grade. PCGS# 507602 Base PCGS# 8112

1813 Half Eagle, BD-1, AU Details
Affordable Type Coin

4243 **1813 BD-1, R.2 — Cleaning — PCGS Genuine. AU Details.** Bass-Dannreuther Die State a/a, unclashed. This variety shares its obverse with BD-2, the other 1813 half eagle die pairing. The BD-1 reverse is not known in a terminal die state, but as this is its only use, the possibility remains that such a coin will one day turn up. There are as many as 650 examples of this variety believed to survive, making it one of only a few die pairings of the type that can be readily collected. This piece displays an even, sharp strike, with just light wear over the high points of the design. Mild cleaning in the past leaves remnants of luster in the recesses and a medium green-gold patina overall. PCGS# 519907 Base PCGS# 8116

1813 Half Eagle, BD-1, AU53
Great Type Coin

4244 **1813 BD-1, R.2, AU53 PCGS.** Bass-Dannreuther Die State a/a, no clashing visible. The BD-1 1813 variety is distinguished from the BD-2, with which it shares the same obverse, by the position of STATES in relation to the motto on the banner below, showing the first S a bit further right. The 1813 issue is the only readily available date of the Capped Bust half eagles, as later series entrants are notoriously rare. This AU53 PCGS example displays a smattering of minor abrasions on still-lustrous honey-gold surfaces, but there are no major abrasions or planchet adjustment marks. The strike is soft on some of the obverse star centers, but the eye appeal is good overall, making this a great type coin. PCGS# 519907 Base PCGS# 8116

1813 Half Eagle, BD-1, AU55
Appealing, Problem-Free Type Coin

4245 **1813 BD-1, R.2, AU55 PCGS.** Bass-Dannreuther Die State b/b, lightly clashed in the reverse shield. The 1813 is the only issue in the 1813 to 1829 Small Capped Bust half eagle series that is readily collectible, ideal for type purposes. Nonetheless, cleaned and otherwise damaged examples abound, and an affordable, problem-free piece is seldom seen. This Choice AU coin retains soft green-gold luster in the recesses, and exhibits smooth, attractive surfaces. The stars and border dentils are complete, mirroring the sharpness of the central devices. Only slight friction is evident over the high points of the design. PCGS# 519907 Base PCGS# 8116

1813 Half Eagle, BD-1, MS62
Frosty, Original Mint Surfaces

4246 **1813 BD-1, R.2, MS62 NGC.** Bass-Dannreuther Die State b/b. The 1813 half eagle is by far the most heavily collected issue in the 1813 to 1829 Capped Bust type, if only because it is the only date therein that is readily collectible and therefore the ideal type candidate. Examples of this issue, particularly the more available BD-1 variety (here represented), are encountered with mild frequency and can be had for a price. Yet, most examples have one distinct fault: surface impairments. A collector may look at dozens of 1813 half eagles before coming across an example in any grade that showcases unequivocally original luster and pleasing eye appeal. This Mint State coin combines these rare qualities with bold design definition and remarkably few abrasions for the grade. The frosty surfaces are aglow in lovely green-gold luster, and the luminous appearance is eye-catching. This piece embodies the combination of technical and aesthetic merit that many early gold collectors hope to find, but seldom do. PCGS# 519907 Base PCGS# 8116

1818 STATESOF Half Eagle, BD-2, Choice AU
Rare Perfect Die State

4247 **1818 STATESOF, BD-2, R.4, AU55 NGC. CAC.** Bass-Dannreuther Die State a/a, perfect dies. The STATESOF is a popular *Guide Book*-listed variety, but when found without the later clashing and/or terminal bisecting obverse die crack, as here, it is rarer than usual. (And the STATESOF variety is very scarce in any case, even though it is the most available of the three die pairings known for the year.) This lustrous Choice AU example is rotated considerably with respect to the obverse, as on all known. Deep honey-gold color highlights surfaces that show excellent eye appeal and only scattered, minor marks. PCGS# 519912 Base PCGS# 8121

1832 Half Eagle, BD-1, AU Details
13 Stars Obverse

4248 **1832 Square Base 2, 13 Stars, BD-1, R.5 — Improperly Cleaned — NGC Details. AU.** Bass-Dannreuther Die State a/a. BD-1 is by far the more plentiful of the two 1832 half eagle varieties, but it is still represented by no more than 40 or 50 coins. The fact that such a small survival rate is one of the higher for the type speaks volumes about the rarity of Small Capped Bust half eagles in general. Despite this being the only use of this obverse die (the reverse was later employed for BD-2, as well as the first two 1833 varieties), there is no terminal die state known. With so few coins extant, there is insufficient data to accurately determine what caused the obverse die to be retired.

This BD-1 example is evenly struck with complete border dentils, although there is some minor weakness on the eagle's left (facing) wing. Green-gold surfaces are slightly muted by old cleaning, but a few hints of luster remain. Some scattered small ticks are to be expected for the grade level. PCGS# 519950 Base PCGS# 8156

1834 With Motto Capped Bust Half Eagle
BD-2, Crosslet 4, AU Details

4249 **1834 With Motto, Crosslet 4, BD-2, R.5 — Improperly Cleaned — NGC Details. AU.** Bass-Dannreuther Die State b/b. In regards to the Small Size Capped Bust half eagles of 1829 to 1834, collectors usually cannot afford to be extremely choosy in selecting an example for their cabinets. Finding a representative of a certain date or variety in any condition is difficult, and in some cases, finding a problem-free coin that doesn't break the bank is almost impossible.

Three head dies and three tail dies were employed for the 1834 Capped Bust half eagle, producing four individual varieties. BD-1 and BD-2 are the only ones that are at all collectible, yet, with only 30 to 40 and 45 to 55 examples believed extant, respectively, even these will prove extremely challenging to locate. This BD-2 representative shows bold detail, with a few hints of luster remaining in the protected regions. Pale olive-gold patina is the product of light cleaning, although the surfaces are pleasantly smooth. PCGS# 519956 Base PCGS# 8161

CLASSIC HALF EAGLE

1834 Plain 4 Classic Half Eagle
Appealing MS61

4250 **1834 Plain 4 MS61 PCGS. Second Head, Breen-6502, McCloskey 2-B, R.3.** A few scattered scrapes are less severe than might be expected for the grade, and strike weakness shows on the hair curls under the coronet and below the ear, as well as left of the shield on the reverse. The peripheral strike is sharp, however, and attractive honey-gold color adds to the already-good eye appeal. A nice example of this first-year Plain 4 variety. NGC ID# 25RR, PCGS# 8171

LIBERTY HALF EAGLES

1840-D Half Eagle, AU50
Elusive Early D-Mint Five

4251 **1840-D AU50 NGC. Variety 3-B.** Tall Mintmark. The 1840-D half eagle is challenging in all grades, with an estimated survival of just 150 to 175 coins, this from a mintage of nearly 23,000 pieces. Most survivors are in XF and lower grades, and AU examples are only infrequently located; Mint State coins are rare. This About Uncirculated piece offers unusually sharp detail with a bright green-gold backdrop. A small tick in the field below Liberty's chin is the only abrasion of note. Census: 11 in 50, 39 finer (4/15). NGC ID# 25SG, PCGS# 8198

1844-D Half Eagle, MS61
Sharp Dahlonega Type Coin

4252 **1844-D MS61 PCGS. Variety 11-G.** This is a delightful Dahlonega five, characterized by razor-sharp detail on each star, the hair curls around Liberty's face, and the eagle's neck and talons. Hints of honey-gold toning accent the peripheral recesses, while the remainder of the surfaces yield warm yellow-gold color. Light chatter defines the grade. The Georgia mint struck 88,982 pieces, but Doug Winter estimates only 10 to 12 true Mint State examples survive. Population: 10 in 61, 11 finer (4/15). NGC ID# 25T9, PCGS# 8221

1845-D Half Eagle, Appealing MS61

4253 **1845-D MS61 PCGS. Variety 13-H,** showing the date shifted farther left than on the rare Variety 14-H. This piece overall is quite sharply struck for the issue, showing less strike weakness on the reverse than normal. A few scrapes account for the grade, including one through the year and hair on the obverse, a pair through the D in UNITED and the rim above on the reverse. Attractive amber-gold color and good luster make this piece one of the more collectible high-grade examples of the issue of 90,000-plus coins. Population: 11 in 61, 7 finer (5/15). NGC ID# 25TC, PCGS# 8224

1858 Liberty Half Eagle, MS64+
Low-Mintage Philadelphia Issue

4254 **1858 MS64+ NGC. CAC.** Only 15,136 Liberty half eagles were struck at the Philadelphia Mint in 1858, a production total that was about on par with the scarce branch-mint issues of that era. The 1858 circulated heavily at the time of issue, making high-grade examples rare in today's market. The present coin is a high-end Choice example, with well-detailed design elements that show just a touch of softness on Liberty's hair and the arrow fletchings. The well-preserved orange-gold surfaces emit vibrant satiny mint luster and overall eye appeal is outstanding. Census: 4 in 64 (1 in 64+), 3 finer (4/15). NGC ID# 25V7, PCGS# 8276

1859-D Medium D Five Dollar, AU58+
Generous Luster and Eye Appeal

4255 **1859-D Medium D AU58+ PCGS. CAC. Variety 44-HH.** The 1859-D half eagle, despite its low mintage of 10,366 pieces, is rather more available in higher grades than some other of its D-mint siblings, fortunately for collectors today. Perhaps a small hoard was uncovered at some time in the past. This piece boasts generous luster on yellow-gold surfaces with just a touch of high-point wear and minimal abrasions. The strike is sharp throughout. Excellent eye appeal makes this a top-flight candidate for a Southern gold type set. Population: 18 in 58 (2 in 58+), 11 finer (4/15). This is one of only five Medium Ds in AU58 with the CAC sticker. NGC ID# 25VD, PCGS# 8282

1860-D Medium Mintmark Half Eagle, AU58
Sharply Struck Throughout

4256 **1860-D Medium D AU58 PCGS. Variety 46-GG.** The D mintmark is close to the branch and the feather, and its upright is over the left serif of the E in FIVE. The yellow-gold surfaces of this near-Mint State example display ample luster in the recessed areas. The design elements are sharply struck throughout, and neither side reveals marks beyond what would be expected for a gold coin that saw brief circulation. Population for Medium D variety: 21 in 58, 31 finer (5/15). NGC ID# 25VH, PCGS# 8286

1864 Half Eagle, AU55
Fewer Than 75 Pieces Known

4257 **1864 AU55 NGC.** The 1864 half eagle is a highly underrated rarity in virtually every grade. Production was limited to only 4,170 pieces, and those coins that were not eventually melted served extensively in circulation. Only 60 to 75 pieces are believed to survive, almost all in circulated condition. This Choice AU representative is pleasantly original with medium orange-gold patina and hints of luster remaining in the recesses. The strike is sharp and there is only minor wear over the high points of the design. A couple small planchet voids are seen at the back of Liberty's neck, not obvious without magnification. An appealing, high-end example of this challenging Philadelphia issue. Census: 11 in 55, 12 finer (4/15). NGC ID# 25VU, PCGS# 8296

1868-S Half Eagle, MS61
Tied for Finest Certified

4258 **1868-S MS61 PCGS.** The San Francisco half eagle issues from the 1860s are, in a word, scarce. The 1868-S had a mintage of 52,000 pieces, the highest half eagle production total since the outbreak of the Civil War in 1861, but attrition took its toll on survivors. Almost all known examples are in various circulated grades, primarily XF and lower; AU representatives are rare, and Mint State coins are seen so seldom that the offering of such a coin at auction is a marquee event. This original example is one of only two Mint State coins at PCGS, the other coin also graded MS61 (4/15). The soft orange-gold surfaces yield smooth, softly frosted luster, with fewer abrasions than are expected for the grade. The strike is soft on the eagle's neck and the hair curls around Liberty's face, but this is of little concern in comparison to this coin's status as one of the finest 1868-S fives known. NGC ID# 25W6, PCGS# 8316

1890-CC Half Eagle, MS64
Seldom Located This Nice

4259 **1890-CC MS64 PCGS. CAC. Variety 1-A.** The allure of the CC mintmark has long established increased demand for Carson City gold over Philadelphia or San Francisco issues, but in the case of the 1890-CC half eagle, a certain degree of scarcity also contributes to its collector interest. The Nevada facility coined 53,800 pieces, but most experienced extensive circulation and suffered from a high attrition rate. Uncirculated survivors are typically only seen in heavily abraded condition, and rarely is a piece encountered that grades better than MS63; Gem examples are extremely rare. This near-Gem displays frosty yellow-gold luster, with well-struck motifs. A few light grazes in the left obverse field are all that preclude a full Gem assessment from PCGS. Population: 30 in 64, 2 finer (4/15). NGC ID# 25Y3, PCGS# 8376

1893 Half Eagle, Frosty Premium Gem
Only Two Finer Submissions at NGC

4260 **1893 MS66 NGC.** Glowing, frosty luster swirls over largely wheat-gold surfaces with areas of sun-yellow and straw accents. This boldly struck Premium Gem originates from a high-mintage issue that nonetheless is a clear condition rarity so fine. NGC has certified just eight examples in Premium Gem with only two finer submissions (4/15). NGC ID# 25YA, PCGS# 8383

1898 Five Dollar Gold, MS66
Tied for Highest Graded Example at PCGS

4261 **1898 MS66 PCGS.** Even honey-gold blankets both sides of this Premium Gem five, and the surfaces admit only the most trivial of marks. The high points of the portrait exhibit deeper color, while the reverse is consistent throughout. A curved line extends from E in AMERICA. Swirling luster completes this attractive representation of the type, and, combined with the near-Superb technical grade, the numismatic desirability is substantial. PCGS had graded no finer pieces, while NGC has certified four coins in MS66 and two pieces in MS67. Population: 3 in 66, 0 finer (5/15). NGC ID# 25YP, PCGS# 8396

1898-S Half Eagle, Magnificent MS68
One of Four Examples Known
The Sole CAC-Endorsed Coin

4262 **1898-S MS68 PCGS Secure. CAC.** The 1898-S half eagle comes from a production of nearly 1.4 million pieces. The PCGS/NGC population, showing more than 1,150 submissions of the 1898-S, indicates that this issue is available in most levels of preservation, including circulated and mint condition through MS63. Near-Gems are scarce, showing a population of 61 examples. Higher-grade specimens are rare; specifically, the two services report 17 Gems, four Premium Gems, one MS67, and four MS68 submissions, with none finer (5/15).

The present offering is one of the four finest certified 1898-S five dollar gold pieces. It is significant that it is the only one of the four MS68s that is endorsed by CAC. Both sides radiate blazing mint luster from yellow-gold surfaces imbued with whispers of soft orange, yellowish-green, pink, and rose patination. All design features exhibit razor-sharp definition, and both surfaces are immaculately preserved, revealing no significant copper spots, toning streaks, die cracks, or planchet defects. We mention a few trivial, unobtrusive marks only to aid future catalogers and researchers who will wish to identify this gorgeous coin. These include a tick just to the left of Liberty's chin, a series of minute marks left of star 12, an apricot toning spot left of star 13, and a minuscule field mark between the I in AMERICA and the middle arrowhead. This unimprovable coin will serve as the centerpiece of a high-grade Liberty Head half eagle collection. The specialist in this field may have a once-in-a-lifetime opportunity to acquire this magnificent condition rarity. Population: 2 in 68, 0 finer (5/15). NGC ID# 25YR, PCGS# 8397

1899 Half Eagle, MS66+
Repunched Date

4263 **1899 Repunched Date, FS-301, MS66+ NGC.** The date is lightly repunched on this *Cherrypickers'* variety, with the undertype visible just to the upper-left of the primary digits. This magnificent example is aglow with thick, original mint frosty over warm, honey-gold surfaces. The strike is bold and the only grade-limiting disturbances are are few very light grazes on the obverse. Census: 76 in 66 (3 in 66+), 12 finer (4/15). PCGS# 145719 Base PCGS# 8398

1907 Half Eagle, MS67
Conditionally Rare

4264 **1907 MS67 NGC.** The 1907 Liberty half eagle is one of the most frequently seen issues in the series in Mint State, but the vast majority of survivors are in MS64 and lower grades; Gems are scarce and this issue is a prime condition rarity at the Superb Gem level. In MS67, NGC lists only nine coins (one in MS67 ★), with three MS68 finer; the finest at PCGS are a couple dozen MS66 coins, including one MS66+ (4/15). This splendid piece is awash in frosty green-gold luster that warms to soft honey hues in the central regions. The strike is bold throughout, and a light graze on Liberty's jaw is the only mentionable flaw. The 1 in the date is minutely repunched north, and the 7 is recut south by the same margin. This die characteristic is unlisted in *Cherrypickers'*. NGC ID# 25ZC, PCGS# 8416

PROOF LIBERTY HALF EAGLE

1886 Half Eagle, PR64 Ultra Cameo
Fewer Than Two Dozen Pieces Known
The Finest We Have Handled

4265 **1886 PR64 Ultra Cameo NGC.** The proof 1886 half eagle closely parallels its eagle counterpart in terms of survival rate in proportion to original mintage. The half eagle was struck to the extent of 72 pieces, but significantly fewer were likely ever distributed. Fewer than two dozen examples are known today, including a pair of coins in the Smithsonian Institution and a third piece from J.P. Morgan in the American Numismatic Society Collection. This leaves paltry few coins to go around for collectors, and makes the proof 1886 half eagle seem significantly underrated.

NGC and PCGS combined list 24 pieces in all grades, including a slightly impaired example, this figure likely including a number of resubmissions. Our Auction Archives show just five previous appearances of this rarity in the last two decades — the most recent offering was an NGC PR64 Cameo which realized $17,037.50 in our December 2013 Houston Signature Sale. The present Ultra Cameo example is superior to that coin in visual merit, and the finest we have ever offered. Stark field-motif contrast adorns the glassy fields and sharp, frosty devices. Close study with a loupe finds a few faint lines in the fields, but the overall eye appeal is exceptional. This is an issue which is inherently difficult to locate in any condition, and this outstanding example will no doubt garner significant attention. Census: 3 in 64 Ultra Cameo, 1 finer (4/15). NGC ID# 28CP, PCGS# 98481

INDIAN HALF EAGLES

1908 Five Dollar, MS65
First-Year Issue, Rarely Seen Finer

4266 **1908 MS65 NGC.** A lovely Gem, this first-year Indian Head five dollar offers bright, frosty luster over light yellow-gold surfaces. Each side exhibits strong strike definition, particularly on the lower headdress and the eagle's breast feathers. From a mintage of 577,845 pieces, the 1908 was saved to a considerable extent and is one of the most available issues in the series through Choice condition. However, Gems such as this are scarce, and finer examples are rarely encountered. PCGS reports just 22 coins in higher numeric grades (4/15). NGC ID# 28DE, PCGS# 8510

1909-O Half Eagle, AU Details
Unusually Pleasing Appearance

4267 **1909-O — Cleaning — PCGS Genuine. AU Details.** Lightly cleaned, but the evidence is barely perceptible, even with a glass. The surfaces yield fine-grain luster in warm wheat-gold hues, with no detracting abrasions or significant hairlines. The lower headdress feathers are deficiently struck, but the eagle is well brought up and the mintmark is plain. This by far one of the more attractive Details-graded 1909-O fives this cataloger has seen, and would serve well in the collection of a budget-conscious collector. NGC ID# 25ZK, PCGS# 8515

1909-O Five Dollar, Unc Details
Final O-Mint Half Eagle

4268 **1909-O — Improperly Cleaned — NGC Details. Unc.** This is a collectible, unworn example of this important New Orleans key, the only issue of the Indian Head type struck at that mint. The design elements are well-defined and the mintmark is clear. Satiny surfaces show unnaturally bright, yellow-gold color due to cleaning, but the overall "look" of the coin is still pleasing. With the rarity of the 1909-O in Mint State, this piece will be a welcome addition to an Indian half eagle date set. NGC ID# 25ZK, PCGS# 8515

1911-S Indian Five, MS63
Deep Coppery-Gold Color

4269 **1911-S MS63 NGC.** The 1911-S half eagle had a mintage in excess of 1.4 million coins, trailing only the 1909-D as the highest mintage in the series, but Mint State examples become increasingly elusive in succeeding grades, and this date is rare finer than MS63. This piece is well-defined throughout, with deep reddish patina over each side. The rich color effectively draws the eye away from a few scattered abrasions. NGC lists 19 numerically finer representatives (4/15).
Ex: Long Beach Signature (Heritage, 9/2002), lot 8275. NGC ID# 25ZM, PCGS# 8522

1912 Five Dollar, Sharp MS65
Only Three Coins Finer at Both Services

4270 **1912 MS65 NGC.** The quarter eagles of 1912 claim one of the largest mintages in the series (790,000 coins) and display a plentiful population through MS64. The issue is conditionally rare, however, and comparable Gems are highly elusive. Wheat-gold color covers lustrous surfaces that reveal just a few minor marks in the raised fields on the reverse. Sharply struck, as usual for the date. Census: 41 in 65, 3 finer (4/15). NGC ID# 28DS, PCGS# 8523

1914-S Five Dollar, MS62
Original Olive-Gold Coloration

4271 **1914-S MS62 NGC.** The 1914-S Indian Head half eagle is a conditionally challenging date, obtainable in MS62 and lower grades, but rarely seen finer. This example is well-struck with original olive-gold coloration. Grade-consistent abrasions are present, but none are individually detracting. NGC has only encapsulated 25 numerically finer coins (5/15). NGC ID# 28DW, PCGS# 8529

1914-S Half Eagle, MS62
Better San Francisco Issue

4272 **1914-S MS62 PCGS.** The 1914-S is one of the most difficult Indian half eagles to locate in MS63 and better condition, and any such coins that are encountered will require a strong bid to acquire. This MS62 coin offers the budget-conscious collector with a slightly more affordable alternative. Natural honey-gold surfaces exhibit mottled olive overtones which effectively mask light, scattered abrasions. Minor striking weakness is noted on the lower headdress feathers. NGC ID# 28DW, PCGS# 8529

1913 Indian Half Eagle, PR66
Second-Rarest Matte Proof Five

4273 **1913 PR66 PCGS.** In the past, the 1913 matte proof Indian half eagle has been regarded as the third-rarest issue in the eight-coin proof set, supported by survival estimates from PCGS and Garrett and Guth. However, the frequency of actual auction appearances suggests that the 1913 proof is either rarer than previously thought, or has an unusually high number of pieces tightly held in private collections. Our Auction Archives show only 16 prior appearances of the 1913 in more than two decades, whereas the 1914 has been offered 19 times, the 1912 has been seen 24 times, and the 1909 has made 25 appearances. Only the 1915 proof has been more elusive, with eight offerings in the past two decades in our Signature Sales.

The certified population data closely parallels the proportion of auction appearances for the matte proof fives. PCGS and NGC combined has seen only 49 examples of the 1913 in all grades, and only the 1915 is scarcer, showing a combined certified population of 39 coins. Even if no resubmissions are reflected in the census data (an extremely unlikely scenario), it is a certainty that less than half of the 99-coin 1913 mintage survives. Mike Fuljenz estimates as few as 30 to 40 coins are known.

Representatives of this issue are clustered around the PR64 to PR66 grade range, meaning that just about any example encountered is going to exhibit outstanding quality. This exceptional piece does not disappoint. Fully rendered design elements exhibit seemingly perfect matte surfacing, with rich olive-gold color overall. This is the first PR66 coin we have handled in just more than a decade, and we anticipate active interest from Indian gold specialists. PCGS# 8544

1795 Small Eagle Ten, XF Details
BD-1, 13 Leaves

4274 **1795 13 Leaves, BD-1, High R.3 — Mount Removed, Polished — NGC Details. XF.** Bass-Dannreuther Die State c/b. Although heavily polished, this BD-1 representative still shows the peripheral die cracks that define this terminal state of the obverse. The reverse was later employed for BD-2. Of the five Small Eagle ten varieties, BD-1 is the most plentiful with 225 to 325 examples believed extant, and is ideal for date or type representation. This example shows mount removal at 9 and 3 o'clock on the edges, and the design elements are smoothed over with a highly reflective polish, but the level of major detail remaining is strong, fully warranting the XF Details grade from NGC. This is an ideal opportunity for the budget-conscious collector of early eagles to acquire this first-year issue. PCGS# 45710 Base PCGS# 8551

1797 Large Eagle Ten, BD-4, XF Details
Rare Early Die State Representative

4275 **1797 Large Eagle, BD-4, High R.4 — Improperly Cleaned — NGC Details. XF.** Bass-Dannreuther Die State d/a. Almost all known examples of this scarce variety (90 to 110 coins) are from the later d/b die state, with cracks through the R and C in AMERICA. This piece is a rare early die state example, with no discernible cracks on the reverse. John Dannreuther knew of only a few such pieces when writing *Early U.S. Gold Coin Varieties*, one of which is the J.P. Morgan coin in the American Numismatic Society Collection. This piece is well-struck, with trivial wear over the high points of the design. Pale green-gold surfaces show evidence of light cleaning, but the overall eye appeal remains pleasing. There are a couple old, light scratches in the central reverse, mostly hidden in the horizontal shield lines. PCGS# 45719 Base PCGS# 8559

1798/7 Eagle, Stars 9x4, MS62
Strong Overdate, BD-1, Very Rare
Among the Few Finest Known

4276 **1798/7 9x4 Stars, BD-1, High R.4, MS62 NGC.** Bass-Dannreuther Die State c/b. The Mint's penchant for getting the most out of its dies — without being overly concerned with the date on the coins — was on display across several denominations in 1798. 1797 silver dollars come to mind, where the late die state 9x7 Large Letters silver dollars were actually struck and delivered in 1798. Gold eagles were struck dated both 1798 and 1797 during the year as well. All of the 1798 tens are overdates, a feature that was of little concern to the Mint, but a source of great interest to today's collectors.

Numerous die cracks run through the obverse of this rare Mint State 1798 eagle, most prominently one from the rim through L of LIBERTY, faintly through the hair, to the field before stars 3 and 4. Another crack splits off from the first and runs forward into Liberty's spitcurl and face. Die clashing from the reverse shield is visible within the cap. The reverse shows light cracks connecting UN and TED.

A few stray, thin contact marks in the obverse fields, along with myriad fine hairlines and a touch of barely visible graffiti in the left obverse field, keep this piece from an even higher grade. A few small marks on the neck of Liberty are consistent with the MS62 grade. Some minor die-grease areas appear on the reverse, as made at the Mint. Rich orange-gold and wheat-gold coloration and overall good preservation make this coin a desirable and appealing example of this very rare early gold variety.

Only two die marriages are known for the 1798/7 eagles, the BD-1 with stars arranged 9x4 and the BD-2 with stars arranged 7x6. The BD-1 1798/7 eagle is the only one among the early eagles to employ the 9x4 star arrangement. The BD-1 is estimated by Bass-Dannreuther to survive to the extent of 80 to 100 pieces in all grades, but even so it is far more available than the BD-2, with an estimated survival of only 20-30 pieces, making it a Low R.6 die pairing.

Of course, when one adds in the factor of conditional rarity, the present 1798/7 eagle in MS62 NGC is among the few finest survivors of its issue. NGC reports two examples in this grade with a single MS63 finer. PCGS also reports a single MS62 example of the BD-1 with none finer (4/15).

From The New Orleans Collection, Part Two. PCGS# 45720 Base PCGS# 8560

1799 Eagle, BD-10, AU Details
Affordable Type Coin

4277 **1799 Large Obverse Stars, BD-10, R.3 — Tooled, Whizzed — NGC Details. AU.** Bass-Dannreuther Die State a/a. BD-10 is the most plentiful 1799 eagle variety, and is one of the most often seen die pairings for the Draped Bust type, ideal for type representation. This bright, yellow-gold piece is sharply detailed and evenly struck. The surfaces are unmistakably whizzed with the effect that both sides are uniformly granular when studied beneath a glass but are completely devoid of the scattered abrasions that would have once occupied the fields. PCGS# 45723 Base PCGS# 8562

1801 Ten Dollar, BD-2, Appealing XF45

4278 **1801 BD-2, R.2, XF45 NGC.** Bass-Dannreuther Die State a/a. This is the usually seen variety of 1801 eagle, BD-2, showing star 1 considerably farther from the lowest hair curl than on the rare BD-1. This available variety, however, usually shows the mysterious "spines" or scoop marks on Liberty's cap, but on this piece, from the earlier die state, they are missing. The source of these marks is very much a mystery. This is an attractive honey-gold example of this variety, showing scattered but mostly minor marks throughout both sides amid good eye appeal. The planchet is well-centered, and no adjustment marks appear. PCGS# 45734 Base PCGS# 8564

1801 Eagle, BD-2, AU Details
Elusive Early Die State

4279 **1801 BD-2, R.2 — Repaired, Whizzed — NGC Details. AU.** Bass-Dannreuther Die State a/a. The scarce early die state before the vertical spines appear in Liberty's cap. This piece is exceptionally well-struck, but old whizzing is evident in the faintly hairlined surfaces. The coin is colored a deep olive-brass hue and the overall appearance is not overly impeded. A sharp, affordable Large Eagle type coin.

1801 Eagle, BD-2, AU58
Sharp Draped Bust Type Coin

4280 **1801 BD-2, R.2, AU58 PCGS.** Bass-Dannreuther Die State b/b. A late die state example; the clash marks on both sides are mostly lapped off, and the spines in Liberty's cap are now present. Still, no cracks are immediately obvious, despite this being the only use of this obverse. The reverse die was later employed for the BD-3 1803 die marriage where it finally cracks. This near-Mint BD-2 representative offers substantial eye-appeal with virtually complete detail and moderate remaining mint luster — all excellent attributes for a Draped Bust, Large Eagle type coin. The strike is even and sharp. A small mint-made planchet void hugs the reverse rim at 10 o'clock. Only a trace of actual wear is discernible over the problem-free, yellow-gold surfaces. PCGS# 45734 Base PCGS# 8564

1803 Capped Bust Eagle, AU Details
Small Reverse Stars, BD-3

4281 **1803 Small Reverse Stars, BD-3, R.4 — Damage — PCGS Genuine. AU Details.** Bass-Dannreuther Die State b/c. One obverse die was used to strike all six varieties of 1803-dated eagles. The BD-3 variety is identified by the position of the right foot of E in STATES over a cloud space. This well-detailed example shows just a trace of actual wear, but some faint planchet adjustment marks kept the lower left stars from striking up completely. The lustrous antique-gold surfaces are lightly abraded, but some minor surface damage is evident below Liberty's chin. PCGS# 45737 Base PCGS# 8565

1803 Eagle, Extra Star on Cloud, AU53
Large Reverse Stars, BD-5

4282 **1803 Large Reverse Stars, Star on Cloud, BD-5, High R.4, AU53 PCGS.** Bass-Dannreuther Die State g/b, showing small die cracks at the right shield corner and the left-side eagle's tail feathers. This AU53 PCGS example is certified in a green-label holder, showing good eye appeal on honey-gold surfaces. The obverse of this example is relatively unabraded and extremely attractive. The reverse shows a few minor scrapes as well as noticeable planchet adjustment marks through the center of the eagle downward to the lower shield area. This is the famous BD-5 Large Reverse Stars variety that shows an extra star, star 14, faintly imprinted on the rightmost cloud, an attribute of this variety apparently noticed first by Harry W. Bass, Jr. Bidding should be quite strong for this handsome early gold eagle. PCGS# 45739 Base PCGS# 88565

LIBERTY EAGLES

1838 Eagle, XF Details
Early Portrait Rendition

4283 **1838 — Cleaning — PCGS Genuine. XF Details.** The 1838 Liberty Head ten dollar uses an obverse portrait that differs considerably from that seen on later dates. The most obvious differences are in the curvature of the neck truncation (more graceful on the 1838 hub), and in the style of the hair that drapes over Liberty's ear (much more relaxed on the earlier issue). Lightly cleaned in the past, this example has acquired pleasing wheat-gold patina, and retains subtle hints of luster in the peripheral recesses. Light wear over the high points of the design leaves ample detail on the motifs. NGC ID# 262D, PCGS# 8575

1839/8 Liberty Eagle, AU53
Large Letters, Type of 1838

4284 **1839/8 Large Letters, AU53 NGC.** The 1839/8 Liberty eagle is a popular overdate from a mintage of 25,801 pieces. The design was modified later in the year, with subtle stylistic changes in the bust and smaller letters in the reverse legends on the new design. This AU53 example of the older issue exhibits light wear on the well-detailed design elements and lightly abraded orange-gold surfaces. Census: 22 in 53, 57 finer (4/15). NGC ID# 262E, PCGS# 8576

1840 Eagle, Semiprooflike MS61
The Finest We Have Ever Offered

4285 **1840 MS61 NGC.** The 1840 Liberty eagle had a mintage of 47,338 pieces, not unusually low for the period, but the attrition rate was very high. Survivors are scarce in all grades, and most are well-circulated; it is a rare occurrence that an AU representative is offered at auction, and Mint State pieces are of prohibitive scarcity. This MS61 example is one of only five Uncirculated pieces listed at NGC, including three in this grade and a single MS62 finer; PCGS has also seen three in this grade with an MS62 finer (4/15). Such figures entertain the possibility of one or more resubmissions. This is only the second Mint State 1840 ten we have offered in more than two decades; the previous coin was the NGC MS60 which realized $7,475.00 more than a decade ago in our August 2004 Pittsburgh Signature sale. This piece is superior to that coin by one grade point, and possesses pleasing eye appeal with semiprooflike, honey-gold fields and sharp, satiny devices. Scattered abrasions define the grade. The Liberty eagle specialist should not let this incredible condition rarity escape. NGC ID# 262G, PCGS# 8581

1842 Eagle, Small Date, MS61
Tied for Finest at NGC

4286 **1842 Small Date MS61 NGC.** The 1842 eagle coinage is divided between the Small Date and Large Date varieties (18,623 versus 62,884 pieces, respectively), and the Small Date is by far the scarcer issue overall. Moreover, while both issues are conditionally rare in Mint State, the Small Date variant is almost entirely limited the MS60 and MS61 grades, while the Large Date is represented by a few pieces as fine as MS64 and MS65.

This Small Date coin is tied with just two others as the finest at NGC, even while PCGS reports a coin each in MS62 and MS63 (4/15). The design elements are well-defined and each side shows satiny straw-gold luster with semiprooflike reflectivity in the fields. A bisecting die crack extends from the eagle's left (facing) wingtip, across the shield, toward the opposite border. Scattered abrasions define the grade. NGC ID# 262L, PCGS# 8585

1843-O Eagle, AU58
Conditionally Scarce O-Mint Ten

4287 **1843-O AU58 PCGS. Variety 2.** During the 1840s it almost appears as if the Philadelphia Mint (in its second facility since 1833) was competing with the New Orleans Mint (completed in 1839, although it struck its first silver coins in 1838). The two facilities regularly flip-flopped the record for most eagles coined during the decade. In 1843, New Orleans grabbed the laurel, with an eagle emission of 175,000-plus pieces, more than double Philadelphia's 75,462 coins. About Uncirculated pieces are nonetheless scarce, and Mint State examples are rare. The present coin boasts boldly struck greenish-yellow surfaces that show generous glimpses of the initial luster. Relatively smooth save for a moderate bagmark above the 3 in the date. Population: 7 in 58, 5 finer (4/15).
Ex: Long Beach Signature (Heritage, 5/2007), lot 2441; FUN Signature (Heritage, 1/2009), lot 5508. NGC ID# 262R, PCGS# 8589

1852 Eagle, MS61
Soft Prairie-Gold Luster

4288 **1852 MS61 PCGS Secure.** The 1852 ten dollar is typically available in circulated grades, but Mint State examples are rarely seen and are almost unknown finer than MS62. This MS61 representative displays satiny wheat-gold luster, with light, uniformly dispersed abrasions that define the grade. Several peripheral stars are weak, but the central devices are sharp. Population: 7 in 61, 5 finer (4/15). NGC ID# 263C, PCGS# 8608

1853/2 Ten Dollar, MS61
Rare in Mint State

4289 **1853/2 MS61 NGC. FS-301.** This *Cherrypickers'* variety, recognized by both NGC and PCGS, exhibits what appears to be the remnants of a 2 within the lower loop of the 3 in the date. This variety is scarce in all grades, but becomes a major condition rarity in Mint State. NGC lists only five Uncirculated examples, including three in this grade and one MS62 finer; the Mint State population at PCGS consists of a coin each in MS60 and MS61. Two of the NGC MS61 coins were recovered from the *S.S. Republic*. This piece is well-struck and displays satiny yellow-gold luster. Scattered abrasions limit the grade, but none are individually noteworthy. NGC ID# 263E, PCGS# 8611

1853-O Ten Dollar, MS60
Marquee Offering of This O-Mint Issue

4290 **1853-O MS60 NGC. Variety 3.** The New Orleans Mint struck 51,000 eagles in 1853, almost all of which were distributed into circulation. Beginning in 1855, coinage of this denomination slipped even lower when California gold began to be processed at the newly operational San Francisco Mint, and gold deposits in New Orleans declined proportionately. Examples of this Gold Rush-era ten are available in most circulated grades, but Mint State pieces are extremely rare, and are unknown finer than MS61. This MS60 coin displays satiny yellow-gold luster and is surprisingly free of major abrasions; the surfaces instead show slight muting of the luster and scattered small ticks and a few lines — nothing overly detracting or even noticeable to the unaided eye. A well-struck and pleasing example. Census: 1 in 60, 4 finer (4/15). NGC ID# 263F, PCGS# 8612

1854-S Ten Dollar, AU58
Rare Any Finer

4291 **1854-S AU58 NGC.** The 1854-S is available in circulated grades, but the significant rarity of Mint State examples puts increased pressure on the limited supply of near-Mint coins. This piece is well-struck and shows the expected friction over the high points of the design. Remnants of rose-gold luster reside in the recesses, while the remainder of each side is olive-gold in color. Census: 54 in 58, 7 finer (4/15). NGC ID# 263K, PCGS# 8615

1855 Eagle, Satiny MS61

4292 **1855 MS61 NGC.** Available in lower grades, the 1855 Liberty Head ten becomes rare in Mint State. This example displays soft, satiny luster in straw-gold hues, while a few small ticks and light, scattered lines limit the grade. Stars 1 and 2 are not fully defined, but the strike is otherwise sharp throughout. Census: 24 in 61, 7 finer (4/15). NGC ID# 263L, PCGS# 8616

1860 Ten Dollar, MS62
Few Known in Mint State

4293 **1860 MS62 PCGS.** The 1860 eagle, with a small mintage of only 15,055 pieces, is a challenging date in all grades. Its O-mint counterpart had a similarly low mintage of 11,100 coins, but is valued substantially higher in all grades. Certified population data for each issue is fairly similar across the spectrum, which makes the 1860 seem somewhat underrated by comparison. The typical piece is in XF or lower grades, and the date becomes a major rarity in Mint State. This MS62 coin is unusually appealing for the grade, with relatively smooth, satiny surfaces and bright yellow-gold luster. A bold strike completes the eye appeal. There are a few light lines in the fields. Population: 2 in 62, 3 finer (4/15). NGC ID# 2644, PCGS# 8631

1860-O Eagle, AU58
Final Pre-War New Orleans Issue

4294 **1860-O AU58 PCGS. Variety 2.** The 1860-O is the final ten dollar gold piece struck at New Orleans before the outbreak of the Civil War. The mint resumed operations in 1879, but eagle production in that year amounted to only 1,500 coins. The 1860-O had a mintage of 11,100 pieces, but most were lost to attrition; About Uncirculated examples are rare, and Mint State cons are exceedingly so. This near-Mint representative displays soft bronze-gold surfaces with hints of luster remaining the peripheral recesses. The design elements are well-defined, showing only trivial friction over the high points. Population: 4 in 58, 3 finer (4/15). NGC ID# 2645, PCGS# 98631

1861-S Eagle, Original XF40
Ex: Eliasberg

4295 **1861-S XF40 PCGS.** Ex: Eliasberg. The "scratch" mentioned in the Eliasberg catalog is visible horizontally in the right obverse field, but that is the only distraction on this otherwise appealing XF example. The smooth olive-gold surfaces are completely original, as evidenced by softly luminous recesses that are reminiscent of subtle mint luster. The 1861-S ten had a mintage of 15,500 pieces, few of which survive in any grade. This is an appealing, collector-grade example. Population: 8 in 40, 35 finer (4/15).
Ex: John H. Clapp; Clapp Estate to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Ruddy, 10/1982), lot 715. NGC ID# 2648, PCGS# 8634

1871-CC Eagle, AU Details
Scarce Carson City Issue

4296 **1871-CC — Improperly Cleaned — NGC Details. AU. Variety 2-A.** This immensely popular Carson City ten had a limited 8,085-coin mintage, and it is believed that only about 100 examples survive in all grades. About Uncirculated representatives are in the distinct minority, and Mint State coins are prohibitively rare. This piece is well-struck, with minor wear and light field chatter contributing to the grade. Lightly cleaned, but retoned a pleasing straw-gold hue. NGC ID# 264X, PCGS# 8661

1876 Eagle, Honey-Gold AU55
Underrated in High Grades
Fewer Than 50 Pieces Believed Known

4297 **1876 AU55 PCGS Secure.** Coinage of eagles at Philadelphia was exceptionally scant in the mid-1870s; the 1875 issue was struck to the extent of just 100 coins, the 1876 to 687, and the 1877 to 797. The 1875 is obviously the rarest of the three, and is widely recognized as a major series rarity. The 1876 and 1877 are also significant rarities, but are seemingly underrated, particularly when compared to the 1876-CC ten. The Carson City issue had a mintage of 4,696 coins and claims more than twice the overall survival rate of the 1876. Yet, the significantly rarer Philadelphia variant is currently quite similar in overall value, grade for grade.

Fewer than 50 examples of the 1876 eagle are believed to survive, with all but two coins in circulated grades. The only known Mint State pieces include a PCGS MS60, and an NGC MS61 Prooflike. This Choice AU representative is obviously among the finer-known examples and is a major rarity as such. Both sides show rich honey-gold patina with significant semiprooflike mirroring in the protected regions of the fields. A faint grease mark (as struck) lives over near the right obverse rim by stars 11 and 12. The design elements show light wear, but retain strong detail. An original, eye-appealing example of this underappreciated Philadelphia gold rarity. Population: 3 in 55, 3 finer (4/15). NGC ID# 265C, PCGS# 8674

1887 Eagle, MS63
Overlooked Rarity in This Grade

4298 **1887 MS63 PCGS.** The moderately low mintage provides a clue, but a glance at the population reports requires a second look to confirm the surprising rarity of the Philadelphia issue. Just nine coins have earned the Select Uncirculated grade or finer by both services combined. This lustrous example is certainly in that class, with minimally marked surfaces and a sharp strike on all of its elements. Eye appeal is excellent. Population: 4 in 63, 2 finer (5/15). NGC ID# 266H, PCGS# 8710

1889 Ten Dollar, MS62
Mintage 4,440 Pieces

4299 **1889 MS62 NGC.** An unusually high mintage of eagles at Philadelphia in the previous year saw the 1889 issue's production go unusually low to just 4,440 business strikes. This MS62 piece is light yellow-gold overall with occasional coppery accents. Modestly abraded but sharply struck and a condition rarity. Census: 7 in 62, 1 finer (4/15). NGC ID# 266N, PCGS# 8715

1890-CC Eagle, Lustrous MS61

4300 **1890-CC MS61 PCGS. Variety 1-A.** IN GOD WE TRUST is lightly die doubled, as always for this low-mintage Carson City issue. Overall, this is a sharply struck sun-gold ten with good luster and fewer abrasions than is customary for the MS61 level. One small strike-through near the lower neck curl is as made. Much scarcer in Uncirculated grades than its 1891-CC successor. NGC ID# 266S, PCGS# 8718

1891-CC Ten Dollar, MS64
High-Grade Carson City Beauty

4301 **1891-CC MS64 PCGS. Variety 1-A.** Attribution is by the reverse, where the second C of the mintmark is directly below the trailing tip of the arrow-fletching and a die line appears within the shield. One of the best surviving 1891-CC eagles in general and of the 1-A variety in particular, this near-Gem has bright apricot-gold luster and eye appeal in spades. Though striking softness visits the highest design elements, the coin's relatively few scattered marks are no impediment to the MS64 grade. Small coppery accents on the reverse add character. A valuable piece for the high-end Carson City collector. Population: 4 in 64, 0 finer (5/15). NGC ID# 266U, PCGS# 8720

1893-O Ten Dollar, MS63
Underappreciated in This Grade

4302 **1893-O MS63 NGC. Variety 1.** The 1893-O eagle is moderately available in Mint State, but the vast majority of such pieces are heavily abraded, grading no finer than MS62. Fewer than two dozen MS63 coins are certified by NGC and PCGS combined, and none are known finer. This piece is lightly abraded, but the eye appeal is heightened by semiprooflike fields and rich honey-gold luster. Bold design elements further contribute to the visual attributes. Census: 11 in 63, 0 finer (4/15). NGC ID# 2673, PCGS# 8727

1895 Eagle, Nicely Preserved MS65 Well-Struck Throughout

4303 **1895 MS65 PCGS.** The 1895 Liberty Head eagle issue ranges from typical Mint State examples with heavy abrasions, usually MS60 or MS61, to some of the finest survivors of the Liberty Head type. This Gem PCGS example is both amazingly well-struck and shows incredible preservation, tied with two other submissions for finest certified at PCGS. NGC reports two MS65 and two finer — one each in MS66 and MS67 (5/15). The surfaces on this piece range from khaki-gold at the rims to yellow-gold on the central devices. The few marks are minuscule. A small spot of deep toning or copper alloy appears on the reverse above the eagle's left (facing) wing. NGC ID# 2678, PCGS# 8732

1897 Ten Dollar, MS65 Thick, Frosty Luster

4304 **1897 MS65 NGC.** The 1897 eagle is readily available in the MS60 to MS63 grade range, but the certified population declines significantly in MS64 and this date becomes a condition rarity at the Gem level. This example is boldly struck, with frosty luster in shades of rose and green-gold. A few small alloy spots are noted, one on the reverse near the olive leaves and two on the obverse near star 13 and on Liberty's cheek. Census: 22 in 65 (1 in 65+), 6 finer (4/15). NGC ID# 267D, PCGS# 8737

1899 Ten Dollar, Superb Gem None Finer at Either Service

4305 **1899 MS67 NGC.** This late 19th century ten dollar issue has a generous mintage of more than 1.2 million pieces and examples in lesser Mint State grades are easy to find. The Superb Gem level, however, is a far different story: NGC has graded only four coins as MS67 and PCGS none, with zero finer at either service (5/15). Generous satiny luster has a distinct peach cast to it, particularly in the fields, while the devices and the fields immediately surrounding tend toward apricot and light gold. Intricately detailed and magnificently preserved, this is a coin to remember. NGC ID# 267J, PCGS# 8742

1846 Liberty Eagle, PR55
Newly Discovered Proof Example
Only Five Specimens Traced

4306 **1846 PR55 NGC.** The mintage of 1846 proof Liberty eagles was not recorded, but it was undoubtedly quite small. David Akers wrote in his Pittman catalog in 1998:

> "It is my belief that only 4 or 5 of the 20-25 proof sets minted in 1846 were issued with the three gold coins. Four specimens each of the Quarter Eagle and Eagle can be accounted for today ... (further down, about the proof eagles) Of course, there is the possibility that another example exists, if another proof set was issued, but the following four specimens are the only ones I can locate."

Akers proceeded to list a roster including the coins in numbers 1-4 in our listing below, but his speculation about a possible fifth specimen proved prophetic. Until the present coin was recently discovered and certified, numismatists continued to believe that only four 1846 proof eagles survived, but that small total will have to be expanded now. Undoubtedly, this coin has been cataloged over the years as a prooflike business strike, but NGC noticed the position of the date on this piece differs from that on the business-strike examples we have seen, corresponding to Breen's diagnostic "small date" for proofs. This coin has definitely been in circulation, probably spent for face value by its owner in the 19th century. Some slight wear is evident on the design elements, and the light greenish-gold surfaces show some minor abrasions, but the mirrored reflectivity is still evident in sheltered areas on both sides, and the devices are sharply rendered, aside from a touch of softness on star 12. Although slightly impaired, this very rare proof gold issue is an important find, as only two other examples are available to collectors, and they are tightly held. We expect intense competition when this lot is called. Census: 1 in 55, 1 finer (4/15).

Roster of 1846 Proof Eagles

1. PR64 Deep Cameo, per Garrett and Guth. Mint Cabinet, National Numismatic Collection at the Smithsonian Institution.

2. PR64 Cameo NGC. Possibly Public Auction Sale (Ed Frossard, 11/1892), part of a complete original cased proof set; unknown intermediaries; Numismatic Gallery; the set was purchased by John Jay Pittman on 7/20/1949 for $750; Pittman Collection, Part II (David Akers, 5/1998), lot 1712 j, realized $522,500 for the set; the eagle was offered individually in the Fun Signature (Heritage, 1/2011), lot 5337, realized $161,000.

3. Proof. Elmer Sears; purchased by John H. Clapp in December 1921; Clapp Estate, purchased by Louis E. Eliasberg, Sr. in 1942, via Stack's; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 675, realized $46,200; Don Kagin; Auction '90 (David Akers, 8/1990), lot 1922, realized $101,750; Worrell Collection (Superior, 9/1993), lot 1670; Seymour Finkelstein Collection (Stack's, 10/1995), lot 1636; offered by Albanese Rare Coins on page 96 of the March 2005 issue of *The Numismatist*.

4. Proof. R.C.H. Brock; J.P. Morgan; American Numismatic Society, exhibited at the 1914 ANS Exhibition.

5. PR55 NGC. The present coin. NGC ID# 28EM, PCGS# 8782

1879 Ten Dollar, PR55
Only 10 to 12 Pieces Believed Known

4307 **1879 PR55 NGC.** The proof 1879 eagle is an extremely rare, underrated proof issue. It is possible that some of the just 30 coins minted were melted as unsold, contributing the issue's paltry survival of an estimated 10 to 12 coins in all grades, two of which are housed in the Smithsonian Institution and the American Numismatic Society. NGC and PCGS combined list 12 grading events, with the current Choice AU coin being the sole lowest-grade example known, an unrivaled opportunity for the budget-conscious collector to acquire a representative of this major proof gold rarity. Both sides show consistent olive-gold patina, with remnants of proof mirroring in the protected regions of the fields. Trivial friction leaves bold detail throughout each side. Census: 1 in 55, 1 finer (4/15). NGC ID# 28FH, PCGS# 8819

1886 Eagle, PR63 Cameo
Underrated in Proof Format
Only 15 to 20 Pieces Known

4308 **1886 PR63 Cameo NGC.** The proof 1886 eagle is a major rarity, significantly underrated when one takes the time to study the frequency of auction appearances and pinpoint its survival rate. Of the 60 coins minted, Garrett and Guth estimate as few as 15 to 20 examples survive, including two coins in the Smithsonian Institution and a third in the American Numismatic Society Collection as part of a complete gold proof set acquired directly from the Mint in 1886 and donated by J.P. Morgan. NGC and PCGS combined list 15 pieces in all grades, a figure which likely includes a small number of resubmissions.

This honey-gold Cameo exhibits stark field-device contrast, with deep mirrors and sharp, frosty relief elements. There are a few light lines in the fields, as suggested by the grade, but no distracting imperfections are observed. Just a lovely coin that is a delight to behold.

The Pittman Collection lacked an example of this date in proof. The Amon G. Carter, Jr. "Brilliant Proof" realized $17,600 in 1984. Our Permanent Auction Archives show only eight previous appearances of this issue in more than two decades, only one of which has been in the last 10 years. Without a doubt, the 1886 proof eagle is a major rarity, and this offering is a landmark event for the proof gold collector. Census: 2 in 63 Cameo, 3 finer (4/15). NGC ID# 28FR, PCGS# 88826

1901 Ten Dollar, PR58
Only 85 Pieces Struck

4309 **1901 PR58 PCGS.** The proof 1901 ten dollar gold piece is challenging in all grades, much more so than the inflated certified population reports would suggest. PCGS and NGC combined list 86 grading events, more than the 85 coins that were actually struck. In actuality, it is believed that 50 to 65 examples survive in all grades, including two pieces in the Smithsonian Institution. This example is one of the more affordable, lower-grade examples known, ideal for the budget-conscious collector seeking an example of this rare turn-of-the-century proof. Both sides show deeply reflective fields beneath warm honey-gold patina. The sharp motifs are almost devoid of friction, although scattered abrasions on each side likely contribute to the grade. Population: 2 in 58, 20 finer (4/15). NGC ID# 28G8, PCGS# 8841

INDIAN EAGLES

1907 No Periods Ten, MS64+
Uninhibited, Vibrant Luster

4310 **1907 No Periods MS64+ PCGS.** The striking sharpness on the eagle's feathers and the obverse headdress is outstanding on this Plus-graded No Periods ten; minor incompleteness on the hair over Liberty's ear is characteristic of these dies, which lacked sharp engraving in this area. Both sides are essential free of disturbances, save for a few faint grazes on Liberty's cheek, and the surfaces deliver vibrant yellow-gold luster. An outstanding No Motto Type coin for the collector who finds a full Gem example to be slightly out of reach. NGC ID# 28GF, PCGS# 8852

1909 Eagle, Bold MS64
Underrated Issue

4311 **1909 MS64 PCGS.** The 1909 eagle is a quietly underrated rarity within its series, one of the scarcest P-mint issues in the entire set and about as rare as the 1908-S despite a mintage three times as large. This is an extremely attractive example of this issue, showing fine-grained, mattelike honey-gold surfaces with minimal abrasions and a bold strike. NGC ID# 28GM, PCGS# 8862

1910-D Ten Dollar, MS65
Clean Yellow and Rose-Gold Surfaces

4312 **1910-D MS65 NGC.** The 1910-D eagle is an accessible issue in most grades, as evidenced by a certified population of more than 22,000 pieces. Near-Gems are available with minimal trouble, but the number of certified representatives declines dramatically at the MS65 grade level. The yellow and rose-gold surfaces of this Gem offering are awash in vibrant luster and exhibit well-struck devices. A few minuscule reverse marks are well-hidden and fall within the parameters of the grade. NGC ID# 28GS, PCGS# 8866

1910-S Eagle, MS62+
Original Patina

4313 **1910-S MS62+ PCGS. CAC.** The 1910-S is a slightly better date in Mint State grades, with the majority of such pieces grading no finer than MS62. This Plus-graded example is sharply struck, with satiny honey-gold luster. Scattered abrasions limit the grade, though none are individually detracting. Finer examples are scarcely seen. NGC ID# 268D, PCGS# 8867

1910-S Eagle, Frosty Near-Gem
Prohibitively Rare Any Finer

4314 **1910-S MS64 NGC.** The 1910-S Indian eagle's high mintage of 811,000 coins is deceiving. The date's availability was drastically reduced in the mid-1930s during the massive gold melts. Mint State survivors are seldom available and typically grade only in the MS62 and lower range. The date is scarce in MS63, and rare at the Choice level. This example is a visual delight for the collector who enjoys original patina. Both sides show frosty luster beneath deep orange, lilac, and lavender-gold hues. The design elements are sharply impressed, and only a few minute ticks preclude full Gem status. Census: 20 in 64, 6 finer (5/15). NGC ID# 268D, PCGS# 8867

1911 Ten Dollar, MS65
Attractive Saint-Gaudens Type Coin

4315 **1911 MS65 NGC.** NGC and PCGS have graded more than 18,000 1911 eagles, but examples are scarcely seen at the Gem level of preservation. Orange-gold color blends with vibrant luster that emanates from both sides, each of which exhibits well-struck design elements. A small as-made planchet defect is visible on the back of the eagle's head. NGC has certified 57 examples finer (4/15). NGC ID# 28GT, PCGS# 8868

1911 Eagle, MS65
Green and Rose-Gold Surfaces

4316 **1911 MS65 NGC.** The Mint struck over a half million ten dollar gold coins in 1911. Vast quantities of Uncirculated coins were shipped overseas and held in international coffers for decades before being returned in the mid-20th century. The issue is available through Gem condition and is a popular choice for type purposes. Green and rose-gold coloration blends with coruscating mint luster over each side. A couple of small abrasions are noted on the eagle's breast. Somewhat lightly struck on Liberty's hair strands, but a highly desirable piece overall. NGC ID# 28GT, PCGS# 8868

1911-S Ten Dollar Gold, MS62
Conditionally Challenging

4317 **1911-S MS62 PCGS.** The 1911-S eagle is not rare in an absolute sense, but in Uncirculated condition every grade point becomes crucial. This is a well-balanced example, with minor ticks evenly distributed on both sides. The protected areas reveal original luster, particularly within the stars and peripheral lettering. Honey-gold hue blankets both obverse and reverse, and there are no distracting toning spots. Population: 44 in 62, 87 finer (5/15). NGC ID# 28GV, PCGS# 8870

1912-S Ten Dollar Gold, MS62
Lustrous Textured Surfaces

4318 **1912-S MS62 PCGS. CAC.** The San Francisco Mint imparted a mildly textured, deeply frosted finish to this attractive eagle, which captures the luster and displays it in swirling cartwheel fashion. The strike is sharp for the issue, which is usually weak on the high points but not overly so on this example. Only minor abrasions are widely scattered across the thickly frosted surfaces. NGC ID# 28GX, PCGS# 8872

1912-S Ten Dollar, MS63
Better S-Mint Date

4319 **1912-S MS63 PCGS. CAC.** The 1912-S Indian ten is a slightly better date in Mint State, particularly challenging above the MS63 grade level. This Select example displays unusually well-struck design elements, with bright yellow-gold luster. A few light abrasions limit the grade, but none are singularly obtrusive to the unaided eye. NGC ID# 28GX, PCGS# 8872

1915 Indian Eagle, MS65
Conditionally Rare in Finer Grades

4320 **1915 MS65 PCGS.** The 1915 Indian eagle claims a mintage of 351,000 pieces and the issue is not difficult to locate in grades up to the MS64 level, but attractive Gems, like the present coin, are scarce. This delightful piece offers well-preserved orange-gold surfaces, with vibrant mint luster and sharply detailed design elements. Population: 51 in 65 (1 in 65+), 9 finer (4/15). NGC ID# 28H5, PCGS# 8878

1920-S Indian Eagle, MS61+
A Marquee Offering

4321 **1920-S MS61+ NGC.** The 1920-S is a downright difficult issue to locate in Mint State, and even more challenging to acquire in the midst of other eager bidders. It somewhat sticks out in the series like a sore thumb ... or more accurately, a diamond in the rough ... a major rarity dropped right in the middle of a 10-year date gap that spans from 1916 to 1926. The hiccup seems to have been brought about by a need for eagles in either commerce or the banking system as backing for gold certificates. Most of the few surviving representatives are lightly circulated. In Mint State, this issue is arguably the rarest in the series, rivaled only by the fabled 1933, with which the 1920-S has something else in common: its mintage was almost complete destroyed in the 1930s gold melts. Series authority Mike Fuljenz states that the survival rate of the 1920-S is "among the lowest of any Indian Head Eagle relative to the original mintage," in this case 126,500 coins.

The present Uncirculated example is a highlight coin in the current offering of Indian Eagles, second only to the magnificent Gem 1933 with which it shares this catalog. Its Mint State rarity is comparable and we anticipate intense interest from collectors. The coin is well-struck, with satiny straw-gold luster. A couple marks on Liberty's face contribute to the grade. NGC ID# 28H8, PCGS# 8881

1933 Eagle, Radiant Gem
A Vibrant, Old-Time Example of This Paramount Melt Rarity
Rarely Seen, Only 30 to 40 Pieces Believed Known

4322 **1933 MS65 PCGS.** The 1933 Indian eagle was recognized as one of the greatest gold rarities of the 20th century almost from the time of its coinage, and demand for it continues to climb, fueled by a mysterious allure that is unparalleled in ten dollar gold pieces. The appearance of an example at public auction, regardless of grade, is a headlining event. In his February 1944 sale of the Beldon E. Roach Collection, B. Max Mehl wrote of the 1933 eagle:

> "Last year of issue, and goodness only knows when the coinage [of the eagle] will be resumed. ... Extremely rare and valuable."

The coin in that sale realized $175.00, an impressive price for a ten dollar piece that was only 11 years off the press. Just five years later, Mehl's 1949 sale of the Dr. Charles W. Green Collection offered an example which realized $470.00. In 1950, Mehl wrote of the 1933 eagle:

> "The only U.S. Gold Coin of this date that is available to and permissible to be owned by collectors. ... Very rare and valuable and steadily advancing in value. ... This coin is certainly to become one of our rarest Eagles ..."

Mehl's assessment of this melt rarity was blatantly prophetic. The number of pieces known is extremely minimal, limited to those few coins that were retrieved by collectors directly from the Mint cashier before the confiscation occurred in early April. David Akers' 1980 survival estimate was only 30 to 40 coins in all grades, a figure that is largely upheld by modern research and census data. All known examples are in Mint State since the issue was never released into circulation, and most survivors grade in the MS64 to MS65 range. "Most" is a relative term, however, as the majority of known 1933 eagles still amounts to only a handful of coins. With just a single piece known in MS66 and none finer, nice MS65 examples, such as the current piece, are essentially the finest obtainable, even by well-funded and patient collectors.

The immense allure and popularity of the 1933 eagle stems not only from the issue's notable rarity, but also from its historical significance as the final issue of the denomination struck before gold coinage was halted as a result of Franklin D. Roosevelt's Executive Order 6102. A world record auction realization for this issue in MS65 was set at our January 2008 FUN Signature sale, where a PCGS coin garnered $552,000. In 2004, the single known MS66 example (an NGC coin) set a world record price for the entire issue at an impressive $718,750. However, when a long-held, old-time representative of the 1933 eagle makes a never before seen appearance in the modern market, the collector demand is staggering, far surpassing that awarded previously seen pieces. The PCGS MS65 coin that appeared in our recent 2015 Central States Signature sale, housed in a green label holder and off the market since 1986, realized $822,500, far and away setting a new auction record for the entire issue.

The present example is of comparable importance. Also housed in a green label PCGS holder, this glowing Gem last appeared nearly two decades ago in a 1997 Bowers and Merena sale, and its pedigree can be traced back to Kosoff's 1946 sale of the World's Greatest Collection, a legendary encasement of coins assembled by noted numismatist, F.C.C. Boyd. Is it fitting that one of the greatest 1933 Indian eagles known first appeared in what was heralded at the time as the "world's greatest collection?" If nothing else, it speaks to the outstanding quality of this piece. This is a sharp, impressive coin, not only for the issue, but for the type. Mint-fresh, vibrant luster engulfs each side in *eye-catching* yellow-gold radiance, while yielding the occasional wisp of deeper coppery-gold color, primarily in the headdress feathers. A few light ticks on Liberty's cheek are typical for the issue and are not out of line for the grade.

While research confirms a few dozen examples of the 1933 Indian eagle survive, the frequency of auction appearances is disproportionately low. These coins are tightly held by the knowledgeable and patient collectors who have painstakingly acquired them, and owning one of these magnificent coins is an achievement to which remarkably few numismatists will ever be able to lay claim. This beautiful Gem, an old-time representative appearing here for the first instance in nearly two decades, is indeed worthy of a record bid. Population: 8 in 65 (2 in 65+), 0 finer (4/15).

Ex: World's Greatest Collection (Kosoff and Kreisberg, 1/1946), lot 727, which realized $375.00; possibly Memorable Collection (Kosoff and Kreisberg, 3/1948), lot 613; possibly Adolphe Menjou Collection (Kosoff and Kreisberg, 6/1950), lot 1664, which realized $525.00; possibly Melish Collection (Kosoff, 4/1956), lot 2639, which realized $825.00; DuPont Sale (Sotheby, 3/1983), lot 222; Greater New York Numismatic Convention Sale (Stack's, 5/1986), lot 1545; Public Auction Sale (Stack's, 10/1996), lot 1592; The Rarities Sale (Bowers and Merena, 1/1997), lot 348.

From The New Orleans Collection, Part Two. NGC ID# 28HC, PCGS# 8885

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU50
The First Regular Issue in the Series

4323 **1850 AU50 NGC.** Highly prized by collectors of all sorts as the first regular issue in the double eagle series, the 1850 was struck to the extent of 1.1 million coins from California-mined gold. The new twenty dollar gold pieces were almost universally well-received, solidifying the denomination's success in the ensuing decades. This bright, minimally circulated survivor shows light khaki-gold color with partial luster in the recesses. Well-detailed despite slight friction over the high points. Myriad abrasions are scattered over each side. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, AU53
Attractive First-Year Type

4324 **1850 AU53 NGC.** This first-year-of-issue double eagle (the 1849s were patterns; only a single example is known to survive, in the Smithsonian) features wheat-gold surfaces with a smattering of small- to medium-sized marks amid good luster and light wear. Type collectors naturally gravitate to attractive examples of first-year coins such as this. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, Lustrous AU55

4325 **1850 AU55 PCGS.** This first-year P-mint double eagle is certified in one of the popular old PCGS green-label holders and shows fewer marks for the grade than might be expected. Attractive yellow-gold surfaces retain considerable mint luster. Type collectors will naturally gravitate to an issue such as this. NGC ID# 268F, PCGS# 8902

1851-O Double Eagle, Boldly Defined XF45

4326 **1851-O XF45 PCGS. Variety 2.** The left foot of the first 1 in the date is between dentils and the O mintmark and is slightly left of center. This issue is a popular choice for type purposes, as many examples are offered at auction every year. Most examples grade Very Fine or Extremely Fine.

This is a boldly-defined coin that exhibits a slighter-than-anticipated degree of high-point wear for the Choice XF grade. The rather bright green-gold surfaces display a number of small-to-moderate marks. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, AU58
Substantial Luster Remaining

4327 **1852 AU58 PCGS.** Strong cartwheel luster illuminates the warm honey-gold surfaces of this nearly Uncirculated No Motto type coin. The strike is bold and there is only minimal high-point friction that is almost lost from sight amid the light chatter that accompanies the grade. Mint State examples of this issue are seldom offered. NGC ID# 268K, PCGS# 8906

1852-O Twenty Dollar, AU53
Scarce New Orleans Type Coin

4328 **1852-O AU53 PCGS. Variety 1.** Often identified as the the second most available New Orleans double eagle from the 1850s, this issue is available but scarce at the AU level. Nice luster remains across lightly abraded medium-gold surfaces. A strong strike for the issue displays the devices to full advantage, and the only significant mark is at the dentils beneath N of TWENTY, where a border disturbance may be of Mint origin. NGC ID# 268L, PCGS# 8907

1854 Small Date Twenty Dollar
Partly Lustrous Near-Mint Example

4329 **1854 Small Date AU58 NGC.** Although the number of Small Date coins included in the issue's mintage of 757,899 pieces is unknown, the variety is decidedly more available than its Large Date counterpart. Still, coins as fine as this near-Mint example are quite scarce, and any Uncirculated survivor is rare. Partial luster illuminates the protected regions over surfaces that show green and reddish-gold color. The well-detailed motifs, including fully defined stars, display moderate blending, and scattered abrasions do not detract. NGC ID# 268P, PCGS# 8911

1855-S Double Eagle, AU55
Bold Luster and Strike

4330 **1855-S AU55 NGC. CAC.** The 1855-S double eagle was only the second-year issue in this largest denomination from the San Francisco Mint, struck in the quantity of nearly 900,000 coins. This Choice AU example is a tad nicer than most certified examples, although it shows a scattering of luster grazes and abrasions consistent with a short spate in circulation. But radiant luster on orange-gold surfaces and a bold strike are partial compensation. NGC ID# 268X, PCGS# 8916

1856 Double Eagle, AU55
Lovely Orange-Gold Color

4331 **1856 AU55 PCGS. CAC.** The surfaces show lovely orange-gold color but with an intermittent overlay of smoke-gray haze, the effect of extensive coin-to-coin rubbing that also accounts for the Choice AU grade. Scattered marks appear throughout, including a few heavy scrapes. These early P-mint double eagles circulated widely, and this one is actually in a higher grade than most certified examples, which average AU50 or thereabouts. Population: 14 in 55, 44 finer (5/15). NGC ID# 268Y, PCGS# 8917

1856-S Double Eagle, Frosty AU53
Ex: *S.S. Central America*

4332 **1856-S AU53 PCGS. Variety 17-K.** Ex: *S.S. Central America*, SSCA 5828. No Serif, Spike F. The salvage of the *S.S. Central America* produced most of the high-grade 1856-S double eagles known to collectors, with more than 1,000 examples recovered, many in Mint State grades. Rather than be discarded by collectors as common, however, these coins are heavily sought-after for their connection to the famous 1857 shipwreck. This About Uncirculated example retains substantial mint luster in the frosty recesses of the honey-gold surfaces. The strike is sharp and there is only a trace of friction over the high points of the hair curls. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, MS61
Attractive Surfaces and Color

4333 **1856-S MS61 PCGS. Variety 17B.** Full Serif on U, Bold Left S Mintmark, Full Crossbar of A in STATES. The Mint State population of this San Francisco issue increased dramatically with the many shipwreck recovery coins, with more than 1,000 pieces brought up from the *S.S. Central America* alone. Although this example is not identified as a recovery piece on the holder, there can be no certainty of its origin because the overwhelming majority of Mint State coins are, in fact, seawater survivors. It matters little given the eye appeal of this coin, with lustrous, medium-gold surfaces and a few light-orange accents. The strike is sharp throughout, with minimal abrasions for the assigned grade. A single scrape by the neck in the left obverse field is the only significant mark. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, MS61
Intense Radiating Mint Luster

4334 **1856-S MS61 NGC. CAC. Variety 17H.** Full Serif, Right S. The 1856-S was rarely seen in mint condition prior to the recovery of the *S.S. Central America*, which yielded about 1,500 Uncirculated coins. This No Motto representative, almost certainly from the ill-fated ship, is sharply struck in most areas, with a few scattered bagmarks on each side that prohibit an even higher numerical grade. Perhaps this coin's most noteworthy attribute is its intense, radiating mint luster over lavender and orange-gold surfaces.
Ex: Central States Signature (Heritage, 4-5/2009), lot 3938. NGC ID# 2692, PCGS# 8919

1857-S Twenty Dollar, MS61
Breen-7189, Large S Variety, 'Very Rare'

4335 **1857-S MS61 PCGS. Breen-7189.** Large, Low S, which Breen called "very rare." The low, right placement of the large S mintmark relative to the N in TWENTY makes it unlikely that the present coin came from the *S.S. Central America*, although it could have come from a different, later shipwreck of the era. All of the *S.S. Central America* 1857-S twenties had a medium S mintmark, implying that the large S coins were delivered later, after the *S.S. Sonora* had sailed from San Francisco for the Pacific leg of what would be the *S.S. Central America*'s final voyage on the Atlantic side. Besides the obvious "naked-eye" size difference in the mintmarks, the final 7 in the date is especially boldly impressed into the die. This lustrous honey-gold representative shows a precise strike and a relatively smooth obverse. The reverse field exhibits several clusters of singularly minor marks. NGC ID# 2696, PCGS# 8922

1857-S Faint S Double Eagle, MS61
Nice for the Grade

4336 **1857-S MS61 PCGS. Variety 20D.** Ex: *S.S. Central America*. SSCA 2298. Faint S. More than 5,000 examples of the 1857-S double eagle were aboard the *S.S. Central America* when the ship sank. Rich orange-gold color with wisps of apricot covers both sides of this MS61 example. The design elements are well-defined. This is quite a pleasing coin for the MS61 designation. Some light scattered marks do not disturb, and are fewer and less severe than what would be expected for the grade. Housed in a gold label holder. NGC ID# 2696, PCGS# 8922

1859-S Double Eagle, AU58
Nicely Preserved Example

4337 **1859-S AU58 PCGS.** This gorgeous early S-mint double eagle is brimming with luster over radiant wheat-gold and reddish-orange surfaces and shows relatively few marks for the grade. The nicely preserved surfaces also benefit from a sharp strike. Finer-graded examples are seldom seen, as low-Mint State examples are few and far between. Population: 37 in 58 (1 in 58+), 36 finer (4/15). NGC ID# 269C, PCGS# 8928

1859-S Twenty, AU58
Original Luster

4338 **1859-S AU58 PCGS. CAC.** Substantial honey-gold luster resides in the recesses of this near-Mint 1859-S twenty, while the exposed regions of each side show deeper green-gold color. A well-struck, original example of this conditionally elusive Type One San Francisco issue. Population: 37 in 58 (1 in 58+), 36 finer (4/15). NGC ID# 269C, PCGS# 8928

1859-S Doubled Die Obverse Twenty, MS60
FS-101, Sole Mint State Example at PCGS

4339 1859-S Doubled Die Obverse MS60 PCGS. CAC. FS-101. Doubling is easiest to pick up on the word LIBERTY on the band of the coronet. Evidence of doubling can also be seen on the eye of Liberty, the hair curls, and profile. The 1859-S is a scarce Type One twenty in spite of a significant mintage of 636,445 pieces with only a few dozen examples certified in mint condition. However, the Doubled Die Obverse is much scarcer; possibly only 5% of the coins examined are from this die pair. In Mint State the Doubled Die is a significant condition rarity. Both of the major grading services recognize this variety and have done so for several years, so we are beginning to see good data for both the absolute and condition rarity of this issue.

This is the sole PCGS-certified example at the Mint State level, although a handful of circulated examples are known at that service. NGC has graded only two Doubled Die 1859-S twenties in Uncirculated, one MS60 and one MS61. Mint luster is remarkably bright on this piece with just a hint of reddish patina. The strike details are strong for a Type One, the only exception being several star centers. Only light and individually insignificant marks can be found with the aid of a loupe. This is a significant opportunity for the advanced gold collector. PCGS# 145732 Base PCGS# 8928

1860 Double Eagle, MS61
Frosty Original Surfaces

4340 1860 MS61 PCGS. The 1860 double eagle is a challenging issue in any Mint State grade, but is notably rare finer than MS61. This piece displays sharp design elements amid frosty green-gold luster. Light, scattered abrasions limit the grade, but none are individually detracting. Population: 23 in 61, 21 finer (4/15). NGC ID# 269D, PCGS# 8929

1861-S Liberty Twenty, AU55
Natural Coloration

4341 1861-S AU55 NGC. CAC. Despite a mintage of 768,000 coins, the 1861-S double eagle is elusive in AU and Mint State, especially in comparison to its frequently encountered Philadelphia counterpart. This Choice AU representative displays deep olive-gold patina, with hints of luster remaining in the recesses. NGC ID# 269K, PCGS# 8935

1862-S Twenty Dollar, AU58
Generous Luster

4342 1862-S AU58 NGC. CAC. Although more than 850,000 examples of the 1862-S double eagle were coined, most circulated widely as a popular trade medium, and today the average certified survivor grades "XF49." This near-Mint State piece is far finer, displaying generous luster on orange-gold surfaces with a scattered of mostly minor grade-consistent marks. NGC ID# 269N, PCGS# 8938

1865 Double Eagle, MS61
Better-Date Example

4343 1865 MS61 PCGS. Production of double eagles in San Francisco generally outpaced the Philadelphia Mint as western gold naturally flowed to the more convenient California facility. Although the 1865 Philadelphia twenty is not especially rare, its lower mintage distinguishes this issue from its San Francisco counterpart. Original luster penetrates the cheek and hair braids of this Uncirculated double eagle, and the obverse surfaces around the stars are smooth. The reverse is notably abrasion-free for the grade level, and the yellow-gold color is consistent throughout. Population: 10 in 61, 29 finer (5/15). NGC ID# 269U, PCGS# 8943

1868 Twenty Dollar, AU53
Beautiful Reddish-Orange Color

4344 1868 AU53 PCGS. The 1868 Philadelphia Mint double eagle is doubly popular, both as an example of the short-lived Type Two issue and for its low mintage of 98,500 postbellum circulation strikes. Beautiful deep reddish-orange color, great luster, and few marks for the grade make this a standout example. Population: 18 in 53, 49 finer (4/15). NGC ID# 26A3, PCGS# 8953

1869-S Twenty, AU58
Conditionally Scarce Example

4345 1869-S AU58 PCGS. CAC. The San Francisco Mint produced generous quantities of double eagles in the 1860s, and none are especially challenging in lower grades, with the exception of the Paquet Reverse 1861-S and 1866-S twenties. This situation rapidly changes as coins approach Uncirculated condition. PCGS counts less than a hundred examples of the 1869-S in AU58, and among these, this CAC-approved piece is one of the more appealing. The obverse exhibits considerable remaining mint frost, especially about the stars, nose, and temple. Both sides reveal even orange-gold color, and there are no unusual abrasions. Population: 87 in 58 (2 in 58+), 51 finer (5/15). NGC ID# 26A6, PCGS# 8956

1869-S Double Eagle, Seldom-Seen MS61

4346 1869-S MS61 PCGS. From a mintage of 686,750 pieces, the 1869-S Liberty double eagle is a very scarce issue in Mint State, with infrequent appearances on the auction circuit. This attractive MS61 piece is well-detailed, with the usual flatness on the stars. The luster on the obverse is a bit thin, but the reverse is much more vibrant. The pleasing surfaces display medium orange-gold coloration with the usual number of small abrasions one would expect for a double eagle in this grade. Population: 30 in 61, 13 finer (5/15).
Ex: Central States Signature (Heritage, 5/2005), lot 8950. NGC ID# 26A6, PCGS# 8956

1870 Twenty Dollar, MS60
Seldom Seen in Mint State

4347 **1870 MS60 NGC.** The 1870 double eagle is a less often seen Type Two date, particularly among Philadelphia issues. Production was fairly minimal, with only a little more than 155,000 coins struck, and few were saved in Mint State grades. Collectors of the period who sought to acquire an example of this date either chose a representative of the higher-mintage 1870-S, or purchased proofs, which were the preferred collector coins of the period due to their superior eye appeal over the heavily bagmarked circulation strikes. The Smithsonian Institution contains two proof examples of this issue, but lacks a circulation strike. This Uncirculated representative offers a combination of bold detail and radiant yellow-gold luster. Scattered abrasions limit the grade. Census: 3 in 60, 36 finer (4/15). NGC ID# 26A7, PCGS# 8957

1870 Double Eagle, MS61
Scarce Philadelphia Twenty

4348 **1870 MS61 PCGS. CAC.** The 1870 double eagle is significantly scarcer than is often realized by nonspecialists. About Uncirculated is the typical grade encountered, and Garrett and Guth note that the issue is "very rare in full Mint State." Moreover, most such pieces are heavily abraded. The Smithsonian Institution lacks a circulation strike example of this date, pointing to the preference of early collectors to acquire proofs, leaving the circulation-issue pieces to slowly fade away in commerce. This Uncirculated representative exhibits radiant, frosty luster with only light chatter limiting the grade. The devices are well-struck and the surfaces yield pleasing yellow-gold color. Population: 18 in 61, 22 finer (4/15). NGC ID# 26A7, PCGS# 8957

1871-S Twenty, MS60
Mint State Scarcity

4349 **1871-S MS60 PCGS.** Small Squat S. In keeping with most Type Two San Francisco double eagles, the issue is readily available up to XF condition, but scarce any finer. Most Mint State examples are well-traveled, returning from foreign holdings in the past several decades. This example displays lustrous, yellow-gold patina, with prooflike tendencies but many light bagmarks across the obverse surfaces. Sharply struck, it retains the original Mint freshness and eye appeal. Population: 20 in 60, 46 finer (4/15). NGC ID# 26AC, PCGS# 8962

1873-S Double Eagle, MS60
Open 3, Rare in Mint State

4350 **1873-S Open 3 MS60 PCGS.** Small S mintmark. Newly made dies with the Open 3 date were slow to reach California, and while exact mintages of the Closed 3 vs. the Open 3 are unknown, the population reports confirm a considerable difference in grading events. The Open 3 is markedly more scarce in AU and substantially more challenging in Mint State than the Closed 3. This lustrous, medium-gold example shows only light abrasions for the grade and a sharp strike with excellent eye appeal. A nice find for the double eagle specialist. Population: 32 in 60, 32 finer (4/15). NGC ID# 26AM, PCGS# 8979

1874-S Double Eagle, MS62
Vibrant, Original Surfaces

4351 **1874-S MS62 NGC.** A cluster of Uncirculated 1874-S double eagles resides around MS60 and MS61, but there are surprisingly few examples that have been awarded an MS62 grade and anything finer is a major rarity. This fully lustrous, original example displays thick orange-gold mint frost and well-defined design elements. Scattered abrasions limit the grade, but a radiant cartwheel effect ensures the eye appeal. Census: 31 in 62 (1 in 62+), 3 finer (4/15). NGC ID# 26AR, PCGS# 8972

1876-CC Double Eagle, AU55
Genuinely Appealing for the Grade

4352 **1876-CC AU55 NGC. Variety 1-A.** The 1876-CC double eagle is more available now than it has been in the past, largely due to the return of small quantities of examples from overseas sources in recent decades. Still, Mint State coins are elusive without heavy bagmarks, making nice AU representative, in some respects, more desirable. This Choice AU example displays pleasantly smooth surfaces, with mellow yellow-gold color and significant semiprooflike mirroring in the fields. Just a brush of wear is evident over the high points of the design. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU55+
Some Luster Remaining

4353 **1876-CC AU55+ NGC. CAC. Variety 1-A.** Many examples of the 1876-CC twenty show slight high-point friction, a product imparted by both brief circulation and careless handling during foreign trade. This Plus-designated Choice AU representative displays remnants of luster in the peripheral recesses, with warm honey-gold patina overall. NGC ID# 26AW, PCGS# 8977

1877-S Double Eagle, MS62
Semireflective Fields

4354 **1877-S MS62 PCGS. CAC.** This otherwise available Type Two San Francisco issue becomes rare finer than MS62. Both sides of this example display strong cartwheel luster, with frosty green-gold margins and flashy straw-gold centers that show subtle reflectivity in the fields. Sharply struck, with grade-consistent abrasions. PCGS has seen just 32 numerically finer representatives (4/15). NGC ID# 26B2, PCGS# 8984

1882-S Double Eagle, MS63
Tied for Finest at NGC

4355 **1882-S MS63 NGC.** Small Squat S, Breen-7283. While officials in the San Francisco branch mint were busy striking more than 1.1 million double eagles in 1882, production in the Philadelphia Mint reached only 571 pieces, and twenty dollar output amounted to just 39,140 coins at Carson City. In circulated grades, the 1882-S is far and away the most available double eagle bearing that date. Likewise, Uncirculated examples through MS62 appear with relative frequency in today's marketplace. It is only in Select condition that the 1882-S can be called rare. Coins in MS63 also happen to be the highest-rated examples that a collector may realistically hope to find. NGC has only seen 16 pieces in this grade (one in MS63+) and none rated higher. PCGS shows two finer MS64s and an MS64+ coin recently certified as part of the Saddle Ridge Hoard (5/15).

This eye-appealing example displays primarily rose-gold color. Typical S-mint frost rolls over each side, and the devices are well-struck. Small bagmarks are peppered throughout with two more prominent marks on Liberty's cheek. A great opportunity to acquire one of the finest examples from this conditionally rare issue. NGC ID# 26BG, PCGS# 8998

1883-CC Twenty, AU58
Seldom Seen Finer

4356 **1883-CC AU58 NGC. Variety 2-A.** This is a soundly graded example of this collectible Carson City issue, possessing the eye appeal of a lower-grade Mint State coin but exhibiting just a brush of friction over the high points of the design. Hints of pale rose accent the frosty yellow-gold surfaces, while the strike is sharp and there is almost no loss of detail due to circulation. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU58
Singularly Pleasing for the Grade

4357 **1883-CC AU58 PCGS. Variety 2-A.** This canary-gold twenty has a bold strike and only a hint of wear. Marks are minimal for the grade and denomination. A mintage of less than 60,000 pieces and the allure of the Carson City mintmark combine to ensure the demand for partly lustrous examples.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 5156. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU58
Nearly Mint State

4358 **1883-CC AU58 NGC. Variety 2-A.** A trace of wear on Liberty's cheek confirms momentary circulation, but cartwheel luster is apparent on both sides. Moderately marked, although mentionable marks are limited to a thin line behind the hairbun and a cluster of grazes below the knob of the left scroll. Two small alloy spots (as made) bookend the two rightmost reverse stars. The usually encountered die marriage for this low mintage Carson City issue, although an additional rare variety is known. NGC ID# 26BH, PCGS# 8999

1883-S Twenty, MS64
Tied for Finest Known

4359 **1883-S MS64 PCGS.** Many issues within the Liberty Head double eagles series have not survived in the highest grades, as early collectors failed to preserve the best examples at the time of issue. Proof runs were more popular at the time, and Uncirculated branch mint coinage was less prized. While proofs remain eminently desirable, today's market now recognizes the rarity of branch mint pieces in top condition. This is such a coin, tied for finest known at both PCGS and NGC. Yellow-gold covers the surfaces of this near-Gem example, with hints of rose in the recesses of the hair. An unobtrusive bagmark blends into the juncture of the jaw and neck. The reverse is evenly shaded, with a couple of toning spots beneath the glory of rays. Both sides reveal generous luster and the eye appeal is considerable. Population: 13 in 64, 0 finer (5/15). NGC ID# 26BJ, PCGS# 9000

1884-CC Twenty Dollar, MS62
Fresh, Original Luster

4360 **1884-CC MS62 PCGS. CAC. Variety 1-A.** Carson City double eagles are among the most sought-after dates in the Liberty Head series, and are usually available in XF and AU grades. Mint State pieces, however, are elusive across the board, and are typically affected by heavy abrasions. This 1884-CC representative is boldly struck, with frosty green-gold luster. Light chatter on Liberty's cheek and the adjacent field limits the grade, but no singularly heavy abrasions are present. Mint State examples of this issue are largely clustered around the MS61 grade level; MS62 pieces are scarce and anything finer is a major rarity. Population: 55 in 62, 8 finer (4/15). NGC ID# 26BK, PCGS# 9001

1885-CC Double Eagle, AU55
Scarce, Low-Mintage Issue

4361 **1885-CC AU55 NGC. Variety 1-A.** From a small mintage of just 9,450 pieces, the 1885-CC Liberty double eagle is the scarcest Carson City twenty of the decade. Probably 350-400 examples survive in all grades today, with most examples seen in the XF-AU grade range. This attractive Choice AU specimen displays just a touch of wear on the design elements, which show much better-than-average detail for the issue. The pleasing greenish-gold surfaces are lightly abraded and retain much of their original mint luster. Altogether, a most attractive representative of this scarce and underrated issue. Census: 55 in 55, 77 finer (4/15). NGC ID# 26BN, PCGS# 9004

1889-CC Liberty Twenty, MS60
Unusually Appealing for the Grade

4362 **1889-CC MS60 NGC. Variety 1-A.** This is an earlier die state example, before the cracks develop along the base of the date. As with the Carson City Morgan dollar issue of this same year, the 1889-CC double eagle's mintage was stunted as a result of the Mint not being in operation for the first part of the year. Coinage was authorized to resume in July, but due to machinery repairs, production did not commence until September. This Uncirculated 1889-CC double eagle is well-struck with full rose-gold luster. Light, scattered abrasions limit the grade, but none are individually detracting. Census: 21 in 60, 41 finer (4/15). NGC ID# 26BV, PCGS# 9011

1889-S Double Eagle, Highly Lustrous MS64+

4363 **1889-S MS64+ PCGS.** The 1889-S double eagle saw a large mintage approaching 800,000 pieces. It also has a high survival rate: PCGS and NGC have certified more than 4,000 examples, mostly in circulated grades through MS62. The two services have seen about 100 near-Gems and fewer than 15 examples finer.

The present high-end near-Gem specimen displays yellow-gold highly lustrous surfaces imbued with whispers of green and orange. The design elements are sharply impressed and each side has been well-cared for. This piece yields pleasing overall eye appeal. Population: 43 in 64 (7 in 64+), 0 finer (5/15) NGC ID# 26BW, PCGS# 9012

1890-CC Twenty Dollar, MS61
Scarce in Mint State

4364 **1890-CC MS61 PCGS. Variety 1-A.** The scarcity of Mint State 1890-CC double eagles is exemplified by the National Numismatic Collection in the Smithsonian Institution, which only has an AU58 specimen. This MS61 example is lustrous and boldly struck, with areas of semiprooflike flash beneath the orange-gold coloration.

The coin is sharply struck, with occasional olive-gold and lilac accents. Distributed light marks are typical for almost all of this popular Carson City issue, and they are present on the current example. None are too severe, and the coin has a terrific in-hand visual appeal. PCGS has certified just 82 numerically finer coins (5/15). NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, MS62
Unusual Prooflike Surfaces

4365 **1890-CC MS62 PCGS. Variety 1-A.** The 1890-CC Liberty double eagle claims a mintage of 91,209 pieces, making the issue relatively easy to locate in absolute terms. Many coins have surfaced in European holdings in recent times and the known population continues to increase, albeit slowly. The 1890-CC is conditionally very rare in grades above the MS62 level, however.

The present coin is an attractive MS62 example with sharp definition in Liberty's hair and nearly complete star radials. Some incompleteness is evident in the eagle's tail feathers and surrounding area, probably due to die polishing, as this coin exhibits unusually prooflike fields. The yellow and greenish-gold surfaces show only minor, grade-consistent signs of contact. Population: 76 in 62 (1 in 62+), 6 finer (5/15). NGC ID# 26BY, PCGS# 9014

1893-CC Double Eagle, MS61
Carson City Series Cap Issue

4366 **1893-CC MS61 NGC. Variety 2-A.** Only two die pairings are known for the 1893-CC double eagle, the final issue of the denomination struck at the fabled Carson City Mint, consisting of a common reverse paired to two different obverses. The present variety is easily identified by the protrusion of a small spike from Liberty's lower neck and the date position, which is slightly further left than is seen on Variety 1-A. As a date, the 1893-CC twenty is only marginally scarce in MS61 and MS62, but finer representatives are rarely seen. This piece is well-struck, with satiny yellow gold luster over each side. Light, scattered abrasions contribute to the grade, but none are individually detracting. NGC ID# 26C9, PCGS# 9023

1898-S Double Eagle, MS65
Extremely Rare Any Finer

4367 **1898-S MS65 NGC.** An especially attractive example of this conditionally elusive San Francisco issue, this Gem 1898-S double eagle is awash in frosty yellow-gold luster and boldly rendered throughout the design elements without evidence of the often seen die lapping. Slight contact on Liberty's cheek is all that keeps this coin from essential perfection. Census: 99 in 65, 3 finer (4/15). NGC ID# 26CL, PCGS# 9034

1905-S Twenty Dollar, MS64
Rarely Encountered Finer

4368 **1905-S MS64 NGC.** The San Francisco Mint was the chief producer of double eagles near the end of the Liberty Head series, but this does not always translate into high-grade availability for these dates. The 1905-S had a mintage in excess of 1.8 million coins, but remarkably few examples are known in Gem or better condition, making attractive MS64 examples the finest obtainable by most collectors. This piece is sharply struck, with radiant yellow-gold luster. Light grazes on Liberty's cheek are much of what defines the grade. NGC has seen only nine numerically finer pieces (4/15). NGC ID# 26D3, PCGS# 9048

1906-S Double Eagle
Lustrous, Near-Gem Surfaces

4369 **1906-S MS64 PCGS.** Satiny honey-gold luster pours over the brilliant surfaces of this smooth and appealing double eagle. The reverse is essentially prooflike and equally dazzling. Scattered light abrasions from coin-to-coin contact account for the grade, although this sharply struck twenty earns extra points for outstanding eye appeal. PCGS has certified just four numerically finer pieces (5/15). NGC ID# 26D6, PCGS# 9051

1907-S Twenty Dollar, Remarkable MS65

4370 **1907-S MS65 PCGS.** This last-year Liberty double eagle from the San Francisco Mint is far finer than most survivors of this liberal issue exceeding 2.1 million coins. Most show heavily abraded surfaces or light circulation; the average certified survivor is a tad less than MS62. The fields on the obverse of this Gem PCGS example are remarkably smooth and nearly abrasion-free; only a sole mentionable tick shows on Liberty at midcheek. Some strike weakness shows on the peripheral stars along the obverse rim. The reverse is equally nicely preserved and better-struck overall. Population: 12 in 65 (1 in 65+), 0 finer (5/15). NGC ID# 26D9, PCGS# 9054

LIBERTY

TWENT

1859 Liberty Double Eagle, PR63 Cameo
Classic Proof Gold Rarity
Nine Examples Traced

4371 **1859 PR63 Cameo NGC.** According to Mint records, 80 proof Liberty double eagles were struck in 1859**,** all for inclusion in the gold proof sets of that year. It was just the second year of the Mint's commercial proof set program, and the enthusiastic response to the first year's offering may have caused some undue optimism about the program's possibilities. Certainly, there were not 80 collectors in the country who were interested in collecting the higher-denomination gold issues at that early date. If that many sets were actually struck, the great majority must have gone unsold, to be melted after the end of the year.

Of the sets that were sold, many were soon broken up, as collecting the larger gold issues was too expensive to be practical for most 19th century collectors. The proof tens and twenties commanded small premiums on the rare occasions when they were offered at auction, and some of these coins were probably melted, or just spent for face value by their owners, during hard times in the Civil War. At least one proof double eagle is known in impaired condition today. Writing in 1907, Samuel Hudson Chapman noted:

> "These proof sets are exceedingly rare, and my estimate would be that there are not over five sets in existence of the years prior to 1890, and of some of the earlier years probably only three sets ... it should be borne in mind that during the Civil War and until the resumption of specie payments a large proportion of our gold was sent abroad and remelted."

Jeff Garrett and Ron Guth estimate a surviving population of just 7-8 proof 1859 double eagles in all grades today, including three coins in institutional collections. NGC and PCGS have combined to certify a total of seven coins, including an unknown number of resubmissions and crossovers (4/15). We have compiled a roster of all nine examples known to us below.

The present coin is a spectacular Select proof that has been off-the-market for 53 years. In its last appearance, in Stack's Wolfson sale in 1962, the cataloger noted, "The appearance is utterly breathtaking." The design elements are sharply detailed throughout, with broad rims, squared-off edges, and a wire rim. The deeply mirrored fields contrast boldly with the frosty devices and the rich yellow-gold surfaces show just a few minor hairlines in the fields. Although two other coins have been offered in the past year, auction appearances are normally infrequent, and it may be years before a comparable example becomes available. Census: 2 in 63 Cameo, 1 finer (4/15).

Roster of 1859 Proof Double Eagles

1. PR66 Cameo NGC. Central States Signature (Heritage, 4/2015), lot 5214, sold as part of a six-piece gold proof set that realized $851,875. The obverse exhibits a toning spot between the eyebrow and hairline, while the reverse features a copper spot in the dentils above E in UNITED.

2. PR65. James Ten Eyck (B. Max Mehl, 5/1922), lot 314, realized $55; John Clapp; Louis E. Eliasberg (Bowers and Ruddy, 10/1982), lot 897, realized $71,500, there graded as PR65; Ed Trompeter estate (8/1998); Heritage Galleries, privately placed prior to 8/2000. There is an obverse spot between stars 3 and 4, while several dots surround Y in TWENTY on the reverse.

3. PR64 Deep Cameo. National Numismatic Collection, likely set aside at the time of striking. Jeff Garrett and Ron Guth enumerated this example (as well as the following coin) in their 2006 study of the National Numismatic Collection (*Encyclopedia of U.S. Gold Coins, 1795-1933)*.

4. PR64 Deep Cameo. National Numismatic Collection, a second example.

5. PR63 Cameo. George Seavey, part of a complete proof set purchased directly from the Philadelphia Mint; Seavey Descriptive Catalog (William Strobridge, 6/1873) lot 821, not sold, as Lorin G. Parmelee purchased the Seavey collection *en bloc* before the date of the sale; Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1302, realized $21.25; Harlan Page Smith; unknown intermediaries; F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1/1946), lot 862, realized $375; Memorable Collection (Numismatic Gallery, 3/1948), lot 685; Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 1797, realized $410; Samuel W. Wolfson Collection, Part One (Stack's 10/1962), lot 869, realized $3,500. **The present coin.** There is a tiny planchet flaw in the left obverse field, out from the space between stars 1 and 2.

6. PR63. American Numismatic Society, 1908.93.370, donated by J. P. Morgan in 1908 as part of a complete 1859 proof set, previously from R.C.H. Brock.

7. PR62+ Cameo PCGS. Louis E. Eliasberg duplicate; H. R. Lee (Stack's, 10/1947), lot 1703, realized $410; Kernochan Family Collection (Bonham's 6/2014), lot 1271, realized $210,600. The H.R. Lee catalog identifies this coin as ex: J. F. Bell (Stack's 12/1944, lot 819, realized $460), but the plate match is questionable. However, the copy of the Bell catalog at the American Numismatic Society does identify Eliasberg as the buyer. This example has an obverse toning spot between stars 12 and 13, and a reverse toning spot inside T of UNITED.

8. PR62. William S. Hunt (J. C. Morgenthau, 10/1940), lot 364; William Cutler Atwater (B. Max Mehl, 6/1946), lot 1251, realized $445; Chadwick-Darnell (Numismatic Gallery, 5/1952), lot 814, realized $525; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 834, realized $426,250 as part of a complete 1859 proof set. There is a toning spot on the cheek, just inside the highest curl.

9. PR58 NGC. Auction '82 (Stack's, 8/1982), lot 412; Auction '83 (Paramount, 7/1983), lot 430; Massachusetts Historical Society (Bowers & Merena, 11/1994), lot 2444, realized $9,350; Pre-Long Beach (Superior, 2/1999), lot 3430, realized $18,400; Rarities Sale (Bowers and Merena, 1/2000), lot 413, realized $12,075; Long Beach Signature (Heritage, 1/2004), lot 7588, realized $14,375; Long Beach Signature (Heritage, 9/2006), lot 4434, realized $17,250. This example is heavily marked in the cheek.

Additional Appearance

A complete 1859 proof gold set appeared in the Thomas Cleneay Collection (Samuel H. and Henry Chapman, 12/1890), lot 407, realized $51. PCGS# 89071

1874 Double Eagle, PR62 Deep Cameo
A Classic Proof Double Eagle Rarity

4372 **1874 PR62 Deep Cameo PCGS.** Twenty 1874 proof double eagles were reportedly struck in 1874, making this issue one of the four lowest-production Liberty Head double eagles minted in this format (the other three are 1875, 1877, and 1878), according to proof mintages listed in the 2016 *Guide Book*. Breen (1988) indicates that seven to nine 1874 double eagle proofs still exist, while Bowers (2004) puts the number of surviving coins at eight to 10 pieces. Garrett and Guth (2008) write:

> "... fewer than 10 examples can be traced, including the two that are housed in the Smithsonian and the American Numismatic Society. At least one or two examples known are seriously impaired."

The PCGS website estimates that eight to nine specimens are known. This service has actually graded six 1874 proof double eagles, four in regular proof and two of which are in Deep Cameo finish. NGC has seen five 1874 proofs, including three Cameos and two Ultra Cameos.

The Heritage Auction Archives reports 11 1874 double eagles that have crossed the auction block since 1980. Seven of these were graded as regular proofs, one as Cameo, and three as Ultra Cameo.

The PR62 Deep Cameo offering in the present lot displays rich orange-gold coloration, and the devices on both sides are accentuated by the deeply mirrored fields, providing stunning contrast. All design elements are boldly delineated, further adding to the coin's pleasing eye appeal. Were it not for wispy hairlines in the fields, this coin would perhaps have been designated one or two numerical grades higher by PCGS. We mention a minute tick at the point of Liberty's chin as a pedigree marker, as well as what might be a faint staple scratch in the field between star 13 and Liberty's hair.

This magnificent piece will be an outstanding hallmark of a Liberty Head double eagle collection. The specialist in this series will not want to miss out on this classic rarity that may not reappear for some time. Population: 1 in 62 Deep Cameo, 1 finer (5/15). PCGS# 99089

LIBERTY
1879
TWENTY

1879 Liberty Double Eagle, PR64 Cameo
Only 30 Pieces Struck
Ex: Wolfson (1962)

4373 **1879 PR64 Cameo NGC.** In the 2015 edition of his series reference *Type Three Double Eagles 1877-1907,* Mike Fuljenz remarks on the 1879 proof Liberty double eagle:

> "There were 30 proofs struck. This is an extremely rare issue with an estimated seven to ten known. Nearly all are in the PR63 to PR64 range, and there are none at this time with Deep Cameo or Ultra Cameo designations."

The tiny mintage of 30 pieces was actually an increase over the 20 examples struck in the two previous years. Perhaps the Mint expected an increase in collector demand in 1879 because the government resumed specie payments that year. In any case, it seems unlikely that any extra gold proof sets were sold, as the 1879 proofs are just as rare as those of previous years today. The extra coins were probably never distributed and were melted after the end of the year. Currently, the population data indicates a total of seven coins have been certified by the two leading grading services (4/15), and we know of two more examples in institutional collections (see roster below).

The present coin is an attractive Choice example, with sharply detailed design elements and deeply mirrored fields that contrast boldly with the richly frosted devices. The well-preserved yellow-gold surfaces show the slight orange-peel texture of the best 19th century proofs. Only a few minor hairlines are evident and eye appeal is terrific. This coin has been off-the-market since 1962 and it may be many years before it surfaces again. Census: 2 in 64 Cameo, 2 finer (4/15).

Roster of 1879 Proof Double Eagles
1. PR66 Cameo NGC. Philadelphia Mint; T. Harrison Garrett; Robert Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection, Part II (Bowers and Ruddy, 3/1980), lot 796; FUN Auction (New England Rare Coin Auctions, 1/1981), lot 998; Ed Trompeter; Central States Signature (Heritage, 5/2000), lot 7892.
2. PR64 Cameo NGC. Samuel Wolfson Collection (Stack's, 10/1962), lot 923**. The present coin.**
3. PR64 Cameo. Mint Cabinet; National Numismatic Collection at the Smithsonian Institution.
4. PR64 Cameo PCGS. Pittsburgh Signature (Heritage, 8/2004), lot 7692.
5. PR64 Cameo PCGS. FUN Signature (Heritage, 1/2007), lot 3773.
6. PR64 Cameo PCGS. Genaitis Collection (Heritage, 8/2001), lot 8200; Long Beach Signature (Heritage, 6/2004), lot 6375; Baltimore Auction (Bowers and Merena, 12/2004), lot 2711; Treasures of the *S.S. New York* (Stack's, 7/2009), lot 1524.
7. PR63 PCGS. Harry Bass Collection (Bowers and Merena, 10/1999), lot 1871; Orlando Sale (Stack's, 1/2009), lot 1186.
8. PR61 Cameo NGC. ANA Convention Auction (Abe Kosoff, 8/1968), lot 1088; Americana Sale (Stack's, 1/2001), lot 1482; Long Beach Signature (Heritage, 9/2004), lot 7984; FUN Signature (Heritage, 1/2007), lot 3755.
9. Proof. Robert C.H. Brock, part of a six-piece gold proof set; J.P. Morgan; American Numismatic Society in 1908; exhibited at the 1914 ANS Exhibition.

Additional Appearances
A. Proof. Heman Ely Collection (W. Elliot Woodward, 1/1884), lot 954, part of a six-piece gold proof set.
B. Proof. Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 430, part of a six-piece gold proof set.
C. Proof. William B. Wetmore Collection (S.H. & H. Chapman, 6/1906), lot 162, part of a six-piece gold proof set.
D. Proof. David S. Wilson Collection (Samuel Hudson Chapman, 3/1907), lot 339, part of a six-piece gold proof set.
E. Proof. James B. Wilson Collection (Thomas Elder, 10/1908), lot 63, part of a six-piece gold proof set.
F. Proof. F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 1/1946), lot 882; possibly Jacob Shapiro (aka J.F. Bell); Memorable Collection (Numismatic Gallery, 3/1948), lot 699.
G. Proof. William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 1271 (possibly the same as D above).
H. Proof. Public Auction Sale (Stack's, 10/1970), lot 956, part of a complete gold proof set, with the coins offered individually. NGC ID# 26DY, PCGS# 89095

1889 Twenty Dollar, PR62 Ultra Cameo
Extreme Proof Gold Rarity
Only 10 to 12 Pieces Believed Known

4374 **1889 PR62 Ultra Cameo NGC.** The 1889 is one of the most underrated issues in the proof Liberty double eagle series. Mintages for proof double eagles increased somewhat in the 1880s over the extremely low production totals of the previous decade, partly in response to the resumption of specie payments. After 1879, collectors who wished to acquire a proof double eagle could now purchase it with paper currencies, in direct contrast to the 1860s and 1870s when gold proofs could only be paid for with gold coin — something with which few people were willing to part.

Proofs in the 1880s were struck in advance to fulfill orders throughout the year, and in most cases significant quantities were left unsold and were later destroyed. Thus, mintage figures have little affect on the actual rarity of any given date.

The 1889 proof twenty stands out from its counterparts with an unusually low production total of just 41 coins, the lowest proof mintage of the decade behind the 1880, of which only 36 pieces were struck. Moreover, few examples were actually distributed, and today it is believed that no more than 12 or 15 examples survive, with the definitive numbers liking being as low as 10 to 12 coins. This includes a single coin in the Smithsonian Institution which grades PR64 Deep Cameo, per Garrett and Guth. David Akers called the 1889 "more rare than any of the famous and highly touted Proof issues from 1881-1887, and more rare than any of the dates that follow from 1890-1907." A bold statement, but surprisingly accurate, especially when one considers the frequency of auction appearances. In the past two decades, we have offered only four previous examples of this incredible rarity.

This Ultra Cameo representative is boldly struck and starkly contrasted, with heavy frost over the relief elements. Light lines in the fields limit the grade, but the eye appeal is remarkably sharp. This exceptional coin would be a hallmark addition to a proof gold rarities collection. Census: 2 in 62 Ultra Cameo, 6 finer (4/15). NGC ID# 26EA, PCGS# 99105

1905 Double Eagle, PR61
Rare in Proof Format

4375 1905 PR61 PCGS. Proof Liberty Head double eagles from the early 1900s are usually more available than are those from the 19th century, particularly those major rarities of the 1870s and earlier years. Yet, they still possess extreme scarcity, and are arguably undervalued in comparison to their more pricey 19th century counterparts.

The 1905 proof twenty had a mintage of 92 pieces, many of which were likely never sold and were later melted. Probably only 30 to 40 examples survive in all grades, including two pieces in the Smithsonian Institution and another in the American Numismatic Society Collection. The PCGS and NGC combined census data counts 59 coins, a highly inflated figure due to resubmissions. Our Auction Archives show just 24 appearances of this date in the span of more than two decades.

This deep, honey-gold representative is boldly struck and displays subtle field-device contrast — seldom seen on any proof coin of this period. Light, scattered marks define the grade, but the eye appeal remains pleasing. This is an important opportunity for the budget-conscious collector to acquire a proof Liberty Head twenty, a coin that is widely sought-after in all grades. NGC ID# 26ET, PCGS# 9121

HIGH RELIEF DOUBLE EAGLES

MCMVII High Relief Double Eagle
Wire Rim, MS63+

4376 1907 High Relief, Wire Rim MS63+ NGC. Charles Barber is often accredited with forcing an end to the High Relief Saint-Gaudens double eagle, citing limitations of the coining presses and reduced efficiency. However, his arguments were based on sound fact: with three to five die impressions needed to bring up the motifs, high-capacity production for circulation was almost impossible with the resources available to the Mint in the early 20th century; moreover, the cost of such coinage was not economically feasible, one coin now requiring the manpower and time that would have produced three to five examples of the earlier Liberty Head type.

Coinage of the High Relief type was ceased after a mintage of just 12,367 pieces, and the presses were fitted with dies that featured a newly approved low-relief version of significantly reduced artistic merit. The High Relief coins were instantly popular among collectors, as the sculptural appearance was one that would never again be produced on a circulating coin. This Plus-graded Select example showcases fully rendered motifs, with rich, satiny luster and minimal abrasions for the grade. A lovely example of this iconic coin. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Twenty, MS64
Bold Wire Rim Example

4377 **1907 High Relief, Wire Rim MS64 PCGS.** There are numerous instances in American numismatics, particularly pertaining to 20th century issues, where the most sought-after dates are not necessarily rare in the absolute sense, but their appeal is instead driven by artistic merit, historical significance, or perceived key-date status, factors which are arguably more significant than traditional rarity in the eyes of certain specialists. Saint-Gaudens' High Relief double eagle is perhaps boldest example of this phenomenon. Of the 12,367 pieces struck, there are numerous Mint State survivors known; collectors saved ample quantities of the issue early on because of its superior artistic beauty and high relief appearance — far greater than had previously been seen on any circulating United States issue. However, the allure of this issue is without equal and collector demand only increases with time.

This Choice example showcases the bold design rendering and thick, satiny luster for which this issue is known and loved, while the delicately preserved surfaces yield medium green-gold color. Excellent quality and visual appeal. NGC ID# 26F2, PCGS# 9135

1907 Wire Rim High Relief Twenty, MS64
'Nobleness and Simplicity, Perfect Execution'

4378 **1907 High Relief, Wire Rim MS64 PCGS.** In the September 1895 issue of *The Numismatist*, G.F. Hill published an interesting article, "The Coinage of the Greeks." In the article, he included a one-sentence quote regarding the successful design of Greek coinage, but the quote is just as applicable today, and especially so to the coinage from the period of the American Renaissance period:

> "The coins of the best period are successful because they combine nobleness and simplicity of conception with perfect execution."

This quote, of course, predates the striking of High Relief twenties by 12 years, but it certainly explains the enduring popularity of these coins: nobleness and simplicity paired with perfect execution. Augustus Saint-Gaudens made a long career of creating statuary that combined nobleness and simplicity, and he always insisted on perfect execution of his designs. This near-Gem certainly embodies these attributes. The satiny surfaces show the usual slight reddish tinge of patina, and there are no distracting contact marks on either side. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Twenty, MS67
From the Wells Fargo Nevada Hoard

4379 **1908 No Motto, Wells Fargo Nevada MS67 PCGS.** Short Rays Obverse. Sandy-gold and wheat-gold surfaces show the amazing preservation typical of the Wells Fargo Hoard, thousands of 1908 No Motto twenties that stayed undisturbed and unmoved for decades before their dispersal. Only the most minor ticks appear on Liberty's lower gown, and good mattelike luster appears throughout both sides. PCGS# 99142 Base PCGS# 9142

1908-D Double Eagle, Sharp MS65
Seldom Seen in Finer Grades

4380 **1908-D No Motto MS65 PCGS.** Long Rays Obverse. The bold luster, sharp strike, and overall excellent preservation are all characteristic of this nicely produced issue. Only the most minor abrasions appear on either side. Beautiful orange-gold color and blatant eye appeal make this a keeper example of this issue. PCGS reports only 10 in MS66 (one MS66+) (4/15), NGC ID# 26F7, PCGS# 9143

1908-D With Motto Twenty, MS66
Exceptional Surface Quality

4381 **1908-D Motto MS66 PCGS.** In comparison to its Philadelphia counterpart which was represented by thousands of coins in the Wells Fargo Hoard, the 1908-D No Motto Saint-Gaudens double eagle is elusive. Lightly abraded examples are usually available, but for the quality-conscious collector, a Gem representative will prove challenging to locate; Premium Gem examples are downright rare, and finer pieces are prohibitively so. The present piece is a delight to behold, showcasing vibrant orange-gold luster and incredibly bold detail — all four fingers on Liberty's torch hand are delineated. A loupe reveals trivial contact on the high points of the breast and knee, but there is no indication of rub. Just a genuinely attractive Premium Gem example of this conditionally rare date. Population: 29 in 66 (2 in 66+), 4 finer (4/15). NGC ID# 26F9, PCGS# 9148

1909 Twenty Dollar, MS64
Rarely Found in Higher Grades

4382 **1909 MS64 PCGS.** The 1909 is an important condition rarity among Philadelphia Saint-Gaudens double eagles. Relatively few Mint State survivors exist, and the vast majority of those are lackluster, heavily abraded pieces that often come weakly struck. This piece exhibits warm, shimmering luster over medium yellow-gold surfaces with lilac accents. Only a few minor blemishes on the obverse prevent a Gem assessment. PCGS has seen just 26 finer submissions (4/15).
Ex: ANA Signature (Heritage, 7/2005), lot 7826. NGC ID# 26FB, PCGS# 9150

1909 Twenty Dollar, MS64
Rarely Seen Finer

4383 **1909 MS64 PCGS.** Choice examples of this early Philadelphia issue are usually the finest obtainable by most collectors, as Gems are rare and anything finer is exceedingly so. This coin exhibits soft honey-gold surfaces, with well-defined relief elements and mild, grade-consistent abrasions. Pleasing eye appeal for the grade. NGC ID# 26FB, PCGS# 9150

1909 Double Eagle, MS65
Rich Luster, Rare This Fine

4384 **1909 MS65 PCGS.** The 1909 Saint-Gaudens double eagle population is almost evenly divided between the 1909/8 overdate and the Normal Date varieties. Neither is significantly scarce in lower Mint State grades, but in Gem or finer condition, the 1909 double eagle becomes highly elusive. Garrett and Guth call the 1909 "one of the true condition rarities of the series ..." A single piece in the Smithsonian Institution grades just MS62, per the same authors. The last Gem Normal Date 1909 we offered realized $49,937.50 in our February/March 2014 ANA Signature Sale. This vibrantly lustrous example displays frosty golden luster and sharply defined design elements. Light contact on the high points of the eagle and Liberty's figure limit the grade, but the fields are largely unabraded. An eye-appealing example in a seldom seen grade. Population: 19 in 65, 7 finer (4/15). NGC ID# 26FB, PCGS# 9150

1909/8 Saint-Gaudens Twenty, Satiny MS63

4385 **1909/8 MS63 PCGS. FS-301.** This is a collectible Mint State example of this popular *Guide Book* variety, characterized by a clear 1909/8 overdate, with the lower loop of the underlying 8 evident in the open part of the second 9 in the date. Both sides show satiny yellow-gold luster, with well-struck devices and minimal abrasions for the grade. Mild strike doubling is evident on the eagle's head. NGC ID# 26FC, PCGS# 9151

1909/8 Twenty Dollar, MS63
Popular Overdate, The Only One in the Series

4386 **1909/8 MS63 PCGS. FS-301.** This popular overdate, the only one known for the famous Saint-Gaudens double eagle series, is available for a price at the Select level but genuinely scarce any finer. This orange-gold example is lustrous with a decent strike and only minor flatness at Liberty's knee. Scattered abrasions define the grade, but none warrant individual mention.
Ex: FUN Signature (Heritage, 1/2011), lot 7469. NGC ID# 26FC, PCGS# 9151

1909/8 Twenty Dollar, MS63
Only Overdate of the Series

4387 **1909/8 MS63 NGC. CAC. FS-301.** This popular *Guide Book* variety shows an underlying 8 in the open lower loop of the second 9 in the date. This piece exhibits vibrant orange-gold luster and well-defined relief elements. The fields are largely devoid of abrasions, although light contact on the high points of the devices limits the grade. NGC ID# 26FC, PCGS# 9151

1911 Saint-Gaudens Twenty, MS64+
Clean, Frosty Fields

4388 **1911 MS64+ PCGS.** This is a collector-grade example of this conditionally challenging Philadelphia issue which is scarce in finer grades. Both sides display intense, frosty luster in warm honey-gold hues, and the devices are sharply rendered. An almost complete absence of abrasions in the fields on each side affirms the Plus designation from PCGS, and only light contact on the high points of the figure of Liberty precludes a full Gem grade. PCGS lists 55 finer pieces (4/15). NGC ID# 26FJ, PCGS# 9157

1911 Twenty Dollar, MS65
For the Quality Seeker

4389 **1911 MS65 PCGS.** An eye for quality will make this Gem 1911 Saint-Gaudens double eagle stand out from comparably graded examples. The glowing, frosty surfaces show traces of lilac and mint periodically throughout the intense yellow-gold cartwheel effect. Careful rotation beneath a light reveals only a few truly faint grazes in the luster and the eagle's feathers are remarkably free of the scattered little ticks that are often present, even on Gem-graded coins. The breast and knee show light contact on the obverse, apparently all that precluded an even finer grade from PCGS. The strike on this coin is bold, showing sharp delineation on the fingers of Liberty's torch hand.

The 1911 double eagle is scarce in Gem condition, and rare any finer. The Smithsonian Institution contains two examples of this date, both with light friction and grading just AU58, per Garrett and Guth. Population: 44 in 65 (2 in 65+), 11 finer (4/15). NGC ID# 26FJ, PCGS# 9157

1914 Double Eagle, MS64+
Rare in Finer Grades

4390 **1914 MS64+ NGC.** Though West Coast double eagle production remained high into the 20th century, demand was not so high near Philadelphia and the 1914 issue had a mintage just shy of six figures. This MS64+ piece has a satiny shimmer and apricot overtones to its yellow-gold surfaces. NGC has graded just 30 numerically finer pieces (5/15). NGC ID# 26FS, PCGS# 9164

1920-S Double Eagle, AU53
Key San Francisco Issue

4391 **1920-S AU53 PCGS.** The 1920-S is every bit as scarce as the 1921, both of which owe much of their scarcity to the gold melts of the mid-1930s. Small quantities of the 1920-S were apparently released into circulation, as evidenced by a few handfuls of lightly worn pieces that are known today, but Mint State coins are equally elusive. Unlike those of the 1929 and later issues, the certified population of the 1920-S is not significantly weighted in favor of Mint State survivors; rather, the more budget-conscious collectors can theoretically obtain a pleasing AU representative, if indeed such a coin is locatable at any given time. This example is lightly circulated, but retains some luster in the recesses, and the design elements are only minimally worn. The surfaces are generally smooth, with no immediately obvious abrasions. Eye appeal is pleasing for the grade. NGC ID# 26FZ, PCGS# 9171

1925-D Twenty, MS62+
Attractive Luster

4392 **1925-D MS62+ PCGS.** Despite a mintage of nearly 3 million pieces, the 1925-D Saint-Gaudens double eagle is seldom seen in pleasing Mint State condition. This Plus-graded MS62 coin shows medium yellow-gold color amid satiny cartwheel luster. Contact on the figure of Liberty prevents a finer grade, but does overly impede the eye appeal. NGC ID# 26GB, PCGS# 9181

1925-D Double Eagle, MS65
Extreme Condition Rarity This Fine
Victim of the 1930s Gold Melts

4393 **1925-D MS65 NGC.** The 1925-D Saint-Gaudens double eagle is not quite as rare as are the 1929 and later issues, it is similar in that almost the entire mintage of nearly 3 million coins was wiped out during the middle to late-1930s gold melts. Early auction appearances reveal the outstanding collector demand for this issue even in the years closely following its coinage. A "Brilliant Uncirculated" coin in Stack's 1944 sale of the J.F. Bell Collection was offered with an estimate of $300.00, but realized $500.00. F.C.C. Boyd's "Brilliant. Uncirculated" example garnered $650.00 in 1946; it later appeared as "Choice, AU-55" in Bowers and Ruddy's 1982 sale of Eliasberg's gold coin collection with a notation stating that "Possibly fewer than 100 are known to exist in all grades." This estimate did not take into account small quantities of the issue that had been discovered in European double eagle hoards in the 1960s, as those coins were not fully included in census data until a while after the establishment of third-party grading.

The Smithsonian Institution's example grades just MS63, per Garrett and Guth, and David Akers stresses: "The 1925-D is rare in choice or gem mint state ..." While most known examples are Uncirculated, those pieces recovered from foreign vaults were stored loosely in bags, and typically come heavily abraded. Thus, there is a significant drop off in availability at the Gem grade level; NGC has seen only eight such coins, with a single MS66 piece finer, and PCGS shows only five pieces in this grade, with two MS66 coins finer (4/15).

It is a rare occurrence that a Gem 1925-D is offered at auction, and such an appearance is met with intense collector interest. This piece exhibits original, satiny luster in shades of rose and green-gold. The design elements are boldly rendered and the only grade-limiting abrasions are seen as light contact on the high points of the motifs. The rarity of this issue in Gem condition is rivaled by few other Saint-Gaudens double eagle issues; even the higher-priced 1929 and later melt rarities are more available in this grade than is the 1925-D. The acquisition of this coin is almost essential for a complete high-end collection. NGC ID# 26GB, PCGS# 9181

1925-S Double Eagle, MS63
Branch Mint Melt Victim

4394 **1925-S MS63 NGC.** The scarcity of the 1925-S double eagle in Mint State seems to belie the issue's mintage of more than 3.7 million pieces. Seldom is such a coin encountered, and rarely without heavy abrasions. Although this issue is not generally included in the list of major late-series melt rarities, its overall scarcity is largely owed to the gold melts of the mid-1930s. Those pieces that survive owe much to European bank hoards, where they remained hidden until recent decades. This Select example displays satiny yellow-gold luster and minimally abraded surfaces. Faint die doubling is discernible on Liberty's lower gown and many of the peripheral stars. Census: 34 in 63 (1 in 63+), 25 finer (4/15). NGC ID# 26GC, PCGS# 9182

1926-D Double Eagle, MS63
Branch Mint Melt Rarity

4395 **1926-D MS63 PCGS.** The 1926-D double eagle is a seldom seen issue, comparable in rarity to the 1929 and only marginally more obtainable than the various 1930 through 1932 issues. Its scarcity is largely a result of the government gold confiscation of the mid-1930s, which destroyed tens of millions of double eagles in a very short span of time. Most known survivors originated in overseas hoards, although small quantities were also spared through the hands of wealthy collectors who could afford to hold the coins throughout the duration of the government gold melts. Mint State coins are the norm, as this Denver issue did not circulate to a measurable extent. The present MS63 piece shows a pleasing strike, with satiny yellow-gold luster. A few light, scattered abrasions limit the grade. Population: 61 in 63, 27 finer (4/15). NGC ID# 26GE, PCGS# 9184

1926-S Double Eagle, MS64+
Conditionally Scarce Example

4396 **1926-S MS64+ NGC.** Augustus Saint-Gaudens' double eagle is among the most iconic coins in the American catalog, and there is no denying the appeal of a hefty piece of gold that bears a design of this gifted artist. This two-tone example features yellow-gold color in the center with orange at the obverse rim and left field. The reverse is similar but the contrast is less marked, and there are hints of rose within the eagle. The NGC census lists seven pieces in MS64+, with 28 finer examples (5/15). NGC ID# 26GF, PCGS# 9185

1927-S Twenty Dollar, Appealing MS62+
Heavily Melted S-Mint Issue

4397 **1927-S MS62+ NGC.** The certified population of this seldom seen melt rarity is heavily weighted toward the lower end of the Mint State grade range, with a small number of lightly circulated pieces also known; high-end examples are rare. This is in contrast to the similarly scarce 1929, which is most frequently seen in MS64 and MS65, but rarely in lower levels. The San Francisco issue was used a little more in the Western banking system prior to the gold confiscation in 1933, with a few pieces having escaped into circulation.

This Plus-designated MS62 example shows vibrant honey-gold luster over satiny surfaces. The design elements are notably sharp, and grade-limiting abrasions are light and evenly distributed. Eye appeal is unusually pleasant, considering the grade. Census: 34 in 62 (2 in 62+), 42 finer (4/15). NGC ID# 26GJ, PCGS# 9188

1893 Isabella Quarter, MS67
Superbly Toned Columbian Commemorative

4398 **1893 Isabella Quarter MS67 PCGS.** Concentric rings of rainbow color surround the obverse bust of this Superb Gem, progressing from blue-green to gold to russet. The center is antique gray, and, as expected for the technical grade, there are no distracting marks. The reverse reveals an azure rim with an interior band of auburn. Rich gold shades are splashed over the lower portion of the central figure, and the overall eye appeal is impressive. The mintage of Isabella quarters was low to begin with, and at this grade level the issue is very scarce. Combined with the outstanding toning, this is certainly one of the most desirable of all Isabella commemoratives. Population: 42 in 67 (5 in 67+), 6 finer (5/15). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, Superb Gem
Colorful and Lustrous

4399 **1893 Isabella Quarter MS67 PCGS. CAC.** The Isabella quarter was given second-class treatment compared to the Columbian half dollar at the time of issue. The Board of Lady Managers had little actual control over the coin issued in its name and the quarter's asking price, at one dollar, the same as for the Columbian half dollar, ensured that few would sell. The situation has reversed, though, and today's collectors prize the Isabella quarter for its singular place in numismatic history. This Superb Gem has rich blue, green, and gold toning with the colors flowing into one another. Population: 42 in 67 (5 in 67+), 6 finer (5/15). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, PR64
Lovely Multihued Toning

4400 **1893 Isabella Quarter PR64 NGC.** Despite a lack of Mint records confirming the issuance of proof Isabella quarters, there exist several dozen pieces which possess distinctly prooflike qualities, namely reflective fields and unusually bold design elements. Anthony Swiatek suggests proof coinage amounted 103 pieces, although only about half that many have been seen by NGC and PCGS combined. This Choice example is deeply toned in cobalt-blue and lavender-gold hues, with full rendering of the design elements and sufficient mirroring in the fields. An eye-appealing example of this popular issue. Census: 18 in 64, 12 finer (4/15). PCGS# 9221

1900 Lafayette Dollar, MS65
Original, Satiny Luster

4401 **1900 Lafayette Dollar MS65 PCGS. DuVall 1-B.** The originality of this Gem Lafayette dollar is undeniable, with fresh, satiny luster cartwheeling beneath dusky champagne and lavender-gray toning such as is often seen on uncleaned examples of this issue. The strike is well-executed and Washington's cheek is unusually free of major abrasions. Finer representatives are seldom offered. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, Lightly Toned MS65

4402 **1900 Lafayette Dollar MS65 PCGS. DuVall 1-B.** Collector appreciation of this first silver dollar commemorative is much stronger than it was at the time of its issue, when 50,000 pieces were struck but only 36,000 coins were absorbed by the market (not counting 26 additional pieces for assay purposes). This Gem example displays satiny luster and remarkably well-preserved surfaces. Pale lilac-gold toning accents each side, yielding deeper olive and lavender-gold overtones around the peripheries. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS66
Distributed in Limited Numbers

4403 **1900 Lafayette Dollar MS66 PCGS. DuVall 1-B.** This is an available variety, but it appears in high grade less frequently than does DuVall 2-C. Lafayette dollars in Premium Gem condition, however, are scarce regardless of die pairing, and finer pieces are notably rare. Interest in the issue at the time of its release was minimal. Many pieces did not initially go to collectors, and were thus improperly stored; still others were spent and a number of lightly circulated pieces are known today. Bags containing 14,000 unsold Lafayette dollars were sealed in a D.C. Treasury vault until 1945, at which time they were melted into bullion. Modern collectors appreciate the Lafayette dollar for what it is: a conditionally scarce issue and the first silver dollar commemorative struck by the United States. Yet, there are few high-grade pieces to go around.

This Premium Gem example is well-preserved, as the grade suggests, with satiny luster shining through light toning on each side. The reverse is consistently lavender-blue in the center and deeper olive around much of the margins — a crescent of russet and amber graces the lower-right border. The obverse shows similar hues around the peripheries and a splash of color in the center, with silvery areas elsewhere. PCGS lists only five numerically finer pieces (4/15). NGC ID# 28N8, PCGS# 9222

1921 Alabama Half Dollar, MS67
None Certified Numerically Finer

4404 **1921 Alabama MS67 NGC.** The 1921 Alabama commemorative half dollar claims a net distribution total of 59,038 pieces and few survivors can match the high technical quality and tremendous eye appeal of the present coin. This delightful Superb Gem exhibits well-detailed design elements and vibrant satiny mint luster, under spectacular shades of golden-brown, lavender-gray, and violet toning. Impeccably preserved surfaces add to the terrific visual appeal. This coin should find a home in the finest collection or Registry Set of silver commemorative coinage. Census: 8 in 67 (1 in 67 ★), 0 finer (4/15). NGC ID# 28HT, PCGS# 9224

1936 Columbia Half Dollar, MS68
Rare This Fine

4405 **1936 Columbia MS68 NGC.** One of the many commemorative designs of 1936, the Columbia half dollar (not to be confused with the early *Columbian* half) celebrates the capital of South Carolina. This Philadelphia example has silver interior luster and deep russet and blue rim toning that is most prominent at the right on obverse and reverse. Census: 5 in 68, 0 finer (4/15). NGC ID# 28K5, PCGS# 9291

1892 Columbian Half, MS67
Semiprooflike Fields

4406 **1892 Columbian MS67 PCGS.** The 1892 World's Columbian Exposition half dollar had a distribution of 950,000 pieces, many of which wound up in circulation. This issue is typically available in all grades through MS66, and only in MS67 does a degree of conditional rarity take precedence. The currently offered example displays beautiful semiprooflike mirroring beneath vivid ocean-blue, amber, and violet toning that lightens to lilac-gray in the centers. The strike is sharp and the eye appeal is excellent. Population: 32 in 67 (6 in 67+), 0 finer (4/15). NGC ID# 26H5, PCGS# 9296

Columbian Half Dollar, MS67
Prooflike and Sharp

4407 **1893 Columbian MS67 PCGS. CAC.** A prooflike and immaculately produced 1893 Columbian half, possibly an early strike based on the deeply reflective surfaces and sharpness of the motifs. This is a lustrous example, originally toned in shades of peach-gold, sea-green, cerulean-blue, and reddish-gold. The strike is bold for the issue, with only minor weakness on the Eastern Hemisphere globe and within the hair strands. The enthusiastically received mintage of more than 1.5 million pieces launched the classic commemorative series with high hopes (few of which were fully realized). None are certified numerically finer at PCGS. Population: 17 in 67 (2 in 67+), 0 finer (5/15). NGC ID# 26H6, PCGS# 9297

1922 Grant Memorial Half, MS66
Scarcer With Star Variant

4408 **1922 Grant With Star MS66 NGC.** The 1922 With Star Grant Memorial half dollar had a limited distribution of 4,256 pieces, and is by far the scarcer of the two Grant half dollar varieties. This Premium Gem is a seldom seen opportunity for the patient collector, and a finer piece will prove significantly rare. Both sides show light golden toning with thick, satiny luster, as imparted by extensive die polishing lines the recesses. The tree trunk immediately to the left of the cottage door is soft, as is the highest point of Grant's hair, neither unusual for the issue. Census: 55 in 66 (1 in 66+, 2 in 66 ★), 10 finer (4/15). NGC ID# 28KC, PCGS# 9307

1938-D Texas Half Dollar, MS67+
Original Color

4409 **1938-D Texas MS67+ PCGS. CAC.** The 1938-D Texas Independence Centennial half dollar is scarce in MS67, and only a single MS68 coin is numerically finer (4/15). This Plus-graded representative offers delicate satiny luster with pale lavender-blue obverse toning and deeper gold, gray, and amber reverse patina that also shows the occasional pine-green accent. NGC ID# 28M3, PCGS# 9395

1938-S Texas Half Dollar, Unimprovable MS68 ★

4410 **1938-S Texas MS68 ★ NGC.** This visually unimprovable example displays crisply struck design elements and vibrant satiny luster. Both sides show pleasingly original mottled patina, in shades that include purple-red, lime-green, and gold. The surfaces are immaculately preserved. The 1938-S Texas half dollar is a low-mintage issue and seldom encountered in this level of preservation. Census: 13 in 68 (6 in 68 ★), 0 finer (5/15).
Ex: Dallas Signature (Heritage, 10/2008), lot 1704. NGC ID# 28M4, PCGS# 9396

1946-D Booker T. Washington Half, MS68
None So Fine at PCGS

4411 **1946-D Booker T. Washington MS68 NGC. CAC.** Deeply toned Booker T. Washington halves routinely dazzle the eye, and this 1946-D representative does not disappoint. The obverse is thickly coated in deep crimson and amber-gold hues that show the occasional glimpse of forest-green and olive, while the reverse exhibits similar shadings but in a lighter, concentric pattern. A bold strike complements the outstanding surface quality. Census: 7 in 68 (4 in 68 ★), 1 finer (4/15). NGC ID# 28M8, PCGS# 9405

1905 Lewis and Clark Gold Dollar, MS66
Warm Straw-Gold Surfaces

4412 **1905 Lewis and Clark MS66 NGC.** In the absolute sense, the two Lewis and Clark gold dollar issues are about equal in terms of availability, but in Premium Gem and finer condition, the 1905's certified population declines significantly below that of the 1904. The quantity of 1905-dated pieces struck totaled 35,000 coins (plus 41 additional representatives for assay purposes), but 25,000 pieces were later melted as unsold, leaving a net distribution of only 10,041 coins (including assay pieces). This Premium Gem example displays well-struck motifs and flashy yellow-gold luster. Close study with a glass fails to find any obtrusive flaws. Census: 58 in 66 (3 in 66+, 1 in 66 ★), 3 finer (4/15). NGC ID# 26HD, PCGS# 7448

1915-S Pan-Pac Quarter Eagle, MS65
Good Color and Preservation

4413 **1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** Certified in a PCGS green-label holder, this Panama-Pacific quarter eagle is free of major marks, although a couple of insignificant reeding marks from coin-on-coin contact appear in the right obverse field. Lush luster and attractive orange-gold color are top-notch on this right-for-the-grade coin. NGC ID# 26HK, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle
Appealing MS66

4414 **1915-S Panama-Pacific Quarter Eagle MS66 NGC.** The design of the Panama-Pacific quarter eagle has had its critics — as have many ideas put forth by the United States Mint — but it is an essential part of the highly collected Panama-Pacific commemorative coin set, and is widely appreciated as such by modern numismatists. This Premium Gem example displays excellent striking definition, with well-preserved, satiny luster. NGC ID# 26HK, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle
Delightful Superb Gem

4415 **1915-S Panama-Pacific Quarter Eagle MS67 NGC.** Delicate preservation and frosty, yellow-gold luster are the chief attributes this Superb Gem Panama-Pacific quarter eagle possesses, delivering a shimmering glow that delights the eye. The strike leaves nothing to the imagination, and the overall impression is one of high quality for the issue. None have been certified numerically finer (4/15). NGC ID# 26HK, PCGS# 7450

1922 Grant With Star Dollar, MS67 ★
Beautifully Variegated Toning

4416 1922 Grant With Star MS67 ★ NGC. CAC. The Grant with Star dollar is a well-known key issue among earlier commemorative gold issues, partly because of its low mintage of only 5,016 pieces. The obverse star was a deliberate device intended to create a separate variety for collectors. This is the finest example that we have ever seen, with impeccable design definition, immaculate surface preservation, and beautifully variegated toning on both sides. The NGC Star designation is, here, *doubly fitting*. Census: 2 in 67 ★, 1 in 67+ ★, 10 finer (5/15). *Ex: Baltimore Signature (Heritage, 3/2009), lot 1815.* NGC ID# 26HH, PCGS# 7459

1926 Sesquicentennial Quarter Eagle, MS66
Exceptional Color and Surfaces

4417 1926 Sesquicentennial MS66 NGC. This is an unusually attractive Premium Gem example of the Sesquicentennial quarter eagle. Where most examples show bright, almost washed-out luster, this gorgeous piece exhibits deep honey, rose, and orange-gold hues, with thick frost and a mint-fresh glow. A few tiny ticks in the left obverse field are all that preclude an even finer grade. NGC shows three numerically finer pieces, PCGS none (4/15). NGC ID# 26HL, PCGS# 7466

1903 Louisiana Purchase Gold Dollar
Jefferson Head, PR67 Ultra Cameo

4418 1903 Louisiana Purchase, Jefferson, PR67 Ultra Cameo NGC. The first 100 Louisiana Purchase gold dollars struck with the Jefferson dies were proofs. These were not sold directly to collectors as were the later "circulation strikes," but were instead distributed to individuals of notable importance, including such as government officials and Exposition higher-ups. They were initially secured in special presentation cards, but most, including the present example, have since been separated from their original encasements for the purpose of certification. This superb Ultra Cameo exhibits rich honey-gold color and delicately preserved, high-contrast surfaces. The strike is nothing short of full and the eye appeal exceptional. Census: 4 in 67 Ultra Cameo (2 in 67 ★ Ultra Cameo), 0 finer (4/15). PCGS# 97482

1995-W Silver Eagle, PR70 Deep Cameo Sought-After Series Key

4419 **1995-W Silver Eagle PR70 Deep Cameo PCGS.** The 1995-W proof Silver Eagle is the acknowledged key to the series, from a small mintage of just 30,125 pieces. The mintage of proof Silver Eagles was limited in 1995, as the coins were only sold as part of the 10th Anniversary proof set, including the four gold denominations of the year, as well. With a purchase price of $999, distribution of the sets was understandably small and the Silver Eagles are seldom encountered today.

The present coin is a magnificent specimen, with technically perfect surfaces and fully struck design elements. The deeply mirrored fields contrast dramatically with the richly frosted devices creating a delightful cameo effect. Eye appeal is extraordinary. The 1995-W proof Silver Eagle is listed among the *100 Greatest U.S. Modern Coins*. Population: 60 in 70 (5/15). NGC ID# 28WZ, PCGS# 9887

1995-W Silver Eagle, PR70 Ultra Cameo Low-Mintage Key Date

4420 **1995-W Silver Eagle PR70 Ultra Cameo NGC.** Only 30,125 Silver Eagles were struck at the West Point Mint in 1995, all for inclusion in the five-denomination 10th Anniversary proof sets of that year. With the large denomination gold coins included in the set, the issue price was a steep $999, which discouraged many collectors from ordering. As a result, the 1995-W is the key issue of the series, much-prized by collectors today.

The present coin is a technically perfect example, with fully detailed design elements and deeply mirrored fields that contrast profoundly with the richly frosted devices to produce a stunning cameo effect. The surfaces are completely brilliant and eye appeal is tremendous. The 1995-W is listed among the *100 Greatest U.S. Modern Coins*.

From The Steitz Collection. NGC ID# 28WZ, PCGS# 9887

Key 1995-W Silver Eagle
PR70 Deep Cameo

4421 **1995-W Silver Eagle PR70 Deep Cameo PCGS.** In recent years several semikeys have become part of the silver eagle series, such as the 2008-W Reverse of 2007, the 2011-S, and the 2011-P Reverse Proof. But the 1995-W remains *the key* silver eagle variety. Sold by the Mint only as part of a five-piece 1995-W proof set, along with tenth-ounce, quarter-ounce, half-ounce, and one-ounce gold eagles. Silver eagle collectors balked at the costly purchase until the set was no longer available, then scrambled to obtain an example on the secondary market. Only 30,125 pieces were issued, a quantity much smaller than the number of silver eagle collectors. The present specimen ranks among the relatively few that have secured the ultimate grade from PCGS. It is fully struck and demonstrates unimprovable white-on-black cameo contrast. Thorough inspection locates a few minute freckles of tan toning and a tiny retained lamination above the rightmost ray. Population: 60 in 70 (5/15). *From The Steitz Collection*. NGC ID# 28WZ, PCGS# 9887

1995-W Silver Eagle, PR70 Ultra Cameo
Limited-Mintage Rarity

4422 **1995-W Silver Eagle PR70 Ultra Cameo NGC.** Ex: Farris Collection. Adolph Weinman created the iconic Walking or Striding Liberty design that was first used on half dollars in 1916. The coins proved so popular that the U.S. government reincarnated the design for use on the American Eagle silver coin program, beginning 70 years later. The limited mintage of the 1995-W proof silver Eagles is explained because the Mint made the coins only available to collectors who purchased a complete four-piece gold set of gold American Eagles. This created a rarity, and this white-on-black silver Eagle is a perfect proof example. NGC ID# 28WZ, PCGS# 9887

1996 Silver Eagle, MS70
Low Mintage Within the Series

4423 **1996 Silver Eagle MS70 NGC.** Although some collectors may consider the American Silver Eagles the Morgan dollars of the 21st century, the fact is that they contain about 30% more pure silver than a Morgan dollar: one ounce versus 0.77 ounce. The 1996 Silver Eagle issue saw a rather low mintage for the series at 3.6 million pieces. This example is frosty and untoned, with flowing luster. *From The Steitz Collection*. NGC ID# 26JR, PCGS# 9900

1996 Silver Eagle, Top-Grade MS70

4424 **1996 Silver Eagle MS70 NGC.** This technically flawless one-ounce silver American Eagle has a faint partial olive overtone across surfaces with a few tiny as-made luster breaks. Post-striking flaws are nil, even under standard triplet magnification. All MS70 examples in the combined certified population have been graded by NGC (4/15). NGC ID# 26JR, PCGS# 9900

1999 Silver Eagle, MS70 Scarce in This Grade

4425 **1999 Silver Eagle MS70 NGC.** The 1999 Silver Eagle was in great demand from investors seeking a hedge against the widely expected Y2K financial disasters that, fortunately, never materialized. The issue claims a substantial mintage of 7.4 million pieces and the 1999 is relatively easy to locate in grades up to the MS69 level. For some reason, relatively few have been certified in the ultimate grade of MS70, however.

The present coin is a technically perfect example, with fully detailed design elements throughout. The impeccably preserved surfaces radiate vibrant mint luster and show a few hints of golden-tan toning. Eye appeal is tremendous. Census: 98 in 70 (4/15). *From The Steitz Collection*. NGC ID# 26JX, PCGS# 9947

2000 Silver Eagle, Radiant MS70

4426 **2000 Silver Eagle MS70 NGC.** Flawlessly preserved surfaces and blazing, brilliant luster deliver exceptional eye appeal on this frosty 2000 Silver Eagle. Fully rendered design elements complete the visual attributes. A tiny, mint-made planchet lamination is discernible on the reverse by star 6. Few examples of this issue have been certified in this coveted grade.
From The Steitz Collection. NGC ID# 26JZ, PCGS# 9949

2009 One-Ounce Ultra High Relief Twenty Thick Flan, MS70 Prooflike

4427 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** This lustrous, sun-gold 2009 issue is double the thickness of a standard gold eagle and 27 mm wide. Produced to showcase the production capabilities of the Mint, just two blows of the coinage dies produced an exceptional result. Eventually, slightly over 115,000 pieces were produced, although not all are of this flawless MS70 prooflike quality. PCGS# 506602

1834 C. Bechtler Five, Attractive XF45 Date, Plain Edge, K-17

4428 **1834 C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, XF45 PCGS. K-17, R.5.** A Choice representative of a scarce five dollar Bechtler issue, with all of the elements boldly struck and little actual wear. This coin shows the variety with the numeral 20 close to CARATS. Bechtler coinage was typically overweight in comparison to federal gold standards. These five dollar coins — issued in the period from 1834 to 1837 — contained 140 grains of 20-carat gold, yielding an excess of gold at a rate of about .5 percent to standard. Both sides display attractive, reddish-gold coloration. Considerable prooflike flash remains. Shallow abrasions from circulation are scattered about the surfaces, although none of the marks are severe or distracting. Listed on page 382 of the 2016 *Guide Book*. PCGS# 10091

1834 C. Bechtler Five Dollar Gold Piece, AU55 K-17, 'AUGUST 1, 1834' Issue

4429 **1834 C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, AU55 PCGS. K-17, R.5.** The Bechtler family earned a well-deserved reputation for fairness and accuracy during more than 20 years of serving the isolated gold mining industry in the rural South. Their private mint maintained a significant presence in southern commerce for those years under the leadership of Christopher Bechtler, his son Augustus, and his grandson Christopher Jr. Operations were based in Rutherfordton, North Carolina, in the heart of the southern gold fields that, in the early years between 1831 and 1838, allowed the Bechtlers to become an important local source of circulating gold coinage. The establishment of the Charlotte and Dahlonega branch mints in 1838 reduced the need for privately minted gold coins, although the Bechtlers continued to operate into the mid-1850s and their coinage circulated side-by-side with federal issues beyond the specie-starved days of the Civil War.

This yellow-gold example of the five dollar gold piece is dated August 1, 1834, but may have been produced anytime within the period of 1834 to 1837. The legend CAROLINA GOLD corresponds to the purity and weight of 20 carats — 140 grains, which slightly exceeded federal gold standards at that time. Well-struck and centered on a smooth planchet, the coin displays greenish overtones and nice appeal. Numerous tiny marks and hair-thin lines determine the Choice About Uncirculated grade. It is the K-17 Plain Edge variety, with a period between C and BECHTLER and RUTHERFORD spelled out. Listed on page 382 of the 2016 *Guide Book*. PCGS# 10091

C. Bechtler Five Dollar, 20 Distant, RUTHERF Standard of August 1, K-19, Near-Mint

4430 **(1834-37) C. Bechtler Five Dollar, 20 Distant, RUTHERF AU58 NGC. K-19, High R.6.** When the United States changed its gold-content standards for coinage, the private mint of Christopher Bechtler followed suit, and while the U.S. Mint marked the change with the Classic Head design, Bechtler added the specific date standard, "AUGUST 1. 1834." to distinguish the new pieces. This near-Mint example was struck from a die with 20 / CARATS well-separated from one another. Coppery elements are visible on both sides but more prominent on the side without the denomination. A great example of private coinage from the first grand U.S. gold rush. Listed on page 382 of the 2016 *Guide Book*. PCGS# 10115

August Bechtler Gold Dollar, MS61
27G., 21C., K-24

4431 **(1842-52) A. Bechtler Dollar, 27G., 21C., K-24, R.3, Plain Edge MS61 NGC.** A beautiful Bechtler Family type coin with exceptionally mark-free surfaces. The strike is even, there are no planchet detractions, and luster outlines all letters and numerals. Many antebellum contracts in the South required payment in Bechtler gold. Listed on page 382 of the 2016 *Guide Book*. PCGS# 10040

(1842-1852) A. Bechtler Dollar, MS62
Plain Edge, 27 G. 21C., K-24

4432 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS62 NGC. K-24, R.3.** The K-24 gold dollar is from the later period of Bechtler family coinage (1842-1852). The coins were struck by August Bechtler, after his father's death in 1842. This well-detailed yellow and rose-gold specimen is lightly marked, with lustrous, slightly wavy surfaces. Census: 38 in 62, 8 finer (4/15). PCGS# 10040

Extremely Rare K-30 A. Bechtler Five Chapman Restrike PR64

4433 **A. Bechtler Restrike PR64 NGC. K-30, High R.7.** August Bechtler struck the very rare K-29 five dollar gold pieces in the later period of the Bechtler family coinage, from 1842-1852. Henry Chapman recovered the dies for this issue around 1908 and polished them up to produce restrikes of the earlier issue in proof format. The restrikes are extremely rare and all examples seen have a diagnostic die crack from the rim to the second A in CARATS. The present coin is a spectacular Choice example, with well-preserved greenish-gold surfaces and sharply detailed design elements throughout. Some slight evidence of die rust is evident in the fields. Listed on page 383 of the 2016 *Guide Book*. Census: 1 in 64, 0 finer (5/15). PCGS# 10054

1852 K-10 Humbert Ten Dollar, AU53
Sharply Detailed Original Example, 884 THOUS

4434 **1852 Humbert Ten Dollar AU53 NGC. K-10, Low R.4.** The N in UNITED is positioned over the O in OF, and the Y in ASSAYER is centered over the NI of CALIFORNIA to confirm this piece as the Kagin-10 variety, one of three variants available to collectors from the non-overdated 1852 Humbert tens. A diagnostic die crack at the bottom of UNITED distorts the lettering and signifies a late state of the dies. The originality of the patina and the sharpness of strike on the eagle and shield are especially noteworthy. Attractive partial luster enlivens rich reddish-gold surfaces that display a few small marks. Listed on page 386 of the 2016 *Guide Book*. Census: 8 in 53, 24 finer (5/15). PCGS# 10187

1853 Assay Office Twenty, MS62
K-18, 900 Thous.

4435 **1853 Assay Office Twenty Dollar, 900 Thous., MS62 PCGS. K-18, R.2.** One of the few moderately plentiful twenty dollar gold pieces struck by the U.S. Assay Office under the management of Curtis, Perry, and Ward. This particular issue had a mintage of approximately 2.5 million pieces, but many of these were deposited as bullion at the San Francisco Mint in the following years, and survivors are significantly scarcer than are those of the Liberty Head double eagles coined in 1854 and 1855 at the newly operational San Francisco branch mint. Of those pieces that survive, Donald Kagin notes: "One specimen exists ... without crossbar on A's in AMERICA." The currently offered MS62 coin fits this description, although it is unknown if this is the exact coin to which Kagin referred, or if there are perhaps others that feature this characteristic. Both sides of this piece show soft orange-gold luster and exhibit boldly rendered design elements. No major abrasions are present and the eye appeal is quite pleasing. Listed on page 388 of the 2016 *Guide Book*. Population: 35 in 62 (1 in 62+), 56 finer (5/15). PCGS# 10013

1854 Kellogg & Co. Twenty, AU55
Short Arrows Variety, K-1a

4436 **1854 Kellogg & Co. Twenty Dollar AU55 NGC. K-1a, R.4.** John G. Kellogg partnered first with G. F. Richter in late 1853 and 1854, then with Augustus Humbert in late 1854 and 1855 to produce twenty dollar gold pieces, filling the gap of production between the closure of the U.S. Assay Office and the start-up of the new San Francisco Mint. Kellogg & Co. produced twenty-dollar pieces in relatively large quantities for the two-year span. This olive-gold 1854 Choice AU example features the Short Arrows reverse, paired with an obverse where KELLOGG & CO is centered on the coronet. The date is thin with a minimal ball on the 5. A well-struck example with a couple of light marks on the cheek but no heavy abrasions. Soft luster remains beneath the original patina. Listed on page 395 of the 2016 *Guide Book*. PCGS# 10222

1861 Clark, Gruber Ten, K-7, AU
Challenging Pioneer Gold

4437 **1861 Clark, Gruber & Co. Ten Dollar AU50 PCGS. K-7, R.4.** The second-year Clark, Gruber ten dollar issue abandoned the "volcanic" Pikes Peak motif for a more conventional imitation of Federal types (Pike's Peak, however, is not in fact a volcano, but rather an igneous intrusion that was subsequently uplifted to create a dome-like mountain). The present wheat-gold pioneer gold piece has a light strike on the lower eagle and upper portrait but is otherwise well-defined. Marks are inconsequential save for a couple of hair-thin lines near the date. Listed on pages 398-399 of the 2016 *Guide Book*.
Ex: Long Beach Signature (Heritage, 5-6/2012), lot 5405. PCGS# 10141

1861 Clark, Gruber Twenty, MS62 Brown
Copper Die Trial, K-12c

4438 **1861 Clark, Gruber $20 Copper Die Trial MS62 Brown PCGS. K-12c, R.6.** Struck in copper from the adopted dies for the 1861 Clark, Gruber & Company twenty dollar gold piece, with a reeded edge. This attractive MS62 example shows evidence of excessive die polishing, with the letters U and E in GRUBER incomplete. The design elements are well-detailed and the glossy chocolate-brown surfaces are lightly marked. Population: 1 in 62 Brown, 8 finer (5/15). PCGS# 10153

Kellogg & Humbert 48.03-Ounce Gold Ingot From the *S.S. Central America*

4439 **Kellogg & Humbert 48.03-Ounce Gold Ingot. CAGB-703.** John G. Kellogg, as discussed by Don Kagin in his *Private Gold Coins and Patterns of the United States*, was a lawyer by training who became a melter and assayer in California. He was hired by Moffat & Co. and worked with them through their United States Assay Office days and on into the Curtis, Perry and Ward era. Augustus Humbert, the former United States Assayer for San Francisco, vouched for Kellogg when the latter opened his own assayer's office late in 1853. Less than 18 months later, after periods of solo work as Kellogg & Co. and a partnership as Kellogg & Richter, he and Humbert joined forces.

Their partnership, which lasted about five years, was a great success. While private coinage bearing Kellogg's name is last dated 1855 (Kagin suggests production stopped "probably at the end of 1855 when the United States Mint was back in full operation"), the assaying business continued unabated. The remarkable bounty of Kellogg & Humbert ingots recovered from the *S.S. Central America,* the famous ship that sank in the Atlantic in October 1857, is a testament to the respect (and business) the two men were given at the time.

This is a uniformly bright, yellow-gold ingot with only one small area of incrustation, just below the fineness on the top side. Many *S.S. Central America* ingots show a heavy presence of rusted iron from the ship's hull. The top of the front side begins with the ingot number, No. 948 / Kellogg & Humbert imprint (lightly impressed) / 48.03 OZS / 896 FINE / $889.61. The ingot measures 42 x 98 x 20 mm.

CALIFORNIA FRACTIONAL GOLD

1853 Arms of California Half Dollar, AU58
BG-435 'Eureka-Humbert Eagle' Pairing

4440 **1853 Arms of California 50 Cents, BG-435, Low R.5, AU58 PCGS.** A famous and popular variety within the fractional gold series, depicting the Arms of California on one side and an eagle vaguely reminiscent of the Humbert-Assay Office octagonal fifty dollar coins of 1851. The BG-435 mark the only appearances of either die within the California fractional series, by an unknown maker (although the Jay Roe Collection catalog notes "possibly by Braverman and Levy"). This beautiful amber-gold piece boasts rich luster and appears quite close to Uncirculated. Population: 9 in 58, 37 finer (5/15). PCGS# 10471

1870 Round Gold Dollar, MS64 Prooflike
Rare BG-1203 Variety

4441 **1870 Liberty Round 1 Dollar, BG-1203, Low R.5, MS64 Prooflike NGC.** A highly elusive gold dollar variety produced in 1870 by Robert B. Gray & Co. The variety was described as "rare" in the Chapman brothers' 1901 sale of the Charles S. Wilcox Collection which was largely assembled in the 1890s; the coin therein was called "Very fine," but the price realized is unknown. This Prooflike MS64 example is tied with just one other as the finest at NGC (4/15). Both sides show deep-mirrored fields, with rich yellow-gold color and modest cameo contrast. Slightly soft in the centers, as usual. PCGS# 710948

COINS OF HAWAII

1883 Hawaii Half Dollar, MS65
Splendid Preservation

4442 **1883 Hawaii Half Dollar MS65 NGC.** Splendid preservation is the hallmark of this Gem 1883 Hawaii half dollar, a coin seldom seen in so fine a grade. The surfaces show a reflective, prooflike sheen with ivory-gray color accented by gold near the rims. The strike is bold throughout, and there are no marks of any import. Census: 5 in 65, 4 finer (5/15). PCGS# 10991

John T. Waterhouse Store Card, XF45
Earliest Hawaiian Token

4443 **(1860) Waterhouse XF45 PCGS. Medcalf 2TE-1.** The tokens of John T. Waterhouse, a prominent Honolulu merchant, were the first issued in the Hawaiian Islands. Struck in soft white metal alloy, Medcalf says they are extremely difficult to locate in grades above XF45. This Choice XF example is well-detailed, aside from the blunt nose almost always seen on this issue. The lavender-gray surfaces are lightly abraded and retain a few traces of original mint luster. Listed on page 414 of the 2016 *Guide Book*. Population: 5 in 45, 11 finer (5/15). PCGS# 600500

1880 1 Real, AU50
Wailuku Plantation Token

4444 **1880 Wailuku Plantation Token, 1 Real, AU50 PCGS Secure. Medcalf 2TE-6.** A splendid chocolate-brown example of this rare Hawaiian merchant token. This specimen is lightly abraded, though parallel die striations (as coined) are evident through the date. Unevenly struck (likely by a local blacksmith) with uncommonly well-defined stars for the variety. The Wailuku Plantation was an early cane sugar farm controlled by American businessmen in the 19th century. One real, a Mexican silver denomination, was roughly equivalent to 12 1/2 cents in U.S. money. Listed on page 414 of the 2016 *Guide Book*. Population: 5 in 50, 3 finer (5/15). PCGS# 600512

1886 Hawaii Plantation Token, XF45
Grove Ranch, 12 1/2 Cents

4445 **1886 Grove Ranch Plantation 12 1/2 Cent Token XF45 PCGS. Medcalf TE-16.** This well-detailed Choice XF example shows some evidence of die erosion on the date and buckling in the left obverse field. The dark gray surfaces are lightly abraded.

Medcalf states that the Grove Ranch Plantation "covered 3,870 acres. In 1885 the plantation employed 110 men and produced 1,300 tons of sugar. 110 yoke oxen were used to provide the work power." Listed on page 414 of the 2016 *Guide Book*. Population: 4 in 45, 7 finer (5/15). PCGS# 600521

PATTERNS

1861 Copper Five Dollar Pattern
Judd-283, PR63 Brown

4446 **1861 Five Dollar, Judd-283, Pollock-336, Low R.7, PR63 Brown PCGS.** The obverse depicts a bust of Liberty facing right with thirteen stars arranged around the periphery. Liberty wears a cap ornamented with three stars, over her right shoulder is a ribbon inscribed LIBERTY. The date 1861 is at the bottom. An eagle with outstretched wings and a shield on its chest dominates the reverse. The eagle grasps a scroll inscribed E PLURIBUS UNUM in its beak, the legend UNITED STATES OF AMERICA and the denomination FIVE DOLLARS are arranged around the border. Struck in copper with a reeded edge. Mellowed red luster surrounds the devices with reddish-brown obverse fields and rich olive reverse fields. One obverse spot prevents an even higher grade. PCGS# 12118

1863 Ten Dollar in Bronzed Copper
Judd-352, PR64 Red and Brown

4447 **1863 Ten Dollar, Judd-352, Pollock-424, R.6, PR64 Red and Brown PCGS. CAC.** Similar to the adopted design for the eagle with the addition of the motto GOD OUR TRUST directly onto the field above the eagle's head. Struck in copper and bronzed with a reeded edge. The Red and Brown designation indicates the underlying (non-bronzed) coin is full red, while the bronzing has added a layer of brown atop the underlying surfaces. One diagonal mark (planchet depression?) on the lower portrait of Liberty is all that separates this piece from an even higher grade. PCGS# 70514

End of Session Two

SESSION THREE

EARLY HALF DOLLARS

4448 **1795 2 Leaves, O-102, R.4, VG8 ANACS.** Cream-gray motifs cede to gunmetal-blue and chestnut-gold fields. The obverse stars and legends are clear, and surprising hair definition remains. A few letters in STATES and AMERICA are faint. The portrait and eagle display delicate hairlines. PCGS# 39215 Base PCGS# 6052

4449 **1795 2 Leaves, O-102, R.4 — Cleaned — ANACS. Fine Details.** Both sides display vertical hairlines, but no other abrasions are apparent. A stone-gray and ice-blue representative of the introductory Flowing Hair type. The eagle's feathers are mostly smooth but considerable hair detail remains. PCGS# 39215 Base PCGS# 6052

4450 **1795/1795 2 Leaves, O-112, R.4, VG8 NGC.** The date is dramatically repunched south. Deep gunmetal-gray toning encompasses this appealing Flowing Hair half dollar. Refreshingly unabraded aside from a minor obverse rim ding at 12 o'clock. The peripheral legends are fully readable. PCGS# 39246 Base PCGS# 6055

4451 **1795 2 Leaves, O-125, R.4, VG10 PCGS.** Deep tan-brown and dove-gray toning blankets this nicely defined and moderately abraded Flowing Hair type coin. On O-125, the upper obverse and lower reverse are more sharply struck than the lower obverse and upper reverse, due to die misalignment. Certified in a green label holder. PCGS# 39241 Base PCGS# 6052

4452 **1795 2 Leaves, O-125, R.4 —Graffiti — PCGS Genuine. VF Details.** A proud former owner pinscratched the initials SA near Liberty's neck. Otherwise, this navy-blue and lavender half dollar is free from mentionable marks. All legends are bold, and the wings display ample plumage. PCGS# 39241 Base PCGS# 6052

1801 Half Dollar, AU Details
O-101, Challenging Bust Date

4453 **1801 O-101, R.3 — Environmental Damage — NGC Details. AU.** A much better Draped Bust date, the 1801 is known from just two die varieties, the scarce O-101 and the very scarce O-102. The present lightly worn and evenly patinated example exhibits moderately granular deep mauve surfaces. We note unobtrusive marks on Liberty's neck and the field near her nose. PCGS# 39267 Base PCGS# 6064

1802 Half Dollar, O-101, VF20
Consistent Light Gray Color

4454 **1802 O-101, R.3, VF20 PCGS.** The 1802 is a popular Draped Bust half dollar, with only one die variety known for the low 29,890-coin mintage. This is an especially appealing mid-grade example, showing soft olive and lavender overtones amid the pale battleship-gray patina. The border denticles are complete and the central devices exhibit pleasing detail for the grade. PCGS# 39269 Base PCGS# 6065

1805/4 O-101 Half Dollar, XF40

4455 **1805/4 O-101, R.3, XF40 NGC.** Charcoal-gray borders cede to dove-gray fields and pearl-white high points. A well defined representative with scattered minor obverse marks and an unabraded reverse. An obvious overdate with the crosslet, diagonal, base, and upright of the 4 all partly visible. PCGS# 39290 Base PCGS# 6070

1805 O-112 Draped Bust Half, AU Details
Bold Semicircular Die Crack on Reverse

4456 **1805 O-112, R.2 — Cleaning — PCGS Genuine. AU Details.** Overton-110 to 113 all share the same obverse with the variety determined by the reverse die. The O-112 reverse shows a field star joined to the front of the beak with the bottom two star points embedded in the scroll. A bold, circular die crack travels from the edge through the first S of STATES, across the clouds, and through the final S back to the edge. This example is bright from cleaning with just a trace of gold toning at the obverse left margin. The obverse shows die clashing above the date and at Liberty's neck and bust. A small planchet defect at star 8 an faint hairlines from the cleaning are not too distracting. Although cleaned, this early half retains significant appeal for the series collector. PCGS# 39286 Base PCGS# 6069

4457 **1806 Knob 6, Large Stars, O-105, R.2, XF40 PCGS.** The die state is between O-105 and O-105a. A die crack connects the first five stars. This gunmetal-gray representative is evenly defined aside from softness on the clouds and reverse stars opposite the bust tip. The moderately granular surfaces lack noticeable marks. PCGS# 39304 Base PCGS# 6074

4458 **1806 Pointed 6, Stem, O-116, R.3, XF40 PCGS.** Dusky olive-gray patina embraces this minimally marked and pleasing Draped Bust type coin. All letters in E PLURIBUS UNUM are readable, and most are sharp. An intermediate die state with a crack atop UNITED but no crack across STATES. Housed in a green label holder. PCGS# 39319 Base PCGS# 6071

4459 **1807 Draped Bust, O-102, R.2, XF45 NGC.** An almond-gold and cream-gray representative that shows glimmers of luster within the legends and shield. Boldly clashed, as often seen on O-102. A narrow cluster of abrasions affects the right border of the shield, and a dark spot is noted below the tailfeathers. PCGS# 39339 Base PCGS# 6079

4460 **1807 Draped Bust, O-105, R.1 — Cleaning — PCGS Genuine. AU Details.** Rich forest-green, cherry-red, and stone-gray embrace this partially lustrous Draped Bust type coin. Faintly hairlined, but abrasions are incidental aside from a short line above the hair ribbon. PCGS# 39343 Base PCGS# 6079

BUST HALF DOLLARS

1807 'Bearded Goddess' Half Dollar, VF20
O-111b, Famous Die Break Variety

4461 **1807 Capped Bust, Bearded Goddess, O-111b, R.5, VF20 NGC.** The 1807 Bearded Goddess best of all worlds for Bust half collectors. The design is the two-year Capped Bust type by John Reich, and the O-111b variety features the popular 50/20 reverse at the denomination, with the five struck over a partially effaced 2. But the main attraction is the dominant die crack most visible between Liberty's chin and chest. On high-grade, late die state coins the crack is visible from the headband, through the eye and face, and traveling downward across the bust to the left of the date. On moderately circulated coins such as the current example, the main break beneath the chin remains clear and dramatic. Gunmetal blue accents enhance the old-silver appeal of this smoothly worn bearded lady. A tiny planchet flaw between R and I of AMERICA on the reverse does not distract from the substantial appeal. PCGS# 39358 Base PCGS# 39357

1807 'Bearded Goddess' Half Dollar
O-111b, AU Details, Luster Remains

4462 **1807 Capped Bust, Bearded Goddess, O-111b, R.5 — Cleaned — ANACS. AU Details.** A moderate cleaning is evident, with the resultant hairlines visible in the open fields, yet this nicely-detailed half dollar retains some mint luster and plentiful detail. The Overton-111b late die state die crack that attracts all Bust half collectors is fully visible on the coin, running from the headband and boldly through the eye and face. From there, it travels downward in an ever-thicker fashion from chin to bust, where a full and prominent "beard" is achieved. The crack then travels across the bust to the left of the date and to the edge. While the present coin is net-graded from the cleaning, it has recovered to show reddish-brown toning at the margins and retains the sharpness of an AU coin with considerable appeal for the perceptive bidder.

1807 O-112 Capped Bust Half, AU53
Large Stars, 50 Over 20

4463 **1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 PCGS. CAC.** A band of luster fills the margins of this golden-gray and ice-blue representative. Impressively free from abrasions. Slightly granular near the left scroll end. The popular blundered die variety where the engraver began to enter the denomination as 25C before recognizing his mistake.
Ex: FUN Signature (Heritage, 1/2008), lot 1454, which realized $2,760. PCGS# 39356 Base PCGS# 6086

4464 **1808 O-102a, R.2, AU55 PCGS. CAC.** Golden-brown borders frame dusky silver-gray fields and devices. A briefly circulated but unblemished Choice AU example. A fairly late die state with a moderate-sized break below the hair ribbon. PCGS# 39363 Base PCGS# 6090

4465 **1812/1 Small 8, O-102a, R.2, AU50 PCGS.** A lightly circulated and minimally marked stone-white and gunmetal-gray example. The late die state of O-102a. The crack between the second 1 and underdigit 1 is present, but faint due to fatigued dies. The dentils are absent, peripheral elements are drawn toward the edge, and PLURIBUS is clashed above the date. PCGS# 39444 Base PCGS# 6101

4466 **1812 Large 8, O-105a, R.2, AU55 PCGS. CAC.** A wheat-gold and stone-gray Capped Bust type coin. Luster illuminates letters and feathers, and the original surfaces are free from any remotely consequential abrasions. A late die state with peripheral elements drawn toward the edge. PCGS# 39450 Base PCGS# 6100

4467 **1812 Large 8, O-105a, R.2, AU55 PCGS. CAC.** Dove-gray and lavender toning dominate, although the peripheries display forest-green. A briefly circulated but unmarked example with ample indications of luster near design elements. The "true" O-105a die state with a diagonal break in the lower half of the 8 in the date, absent on most examples designated as O-105a. PCGS# 39450 Base PCGS# 6100

4468 **1814 O-103, R.1, MS61 NGC.** Well-struck, lustrous, and untoned. No marks are remotely consequential. The thick die line beneath the left scroll end instantly attributes Overton-103. A late die state with multiple sets of clash marks on both sides. PCGS# 39477 Base PCGS# 6105

4469 **1815/2 O-101, R.2 — Corroded, Repaired, Scratched, Cleaned — ANACS. AU50 Details.** Most of this well defined key date half dollar is minimally toned, but a few dark spots are noted on Liberty's jaw and neck. The reverse exhibits several thin marks, Liberty's neck is smoothed, and the obverse field is tooled with pinscratches. Moderately bright from cleaning. PCGS# 39491 Base PCGS# 6108

1817 Bust Half, VF Details
Scarce O-105 Variety, Struck 10% Off Center

4470 **1817 O-105, R.6 — Struck 10% Off Center, Improperly Cleaned — NGC Details. VF.** A remarkable Off-Center Mint error, seldom seen on a Bust half and highly unusual to be found on this scarce variety. The Overton-105 die pair is almost never found in an early die state or, for that matter, in a middle die state such as this example. The diagnostic die crack at stars 8 and 9 is visible on the coin at the edge near Liberty's cap, but despite the depth of the chasm, the break does not extend across the cap to stars 6 and 7. No reverse cracks typical of later die states are visible on the coin. Cleaned to a dull dove-gray, the surfaces of this example show numerous scratches and cuts that are faint to the unaided eye but prominent under magnification. Still, it is a dramatic error and an eminently desirable coin for the specialist or error collector.

4471 **1817 O-110, R.2, AU58 PCGS.** Medium honey-gold patina graces this well-struck and partly lustrous Borderline Uncirculated example. Bagmarks are absent, although careful rotation beneath a light displays wispy hairlines. PCGS# 39502 Base PCGS# 6109

4472 **1818 O-107, R.1, AU53 PCGS.** Peripheral bands of apple-green and autumn-brown surround stone-gray and lilac-red centers. Glimpses of luster illuminate protected areas of this lightly worn and inoffensively abraded Capped Bust type coin. PCGS# 39523 Base PCGS# 6113

4473 **1819/8 Large 9, O-105, R.2, AU58 PCGS.** Autumn-gold and navy-blue toning invigorates the borders of this crisply struck near-Mint half dollar. The fields and motifs are mostly brilliant. Smooth aside from a single thin mark above the left shield corner. PCGS# 39561 Base PCGS# 6119

1820/19 Half Dollar, Near Mint
Square Base 2, O-101

4474 **1820/19 Square Base 2, O-101, R.2, AU58 PCGS.** The Square 2 overdate variety, with both the 1 and 9 underdigits obvious. Liberty's drapery and the top of the eagle's head display slight wear, but luster dominates the borders. The sea-green and golden-brown surfaces are refreshingly unabraded.
Ex: Long Beach Signature (Heritage, 2/2010), lot 1148. PCGS# 39572 Base PCGS# 6125

4475 **1823 O-109, High R.5 — Scratches — NGC Details. VF.** Numerous peripheral obverse die cracks confirm the rare Overton-109 marriage. This cream-gray and gunmetal representative exhibits rich autumn-brown, sea-green, and plum-red undertones. The left obverse field has a pair of thin marks and the reverse exhibits numerous slender abrasions.
From The Skidaway Island Collection, Part Two.

4476 **1826 O-102, R.1, MS63 PCGS.** A prooflike representative with iridescent sea-green, sun-gold, and rose-red toning. The surfaces are clashed, but unabraded aside from wispy hairlines on the reverse. The strike is sharp except on the left-side borders. PCGS# 39668 Base PCGS# 6143

4477 **1826 O-112, High R.4, AU58 PCGS.** Bold stars and denticles are a hallmark characteristic of this scarce variety, and the current example does not disappoint. Trivial friction over the high points of the devices precludes a Mint State grade, but the sharpness of detail is nonetheless outstanding. Hints of luster remain in the recesses amid natural olive and golden-gray hues which grow deeper toward the margins. PCGS# 39682 Base PCGS# 6143

1829/7 O-102 Half Dollar, Standout MS63 Coin

4478 **1829/7 O-102, R.2, MS63 PCGS.** The shortened flag atop the 5 with filling-in distinguishes the 1829/7 O-102 reverse die from the 1829/7 O-101. This beautiful Select Mint State example shows attractive rose-gray color but as yet no sign of the later die crack from the 9 to the clasp that diagnoses the O-102a. The obverse stars are drawn to the edge. Only tiny ticks appear on Liberty's chin and neck, consistent with the grade, but the satin luster and excellent eye appeal make this a standout coin. PCGS# 39809 Base PCGS# 6155

4479 **1829 Small Letters, O-112a, R.2, MS62 PCGS.** Deep lavender and olive-brown toning encompasses this prooflike Capped Bust type coin. Minimally abraded and original. The later die state without die lines below the shoulder curl. The strike is precise aside from star 5 and the C in 50 C. PCGS# 39796 Base PCGS# 6154

4480 **1830 Small 0, O-107a, R.2, MS63 PCGS.** Orange-gold and cream-gray dominate this lustrous half dollar, although plum-red, sea-green, and cobalt-blue visit the margins. Boldly struck except on star 8. The late die state with multiple sets of clash marks and spindly obverse cracks. PCGS# 39818 Base PCGS# 6156

4481 **1831 O-115, R.4, MS62 PCGS.** A much better Overton variety, among the scarcest 1831 marriages. This satiny example has a rose-gold and olive-green obverse. The reverse displays deeper aquamarine and lavender shades. Impressively unabraded and evenly struck. A fairly late die state with elongated outer star points. PCGS# 39852 Base PCGS# 6159

1832 Half Dollar, O-102, MS63+
Unsurpassed Eye Appeal for the Grade

4482 **1832 Small Letters, O-102, R.1, MS63+ NGC.** Glowing luster resides beneath rich toning that blankets each side in concentric shades of lavender-gray, amber-gold, olive, and gunmetal-blue. A couple light grazes are discernible on Liberty's cheek, but no other flaws are observed. Striking softness occurs on the eagle's right (facing) talons and the uppermost obverse stars, but this is of little notice. A lovely coin, ideal for the collector who appreciates rich toning. PCGS# 39858 Base PCGS# 6160

4483 **1832 Small Letters, O-103, R.1, MS62 ANACS.** Star 8 is close to the cap, and the upright of the 5 in the denomination is recut. This is one of the more eye-appealing coins this cataloger has seen in an MS62 holder. Vivid album toning offers rings of sea-green, blue, indigo, and orange-red toning around the mostly silver-gray centers on both sides, while the reverse also shows a few additional patches of deep purple across the middle. To the naked eye, this coin appears about two grade points finer, although closer examination reveals slide marks over the high points that limit the grade.
Ex: Long Beach Signature (Heritage, 9/2009), lot 761; ANA Signature (Heritage, 3/2010), lot 966. PCGS# 39860 Base PCGS# 6160

4484 **1833 O-103, R.2, MS61 PCGS.** This lightly toned and lustrous Capped Bust half has clean surfaces and good eye appeal. The right-side stars and the forehead curl are incomplete, but the strike is generally crisp.
Ex: Long Beach Signature (Heritage, 5/2007), lot 1094, which realized $1,265. PCGS# 39889 Base PCGS# 6163

4485 **1834 Large Date, Small Letters, O-104, R.2, MS61 NGC.** Caramel-gold and powder-blue embrace this lustrous and refreshingly unabraded half dollar. The stars are mostly flat but the remainder of the strike is good. O-104 is most often attributed by the tine from the left shield corner. PCGS# 39908 Base PCGS# 6165

4486 **1835 O-108, R.3, MS63 NGC.** Star 11 is repunched. Dusky autumn-gold, lilac-red, and gunmetal toning drape the obverse. The reverse is about evenly divided between light caramel-gold and deep cobalt-blue patina. A coruscating and unmarked example with selected inexactness of strike. PCGS# 39934 Base PCGS# 6168

REEDED EDGE HALF DOLLARS

4487 **1839-O GR-1, R.1, VF30 PCGS.** Consistent deep walnut-brown toning blankets this New Orleans Bust half dollar. The left obverse field and Liberty's eye display abrasions, and glimpses of powdery residue reside in reverse crevices. PCGS# 531106 Base PCGS# 6181

4488 **1839-O GR-1, R.1 — Reverse Scratched — NGC Details. AU.** The strictly assessed NGC notation refers to a single straight pinscratch on the upper left reverse field. The pearl-gray surfaces also display faint hairlines. A partly lustrous and richly detailed example of the only collectible New Orleans Bust issue. PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

4489 **1839 No Drapery, WB-101, AU53 ANACS.** A 1.9 million first-year Seated half production is split between the the No Drapery and With Drapery subtypes, with the No Drapery variant (closest to the original Gobrecht design) scarcer both by mintage and collector demand. This example shows a thin display of softly lustrous, tan-gold toning that is strongest at the margins, fading to silver-gray color at the centers. A scattering of small marks and hair-thin lines is softened by brief circulation. A sharp strike remains over most of the motifs, with minor blending of Liberty's hair strands and on the eagle's left leg and claws. A small dig between the right knee and star 12 and a slight bump above RI of AMERICA are noted. PCGS# 572000 Base PCGS# 6230

4490 **1840-O Small Letters, Very Small O, WB-102, Die Pair 7, R.2. AU58 NGC.** An attractive and still-lustrous near-Mint example of the sole Very Small O Mintmark die pair for this early New Orleans issue. Light caramel-gold toning covers the obverse, which appears with greater intensity on the reverse, mixing with blue and slate-gray accents near the border. A diagnostic die crack reaches from the rim, through the L of HALF, to the eagle's middle left talon. A few light abrasions are evident beneath the toning, including a linear scrape across Liberty's chin. The star centers and central motifs remain sharp except for the eagle's left leg and talon. Census (all varieties): 15 in 58, 35 finer (4/15). PCGS# 572004 Base PCGS# 6235

4491 **1840-O Small Letters, Large O, WB-104, Die Pair 8, R.5, MS61 NGC.** A scarce and interesting die pair with the obverse dentils reengraved and enlarged so the outer star points touch the dentils (or nearly so) all the way around. The obverse rim is extremely tall. The Bugert reference suggests the reengraving was an attempt by the New Orleans Mint to extend die life. The reverse die was in its final use, and several die cracks confirm the late die state including one from the midpoint of the eagle's right upper wing into the field below OF. This is a rare Uncirculated example of this popular variety — sharply struck on both sides except along the eagle's left shield line, leg, and talon. Interesting copperlike coloration shows reddish-gold luster and lilac accents. An important find for the Seated half specialist. Census (all Small Letters varieties): 5 in 61, 30 finer (4/15). PCGS# 572006 Base PCGS# 6235

4492 **1840-O Small Letters, Large O, WB-104, Die Pair 5, R.3, MS62 NGC.** A bright, untoned example Die Pair 5 according to the most recent Bill Bugert monograph. The Small Letters reverse die displays the diagnostic die cracks running radially through the denomination at the L and near the O of HALF DOL., as well as other confirming cracks. The 8 in the date is repunched at the outer left edge of the top loop. Marks are limited to a scattering of light lines on both sides. The strike is sharp on the star centers and dentils, with only minor blending on the hair curls. The eagle's forward leg and arrow fletchings show minor incompleteness. The die rusted at the deepest recesses, resulting in microscopic lumps on Liberty's portrait. Considerable mint luster remains across both sides. Census (all Small Letters varieties): 6 in 62, 24 finer (4/15). PCGS# 572006 Base PCGS# 6235

1840-O Half Dollar, MS63
Rare Large Mintmark Variety

4493 **1840-O Small Letters, Large O, WB-104, Die Pair 13, R.5, MS63 NGC.** Large Mintmark. The 1 in the date is repunched on this rare die pairing, and the reverse is extensively cracked, two attributes that readily identify the marriage. As a date, the 1840-O half dollar is rare in all Mint State grades, particularly finer than the Select level. This example shows satiny luster with pale silvery-gray toning. Minimally abraded, but with slight striking weakness on Liberty's lap and the eagle's head and left (facing) leg. Census: 5 in 63, 19 finer (4/15). PCGS# 572006 Base PCGS# 6235

1840-O Seated Half, MS63
WB-104, Rare Die Pair

4494 **1840-O Small Letters, Large O, WB-104, Die Pair 6, R.6, MS63 NGC.** Small Letters, Large O Mintmark. Bill Bugert noted that he had seen fewer than 10 examples of this die pair as of publication of his 2011 monograph, suggesting an R.6 rarity for the variety. This Select Uncirculated example may be the finest known of the die marriage, confirming on all of the listed diagnostics including slight repunching of the 8 in the date, raised die polish lines around the denomination, and a identifying die crack from the eagle's head to the second S in STATES. Natural golden-gray patina covers this lustrous example, with sharp definition for a variety that is always weak at the eagle's head, neck, and left leg. Census (all varieties): 5 in 63, 19 finer (4/15). PCGS# 572006 Base PCGS# 6235

4495 **1841-O Large O, WB-101, Die Pair 8, R.3. MS61 NGC.** Attractively covered by a thick olive-gold patina with blue overtones, this sharply struck example of Die Pair 8 is appealing and minimally marked for the grade. Golden mint luster is plentiful beneath the toning, where it becomes more visible when angled under light. The star centers are complete and the eagle is fully feathered. Radial die cracks spell the end to this briefly used reverse die — one traveling upward through the A in HALF, and a second bold crack from the rim through the eagle's right wing beneath the last A in AMERICA. Census (all varieties): 7 in 61, 27 finer (4/15). PCGS# 572009 Base PCGS# 6237

4496 **1841-O Large O, WB-101, Die Pair 8, R.3. MS62 NGC.** The original surfaces take on a pearlescent glow from the plentiful mint luster that shines through the natural, silver-gray patina. Sharply struck for this early New Orleans issue, the obverse saw its first use as part of this die pair, while the reverse cracked and the variety is its sole use. This example shows a crack from the eagle's beak to the second T in STATES, representing a late state of the dies. It was, however, a bolder crack from the bottom dentils to the A of HALF, then traveling through the eagle's middle talon, leg, and left wing that likely caused the die's demise. Census (all varieties): 10 in 62, 17 finer (4/15). PCGS# 572009 Base PCGS# 6237

4497 **1842 Small Date, Large Letters, WB-101, MS61 NGC.** Ex: Richmond Collection. Sold as a Medium Date variety in the Richmond Collection Part III, lot 1669, it is now correctly holdered as a Small Date, Large Letters variety. The coin is primarily white and satiny with strong mint luster. A dusting of pale-gold toning visits both sides. The strike is nearly full with nominal weakness at the eagle's left talon, but Liberty's head and the surrounding star centers are fully brought up. The coin is virtually unmarked save for two tiny reeding marks in the left field near Liberty's elbow. Census (for the variety): 5 in 61, 11 finer (4/15). PCGS# 572011 Base PCGS# 6240

4498 **1842 Medium Date, Large Letters, WB-104, MS62 NGC.** A strongly lustrous coin with crisp detail. Aside from faint charcoal and gold-gray elements at the margins, this is a minimally toned and attractive half. The satiny surfaces show few marks of any consequence for the assigned grade. Despite a mintage of more than 2 million pieces and the fact that the Medium Date is more plentiful than the Small Date varieties, all 1842 Philadelphia Mint halves are scarce in Mint State. Census (all varieties): 14 in 62 (1 in 62+★), 25 finer (4/15).
Ex: Long Beach Signature (Heritage, 2/2009), lot 1326. PCGS# 572013 Base PCGS# 6239

1842-O Small Date Half, WB-101, XF40 Deep Original Patina

4499 **1842-O Small Date, Small Letters, WB-101, Die Pair 1, R.5, XF40 PCGS.** New Orleans half dollars of 1842 are rarely seen with the Small Date logotype. This Die Pair 1 example is well-detailed for the grade, and exhibits deep, undeniably original patina — areas of tan-gray highlight the relief elements, but the majority of each side shows a blend of olive and gunmetal-gray toning, with tinges of gold revealed in the protected regions when tilted beneath a light. There are no complaints and the eye appeal is outstanding for the grade. Population: 8 in 40, 15 finer (4/15). PCGS# 572015 Base PCGS# 6238

4500 **1842-O Medium Date, Large Letters, WB-102, Die Pair 12, R.3. AU58 NGC.** Seemingly struck from a later state of the dies than that described in the most recent Bill Bugert reference. Several faint peripheral die cracks at the stars and at UNITED STATES OF on the reverse suggest the advanced die state. A brilliant, nearly untoned coin, with hints of reddish-gold toning at the margins. Well-struck with remaining mint luster. Numerous light marks and abrasions are distributed over the frosty surfaces. Census (all Medium Date varieties): 9 in 58, 17 finer (4/15). PCGS# 572016 Base PCGS# 6242

1844 WB-103 Seated Half, MS63+ Noticeably Repunched at 44

4501 **1844 Repunched Date, WB-103, MS63+ PCGS.** Repunching is obvious at the top of the second 4, and the first 4 shows evidence of recutting at the crossbar. A faint die crack at the top of UNI of UNITED curves upward from the right top serif of I to the edge, confirming the WB-103 variety. A thin band of gold toning surrounds lustrous, pearlescent-silver centers. The star centers, Liberty's hair strands, and the eagle's plumage are fully brought up to represent an overall sharp strike. Delicate field marks do not distract. This is the sole example for the issue regardless of variety to earn the PCGS Plus designation at MS63. Population (all varieties): 18 in 63 (1 in 63+), 11 finer (4/15). PCGS# 572027 Base PCGS# 6245

4502 **1844 Repunched Date, WB-105, MS62 PCGS.** The 1993 Wiley-Bugert Seated half reference defines a quartet of recut dates for the 1844 Philadelphia issue. This WB-105 example shows slight repunching north on the 44 in the date, the recutting visible beneath the crossbars. The coin is mostly prooflike and beautifully toned in shades of lavender at the centers surrounded by cerulean-blue, lime-green, and orange-gold border accents. The star centers are fully defined, as are Liberty's hair tresses and the eagle's plumage. Population (all varieties): 10 in 62, 29 finer (4/15).
Ex: Sheridan Downey (2/1996).
From The Dr. Harry Salyards Collection. PCGS# 572029 Base PCGS# 6245

4503 **1844-O WB-101, Die Pair 12, R.3. MS62 PCGS.** Early Die State. The date is positioned further left on Die Pair 12 than on a similar variety (Die Pair 21) — which shares the same reverse — a subtle-but-important difference to identify the correct obverse. The first 4 is slightly recut beneath the crossbar. This is an attractive, lightly toned example with semiprooflike fields and a sharp strike on both sides. Hints of orange-gold toning reside primarily at the margins. Marks consist solely of light field abrasions, which define the grade but detract little from the lustrous Mint State appeal. Population (all varieties): 6 in 62, 15 finer (4/15).
From The Dr. Harry Salyards Collection. PCGS# 572030 Base PCGS# 6246

4504 **1845-O WB-101, Die Pair 9, R.3. MS62 PCGS.** Partial Drapery. Sharply struck from an early, near-perfect state of the dies. The obverse is confirmed by a group of tiny rust lumps on the shield as well as a die lump on Liberty's knee. The reverse lacks die cracks due to the early die state, with a Large O mintmark positioned left. This beautifully toned coin is prooflike at the obverse margins and more extensively prooflike on the reverse. Iridescent shades are royal-blue and russet shades framed by lemon-gold at the rims. The strike is pinpoint sharp. Population (all With Drapery varieties): 5 in 62, 17 finer (4/15).
Ex: Auction '90 (Stack's, 8/1990), lot 212; unknown intermediaries; 60th Anniversary Sale (Stack's, 10/1995), lot 594.
From The Dr. Harry Salyards Collection. PCGS# 572036 Base PCGS# 6249

1846 Seated Half Dollar, AU55
WB-104, 6 Over Horizontal 6

4505 **1846 6 Over Horizontal 6, WB-104, FS-301, AU55 PCGS.** This *Guide Book* variety is one of the most famous blunders in the Seated half dollar series. Sometimes referred to as the "6 over lazy 6," this obverse shows an errant 6 punched horizontally and then corrected, with two small rim cuds below along the border. The reverse is heavily cracked, most notably with a retained cud above UNIT in UNITED. This example displays mildly glossy surfaces with deep golden-gray and subtle aquamarine hues overall. The strike is bold and only trivial friction is evident over the high points of the design. Population: 9 in 55, 7 finer (4/15).
Ex: Douglas L. Noblet Collection; Rarities Sale (Bowers and Merena, 1/1999), lot 89.
From The Dr. Harry Salyards Collection. PCGS# 409888 Base PCGS# 6254

1846 Seated Half, MS63
WB-106, Tall Date

4506 **1846 Tall Date, WB-106, MS63 PCGS.** A moderately available variety, but seldom seen in pleasing Mint State condition. This Select example displays satiny luster with just a touch of lavender-gray color. The strike is boldly rendered and the surfaces are only minimally abraded. Population of Tall Date examples: 8 in 63 (1 in 63+), 7 finer (4/15).
From The Dr. Harry Salyards Collection. PCGS# 572045 Base PCGS# 6252

4507 **1846-O Medium Date, Repunched Date, WB-103, Die Pair 5, R.4. MS61 NGC.** Medium Date. Large O Mintmark. The 18 of the date is repunched north, most visible at the base of the 1 and faintly visible at the base of the 8. Both the obverse and reverse display an array of die cracks. The surfaces of this boldly struck example are semiprooflike, allowing some busyness in the fields to account for the technical grade. Steel-blue and golden-gray toning deepens at the margins, contrasting with silver-white central devices. Mint State examples of the New Orleans Medium Date issue are surprisingly scarce given the 2.3 million-piece mintage. Census: 8 in 61, 14 finer (4/15). PCGS# 572050 Base PCGS# 6255

4508 **1846-O Medium Date, Repunched Date, WB-105, Die Pair 12, R.3. AU58 PCGS.** At present, 27 different die marriages are known for the 1846-O half, including a multitude of repunched dates, two different sizes of the date logotype, and die cracks galore. Because the reverse die was in the anvil position, it was prone to cracking moreso than the obverse (hammer) die. Die Pair 12 at times has been misidentified as a 6/5 overdate, when in fact the 6 is broadly repunched at the inside loop and outside the lower curve. Both sides of the coin show nearly prooflike fields, with only a few delicate hair-thin lines and tiny nicks. The strike is sharp on this New Orleans issue, with virtually full details throughout. Light, natural old-time toning displays a ring of steel-blue toning around ivory-gold interiors. Population (all Medium Date varieties): 10 in 58, 14 finer (4/15).
Ex: Harry Laibstain Rare Coins at the Bay State Show (11/2001).
From The Dr. Harry Salyards Collection. PCGS# 572052 Base PCGS# 6255

1846-O Half Dollar, AU55
WB-106, Tall Date

4509 **1846-O Tall Date, WB-106, Die Pair 27, R.4, AU55 PCGS.** Lustrous surfaces yield just a hint of iridescent pastel toning in the fields, while the well-defined central devices show only trivial wear over the high points. No major abrasions are present and the eye appeal is outstanding for the grade. Overall, the Large Date 1846-O half dollar is significantly scarcer than its Medium Date counterpart.
Ex: Douglas L. Noblet Collection; Rarities Sale (Bowers and Merena, 1/1999), lot 92.
From The Dr. Harry Salyards Collection. PCGS# 572053 Base PCGS# 6256

4510 **1847-O WB-101, Die Pair 11, R.3. MS62 PCGS.** An essentially brilliant and frosty coin with excellent cartwheel luster. Pale reddish-gold toning visits the date area and makes a token appearance at the margins on both sides. As typical for the die pair, the peripheral strike is weak, where many of the star centers and the foot support lack definition. The reverse strike is more robust, with sharp detail everywhere except on the eagle's left talon and the adjacent berries. The 1847-O is one of the notable condition rarities of the series in Mint State despite a plentiful mintage of 2.5 million pieces. Population (all varieties): 3 in 62, 13 finer (4/15).
Ex: The Rarities Sale (Bowers and Merena, 1/1999), lot 95.
From The Dr. Harry Salyards Collection. PCGS# 572057 Base PCGS# 6259

4511 **1848 WB-101 MS63 PCGS.** Still housed in the green label holder from the Pryor sale, this Philadelphia issue joins most early Seated halves as conditionally rare in Select Uncirculated or finer grades. Because the silver value exceeded the face value of these halves, few pieces survived the dual threats of hoarding or melting until the weight was adjusted in 1853. Mintages were kept low. This example is lightly toned and highly lustrous, with amber-gold accents over frosty silver surfaces. Only a few light marks and some peripheral weakness at the stars are noted. Four die marriages were identified by the 1993 Wiley-Bugert reference, with the WB-101 variety the only "normal date" obverse. The date is positioned further right than all the other varieties. Population: 9 in 63, 12 finer (4/15).
Ex: Julian Leidman (5/1973); James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 133.
From The Dr. Harry Salyards Collection. PCGS# 572062 Base PCGS# 6260

4512 **1850 Repunched Date, WB-102, AU53 PCGS.** Repunching on the date is most evident on the 0, which is noticeably recut northwest. J.B. Pryor wrote in the *Gobrecht Journal #29:* "The 1850 is not only not overrated, it is underrated ... a very nice AU is a very scarce coin, and in true UNC this coin is **rare**, period." The present AU coin is indeed very nice, with vivid old album toning in concentric rings of gold, blue, and purple around fawn-gold centers. The natural coloration is remarkably consistent on both sides of the coin. A few light abrasions are hidden in the toning but none are individually noteworthy. A tiny oval indent is noted near the flag of the 5 in the date. Sharply struck throughout, the coin is extremely attractive and undeniably scarce. Population: 6 in 53, 55 finer (4/15).
Ex: Lewis Reeves (5/1985).
From The Dr. Harry Salyards Collection. PCGS# 572075 Base PCGS# 6264

4513 **1851 Repunched Date, WB-102, XF45 PCGS.** The 18 in the date is repunched south, with the recutting noticeable at the top of the 1 where the flag of a misaligned 1 is visible beneath the primary digit, and the the top loop of an extra 8 floats slightly above the primary 8. The low mintage of 200,750 pieces was further diminished by melting, since the intrinsic value of the issue's silver exceeded face value. This Choice XF example displays powder-gray surfaces that flash iridescent colors under light. The pleasing patina deepens at the borders. Moderate wear softens the high points, but strong detail remains for the assigned grade. A few swirling lines are visible with a glass. Population (all varieties): 11 in 45, 70 finer (4/15).
Ex: Brian Greer (1/2008).
From The Dr. Harry Salyards Collection. PCGS# 572079 Base PCGS# 6266

1852 Seated Half, AU58
Frosty, Iridescent Surfaces, WB-101

4514 **1852 WB-101 AU58 PCGS.** A wonderful example of a rare Seated half issue, minted to the extent of just 77,130 pieces. There is a likelihood many coins were melted (as was the case for the 1851 date) since the silver value exceeded the face value in 1852. The following year, the weight of half dollars was reduced to bring the value closer to par and to discourage the hoarding and melting of silver.

The present coin is frosty and lustrous, with steely silver surfaces that emit iridescent tones of lavender, gold, pink, and green. As with most 1852 halves, a full strike covers the motifs. The few light marks are widely scattered and small, visible only with a glass. Population: 11 in 58, 43 finer (4/15).
Ex: Jack Beymer at the 1999 ANA.
From The Dr. Harry Salyards Collection. PCGS# 572083 Base PCGS# 6268

1852 Seated Half, MS63
WB-101, Sharply Original

4515 **1852 WB-101 MS63 PCGS.** California gold discoveries lowered the world market value of gold in relationship to silver, essentially driving up the price of silver and upsetting the ratio used to determine the standard for silver coinage. In 1851-1852, silver coins were worth more as bullion than their face value and silver coinage was exported for remelting. Mintages were curtailed, with only 77,130 half dollars struck in 1852 at the Philadelphia Mint.

This attractive, originally toned half displays an overall golden-bronze toning with iridescent shades at the borders of blue, magenta, and lilac. Sharply struck at the centers, the periphery is less boldly struck with blending at several star centers and Liberty's hair strands. Nice mint luster illuminates the nearly unmarked fields and devices. Population: 18 in 63, 8 finer (4/15). PCGS# 572083 Base PCGS# 6268

4516 **1852-O WB-101, Die Pair 1, R.4. AU55 PCGS.** While the scarcity of the 1852-O Seated halves is partially explained by the low mintage of just 144,000 pieces, it is more likely a result of many pieces lost to melting. The silver value exceeded the face value of half dollars until legislation paved the way for the adjusted-weight 1853 Arrows halves. Prior to the change-of-weight standard, mintages were low and half dollars simply disappeared from circulation. This is a Choice About Uncirculated example of the rare 1852 O-Mint issue. The surfaces display semiprooflike flash beneath mottled teal, blue, and golden-tan toning. Silver luster remains plentiful across both sides of this sharply detailed coin. Population: 10 in 55, 11 finer (4/15). PCGS# 572084 Base PCGS# 6269

1853 WB-101 Half Dollar, MS63
Single-Year Type with Arrows and Rays

4517 **1853 Arrows and Rays, WB-101, MS63 NGC.** A reduction in weight to encourage circulation occurred in 1853, with the addition of arrows on the obverse and rays on the reverse to distinguish these from earlier pieces struck at the higher weight standard. A sharply struck and attractive example of this single-year design, with frosty silver luster and faint champagne toning on each side. Its status as a one-year type coin heightens demand and ensures a ready market.
Ex: Houston Signature (Heritage, 11/2007), lot 60648. PCGS# 572085 Base PCGS# 6275

4518 **1854-O Arrows, WB-101, Die Pair 4, R.3. MS63 PCGS.** Multiple die cracks traverse both the obverse and reverse borders, with a small cud in the dentils beneath D(OL). Sharply struck, with crisp definition on Liberty's head, the obverse stars, and the eagle's talons. The satiny surfaces are brightly lustrous and display lovely golden toning with slight mottled kelly-green peripheral accents. Minimally marked for the grade, with surface quality and eye appeal suggestive of an even higher grade.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1331. PCGS# 572088 Base PCGS# 6280

4519 **1855-S Arrows, WB-101, Die Pair 3, R.5, VF30 PCGS.** Bill Bugert writes in his *Register of Liberty Seated Half Dollar Varieties*, "Choice, original, problem free 1855-S half dollars of any grade are scarce." To date, PCGS has seen just a single Mint State coin, plus 83 others in various circulated grades — about half of them in lesser condition than this pleasing mid-grade example. Six letters of LIBERTY are fully visible, with the E only partially so. Attractive medium-gray surfaces show a few tiny marks (the largest is a small dig below star 9). Nicely detailed on the motifs, this R.5 VF30 coin would be a perfect addition to any mid-to-higher-grade circulated set. Population: 3 in 30, 34 finer (4/15).
Ex: Heritage Rare Coin Galleries (2/1988).
From The Dr. Harry Salyards Collection. PCGS# 572091 Base PCGS# 6284

4520 **1856-S WB-101, Die Pair 2, R.4. XF45 PCGS.** Large, Thin Top S. A golden-gray Choice XF example, sharply struck, with vestiges of remaining mint luster. Just 211,000 pieces were produced, making this San Francisco issue a challenge for series collectors in all grades. This is the sole variety with the date positioned far to the left. An attractive coin, minimally marked, with a few blue accents at the borders and great eye appeal for the grade. Population (all varieties): 15 in 45, 34 finer (4/15).
Ex: Brian Greer at ANA (8/1996).
From The Dr. Harry Salyards Collection. PCGS# 572098 Base PCGS# 6289

1856-S WB-101 Seated Half, AU55
Underrated San Francisco Issue

4521 **1856-S WB-101, Die Pair 6, R.5, AU55 PCGS.** The date is level and sits lower than any other variety for this scarce San Francisco second-year issue. The 1 in the date shows two diagnostic anomalies — a notch near the end of the lower-right serif, and a bar-like lump on the upright just above the flag. The Notched One suggests the date logotype was also used on 1856 large cents, eagles, and double eagles since they show the same feature. Just 211,000 pieces were minted and few survived the rigors of circulation in the West. Others likely were melted for their bullion value. This sharply struck AU example is softly lustrous at the margins with silver-gray surfaces and sparse lavender highlights. A pinhead-sized deep toning spot near star 12 and a few faint, scattered hair-thin lines are the only marks needing mention. Population (all varieties): 10 in 55, 7 finer (4/15). PCGS# 572098 Base PCGS# 6289

4522 **1857-O Misplaced Date, WB-102, Die Pair 6, R.3. MS61 PCGS.** Date In Rock. One of the most interesting obverses not only for the issue, but for the series, too. Multiple digits are visible to one extent or another in the rock above 57 of the date. An errant tine floats above the serif of 1, perhaps from another misplaced digit. The smooth surfaces show few marks of any kind on the obverse and a sharp strike. The reverse is equally smooth and attractive, with slight field chatter above the eagle's left shoulder and minor flatness on the left talon. A brilliant and frosty coin, with a hint of translucent reddish-gold toning at the margins. Population (all varieties): 3 in 61, 16 finer (4/15). PCGS# 572103 Base PCGS# 6291

4523 **1857-S Large S, WB-101, Die Pair 1, R.4, XF45 PCGS.** The date is high and lightly impressed, with a series of small die lumps in the rock to the left of the obverse shield. Stars 7 through 13 show varying degrees of recutting. The reverse die is transitional with some 1856-S halves, and features a noticeable die line across the eagle's tail feathers below the top arrow fletchings. Just 158,000 pieces were struck of the 1857 San Francisco issue. This Choice XF coin is displays a light-gold patina with sharp motifs and just a few scattered, faint abrasions. Luster remains in protected areas among the devices. Population (all varieties): 17 in 45, 21 finer (4/15).
Ex: Brian Greer at the Denver ANA (8/1996).
From The Dr. Harry Salyards Collection. PCGS# 572105 Base PCGS# 6292

4524 **1859-S Medium S, WB-102, MS62 NGC.** A few glimpses of golden-brown toning appear at the rims, but essentially the coin is brilliant-white throughout all the fields and devices. A full strike shows no weakness on any of the stars or Liberty's portrait. The eagle's plumage is razor-sharp to the last feather. Bright mint luster covers both sides, which display only a few shallow marks and wispy lines that define the grade. A scarce coin in Mint State, as are all Seated halves from the 1840s through the 1860s. Census (all varieties): 3 in 62, 25 finer (4/15). PCGS# 524239 Base PCGS# 6298

1859-S WB-102 Seated Half, MS63
Medium S Mintmark, Natural Appeal

4525 **1859-S Medium S, WB-102, Die Pair 6, R.3, MS63 NGC.** One of two Medium S mintmark varieties for the scarce San Francisco issue. This example shows the mintmark positioned lower and leaning slightly left, well-centered under the junction of the olive branch and the feather tip. Soft, satiny silver luster resides beneath light-gold and lilac shades, with a few patchy areas of deep umber toning. The sharp strike is characteristic of the issue, which was well-produced but in a small quantity of just 566,000 pieces. Few marks are visible even under magnification. Census (all varieties): 10 in 63 (1 in 63+), 15 finer (4/15). PCGS# 524239 Base PCGS# 6298

4526 **1860-S Large S, WB-101, Die Pair 1, R.3. MS61 PCGS.** Large S Mintmark. This well-struck and semiprooflike Seated half shows ample luster and an unblemished in-hand appearance. The fields reveal a few delicate lines under magnification, but the strike is sharp and an overall sheen of pale gold is attractive. Surprisingly affordable given its Mint State rarity, low mintage, and low population that hasn't changed significantly in the eight years since we last sold this coin. Still housed in its blue label holder. Population (all varieties): 3 in 61, 25 finer (4/15). PCGS# 572142 Base PCGS# 6301

1860-S Seated Half, MS63
WB-101, Attractive Pearlescent Surfaces

4527 1860-S Large S, WB-101, Die Pair 1, R.3, MS63 PCGS. Ex: Dick Osburn Collection. Large S mintmark. Most of the 472,000 pieces minted did not survive the turbulent 1860's decade. This scarce San Francisco date owes many of its survivors to the infamous "Guatemala Hoard," although coins from the hoard were usually roughly handled and abrasively cleaned. The present coin is obviously not one of those. Pearlescent silver surfaces display a light dispersion of powder-gold toning over the lustrous, frosty fields and devices. A sharply struck coin — the star centers and Liberty's portrait are well-detailed, with noticeable recutting on stars 3 through 11. The eagle is equally sharp, with a few tiny die lumps diagnostic of the die pair but no cracks or abrasions to mention. Seldom seen any finer, the coin features excellent eye appeal and a notable pedigree. Population: 9 in 63, 10 finer (4/15).
Ex: ANA Rarities Night (Stack's Bowers, 8/2011), lot 7073.
From The Dr. Harry Salyards Collection. PCGS# 572142 Base PCGS# 6301

4528 1861 WB-101 MS64 NGC. For the period, the 1861 is one of the more plentiful Seated half issues in Mint State, ideal to represent the No Motto type. This piece shows the sharp design definition that is a hallmark of this issue, along with satiny luster that shows soft lavender and gold hues around portions of the peripheries. Mild die rust is discernible in the obverse fields near the borders. Census: 60 in 64 (1 in 64 ★), 30 finer (4/15). PCGS# 572144 Base PCGS# 6302

4529 1861-S Large S, WB-102, Die Pair 3, R.3, AU58 NGC. Large S Mintmark. Russet and gunmetal-blue toning covers both sides of this richly patinated San Francisco half. Soft mint luster remains beneath the toning. Well-struck for the issue, which was produced in large quantities from dies that show evidence of crumbling, stress, and die clashing. Like most San Francisco halves, the issue circulated widely in the West and Mint State examples are scarce. This attractively toned near-Mint coin would be a suitable alternative. Census (all varieties): 20 in 58, 31 finer (4/15). PCGS# 572149 Base PCGS# 6306

4530 1864-S Small Wide Broken S, WB-103, Die Pair 3, R.3. MS61 ANACS. The date is very high on the obverse, paired with a reverse showing the Small Wide Broken S mintmark. The reverse die was used twice in 1864 and again in 1865, when it shattered and the Small Wide mintmark was not used again in the series. This variety represents the first use of the reverse, where the top serif of the S mintmark is widely detached from the top curve of the letter. Soft luster glows from minimally toned silver-gray surfaces. The coin is well-struck except for slight weakness at Liberty's head and the adjacent star centers. A few light abrasions and marks define the assigned grade. PCGS# 572162 Base PCGS# 6312

4531 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.4, VF35 PCGS. Late Die State. Strong blue-green and gold influences saturate the deep gunmetal-gray surfaces of this Choice VF piece. Aside from a rim bump over the ER of AMERICA, this is a pleasing midrange example from the last No Motto half dollar issue, mintage 60,000 pieces. Population: 13 in 35, 50 finer (4/15).
Ex: Long Beach Signature (Heritage, 5/2012), lot 3828. PCGS# 572170 Base PCGS# 6315

1866-S WB-101 Seated Half, XF45
Elusive No Motto Reverse

4532 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.5. XF45 PCGS. No Motto reverse. Late Die State. Struck from a single transitional 1865-S reverse die (before the With Motto dies arrived in May, 1866) to an extent of just 60,000 pieces. Because the letter of the law stated all coins large enough to bear the IN GOD WE TRUST motto were to include the motto in mintages as of January 1, 1866, the existence of the No Motto variety is an aberration. Apparently, there was some wiggle room in the law. The present example is Choice for the XF grade, with glossy, attractive gunmetal-gray patina with interspersed golden-gray highlights. Slight weakness on a few of the stars and Liberty's hair strands, as well as the eagle's left leg and talon are minor for the grade. Abrasions are limited to a few tiny ticks and light lines. Population: 16 in 45, 15 finer (4/15).
Ex: Jack Beymer (4/1993).
From The Dr. Harry Salyards Collection. PCGS# 572170 Base PCGS# 6315

1866-S No Motto Half, AU55
WB-101, Early Die State

4533 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.5. AU55 PCGS. No Motto. Small Thin S Mintmark. Deep iridescence covers the semiprooflike fields and sharply struck devices of this scarce No Motto half. Shades of gunmetal-blue and golden-tan flash a cross the reflective surfaces with glimpses of remaining mint luster. Just 60,000 pieces with the No Motto design were struck — less than 6% of the total San Francisco half dollar mintage for the year — making the 1866-S No Motto type an important series key issue in any condition. This Choice About Uncirculated example is the sole representative of its grade at PCGS. Population: 1 in 55, 7 finer (4/15). PCGS# 572170 Base PCGS# 6315

4534 1866-S Motto, Doubled Die Reverse, WB-104, Die Pair 3, R.3, MS62 NGC. The obverse is a late state that was used in its earlier state for the 1866-S No Motto half dollar. This pleasing Mint State example displays brilliant and frosty silver luster beneath light gold toning with a splash of steel-blue at the left obverse border. Census: 2 in 62, 15 finer (5/15). PCGS# 572176 Base PCGS# 6320

4535 **1867-S WB-101, Die Pair 2, R.3. MS62 ANACS.** A brightly lustrous and nearly untoned example of this conditionally scarce San Francisco issue, with faint lemon-gold toning on the reverse and a scant whisper of gold on the obverse rim. Only a few minor marks and evidence of light obverse die clashing are visible even with magnification. Sharply struck, although stars 7 and 8 show minor incompleteness. PCGS# 572179 Base PCGS# 6322

1870-S WB-101 Seated Half, MS62
Attractive Lilac-Silver Surfaces

4536 **1870-S Very Small S, MS62 PCGS. WB-101, Die Pair 1, R.4.** When last seen in the sale of The Douglas L. Noblet Collection in 1999, this coin vied for attention with the renowned Eliasberg example of the same variety, which appeared as the preceding lot. Attractive frosty surfaces glow with bright silver luster and display beautiful lilac and pink overtones. Fully struck except for minor weakness at the 18 of the date (diagnostic of a later state of the die pair), the coin offers tremendous eye appeal. Only a few faint lines and tiny marks are seen on this "no drapery" variety, with noticeable clashing of the reverse shield lines beneath Liberty's elbow. A surprisingly scarce San Francisco issue. Population (all varieties): 7 in 62, 16 finer (4/15).
Ex: The Rarities Sale (Bowers and Merena, 1/1999), lot 158.
From The Dr. Harry Salyards Collection. PCGS# 572191 Base PCGS# 6329

4537 **1871-CC WB-101, Die Pair 6, R.4. VF35 PCGS.** A sharp, Choice VF example that displays smoothly even silver-gray fields and sharp remaining detail on all of the elements. An above-average example for this scarce Carson City date, which is often overshadowed by the rare CC-issues that surround it. The coin shows remarkably little wear for the assigned grade, and marks are limited to only minor abrasions visible with a glass. A nearly perfect collector-grade coin. Population (all varieties): 14 in 35, 58 finer (4/15).
Ex: Larry Briggs (12/1986).
From The Dr. Harry Salyards Collection. PCGS# 572196 Base PCGS# 6331

4538 **1871-CC WB-101, Die Pair 1, R.4, PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned and has a few light, scattered scratches. The strike is nonetheless sharp, and only light wear is present over the design elements. Bright steel-gray surfaces yield occasional glimpses of light gold and lavender color. PCGS# 572196 Base PCGS# 6331

1872 WB-101 Half Dollar
Satiny Near-Gem, Ex: Pryor Collection

4539 **1872 WB-101 MS64 PCGS.** The 1872 Philadelphia issue is available in circulated grades, but it becomes one of the challenging condition rarities in high Mint State. Satiny luster adorns this near-Gem half with whispers of light tan-gold toning at the margins. An exacting strike leaves nearly full definition on the design elements, further heightening the eye appeal. Trivial high point marks from bag transport and Mint handling are visible under magnification. The fields are otherwise remarkably smooth and lustrous. Population: 15 in 64 (1 in 64+), 8 finer (4/15).
Ex: Bob Rossfield (12/1973); James Bennett Pryor Collection (Bowers and Merena 1/1996), lot 211; Sundance Collection ANA Signature (Heritage, 8/2008), lot 2230; Richard Jewell Collection (Stack's Bowers, 8/2013), lot 4214.
From The Dr. Harry Salyards Collection. PCGS# 572201 Base PCGS# 6333

1873-CC No Arrows Half, XF45
WB-101, Scarce Closed 3 Issue

4540 **1873-CC No Arrows, Small CC, WB-101, Die Pair 1, R.3. XF45 PCGS.** Small CC mintmark. Glossy, battleship-gray toning covers the obverse with glimpses of deep-seated iridescence. The reverse is a shade or two warmer gray with blue and lavender overtones and colorful iridescence around the legends. The surfaces are smooth and attractive with widely scattered marks from circulation. Strong detail remains on the motifs along with traces of mint luster at the stars, date, and throughout the reverse elements. All 1873-CC No Arrows halves show a Closed 3 in the date; conversely, all 1873-CC With Arrows halves are of the Open 3 type. Carson City No Arrows halves always command respect by series collectors and type enthusiasts alike. Just 122,500 pieces were struck, and reportedly many were melted after April, 1873. Population: 10 in 45, 26 finer (4/15).
Ex: J.J. Teaparty at the '98 ANA (8/1998).
From The Dr. Harry Salyards Collection. PCGS# 572214 Base PCGS# 6338

4541 1873-S Arrows, WB-101, Die Pair 1, High R.3. AU53 PCGS. Despite rumored examples of a No Arrows, Closed 3 1873-S variety, no specimens are substantiated and collectors can only dream of finding one. The With Arrows, Open 3 variety remains the sole representative of the date and mint. So far, just a single die pair seems responsible for the entire 228,000-piece mintage. This example displays mottled gray, blue, and gold toning with nice remaining mint luster. The coin is remarkably well-preserved with sharp details on the devices and problem-free fields. It would be challenging to improve upon the technical quality and eye appeal of this coin for the assigned grade. An unappreciated series "sleeper," and a conditionally scarce San Francisco issue. Population: 7 in 53, 19 finer (4/15).
Ex: Jim O'Donnell at the Baltimore ANA (7/1993).
From The Dr. Harry Salyards Collection. PCGS# 572217 Base PCGS# 6345

4542 1873-S Arrows, WB-101, Die Pair 1, High R.3, AU55 NGC. The scroll edge and the second olive leaf are weak, suggesting a late state of the dies to strike this pleasing Choice About Uncirculated half dollar. Otherwise, strong details remain. The star centers are sharp and nice detail is seen on Liberty's hair despite the coin's brief stay in circulation. Powder-gray toning is minimal and the coin retains substantial silver luster. An underappreciated San Francisco scarcity in higher grades. Census: 7 in 55, 14 finer (4/15). PCGS# 572217 Base PCGS# 6345

4543 1874 Large Arrows, WB-102, MS62 PCGS. Large Arrows. Deep amber-gold border toning surrounds lustrous, silver-white centers of this smooth and frosty half. Sharply struck on the elements, only a few widely scattered nicks and abrasions visit the surfaces, visible with a glass. In hand, the coin appears virtually unmarked.
Ex: Don McCulloch (Iowa Great Lakes Coins, 1/2001).
From The Dr. Harry Salyards Collection. PCGS# 572219 Base PCGS# 6346

4544 1874 Large Arrows, WB-102, MS62+ NGC. The mintage of more than 2.3 million pieces required many die pairs, most of them undocumented to date. Most numerous by far are the Large Arrows varieties, which comprise most of the mintage and are seen much more frequently than the Small Arrows coins. This example is high-end for the MS62 grade, confirmed by the NGC Plus designation. A brilliant, frosty, and sharply struck half with a slight band of gold toning at the rims. The minimally abraded surfaces and bold cartwheel luster add to the considerable appeal. PCGS# 572219 Base PCGS# 6346

1874-CC WB-101 Arrows Seated Half, XF40
Scarce, Low-Mintage Carson City Issue

4545 1874-CC Arrows, WB-101, Die Pair 3, R.4. XF40 PCGS. This coin was regarded as a Choice VF by our consignor (and a nice XF/AU by Seated half specialist Larry Briggs) when the coin changed hands 20 years ago. Today, most collectors would agree it is appropriately graded in its current XF40 holder. Considerable golden flash remains on both sides of this scarce Carson City issue. Grade-consistent wear on the high points and an overall pleasing golden-gray patina provide ample eye appeal. There are no severe marks — rather, a few unobtrusive small nicks and thin lines visit the surfaces. The die pair is the most frequently available variety of the 1874-CC. Just 59,000 pieces were struck from a common reverse mated with three different obverses, yielding a total of three varieties plus a late die state (Die Pair 3a). The present coin represents the earlier die state of Die Pair 3, without the "Railroad Tracks" die damage at STATES seen in later strikes. Always in demand and seldom offered in this preferred collector grade. Population: 12 in 40, 39 finer (4/15).
Ex: Larry Briggs (3/1995).
From The Dr. Harry Salyards Collection. PCGS# 572221 Base PCGS# 6347

1875-S Seated Half, MS65
Lovely Type Coin

4546 1875-S Very Small S, WB-101, Die Pair 17, R.3, MS65 PCGS. "Spiked 5," with a minute tine extending left from the upright of the 5 in the date. As a date, the 1875-S half dollar is fairly available, ideal for type representation. This piece is well-struck throughout, with Gem-quality, frosty surfaces that yield soft champagne toning. Housed in an old green label holder. Population: 59 in 65 (2 in 65+), 26 finer (4/15). PCGS# 572229 Base PCGS# 6351

1876 WB-101 Half Dollar, MS65
Lustrous and Attractive

4547 **1876 Open Bud, WB-101, MS65 NGC.** Type One Reverse with a split berry above the H in HALF. Lilac and cherry-red patina deepens toward the rims. This lustrous Gem shows a sharp strike save for minor weakness on the eagle's left (facing) ankle. A beautifully preserved and exceptionally attractive representative of this popular 19th century silver type. Census: 13 in 65, 4 finer (4/15).
Ex: Summer FUN (Heritage, 7/2007), lot 915. PCGS# 572234 Base PCGS# 6352

4548 **1876-S Open Bud, Very Small S, WB-102. Die Pair 35, R.3. MS64 NGC.** Type One Reverse. Very Small S Mintmark. A massive mintage of more than 4.5 million pieces required at least 44 die pairs, with additional varieties yet to be discovered. This example matches the Wiley-Bugert Die Pair 35, an R.3 variety. Choice and appealing surfaces are richly toned with pleasing luster beneath red-violet and dusky-gold patina. Nicely struck, with only a few scattered marks in the fields. Census (all varieties): 30 in 64 (2 in 64+), 16 finer (4/15).
Ex: Dallas Signature (Heritage, 10/2006), lot 1187. PCGS# 572242 Base PCGS# 6354

4549 **1878-CC WB-101, Die Pair 1, R.4, PCGS Genuine.** The PCGS number ending in .95 suggests that Scratches or a Rim Dent is the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen with a few old, toned-over scratches in the obverse fields. Deep olive and gunmetal-gray patina attests to the originality of the surfaces, and the level of detail remaining is satisfactory. The 1878-CC half is rather scarce; the entire 62,000-coin mintage was accomplished with a single die pair. PCGS# 572257 Base PCGS# 6359

4550 **1879 Closed Bud, WB-102, MS63 PCGS.** The Type Two reverse die hub shows a closed lower berry on this coin — as do all business strikes — while 1879 proof coins have a split lower berry (Type One hub). Despite the small mintage of just 4,800 circulation strikes plus 1,100 proofs, the issue is available in all grades and it is typically well-produced. Semiprooflike fields surround frosted devices of this Select Mint State coin, which is fully struck and radiantly lustrous. Tan-gold toning surrounds the stars and rides the rims. A scattering of minor field abrasions define the grade.
Ex: Purchased raw from Julian Leidman at the '99 ANA (8/1999).
From The Dr. Harry Salyards Collection. PCGS# 572260 Base PCGS# 6361

4551 **1879 Closed Bud, WB-102, MS64 PCGS.** The combined effects of the Bland-Allison Act of 1878 and a glut of silver coins in commerce resulted a drastic cutback in Seated half dollar production starting in 1879, when just 4,800 business strikes plus 1,100 proofs were made. Coin dealers quickly hyped the low mintages, and many coins were speculatively put aside. This near-Gem example is partially prooflike with mottled lilac, blue, and gold toning. Well-struck on Liberty's head, the obverse stars, and at the eagle's leg and talons, a scattering of small marks across the softly lustrous surfaces determine the grade. PCGS# 572260 Base PCGS# 6361

4552 **1880 Closed Bud, WB-102, MS64 PCGS.** Julian Leidman called this coin a "borderline Gem" on PNG Day at the 1996 Central States show, prior to Harry Salyards' purchase of the coin. The verbal grade was confirmed many years later by PCGS when certified as MS64. The coin displays nearly prooflike surfaces, with a glimpse of translucent tangerine-gold toning on the brilliant obverse that carries over to engulf the deeply-mirrored reverse. Aside from a few delicate obverse lines and a shallow scrape from the tip of the eagle's left wing, this fully struck half is virtually unmarked and Choice. The pedigree is impressive. Population: 22 in 64, 42 finer (4/15).
Ex: Joe Flynn, Jr. (12/1965); James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 239; Julian Leidman (4/1996).
From The Dr. Harry Salyards Collection. PCGS# 572262 Base PCGS# 6362

4553 **1882 WB-101 MS63 PCGS.** A brilliant, semiprooflike example of this low-mintage date (just 4,400 circulation strikes were produced). A thin band of golden toning at the rims surrounds medium-mirrored fields. The sharply struck motifs display thick mint frost for nice contrast with the reflective surfaces. A few delicate field lines determine the Select Uncirculated grade. Like nearly all of the late-series Seated halves, production was limited by an emphasis on silver dollar production. Proofs are invariably more available than business strikes for these dates in higher grades. Population: 22 in 63, 44 finer (4/15).
Ex: J.J. Teaparty (2/2001).
From The Dr. Harry Salyards Collection. PCGS# 572265 Base PCGS# 6364

4554 **1882 WB-101, MS63 ANACS.** Pleasing amber-gold rim toning encircles silver-white centers on both sides of this virtually prooflike, late-series half. Sharply struck, the frosted devices contrast boldly with reflective fields. With a mintage of just 4,400 pieces plus 1,100 proofs, circulation strikes are notably more scarce than proofs in higher grades. For all purposes, this Select Uncirculated example offers the best of both worlds. PCGS# 572265 Base PCGS# 6364

4555 **1883 WB-101 MS63 PCGS.** An unquestionable circulation strike — more frosty than prooflike — and a scarce and desirable coin in Select Uncirculated condition. Just 8,000 pieces were struck plus 1,039 proofs. Like others of its ilk, the late-series Seated halves (1879 to 1891) are often more challenging in high grades as business strikes than as proofs. This lustrous half shows minor incompleteness at the centers of stars 7 through 10 and at Liberty's head, but it is sharp in all other areas. Golden-brown border toning displays sea-green accents that lighten to a thin golden hue over silver centers. Two or three light bagmarks and a small toning spot on the reverse shield do not distract from the strong eye appeal. Population: 19 in 63, 53 finer (4/15).
Ex: Sheridan Downey (4/1996).
From The Dr. Harry Salyards Collection. PCGS# 572267 Base PCGS# 6365

4556 **1885 WB-101 MS64+ NGC.** Two head dies and two tail dies have been identified for this issue; the current obverse is distinguished by a tiny die line in the denticles immediately below the left foot of the 1 in the date. Both sides of this coin are beautifully toned in lavender-gray, sky-blue, and various shades of gold and mint. Bold design elements are accentuated by deep, glassy fields. Census: 17 in 64 (1 in 64+), 16 finer (4/15). PCGS# 572270 Base PCGS# 6367

4557 **1886 WB-101 MS62 PCGS.** Prooflike fields are visible beneath light gold toning with sharp design features and attractive cameo contrast. This low-mintage issue is seldom seen in higher Mint State grades. Population: 20 in 62, 74 finer (4/15).
Ex: Chicago Signature (Heritage, 8/2011), lot 4014. PCGS# 572271 Base PCGS# 6368

4558 **1886 WB-101 MS64 PCGS.** Looking more like a Cameo proof than a business strike, this dazzling near-Gem coin displays silver-white surfaces with a translucent vignette of orange-gold toning at the margins on each side. A single obverse die was used for the entire mintage of 5,000 coins struck for circulation plus 886 proofs. Faint die clashing near Liberty's draped elbow confirms this is indeed a business strike. The coin is visually high-end for the grade, and a full strike prevails except for minor incompleteness at Liberty's head and stars 8 and 9. The eagle's left (facing) talon shows slight blending of detail. Only a few wispy lines are visible with a glass. Population: 33 in 64 (1 in 64+), 14 finer (4/15).
Ex: Sale of the Millennium (Bowers and Merena, 8/2000), lot 4179.
From The Dr. Harry Salyards Collection. PCGS# 572271 Base PCGS# 6368

4559 **1887 WB-101 AU58 PCGS.** The luminous surfaces of this near-Mint State half display light champagne-gold toning with cobalt-blue and reddish-gold accents at the margins. Both sides are nicely struck and reveal a few minor circulation marks. From a low mintage of 5,000 circulation strikes.
Ex: Long Beach Signature (Heritage, 2/2012), lot 3661. PCGS# 572272 Base PCGS# 6369

4560 **1889 WB-101 MS63 PCGS.** Slate-gray and steel-blue toning blankets the frosty surfaces of this sharp Select Uncirculated half. Silver luster penetrates the toning to brighten the natural patina and adds subtle iridescence. Just 12,000 pieces were struck, supplemented by 711 proofs. This example is clearly a circulation strike, and seemingly at the top end of its grade with only a few delicate lines and no heavy marks. The star centers, hair details, and eagle plumage are extremely well-defined.
Ex: J.J. Teaparty (3/2002).
From The Dr. Harry Salyards Collection. PCGS# 572274 Base PCGS# 6371

4561 **1890 WB-101 MS62 NGC.** Semiprooflike, as are most circulation strikes of the next-to-last issue of the Seated half series. Just 12,000 pieces were minted in non-proof format. Patchy areas of light gold and lilac toning cover both sides of this well-struck example. The star centers are sharp, and only Liberty's top-most hair curls show slight incompleteness. The eagle's plumage is bold. There are no significant abrasions or untoward marks to report on the lustrous, reflective surfaces. Census: 5 in 62, 55 finer (4/15). PCGS# 572275 Base PCGS# 6372

4562 **1890 WB-101 MS62 PCGS.** The 1890 issue was the next-to-last year of the long Seated half series and the final year of extremely low-mintage halves, with a production of just 12,000 pieces. The final-year 1891 mintage increased to more than 200,000 coins. This iridescently toned business strike flashes sky-blue and golden hues over prooflike surfaces. A near-full strike shows sharp details on the motifs, while only a handful of tiny marks are visible with a glass. Housed in an old green label holder. Population: 14 in 62, 84 finer (4/15). PCGS# 572275 Base PCGS# 6372

PROOF SEATED HALF DOLLARS

4563 **1858 PR63 PCGS.** The Mint prepared for more extensive marketing of proofs to the public by expanding their production beyond the usual made-to-order quantities, although no premium was charged for the special handling (a practice that would commence in 1860). Current estimates suggest more than 300 half dollar proofs were struck in 1858. This example is sharply struck with even wheat-gold coloration on the obverse. The reverse displays a richer sun-gold patina. Radiant mint luster shines through on both sides. Faintly visible lines on the obverse account for the assigned grade, yet this is an appealing 1850s proof that remains scarce in the Select grade and finer. Population: 23 in 63, 31 finer (4/15). NGC ID# 27TH, PCGS# 6412

4564 **1860 PR63 NGC. WB-102.** Struck from the Type Two reverse hub die with the L in HALF reworked to more closely match the L in DOL. This Select proof shows a few delicate lines in the deeply mirrored fields, but the overall reflectivity is suggestive of a higher grade. Nice contrast exists with the frosted devices. Richly patinated in blue and bronze shades, the surfaces are sharply struck and problem-free save for a pinprick planchet chip near the dentils at 7 o'clock on the obverse. The mintage of 1,000 proofs was excessive in terms of public demand, and nearly half the mintage went unsold to be subsequently melted. Census: 36 in 63, 57 finer (4/15).
Ex: J.J. Teaparty (8/2003).
From The Dr. Harry Salyards Collection. NGC ID# 27TK, PCGS# 6414

4565 **1864 PR62 PCGS. CAC.** Ex: Teich Family Collection. In 1860, the Mint entered the era of officially marketing proofs to collectors and charging a premium for the service. The combined factors of a war-weary public and reduced mintages limited production to 470 pieces, and it is possible not all of those were sold. This example shows brilliant, deeply mirrored fields with scattered accents of faint golden-brown toning and a circular area of iridescent color in the right obverse field. Some old hair-thin lines are visible with a glass and determine the assigned grade. CAC endorsed for quality and appeal.
Ex: Abner Kreisberg (circa 1970); Teich Family Collection (Stack's Bowers, 11/2011), lot 5038.
From The Dr. Harry Salyards Collection. NGC ID# 27TR, PCGS# 6418

4566 **1871 PR64 NGC.** Blue-toned at the obverse margins and through most of the reverse, while the area on and around Liberty has a more apricot tone. Only a few small faults appear in the fields of this near-Gem proof. Census: 37 in 64 (1 in 64 ★), 31 finer (5/15). NGC ID# 27U6, PCGS# 6429

4567 **1871 PR64 NGC.** Whispers of cobalt-blue, lavender, and orange-gold travel over the luminous surfaces of this near-Gem proof. This is an exquisitely struck and impeccably preserved specimen. Walter Breen enumerated how 960 minor proof sets were made in small lots throughout 1871, which has become the accepted mintage for this proof issue. Census: 37 in 64 (1 in 64 ★), 31 finer (4/15). NGC ID# 27U6, PCGS# 6429

4568 **1873 No Arrows PR63 PCGS.** Unlike the scarce No Arrows, Open 3 business strikes, all No Arrows proofs are believed to be of the Closed 3 logotype. 600 proofs were issued as part of the proof sets, and no other proofs were issued until the Arrows design was implemented in April, 1873 (with an Open 3). This delightfully toned proof displays russet-red toning that is deepest at the margins, complemented by blue and violet accents. Deeply mirrored fields contrast with the sharply struck, frosted central devices. NGC ID# 27U8, PCGS# 6431

4569 **1873 Arrows PR63 PCGS. CAC.** Neon-blue rim toning adds life to this deeply-mirrored, minimally marked Select proof. The interior surfaces display deep ivory-gold shades with amber-gold accents. The strike is sharp except for the area just above the eagle's left talon. A few delicate lines in the obverse fields are visible under magnification. Just 550 proofs were struck of the With Arrows variety, all featuring the new Open 3 date logotype. CAC endorsed for quality. Population: 44 in 63, 55 finer (5/15). NGC ID# 27UU, PCGS# 6434

4570 **1877 PR63 PCGS.** Type Two Reverse. This flashy specimen appears brilliant at first glance, but it displays a slender arc of peach-red toning along the right margins on both sides. Fully struck aside from minimal incompleteness on the eagle's left (facing) ankle. A few delicate obverse lines do not distract. Just 510 proofs were produced. Population: 46 in 63, 37 finer (4/15).
Ex: Central States Signature (Heritage, 4/2010), lot 944. NGC ID# 27UC, PCGS# 6438

4571 **1883 PR63 Cameo NGC.** Ex: W.J. Skiles Collection. An appealing proof with a hint of icy blue color in the silvery fields and stark silver color over the razor-sharp, delicately frosted devices. Faint, scattered hairlines in the fields preclude a finer grade, though the eye appeal remains strong. Census: 18 in 63 Cameo (1 in 63+ Cameo), 62 finer (4/15).
Ex: FUN Signature (Heritage, 1/2005), lot 7415; Long Beach Signature (Heritage, 9/2007), lot 1618. PCGS# 86444

4572 **1884 PR64 NGC.** The flip side of this Choice proof is stunning, with dramatic border toning of cobalt-blue and violet shades yielding to champagne-gold centers. The obverse is a bit more sedate by comparison, yet attractively toned in an ivory-gold hues. Both sides are deeply mirrored throughout the fields. The elements are sharply impressed except at the high points of Liberty's curls. A few faint lines are visible with a glass. Just 875 proofs were struck to accompany the small mintage of 4,400 business strikes. NGC ID# 27UK, PCGS# 6445

4573 **1885 PR64 PCGS.** The year 1885 was another in the late 19th century that saw a minuscule production of half dollars, as all else was subordinate to the demand to produce millions of Morgan silver dollars, aka "Bland" dollars, under the terms of the Bland-Allison Act of 1878. This pretty near-Gem proof is one of only 930 struck, with a complement of 5,200 circulation strikes. Only the barest hint of gold sits high around the rims, and it does not intrude on the radiant silver-white surfaces. A few trivial contact marks and a dotlike planchet lamination between stars 1 and 2 are all that appear to limit an even finer grade, but there is much appeal present. *Ex: FUN Signature (Heritage, 1/2009), lot 2912.* NGC ID# 27UL, PCGS# 6446

1886 Half Dollar, Richly Toned PR66
Only 886 Proofs Struck

4574 **1886 PR66 PCGS Secure.** Highly attractive rainbow shades visit the iridescent mirrored fields of this Premium Gem proof. The frosted portrait displays rich coloration limiting field-to-device contrast, but this radiant proof is no less appealing as a result. The reverse is similarly toned, with cerulean-blue and pink-gold patina floating over the sharply reflective surfaces. The elements show a full strike with no visible signs of contact. Population: 12 in 66, 4 finer (5/15). NGC ID# 27UM, PCGS# 6447

1887 Seated Half, PR66
Abundantly Toned

4575 **1887 PR66 PCGS.** The business strike mintage of 5,000 pieces yields relatively few high-grade examples in comparison to the proof survivors in similar grades, making a sharp proof issue the logical selection for many collectors. This intensely toned proof is blanketed in olive-brown and dusky-blue shades that do not reveal their complex and vivid coloration until viewed at an advantageous perspective. Once turned to the correct angle and light, fire-orange, lavender, and yellow-gold colors vibrate across the deeply mirrored fields. A remarkable Premium Gem proof that needs to be seen to be fully appreciated. Population: 12 in 66 (1 in 66+), 2 finer (5/15). NGC ID# 27UN, PCGS# 6448

4576 **1887 PR64 Cameo PCGS.** The low business strike mintage of just 5,000 pieces puts pressure on the proof mintage of 710 examples, and the scant availability of proofs with cameo contrast adds to the demand. This boldly contrasted, near-Gem proof is essentially untoned and silver-white, although a thin-gold sheen sits atop the bold rims. The strike is uncompromisingly full on Liberty and all other devices, yet there is some curious blending of the arrow fletchings and at the underlying tail feathers, which are weakly struck. Still, there are no serious distractions for this glittering proof and the eye appeal is terrific. PCGS# 86448

4577 **1888 PR63 Cameo NGC.** A proof of exceptional eye appeal for the assigned grade. Deep, glassy-mirrored fields surround frosted devices for strong cameo contrast. Sunset-gold toning encompasses the central elements, yielding to a ribbon of electric-blue and fire-red accents at the obverse border. The reverse is equally deep-mirrored and attractive with the same central-gold patina, but with a margin of sky-blue toning at the legends. The in-hand appeal of this coin exceeds its Select Proof grade, which is limited only by a scattering of delicate lines that appear only under a strong glass. Census: 9 in 63 Cameo (1 in 63+★ Cameo), 39 finer (4/15). PCGS# 86449

4578 **1889 PR63 PCGS.** The proof mintages for the final four issues of the Seated half series (1887 through 1891) are relatively small compared to the preceding years. Just 711 proofs were struck in 1889. This Select survivor displays deep lilac and cerulean-blue toning around frosted-silver central motifs. The mirrored fields are a bit reserved beneath the toning until viewed at the most advantageous angle. Still, this is a sharp and attractive, colorfully toned proof with only scattered lines well-disguised in the toning. NGC ID# 27UR, PCGS# 6450

4579 **1891 PR63 PCGS.** The obverse of this vividly toned proof ranks high on the wow scale, with variegated colors ranging from flame-orange centers to neon-blue and amber-gold toning across the fields and margins. The reverse is less flamboyant than the obverse, but still richly toned in harmonious shades of earthy colors. Likewise, the strike is sharper on the obverse than the reverse, although the difference is minor and the few technical quibbles are secondary to the impressive visual impact of this Select proof. NGC ID# 27UT, PCGS# 6452

1891 Seated Half, PR66+
Beautifully Toned and Visually Impressive

4580 **1891 PR66+ NGC.** Deep steel-blue and copper-mauve sunset shades congregate over Liberty's head and around the rock and the date, while the central portions remain largely untoned on this beautiful Premium Gem proof. A few microscopic ticks on the left (facing) arm and on the thighs determine the grade, but this is a beautiful and well-struck example of this final-year Seated half dollar issue with superb eye appeal. Census: 36 in 66 (2 in 66+), 5 finer (4/15). NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

4581 **1892-O MS64 NGC. CAC.** The 1892-O is a key to the series in typical circulated grades, due to its early date and low mintage of only 390,000 coins, with few survivors at the near-Gem level or higher. Luster emanates from the surfaces of this toned near-Gem example. The intermingled toning includes shades of teal, copper, and gold. The design elements reveal only slight incompleteness of strike. Census: 29 in 64, 20 finer (5/15). NGC ID# 24LG, PCGS# 6462

4582 **1892-S MS61 NGC.** As a date, the 1892-S is the most challenging of the three first-year Barber half dollar issues to locate in Mint State. This toned example displays mint-gold, aquamarine, and coppery-rose hues over the obverse, with more uniform orange-gold shadings over the reverse. Well-struck, with no singularly obtrusive abrasions. NGC ID# 24LJ, PCGS# 6464

4583 **1893 MS64 PCGS.** This satiny MS64 example is moderately sharp, showing only minor weakness on the upper-right corner of the shield. The obverse displays rich russet-gold and olive toning, while the reverse exhibits similar hues but with additional aquamarine and amber overtones. A few light grazes on the cheek are well-hidden by the patina. Population: 39 in 64 (3 in 64+), 29 finer (5/15). NGC ID# 24LK, PCGS# 6465

4584 **1894-S MS63 PCGS.** The 1894-S is a slightly better Barber half issue in Mint State, seldom available finer than MS63. This Select example displays remarkably sharp design elements amid satiny luster that shows just a hint of light golden toning. A few small ticks on Liberty's cheek are the only grade-limiting flaws. Population: 26 in 63, 54 finer (5/15). NGC ID# 24LR, PCGS# 6470

4585 **1895-O MS62 PCGS.** A network of faint die cracks encircle both sides at the margins, as does a glimpse of golden toning, but essentially this coin is blaze-white, frosty, and boldly lustrous. All mintmarked Barber halves from the 1890s are desirable and scarce, particularly the O-Mints. The strike is rather typical for a New Orleans half — strong on the obverse, but slightly weak along the eagle's right side from shield tip to talon. Still, this Mint-fresh example is virtually unmarked with tremendous eye appeal for the grade. Population: 14 in 62, 47 finer (5/15). NGC ID# 24LT, PCGS# 6472

4586 **1895-S MS63 PCGS. CAC.** Brilliant and lustrous with just a faint powdering of almond-gold toning, this frosty San Francisco issue is scarce so nice. Sharply struck with few marks for the Select Uncirculated grade. It will be challenging to find a more appealing example for the grade. CAC endorsed. Population: 31 in 63 (1 in 63+), 50 finer (5/15). NGC ID# 24LU, PCGS# 6473

4587 **1897 MS64 NGC.** Ex: Richmond Collection. A trace of straw-gold toning adorns this lustrous and intricately struck Choice half dollar. Impressively unabraded, and a desirable high-end acquisition. Census: 43 in 64 (1 in 64+), 29 finer (4/15).
Ex: Richmond Collection, Part III (David Lawrence, 3/2005), lot 1852, which realized $1,438. NGC ID# 24LY, PCGS# 6477

4588 **1898 MS65 NGC. CAC.** An immaculate Gem example of this conditionally rare issue. A mintage of nearly three million coins has not resulted in a large number of high-grade survivors. This piece is well-struck and displays variegated original patina. One of the finest-known examples. Census: 15 in 65, 3 finer (5/15). NGC ID# 24M3, PCGS# 6480

4589 **1901-O AU55 PCGS.** Traces of friction over the exposed fields and devices slightly subdues the luster in those regions, although the peripheral recesses retain significant illumination. The strike is slightly weak on the eagle's right (facing) shoulder, as usual, but this is not distracting on an AU coin. Pale golden toning accents each side. Population: 7 in 55, 47 finer (4/15). NGC ID# 24MD, PCGS# 6490

4590 **1903-O MS64 ANACS.** The 1903-O Barber half dollar is a challenging issue in Choice condition, from a mintage of 2.1 million pieces. The present coin is sharply detailed and vibrant, with dramatic gold and ice-blue toning on the obverse and lighter champagne over the reverse.
Ex: ANA Signature (Heritage, 3/2011), lot 3672. NGC ID# 24MK, PCGS# 6496

1904 Barber Half, MS66
Notable Condition Rarity

4591 **1904 MS66 NGC.** A hint of blue at the rims surrounds lustrous, champagne-gold toning across the obverse, while the reverse is equally lustrous with a mere suggestion of golden hues. The strike is sharp throughout both sides. Despite a production of nearly 3 million pieces, this Philadelphia date is genuinely rare in grades exceeding MS65. Just a single coin has been certified finer than MS66 by both services combined. Census: 3 in 66, 0 finer (5/15). NGC ID# 24MM, PCGS# 6498

4592 **1904-S XF40 ANACS.** The 1904-S is a challenging issue with a mintage of little more than half a million pieces, but its elusiveness is not fully appreciated until one attempts to find a problem-free XF or AU coin. This example displays uniform lavender-gray toning with highlights of light blue and gold revealed when tilted beneath a light. Well-struck with grade-consistent wear. NGC ID# 24MP, PCGS# 6500

4593 **1905-O AU58 PCGS.** The 1905-O is an elusive New Orleans issue, struck to the extent of only 505,000 pieces. This nearly Uncirculated example displays soft luster beneath dusky golden-gray toning on each side. Lightly struck on the eagle's right (facing) shoulder, but technically problem-free. NGC ID# 24MS, PCGS# 6502

4594 **1906 MS64 PCGS. CAC.** Consistent champagne-gold toning over each side is accented by mottled russet and olive-brown overtones which together provide an effective mask for a few grade-consistent marks on Liberty's portrait. Trivial weakness on the eagle's right (facing) shoulder is the only mentionable striking deficiency. PCGS has seen 29 numerically finer representatives (4/15). NGC ID# 24MU, PCGS# 6504

4595 **1907 MS64 NGC.** A frosty and nearly untoned example, sharply struck save for the usual slight weakness at the upper right shield junction. A small area of faint reddish toning visits each side, as do a few minor field grazes. Eminently collectible in the near-Gem grade, since this Philadelphia date is scarce any finer. Census: 78 in 64 (4 in 64+), 23 finer (5/15). NGC ID# 24MY, PCGS# 6508

4596 **1907-O MS65 NGC.** The Gem grade assignment sets this piece above most other examples of the date in terms of technical merit. Both sides show soft champagne toning, while the obverse also exhibits deeper russet and olive-brown overtones. Some of the usual striking weakness is seen on the right (facing) side of the eagle's body and shoulder. Census: 19 in 65, 9 finer (4/15). NGC ID# 24N2, PCGS# 6510

1908 Barber Half Dollar, MS65
Sharply Detailed Example

4597 **1908 MS65 PCGS.** This attractive Gem Barber half exhibits razor-sharp definition on all design elements and the well-preserved surfaces show a few hints of lavender-gray toning, with ample mint luster on both sides. From a mintage of 1.3 million pieces, the issue is seldom encountered in high grade. Population: 14 in 65, 10 finer (5/15). NGC ID# 24N4, PCGS# 6512

4598 **1908-O MS65 NGC.** This is a remarkably well-struck example of this usually soft Gem Barber half. Faint evidence of the "mumps" die swelling is seen at the back of Liberty's neck. The surfaces are bright and lustrous, remarkably so for an O-mint, and each side has moderate purplish-brown patina in varying degrees. NGC ID# 24N6, PCGS# 6514

1908-O Barber Half Dollar, MS65
Sharp Details, Satiny Luster

4599 **1908-O MS65 PCGS. CAC.** The 1908-O Barber half dollar claims a mintage of 5.3 million pieces but few examples were saved by contemporary collectors and the issue is seldom encountered at the MS65 level today. This attractive Gem is sharply detailed throughout, with well-preserved surfaces that show hints of champagne-gold and lavender toning and satiny mint luster. Population: 37 in 65, 33 finer (5/15). NGC ID# 24N6, PCGS# 6514

4600 **1911-D MS64 PCGS.** This boldly struck 1911-D half exhibits minimally disturbed, satiny luster with hints of light golden toning throughout each side. A slightly better date, with a mintage totaling less than 700,000 coins. Population: 39 in 64 (2 in 64+), 34 finer (4/15). NGC ID# 24NE, PCGS# 6522

4601 **1915-D MS64 NGC.** Trivial contact on the cheek is the only grade-limiting fault on this Choice 1915-D Barber half. Both sides exude vibrant luster and show just a hint of light golden toning which is a little deeper on the reverse. The strike is a trifle soft on the eagle's right (facing) talons and shoulder, but is otherwise pleasing. NGC ID# 24NS, PCGS# 6533

4602 **1915-S MS65 NGC.** Deep brass-gold toning encompasses much of the obverse, while the reverse shows the same but in a much lighter hue. Trivial weakness on the eagle's right (facing) talons is the only mentionable striking deficiency, and Liberty's cheek is free of distracting abrasions. Census: 45 in 65, 10 finer (4/15). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

1893 Barber Half, Toned Gem Proof

4603 **1893 PR65 PCGS.** A blanket of blended lavender and forest-green toning embraces this satiny and pristine Gem. The fletchings are fully struck, though the right shield corner shows incompleteness of impression. Proof mintages were significantly lower in 1893 than the preceding year, since type collector demand had been sated. Population: 21 in 65, 31 finer (4/15). NGC ID# 24NV, PCGS# 6540

4604 **1893 PR63 Cameo NGC.** Nicely contrasted devices stand out from the deep-mirrored fields. One of 792 proofs struck during the financially tumultuous 1893 year. An untoned Select proof, with steely-silver surfaces and only a few widely scattered hair-thin lines visible with a glass. Weakness at the upper-right shield junction does little to diminish the appeal. Census: 11 in 63 Cameo (1 in 63 ★ Cameo), 71 finer (5/15). PCGS# 86540

1895 Barber Half, Untoned PR66

4605 **1895 PR66 PCGS.** No more than a hint of color appears on either side of this Premium Gem proof, which shows nice if undesignated cameo contrast on both sides. The strike is full throughout — save for the most trivial weakness in the usual area on the reverse. But the eye appeal is top-notch. Population: 25 in 66, 10 finer (4/15). NGC ID# 24NX, PCGS# 6542

4606 **1899 PR64+ NGC. CAC.** Reflective surfaces host a layer of mottled toning on each side of this high-end near-Gem; gray, orange, and blue dominate the obverse with possible toned-over remains of an old fingerprint in the left field, while the reverse shows good contrast amid sky-blue, charcoal, and silver tones. Minor strike weakness appears on the upper-right shield corner. *Ex: Philadelphia Signature (Heritage, 8/2012), lot 5240.* NGC ID# 24P3, PCGS# 6546

4607 **1903 PR64 PCGS.** The deeply reflective fields of this sharply detailed Choice Barber half display a vivid medley of cobalt-blue and emerald-green hues in a dazzling play of colors. PCGS has certified just 61 proofs in a finer numeric grade (5/15). NGC ID# 24P7, PCGS# 6550

1903 Half Dollar, PR66
Entrancing Mirrors

4608 **1903 PR66 PCGS.** A lack of disturbances in the deeply mirrored fields confirm the Premium Gem grade from PCGS, while a few faint lines on the cheek of Liberty are all that keep this piece from an even finer assessment. The strike is bold on the obverse stars and the eagle's talons, although the right (facing) shoulder of the same is a trifle soft. Tan-gold and pale lavender hues accent the peripheral regions. Population: 19 in 66, 10 finer (4/15). NGC ID# 24P7, PCGS# 6550

1908 Half Dollar, PR65
Delicate Contrast

4609 **1908 PR65 PCGS.** Faint contrast appears on both sides of this delicately gold toned Gem proof Barber half dollar. Although that contrast is insufficient for a Cameo designation, it is stronger than on most other survivors from the 545 coin mintage. Population: 29 in 65, 27 finer (5/15). NGC ID# 24PC, PCGS# 6555

1909 Barber Half, PR66
Lightly Toned, High-Grade Example

4610 **1909 PR66 PCGS.** Champagne-gold and pale-blue toning visits the sharply struck devices and deep-mirrored fields of this technically high-end Premium Gem proof. A bit of haziness in the obverse field limits the field-device contrast. Otherwise, the pristine, frosted devices set against the strong underlying reflectivity would be worthy of a Cameo designation. Even so, the eye appeal is undeniable. Population: 21 in 66, 18 finer (4/15). NGC ID# 24PD, PCGS# 6556

4611 **1912 PR63 PCGS.** A better Philadelphia date as a business strike, this glittering Select Proof is also somewhat scarce, coming from a mintage of 700 pieces. Faint gold and powder-gray toning provide a thin patina across the silver-mirrored surfaces with a slightly deeper streak running vertically on the portrait. The strike is razor-sharp. Very few flaws are visible even with a strong glass. NGC ID# 24PG, PCGS# 6559

4612 **1913 PR63 PCGS.** Gleaming fields and fully rendered design elements give this affordable gold-tinted proof pleasing eye appeal, despite light hairlines in the right obverse field. The reverse displays full cameo contrast, although the obverse is somewhat more modest in that regard. NGC ID# 24PH, PCGS# 6560

4613 **1913 PR64 PCGS.** This Choice 1913 proof half is boldly struck, with gleaming fields that reside beneath deep amber, gold, and gunmetal-blue toning. A few faint lines on Liberty's cheek are well-hidden by the rich patina. NGC ID# 24PH, PCGS# 6560

1914 Barber Half Dollar, PR66
Ex: "Col." Green-Eric Newman

4614 **1914 PR66 NGC.** Ex: "Col." E.H.R. Green. An extremely low mintage of 380 proof Barber half dollars was accomplished in 1914, the lowest production total for the series. This sharply detailed Premium Gem is blanketed in shades of champagne-gold toning on both sides, with deeply mirrored fields underneath. Census: 39 in 66 (1 in 66+, 3 in 66 ★), 16 finer (5/15).
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ $15.00; Eric P. Newman Numismatic Education Society; Newman Collection, Part II (Heritage, 11/2013), lot 33842. NGC ID# 24PJ, PCGS# 6561

4615 **1915 PR64 PCGS.** Always in demand as a low-mintage circulation strike, only the 1914 issue has a lower mintage of both business strikes and proofs. Just 450 proofs were made in 1915. This fully struck near-Gem proof is richly toned in shades of cobalt-blue and greenish-bronze over deeply mirrored fields and frosted devices. Scarce and popular, this attractive example is sure to attract a strong bid. Population: 45 in 64 (1 in 64+), 37 finer (5/15). NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

1916 Walking Liberty Half, Frosty MS66

4616 **1916 MS66 NGC.** The surfaces on this Premium Gem 1916 Walking Liberty half dollar are thickly frosted with mint luster and show an excellent strike on crucial details such as Liberty's head and hand, the rock and sandals, and the eagle's trailing leg on the reverse. No more than a trace of color is present, but the eye appeal and preservation are excellent. Census: 59 in 66 (1 in 66+, 1 in 66 ★), 12 finer (5/15). NGC ID# 24PL, PCGS# 6566

4617 **1916-D MS65 NGC.** First-year Walkers are always in demand, regardless of the mint of origin. This Denver-issued example displays strong, satiny luster beneath a veil of warm sun-gold toning. Liberty's head and thigh show trivial weakness, but the overall eye appeal is unaffected. NGC lists only 47 numerically finer representatives (4/15). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

4618 **1916-S — Improperly Cleaned — NGC Details. Unc.** Delicate almond-gold toning visits this lustrous and well-struck first-year Walker. Visible marks are virtually absent, but wispy hairlines cross both sides. Among the lowest mintage issues of the type. NGC ID# 24PN, PCGS# 6568

4619 **1916-S MS62 NGC.** A strictly Uncirculated example of this conditionally elusive first-year San Francisco issue. The level of detail represented on Liberty's head, branch hand, and the eagle's rear leg is impressive, and the surfaces display a thick patina of rose-gold, matte-like luster. Trivial abrasions account for the grade. NGC ID# 24PN, PCGS# 6568

4620 **1916-S MS63 NGC.** Lightly iridescent silver-lilac surfaces glow with satiny mint luster in texture, with an above-average strike. The eagle is particularly well-struck for the first-year San Francisco date. Overall, the appeal is considerable although a bit reserved, as is typical for many examples of this early issue. NGC ID# 24PN, PCGS# 6568

1916-S Walking Liberty Half Dollar, MS64
Boldly Impressed for the Date

4621 **1916-S MS64 PCGS.** The 1916-S is the first key date in the Walking Liberty series with a mintage of 508,000 coins. While most examples come softly struck, this near-Gem features full thumb separation on the branch hand, nicely delineated skirt lines, and strong detail on the eagle's breast feathers. Liberty's head and the eagle's leg are a touch soft, but that is to be expected of the issue. Each side is almost all-brilliant with areas of light golden patina. Carefully preserved with frosty luster. A difficult-to-improve-upon example. NGC ID# 24PN, PCGS# 6568

1916-S Half Dollar, MS64
Dusky Original Patina

4622 **1916-S MS64 PCGS.** Thick, almost matte-like luster provides a gentle glow beneath the lavender-gray and champagne hues that blanket the original surfaces of this Choice first-year Walker. Partial thumb separation on Liberty's branch hand is a plus, and there are no major abrasions. Challenging in finer grades, this piece offers the budget-conscious collector a slightly more affordable avenue for securing an example of this early San Francisco issue. NGC ID# 24PN, PCGS# 6568

4623 **1917 MS66 PCGS.** The design elements of this early series Premium Gem are sharply detailed and the well-preserved lustrous surfaces are lightly toned in shades of greenish-gold and lavender, with a few spots of amber on the reverse. Population: 89 in 66 (1 in 66+), 3 finer (5/15). NGC ID# 24PP, PCGS# 6569

4624 **1917-D Obverse MS64 NGC.** Rich luster sets aglow the light golden surfaces of this Choice Obverse Mintmark representative. A few light abrasions are barely discernible with a glass. Liberty's head and branch hand are well-defined, although the eagle's rear leg is typically soft along its leading edge. NGC ID# 24PR, PCGS# 6570

4625 **1917-D Obverse MS64 PCGS. CAC.** This satiny example is well-struck and minimally abraded. Both sides exhibit soft golden toning overall, but also feature deep russet overtones in portions of the recesses. The CAC-endorsement confirms the grade. NGC ID# 24PR, PCGS# 6570

1917-S Half Dollar, MS64
Reverse Mintmark

4626 **1917-S Reverse MS64 PCGS.** Satin surfaces emit strong luster on each side of this golden 1917-S Walker. Abrasions are minimal, although striking weakness on Liberty's thigh and the central eagle's feathers contributes to the grade. A search for finer representatives will prove a challenging endeavor. This piece offers a great deal of appeal for a Reverse Mintmark representative. NGC ID# 24PU, PCGS# 6573

1918 Walking Liberty Half, MS65
Immaculate Full Head and Hand

4627 **1918 MS65 PCGS.** This exceptional Gem gives new definition to the term "Full Head," with every intricate detail defined. Liberty's branch hand is also bold, and the eagle's feathers are sharp. The satiny surfaces glow beneath dusky golden-gray toning, but the eye appeal is most fully appreciated beneath a loupe. The 1918 Walker is seldom seen in this grade, and PCGS has encapsulated only eight numerically finer pieces (5/15). NGC ID# 24PV, PCGS# 6574

4628 **1918-S MS63 PCGS.** The 1918-S Walking Liberty half is challenging in Mint State, and most such pieces exhibit moderate abrasions. This Select example is unusually clean for the grade. Partial thumb separation is evident on Liberty's branch hand, and each side shows just a suggestion of light golden color. NGC ID# 24PX, PCGS# 6576

1918-S Half Dollar, MS64
Partial Thumb Separation

4629 **1918-S MS64 PCGS.** The moderate availability of the 1918-S half dollar ceases to exist at the Gem grade level, where the date becomes conditionally scarce. This near-Gem representative has pleasing satin luster with warm sun-gold toning overall. Partial thumb separation is present on Liberty's branch hand, despite minor weakness that persists on the thigh and central eagle's feathers. PCGS lists 36 numerically finer representatives (5/15). NGC ID# 24PX, PCGS# 6576

1919 Walker, MS62
Fully Struck Centers

4630 **1919 MS62 NGC.** The 1919 Walking Liberty half is slightly more elusive in Mint State than is often realized until one tries to find an example and discovers the difficulty. This MS62 representative displays remarkably bold definition on Liberty's head and branch hand, and the eagle's rear leg. Satiny surfaces yield pale golden color which deepens slightly around the obverse periphery. NGC ID# 24PY, PCGS# 6577

4631 **1919-D — Improperly Cleaned — NGC Details. AU.** The 1919-D is one of the most conditionally rare issues of the Walking Liberty series. Examples were saved from circulation during the 1930s, with the advent of coin boards, but by that time most pieces were well worn. The present caramel-gold and steel-blue coin displays partial luster and minor hairlines. NGC ID# 24PZ, PCGS# 6578

4632 **1919-S AU50 NGC.** A challenging date, particular in AU and Mint State grades. This representative exhibits remnants of light golden luster on each side with smooth surfaces. Only trivial wear is present, as much of the design weakness in the centers is due to strike and not circulation. NGC ID# 24R2, PCGS# 6579

4633 **1920 MS64 PCGS. CAC.** Gold-orange shadings prevail at the margins, while the centers remain silver-gray. The branch hand is weak, but the coin is well-struck at the peripheries with few signs of contact and solid eye appeal for the grade. A CAC endorsed example. NGC ID# 24R3, PCGS# 6580

4634 **1920-D AU58 NGC.** A scarce Denver Mint date that is sandwiched between two key-date rarities (the 1919-D and 1921-D), and the issue is sometimes overlooked for that reason. This softly lustrous, borderline Uncirculated piece shows only a hint of wear and no meaningful abrasions. The strike is decent for the issue, with some sharpness at Liberty's head and at the eagle's trailing leg, but lacking detail on the branch hand. NGC ID# 24R4, PCGS# 6581

1920-D Half Dollar, AU58
Original Olive-Gray Patina

4635 **1920-D AU58 PCGS. CAC.** A totally original example of this better Denver issue, this near-Mint 1920-D Walker is deeply patinated in olive-gray hues that allow the emergence of soft luster in the recessed regions. The minor weakness on Liberty's thigh and the central eagle's feathers is more due to a soft strike than actual wear. NGC ID# 24R4, PCGS# 6581

1920-S Half Dollar, MS63+
Rich Luster

4636 **1920-S MS63+ NGC.** Overshadowed by the key 1921 issues, the 1920-S is conditionally challenging in Mint State. This Plus-designated piece has satiny surfaces with dusky golden toning over each side. The strike is above-average for the issue, although some striking softness persists on the eagle's plumage and Liberty's thigh. NGC ID# 24R5, PCGS# 6582

4637 **1921 — Improperly Cleaned — NGC Details. AU.** This untoned rare date half dollar shows noticeable luster across the legends and devices. Both sides are hairlined, and thin marks across portions of the reverse periphery. NGC ID# 24R6, PCGS# 6583

1921-D Half Dollar, XF40
Hints of Luster

4638 **1921-D XF40 PCGS. CAC.** This pleasing key Walker has attractive light gray surfaces with tinges of champagne toning near the borders and some darker verdigris among the devices. This date is frequently encountered in heavily worn condition, but middle to upper-grade circulated pieces are elusive.
Ex: FUN Signature (Heritage, 1/2010), lot 2707. NGC ID# 24R7, PCGS# 6584

4639 **1921-D — Improperly Cleaned — NGC Details. AU.** A hint of straw-gold toning adorns the reverse border of this lightly circulated key date half dollar. Minor hairlines are noted on Liberty's chest. The lowest mintage issue of the series, since the Denver Mint concentrated on silver dollar production in 1921. NGC ID# 24R7, PCGS# 6584

1921-S Half Dollar, XF40
Elusive in This Grade

4640 **1921-S XF40 NGC.** Higher-grade circulated examples of this key San Francisco issue are difficult to acquire, particularly with original coloration. This XF example will please even the most astute collector. Both sides show uniform lavender-gray patina with light highlights seen over the relief elements. Wear is minimal, with the remnants of a sharp strike are evident on the devices. NGC ID# 24R8, PCGS# 6585

4641 **1923-S AU53 NGC.** Some luster remains in the recesses of this conditionally elusive San Francisco issue, while a hint of golden toning accents each side. A combination of light wear and striking weakness produces moderate softness on the extreme centers, not unusual for the issue. NGC ID# 24R9, PCGS# 6586

4642 **1928-S AU58 NGC.** It is difficult to discern actual wear on this near-Mint 1928-S half dollar, as most of the central weakness is due to strike deficiency, a frequently seen attribute of this mid-series San Francisco issue. This piece is unusually lustrous for an AU coin, and displays just a hint of light golden toning overall. NGC ID# 24RB, PCGS# 6588

4643 **1929-D MS65 PCGS.** Lustrous and well-preserved with several shades of speckled patina over each side. The originally preserved surfaces are blemish-free. The 1929-D is a popular early Walker issue with a mintage of just over a million pieces. Gems are occasionally seen, but finer pieces are scarce.
Ex: Palm Beach Signature (Heritage, 3/2006), lot 1533. NGC ID# 24RC, PCGS# 6589

4644 **1933-S MS64 PCGS.** This Choice 1933-S is sharply defined on Liberty's branch hand and the eagle's rear leg. A few light abrasions in the right obverse field determine the grade, but Liberty's thigh is unusually smooth. Light champagne in color, with a few deeper olive-gold overtones along the upper obverse border. NGC ID# 24RE, PCGS# 6591

4645 **1933-S MS64+ PCGS. CAC.** This Plus-graded 1933-S Walker is boldly rendered throughout each side, and surface abrasions are at a minimum. Uninhibited luster illuminates a light golden overlay of color on each side, while the obverse also exhibits a crescent of deeper violet along the upper periphery. NGC ID# 24RE, PCGS# 6591

1933-S Half Dollar, MS65
Pleasing Surfaces

4646 **1933-S MS65 NGC.** This well-struck Gem exhibits rich, frosty luster beneath dusky golden-gray toning. The soft cartwheel effect is not inhibited. Trivial contact on the high points of Liberty's figure limits the grade, but there are no distracting abrasions. Finer representatives of this San Francisco issue are only infrequently located. NGC ID# 24RE, PCGS# 6591

4647 **1934-D MS66 PCGS.** Small D. Light apricot-gold shades adorn this lustrous and precisely struck Premium Gem. Marks are mostly relegated to a tick on the reverse rim at 12 o'clock and minor contact on Liberty's forehead. NGC ID# 24RG, PCGS# 6593

1934-D Half Dollar, Bold MS66+

4648 **1934-D MS66+ PCGS. CAC.** Rich satin luster and an especially bold strike, showing a full split thumb on Liberty, combine with near-immaculate preservation and a complete lack of mentionable color to make this Premium Gem a standout coin, one that would be extremely difficult to improve upon, either aesthetically or numerically. Population: 7 in 66+, 4 finer (5/15). NGC ID# 24RG, PCGS# 6593

1935-D Walking Liberty Half, MS66
None Graded Finer

4649 **1935-D MS66 PCGS.** This radiant Premium Gem is among the finest-certified examples of the 1935-D Walking Liberty half dollar. Chief among its attributes are frosty mint luster and lovely champagne toning which deepens slightly toward the peripheries. No major abrasions are present. Some of the usual striking weakness is observed on the high points of Liberty's figure. NGC ID# 24RK, PCGS# 6596

1935-D Half Dollar, Frosty MS66 Tied for Finest at PCGS

4650 **1935-D MS66 PCGS.** An important issue from a mintage of just 3 million coins, this Denver Mint half dollar show typical weakness in the central obverse with sharper central reverse details. Both sides displays frosty silver luster amid hints of champagne toning. PCGS has never seen an example in MS67 of this issue (5/15).
Ex: Central States Signature (Heritage, 4/2012), lot 4747. NGC ID# 24RK, PCGS# 6596

4651 **1936 MS67 PCGS.** The Superb Gem grade of this 1936 Walker is only a small part of its tremendous appeal. Uninhibited luster cartwheels beneath vivid multicolor toning on each side, including sun-gold, amber, forest-green, crimson, and russet on the obverse, and pastel rainbow hues around a champagne center on the reverse. The strike is beautifully full. Only two coins are numerically finer at PCGS (5/15). NGC ID# 24RM, PCGS# 6598 Base PCGS# 6598

4652 **1936-S MS66 PCGS.** An above average strike reveals a trace of thumb detail at the center of the obverse on this lovely Premium Gem. Both sides exhibit frosty silver luster with delicate peripheral gold toning. PCGS has only certified 11 finer examples (5/15). NGC ID# 24RP, PCGS# 6600

4653 **1936-S MS66 NGC. CAC.** This piece exhibits intense, frosty luster of the sort that makes it stand out in a group display. Traces of ice-blue and pale champagne toning grace the surfaces, while only minor striking weakness is noted on Liberty's branch hand and the eagle's rear leg. Trivial ticks on Liberty's thigh appear to be all that limit the grade. NGC shows 17 numerically finer representatives (4/15). NGC ID# 24RP, PCGS# 6600

4654 **1937 MS67 PCGS. CAC.** The 1937 Walking Liberty half dollar is an available date, spurred by a mintage of nearly 10 million coins. This Superb Gem representative, however, stands out from its peers with radiant, mint-fresh luster that cartwheels uninterrupted around each side beneath just a suggestion of light golden patina. The strike is bold throughout Liberty's figure and the only grade-limiting flaws appear to be a couple minute ticks on Liberty's head and breast. PCGS lists only five numerically finer examples (4/15). NGC ID# 24RR, PCGS# 6601

1937-D Half Dollar, Near-Pristine MS67

4655 **1937-D MS67 PCGS.** A partial split thumb on Liberty and good detailing on her face and the eagle's high points on the reverse combine with near-pristine preservation and good eye appeal to distinguish this coin from the vast majority. Satiny luster and a hint of golden-tan patina are pluses as well. Population: 53 in 67 (1 in 67+), 0 finer (4/15). NGC ID# 24RS, PCGS# 6602

4656 **1938-D MS66 PCGS. CAC.** Fresh, satiny luster heightens the impact of the well-preserved surfaces on this Premium Gem 1938-D Walker. Partial thumb separation is present on Liberty's branch hand and the head detail is sharp. Some faint striations in the fields are the product of polished dies. NGC ID# 24RV, PCGS# 6605

4657 **1939 MS67+ PCGS. CAC.** Full design rendering is the hallmark of this coin, although the Plus-designation effectively sets it above most other MS67 examples in regards to technical quality. A blush of iridescent champagne toning attests to the originality of the luster. Only 24 coins are finer at PCGS (5/15). NGC ID# 24RW, PCGS# 6606

4658 **1939-S MS67 PCGS.** Brilliant satin luster and mark-free surfaces define this Superb Gem Walker, with a sharp strike and the merest hint of golden toning near the rims. The eye appeal is exceptional. PCGS has yet to certify a numerically finer 1939-S, while NGC recently slabbed the first and only MS68 example (4/15). NGC ID# 24RY, PCGS# 6608

4659 **1940-S MS66 PCGS. CAC.** Satiny, unmarked surfaces are largely untoned silver-white, save for a slight cast of gold near the lower obverse. Effulgent luster and excellent eye appeal make this Premium Gem a keeper for even the finest collection. PCGS reports only 12 finer in MS67 (three MS67+). NGC ID# 24S2, PCGS# 6610

4660 **1943-S MS66+ PCGS. FS-101.** Trumpet tail S. A lustrous high grade example that has only a hint of ice-blue and olive-gold patina. The strike is unusually sharp for a wartime San Francisco Walker. Pristine except for unobtrusive marks near the right (facing) claw. The motto and the bottom of the dress are die doubled, customary for the issue. NGC ID# 24SB, PCGS# 6620

4661 **1943-S MS66+ PCGS. CAC. FS-101.** Large S. A brilliant, lustrous, and virtually immaculate wartime Walker. The grade is determined by the strike, which shows softness on the central skirt lines and branch hand. IN GOD WE TRUST and the base of Liberty's skirt are die doubled, as usual for a 1943-dated half dollar. NGC ID# 24SB, PCGS# 6620

4662 **1943-S MS66+ PCGS. CAC. FS-101.** Trumpet tail S. Caramel-gold toning graces the obverse border, but this lustrous high grade half dollar is mostly brilliant. The skirt lines have a good strike, although the fingers of the branch hand are merged. The obverse is hub doubled, usual for the issue.
Ex: Long Beach Signature (Heritage, 6/2012), lot 9319, which realized $805. NGC ID# 24SB, PCGS# 6620

4663 **1944-S MS66+ PCGS.** Large S. Dappled golden-brown and navy-blue toning overlies lustrous stone-gray surfaces. The strike is sharp for the issue, although the branch hand lacks full detail. Marks are absent, save for a small scuff near the Y in LIBERTY. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

1944-S Walker, MS66+ Extremely Rare Finer

4664 **1944-S MS66+ PCGS. CAC.** A tinge of yellow-gold color intrudes from the peripheries on each side of this frosty 1944-S half. Liberty's head and branch hand show the usual San Francisco-issue softness, but the eye appeal is largely unaffected. Trivial contact on Liberty's thigh is all that precludes a full Superb Gem grade. PCGS lists only eight numerically finer pieces (4/15). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

1945-S Half Dollar, MS67
Virtually Pristine

4665 **1945-S MS67 NGC.** Knob S. A brilliant and lustrous example that boasts pristine field. Contact is confined to the flag beneath the extended arm. Like other wartime San Francisco issues, the 1945-S has a reputation for indifferent strikes. But the present Superb Gem displays full skirt lines and shows only minor blending on Liberty's head. The branch hand and the eagle's front leg feathers show incompleteness. Census: 31 in 67 (1 in 67 ★), 0 finer (4/15). NGC ID# 24SH, PCGS# 6626

1945-S Half Dollar, MS67
Sharply Struck

4666 **1945-S MS67 NGC.** Knob S. An essentially unimprovable Superb Gem. The white and lustrous surfaces are devoid of evident contact, and the strike is sharp aside from the expected merging on Liberty's branch hand. Minor clash marks are noted beneath STATES. Census: 31 in 67 (1 in 67 ★), 0 finer (4/15). NGC ID# 24SH, PCGS# 6626

1945-S Half Dollar, MS67
Above Average Strike

4667 **1945-S MS67 NGC.** Knob S. The strike is sharp on Liberty's head and skirt lines, and the branch hand shows a separate thumb. Most S-mint wartime Walkers are much less distinct. Lustrous and well preserved with light honey-gold toning. Census: 31 in 67 (1 in 67 ★), 0 finer (4/15). NGC ID# 24SH, PCGS# 6626

4668 **1946-D MS67 PCGS.** An impressive Superb Gem, this frosty and fully lustrous example has attractive peripheral gold and iridescent toning. Exceptional eye appeal is noted on this low-population issue. Population: 73 in 67 (1 in 67+), 0 finer (5/15). NGC ID# 24SK, PCGS# 6628

4669 **1946-S MS67 NGC.** Knob S. Glimpses of green-gold patina preclude full brilliance, but this lustrous Superb Gem is virtually immaculate and exhibits outstanding eye appeal. The skirt lines are bold but Liberty's cheek and lower hand show expected softness. Census: 74 in 67 (1 in 67+, 4 in 67 ★), 0 finer (4/15). NGC ID# 24SL, PCGS# 6629

PROOF WALKING LIBERTY HALF DOLLARS

1936 Walking Liberty Half Dollar, PR65
Slight but Noticeable Contrast

4670 **1936 PR65 PCGS.** This lovely Gem has noticeable contrast between the fields and devices, although not enough to warrant a Cameo designation from PCGS. In fact, over the past 29 years PCGS has only designated two 1936 proof Walkers as Cameo. The fields are deeply mirrored with hints of gold toning. We encourage the specialist to give this coin due consideration.
Ex: Dallas Signature (Heritage, 11/2006), lot 1005. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, Lightly Toned PR66

4671 **1936 PR66 PCGS.** The 1936 is the most challenging issue in the seven-year proof Walking Liberty half dollar series, particularly in high grades. This Premium Gem example exhibits fully rendered, satiny motifs set against glass-like fields. A pale champagne overlay displays the occasional glimpse multicolor toning in the peripheral regions. Only 36 Superb Gems are numerically finer at PCGS (5/15). NGC ID# 27V4, PCGS# 6636

4672 **1937 PR67 NGC.** The design elements of this Superb Gem proof exhibit pinpoint definition throughout and the pristine fields are deeply reflective, with a few hints of pale gold toning. NGC has graded 27 numerically finer examples (5/15). NGC ID# 27V5, PCGS# 6637

4673 **1937 PR67 NGC.** A brilliant silver-white Superb Gem with few mentionable distractions visible even under a loupe. The bold strike shows a split thumb on Liberty's branch hand, and good detailing on the eagle. Typical for the issue, little contrast is seen between the fields and devices. NGC has graded 27 numerically finer examples (5/15). NGC ID# 27V5, PCGS# 6637

4674 **1938 PR67 PCGS.** Fully struck devices and highly reflective fields reside beneath a nearly imperceptible blanket of cream-gray and almond-gold toning. Seldom obtainable any finer. Housed in a green label holder. NGC ID# 27V6, PCGS# 6638

1939 Half Dollar, PR68
Delicately Toned

4675 **1939 PR68 NGC.** This piece displays sharply struck, satiny devices set against watery fields that are seemingly devoid of flaws. Vivid sun-gold and amber peripheral hues yield to lighter pastel shades of lavender and ice-blue in the centers, granting this high-end Superb Gem impeccable visual appeal. Census: 98 in 68 (21 in 68 ★), 1 finer (4/15). NGC ID# 27V7, PCGS# 6639

1940 Half Dollar, PR68
Dashes of Rainbow Color

4676 **1940 PR68 NGC. CAC.** Infatuating crescents of vivid rainbow color, gracing the upper and lower obverse borders, are a significant contribution to this high-end proof's gratifying eye appeal. Dusky golden toning accents the remainder of each side, while the striking sharpness meets the expectations of the grade and the glassy fields deliver the reflection that backlights the whole scene. Census: 60 in 68 (4 in 68 ★), 0 finer (4/15). NGC ID# 27V8, PCGS# 6640

4677 **1942 PR68 NGC.** This beautifully preserved proof exhibits a sharply contrasted two-sided appearance; the obverse is deeply patinated in peripheral rainbow hues that fade slightly to lavender-gold in the center, while the reverse shows just a few amber accents over otherwise brilliant surfaces. Boldly struck with deeply reflective fields. NGC shows just four numerically finer proofs (4/15). NGC ID# 27V9, PCGS# 6642

4678 **1942 PR68 NGC.** A stellar strike sets off the satiny devices from the reflective fields on this final-year proof Walker, while an absence of contact marks or bothersome hairlines confirms the lofty PR68 grade. Traces of light golden color are present overall, but a tinge of umber along the upper obverse border is chief toning contribution. NGC ID# 27V9, PCGS# 6642

4679 **1942 PR68 NGC.** The 1942 proof half is a logical choice for the type collector. It has the largest mintage in the seven-date series, but it is still small with only 21,120 pieces minted. This example is brilliant and exhibits well-mirrored fields.
Ex: Dallas Signature (Heritage, 10/2009), lot 796, which realized $2,415. NGC ID# 27V9, PCGS# 6642

1942 Half Dollar, PR68
Top-Notch Registry Contender

4680 **1942 PR68 PCGS. CAC.** A total of 21,120 proof Walking Liberty half dollars were struck in 1942 (the final proofs of the design), but few are as well-preserved as this near-flawless PR68 specimen. Bands of golden, orange, and russet toning on the obverse surround mostly brilliant centers that show speckles of blue and green color. The reverse appears lighter with largely ice-blue and sea-green hues, and an area of deeper toning at the right border. Population: 51 in 68 (1 in 68+), 1 finer (4/15). NGC ID# 27V9, PCGS# 6642

FRANKLIN HALF DOLLARS

4681 **1950-D MS66 Full Bell Lines PCGS.** This impressive Premium Gem exhibits well-detailed design elements, with Full Bell Lines, and well-preserved lustrous surfaces that show hints of golden-tan toning. Population: 72 in 66 (7 in 66+) Full Bell Lines, 0 finer (5/15). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657

4682 **1951-S MS66 Full Bell Lines PCGS. CAC.** A boldly struck Registry-grade example of this conditionally challenging San Francisco issue. This piece well-preserved and exhibits frosty champagne luster. Only three coins are numerically finer at PCGS (5/15). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

4683 **1952-S MS65 Full Bell Lines PCGS. CAC.** Wisps of olive-gray toning at the borders become slightly more intense on the reverse. A well-struck Gem with pleasing luster and minimal marks.
Ex: Dallas Signature (Heritage, 11/2007), lot 922. NGC ID# 24T5, PCGS# 86663

4684 **1952-S MS66 Full Bell Lines PCGS.** A Registry-quality example of this conditionally challenging San Francisco issue. This Full Bell Lines coin is awash in frosty luster beneath a blanket of dusky nickel-gray toning that yields amber overtones in the peripheral recesses. Population: 52 in 66 (7 in 66+) Full Bell Lines, 2 finer (5/15). NGC ID# 24T5, PCGS# 86663

4685 **1959 MS66 Full Bell Lines PCGS.** Most high-grade Franklin half dollars survive from Mint Sets, and those issued from 1959 to 1963 were packaged in thin plastic that eliminated the rich toning from the sulfur-laden cardboard holders of earlier years. This Premium Gem has light gold and iridescent toning over fully brilliant and frosty silver surfaces. Population: 48 in 66 (3 in 66+) Full Bell Lines, 0 finer (5/15). NGC ID# 24TJ, PCGS# 86676

4686 **1959 MS66 Full Bell Lines PCGS.** Wisps of delicate blue and gold toning reside on the highly lustrous and frosty silver surfaces of this sharply detailed Premium Gem. Population: 48 in 66 (3 in 66+) Full Bell Lines, 0 finer (5/15). NGC ID# 24TJ, PCGS# 86676

4687 **1962 MS65 Full Bell Lines PCGS.** Dappled shades of sea-green, lilac, and amber toning visit the well-preserved lustrous surfaces of this attractive Gem. The design elements are sharply detailed, with full definition on the bell lines. PCGS has graded six numerically finer examples (5/15). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

1951 Franklin Half, PR68
Registry Set Quality

4688 **1951 PR68 NGC.** Only a handful of proof 1951 Franklin halves are known in the lofty PR68 grade, including 10 at NGC (one in PR68 ★) and two at PCGS; neither service has seen any Cameos or Deep Cameos finer than PR67+. This brilliant, dazzling proof is fully struck with frosty motifs rising above flashy fields. Modest cameo contrast is seen on the reverse, less so on the obverse. The eye appeal is incredible. NGC ID# 27VB, PCGS# 6692

4689 **1956 Type One, FS-901, PR68 Cameo NGC.** The Type One Reverse has an eagle with blurry wings and four feathertips left of the perch. Its successor, the Type Two Reverse, has bold wings and three feathertips left of the perch. The Type One Reverse constitutes only about 5% of 1956 proofs. The present specimen is brilliant and pristine. The Liberty Bell is icy and demonstrates exemplary contrast. PCGS# 510120 Base PCGS# 86686

4690 **1957 PR68 Deep Cameo PCGS. CAC.** Razor-sharp definition is evident on all design elements of this magnificent proof Franklin half dollar, and the frosty devices contrast profoundly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 73 in 68 Deep Cameo, 2 finer (5/15). NGC ID# 24TX, PCGS# 96698

PROOF KENNEDY HALF DOLLARS

1974-S Kennedy Half, PR70 Deep Cameo
Registry-Grade Proof

4691 **1974-S PR70 Deep Cameo PCGS.** A prime Registry coin, this eye-catching Deep Cameo is one of just 36 at the highest level of the PCGS population report (5/15), an essential acquisition for a competitive Registry Set. The field-device contrast is spectacular and the preservation is flawless. A hint of uniform, golden toning only heightens the visual appeal. NGC ID# 27WN, PCGS# 96810

1976-S Clad Bicentennial Half
PR70 Deep Cameo

4692 **1976-S Clad PR70 Deep Cameo PCGS.** Tied with 61 others as the finest Deep Cameo Clad proof seen by PCGS; a single Cameo representative is also certified at this level by that service (5/15). Both sides show stark white-on-black contrast, with razor-sharp motifs and full mirrors. A tiny planchet lamination is barely detectible near the 1 in 1976. One of the more eye-appealing Clad proofs seen, an essential Registry Set coin. NGC ID# 27WP, PCGS# 96811

EARLY DOLLARS

4693 **1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Obverse Damage — NGC Details. Fine.** This is an affordable Flowing Hair type coin, ideal for the collector on a budget. A number of small, shallow hits on Liberty's neck preclude a numeric grade from NGC, but are of little distraction to the unaided eye. Bright steel-gray surfaces yield just a tinge of light golden toning. The borders are strong, and the central devices show moderate, even wear. PCGS# 39986 Base PCGS# 6853

4694 **1795 Draped Bust, Off-Center, B-14, BB-51, R.2, Good 4 PCGS.** Bowers Die State I. Likely the first Draped Bust die marriage of any denomination, B-14 is highly collectible in the present quality. This example has a bold date and LIBERTY. The stars and country name are mostly clear. The deep gunmetal-blue and cream-gray surfaces display minor field marks below the Y in LIBERTY and a small edge knock near the E in AMERICA. PCGS# 39996 Base PCGS# 96858

4695 **1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VG8 NGC.** This silver-gray example is worn but all obverse stars and legends are bold. STATES OF is also crisp, while UNITED and AMERICA are faint but intact. The rims have a few minor marks.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 1749. PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, Centered Portrait
B-15, BB-52, XF Sharpness

4696 **1795 Draped Bust, Centered, B-15, BB-52, R.2 — Graffiti — PCGS Genuine. XF Details.** An attractive, old-silver patina with reddish-gold luster gives this Centered Draped Bust dollar considerable appeal despite the net-grading by PCGS. The graffiti designation refers to a long, looping scratch in front of Liberty's face, which reaches to star 12 where it joins a second, shorter scratch. Otherwise, the coin appears original and undamaged with only scattered small marks. The scratches are shallow and best viewed with a glass. In hand, the sharpness and natural surfaces of the coin are impressive. NGC ID# 24X2, PCGS# 6858

4697 **1796 Small Date, Large Letters, B-4, BB-61, R.3 — Damaged — NGC Details. VF.** Bowers Die State I. Deep aquamarine, wheat-gold, and rose-red patina encompasses this glossy Small Eagle dollar. A thin V-shaped scratch affects Liberty's chest and the field near her chin. Moderate mint-made adjustment marks are noted near the upper right end of the wreath.

1797 10x6 Stars Dollar, Fine 12
Large Letters, B-3, BB-71

4698 **1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, Fine 12 PCGS.** Bowers Die State III. Deep olive-green and cream-gray toning embraces lightly abraded and minutely granular Small Eagle dollar. Liberty's earlobe is clear, as are portions of her hair, although the eagle's breast and belly plumage is worn. The sole die marriage with a 10x6 star arrangement. PCGS# 40004 Base PCGS# 6865

4699 **1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Improperly Cleaned — NGC Details. VF.** Bowers Die State I. Rotation beneath a light reveals lilac-red, peach-gold, and steel-blue shades across the reverse. The obverse has a pearl-gray portrait and a wheat-gold field. The surfaces are mildly granular but devoid of evident abrasions.

1798 Pointed 9 Dollar, VF30
Heraldic Eagle, B-23, BB-105

4700 **1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF30 PCGS.** Bowers Die State I. This Heraldic Eagle dollar offers ice-blue fields and olive-gold high points. Abrasions are inconsequential save for a slight reverse rim ding near 4:30. Portions of Liberty's forehead and hair are mildly granular. Certified in a green label holder. PCGS# 40022 Base PCGS# 6877

1798 Dollar, Original XF40
B-23, BB-105, Large Eagle

4701 **1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, XF40 PCGS.** Die State III, both dies lapped. An appealing circulation cameo, this lightly circulated Large Eagle type coin exhibits deep gunmetal-gray toning in the fields, with lighter pewter-gray color over the relief elements. The strike is even and well-executed, with significant detail remaining in the centers and complete border denticles around each side. No adjustment marks are observed. PCGS# 40022 Base PCGS# 6877

4702 **1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3 — Improperly Cleaned — NGC Details. XF.** Golden-brown toning visits the left-side margins of this otherwise stone-gray representative. Both sides display parallel hairlines, but noticeable marks are limited to a field line near the M in AMERICA and a couple of tiny rim nicks. PCGS# 40022 Base PCGS# 6877

1798 Large Eagle Dollar, Dove-Gray XF40
Pointed 9, 10 Arrows, B-13, BB-108

4703 **1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, XF40 NGC.** Bowers Die State II, showing a vertical die crack running upward toward the rim from the right serif of L(IBERTY) but no sign of a die crack below 17. This medium dove-gray piece still boasts much allure on its problem-free surfaces, showing the expected moderate wear but no major marks or other distractions. A few light planchet adjustment marks appear in the center reverse. One of several popular 1798 varieties found in the *Guide Book*, and a generally available one. PCGS# 40025 Base PCGS# 6876

1798 Heraldic Eagle Dollar, XF40
Pointed 9, B-31, BB-115

4704 1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.4, XF40 PCGS. Bowers Die State IV. Pointed 9, Line Star Pattern. Digit 8 out of position, high and leaning slightly right; star 12 close to upper and lower beaks but touches neither. This is the usually seen late die state with several reverse die cracks. This better variety example has medium gray and darker gray-brown color with splashes of deeper steel toning. The surfaces are occasionally microgranular and surprisingly unabraded.
Ex: Dallas Signature (Heritage, 11/2006), lot 1067, which realized $3,450. PCGS# 40032 Base PCGS# 6873

4705 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VG8 PCGS. Bowers Die State IV. Toned deep steel-gray with lighter cream-white shades on the high points. The moderately granular surfaces show a few thin marks on the upper right reverse quadrant. PCGS# 40041 Base PCGS# 6873

1798 Large Eagle Dollar, VF35
B-24, BB-124, Pointed 9

4706 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF35 NGC. Die State II, reverse lapped. Bold borders and light, even wear grant excellent eye appeal to each side of this mid-grade Large Eagle type coin. The surfaces show primarily ten-gray patina, although areas of deeper amber and ocean-blue color are also revealed in the peripheral recesses when tilted in-hand. A problem-free example with no distracting adjustment marks. PCGS# 40041 Base PCGS# 6873

1799/8 B-3, BB-141 Dollar, VF25
Blundered 15 Stars Reverse

4707 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF25 PCGS. Bowers Die State III. A problem-free medium brown and lavender example. The mildly glossy surfaces show only inconsequential contact. PLURIBUS is only faintly evident but the shield lines are mostly separated. The popular *Guide Book* variety that combines the overdate obverse with the blundered star count reverse. PCGS# 40064 Base PCGS# 6883

1799/8 Dollar, 13 Stars Reverse, VF25
Appealing B-1, BB-142 Example, Very Scarce

4708 1799/8 13 Stars Reverse, B-1, BB-142, R.4, VF25 NGC. Bowers Die State III, showing the typically seen advanced die crumbling around the I in AMERICA and cracks in the area of TES OF. The 1799/8 is a very scarce die marriage among early dollars, more common than the 1799/8 BB-143 and less common than the 1799/8 BB-141. This pinkish-gray coin shows the expected wear but no singular abrasions or planchet adjustment marks. One hair-thin scrape shows in Liberty's upper hair. Good eye appeal for the grade. PCGS# 40065 Base PCGS# 6884

4709 1799 Irregular Date, 13 Stars Reverse, B-13, BB-151, R.5 — Damage — PCGS Genuine. Fine Details. BB-151 is a rare variety, prohibiting many collectors from being too choosy when selecting a representative. The current example offers the budget-conscious enthusiast with a moderately affordable acquisition, showing bright golden-gray patina and adequate detail for the Fine grade level. PCGS cites damage as the reason for a Details-only grade, although the only such flaw readily identifiable is an old dig in the field near the tip of the bust. PCGS# 40044 Base PCGS# 6880

4710 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, Fine 12 NGC. Bowers Die State II. Stone-white high points contrast with charcoal-gray fields. The surfaces are only lightly abraded and the rims are problem-free. All letters in E PLURIBUS UNUM are at least partially present. PCGS# 40045 Base PCGS# 6879

4711 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, Fine 15 PCGS. Bowers Die State IV. Deep gunmetal-blue, dove-gray, and tobacco-brown toning encompasses this moderately marked early dollar. All letters in E PLURIBUS UNUM are at least partially present. PCGS# 40045 Base PCGS# 6879

1799 Irregular Date Dollar, VF30
13 Stars Reverse, B-15, BB-152

4712 **1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, VF30 PCGS. CAC.** Bowers Die State IV. The BB-152 die marriage combines the Irregular Date obverse with the Blundered Stars reverse. The date and reverse stars are awkwardly entered, particularly the second 9 and the highest star. The present midgrade example displays deep olive-brown and dove-gray toning. The surfaces are pleasing, and lack any remotely mentionable marks. PCGS# 40045 Base PCGS# 6879

4713 **1799 7x6 Stars, B-7, BB-156, R.4, VG8 NGC.** Bowers Die State III. A stone-gray and lavender Bust type coin with only minor abrasions for the designated grade. Peripheral elements are sharp, but the area near the eagle's head is well-worn, due to a buckled reverse die. BB-156 is a scarce die marriage, often identified by the radial crack through the second S in STATES. PCGS# 40048 Base PCGS# 6878

1799 7x6 Stars Dollar, VF30
B-5, BB-157, Die State III
Midgrade Bust Type Coin

4714 **1799 7x6 Stars, B-5, BB-157, R.2, VF30 PCGS.** Bowers Die State III, a frequently seen die state with several reverse cracks. Nearly all examples of the B-5 dollar are die states II and III. State I apparently does not exist, and State IV is quite scarce. This pleasing original dollar has walnut-brown and olive-green toning. The surfaces show only a few scattered small marks and minor reverse residue. *Ex: Central States Signature (Heritage, 4/2012), lot 4858, which realized $2,300.* PCGS# 40049 Base PCGS# 6878

1799 B-23, BB-159 Dollar, VF25
Guide Book 8x5 Stars Variety

4715 **1799 8x5 Stars, B-23, BB-159, R.3, VF25 PCGS.** Bowers Die State II. A cream-gray early dollar with violet undertones. Sharply detailed for the VF25 level. The lightly granular surfaces are refreshingly unabraded aside from delicate horizontal hairlines on the portrait. B-23 is the sole Bolender variety of the 8x5 Stars *Guide Book* variety. PCGS# 40063 Base PCGS# 6881

4716 **1799 7x6 Stars, B-11, BB-161, R.3, VF25 PCGS.** Bowers Die State III. This early dollar is well defined for the VF25 grade and displays richly blended golden-brown and dove-gray toning. No abrasions are noticeable aside from a few brief field marks above the bust tip. The reverse is granular. PCGS# 40052 Base PCGS# 6878

4717 **1799 7x6 Stars, B-11, BB-161, R.3, VF25 ANACS.** Bowers Die State III. A dusky cream-gray and almond-gold early dollar. Lightly abraded except for a rim ding above the B in LIBERTY. An unusually late (and unlisted) die state with a break below the eagle's beak. PCGS# 40052 Base PCGS# 6878

4718 **1799 7x6 Stars, B-8, BB-165, R.3, Fine 15 PCGS.** Bowers Die State I. The rare initial die state without a crack through the LIB in LIBERTY. This almond-gold and powder-blue representative is surprisingly free from marks, although small flan imperfections surround the I in LIBERTY. PCGS# 40056 Base PCGS# 6878

4719 **1799 7x6 Stars, B-8, BB-165, R.3 — Smoothed — PCGS Genuine. XF Details.** Bowers Die State II. Die cracks through the second S in STATES provide a pick-up point for the moderately scarce Bolender-8 variety. This example shows only light wear on the forehead curls and breast feathers, but the surfaces are moderately granular and exhibit bright orange-red and steel-blue shades. PCGS# 40056 Base PCGS# 6878

4720 **1799 7x6 Stars, B-14, BB-167, R.3 — Cleaned — ANACS. XF45 Details.** Die State II. This lightly circulated Large Eagle type coin exhibits strong borders and well-detailed central devices. No adjustment marks are observed. Bright steel-gray patina shows a thin overlay of light golden toning on each side. PCGS# 40058 Base PCGS# 6878

4721 **1799 7x6 Stars, B-22, BB-168, R.4, VG10 PCGS.** Bowers Die State III. The scarce Bolender marriage with a heavy bisecting horizontal break across the reverse. A cream-gray and powder-blue example with unexpectedly sharp details on the reverse. A few faded thin marks are noted on the starry field above the eagle's head. PCGS# 40059 Base PCGS# 6878

4722 **1800 B-1, BB-181, R.5 — Obverse Scratched, Cleaned — NGC Details. XF.** Die State I, unclashed. A couple old, toned-over scratches in the upper-left obverse field are noted by NGC, as is evidence of old cleaning beneath the thick orange-gold and plum-gray toning that blankets each side. Light wear confirms the grade, but leaves the design elements sharp and the border dentils complete. BB-181 is a rarely encountered variety, identified in part by recutting on the first T in STATES and die lumps around star 11 on the obverse. PCGS# 40067 Base PCGS# 6887

1800 B-10, BB-190 Dollar, VF30
Originally Toned, Few Marks

4723 **1800 Wide Date, Low 8, B-10, BB-190, R.3, VF30 PCGS. CAC.** Bowers Die State III. Dove-gray and gunmetal toning encompasses this charming midgrade Draped Bust dollar. Lightly abraded overall, although as an identifier we note small rim nicks on the reverse at 1 o'clock and 9:30. B-10 is usually selected to represent the *Guide Book* Very Wide Date, Low 8 listing, since the scarce B-11 alternative has an AMERICAI reverse. PCGS# 40076 Base PCGS# 6888

4724 **1800 Dotted Date, B-14, BB-194, R.3, Fine 12 PCGS. CAC.** Bowers Die State III. Russet-brown borders cede to cream-gray fields and devices. A circulated but minimally abraded collector coin of the *Guide Book* Dotted Date variety, named after the slew of tiny die lumps near the first 0 in the date. PCGS# 40078 Base PCGS# 6889

4725 **1801 B-1, BB-211, R.3 — Improperly Cleaned — NGC Details. VF.** Bowers Die State V. The rare late die state with a buckled reverse field near the E in AMERICA, nearly effacing the lower half of that letter. A stone-gray and tan-gold silver dollar without any noticeable marks, but the surfaces are microgranular, particularly near the left-side reverse stars. PCGS# 40083 Base PCGS# 6893

4726 **1801 B-2, BB-212, R.3, VF20 PCGS.** Bowers Die State III. Deep walnut-brown, steel-blue, and lavender toning blankets this nicely defined early dollar. A few hair-thin marks are present on the lower right obverse field and between the reverse stars. PCGS# 40084 Base PCGS# 6893

4727 **1801 B-3, BB-213, R.3, VG8 PCGS. CAC.** Bowers Die State II. A deep lavender-gray Draped Bust dollar with refreshingly few abrasions given its service in Early American commerce. The reverse rim has a pair of small nicks at 4 o'clock and 5:30. PCGS# 40085 Base PCGS# 6893

4728 **1802/1 Narrow Date, B-1, BB-231, R.4 — Scratched — ANACS. VF35 Details.** Bowers Die State II. Thorough evaluation beneath a lens finally reveals a cluster of thin marks near the right shield corner. The steel-gray and stone-white surfaces are otherwise attractive. PCGS# 40091 Base PCGS# 6898

4729 **1803 Small 3, B-5, BB-252, R.3, Fine 15 PCGS.** Deep gunmetal-gray and golden-brown toning encompasses both sides. An unobtrusive shallow strike-through (as made) is noted near the final two obverse stars, and a few faded field marks near the forehead emerge beneath a loupe. PCGS# 40097 Base PCGS# 6900

4730 **1803 Large 3, B-6, BB-255, R.2 — Scratch — PCGS Genuine. VF Details.** Bowers-Borckardt Die State III. This moderately hairlined silver-gray early dollar displays more extensive luster than expected for a VF example. The central reverse has mint-made adjustment marks along with a number of pinscratches. The obverse has a few thin marks but only a pair beneath the neck are of any consequence. PCGS# 40101 Base PCGS# 6901

4731 **1803 Large 3, B-6, BB-255, R.2 — Improperly Cleaned — NGC Details. VF.** Bowers Die State I. Glimmers of luster emerge from cream-gray and almond-gold surfaces. Both sides are somewhat cloudy from vertical hairlines, but abrasions are inconsequential except for a small reverse rim bump at 5:30. The reverse is misaligned a few degrees toward 7 o'clock, unusual for the series. PCGS# 40101 Base PCGS# 6901

1803 Silver Dollar, VF20
Large 3, B-6, BB-255

4732 **1803 Large 3, B-6, BB-255, R.2, VF20 PCGS. CAC.** Bowers Die State I. Sea-green, chestnut-gold, and cream-gray toning encompass this Heraldic Eagle type coin. Most letters in E PLURIBUS UNUM are bold, and all are readable. The obverse is minutely granular and mildly luminous but both sides are free from noticeable abrasions. PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

4733 **1840 AU53 NGC.** Early dates with original surfaces and naturally acquired, deeply ingrained toning are scarce among the surviving population of Seated dollars. Many coins were dipped or cleaned at some point when such things were in vogue. This attractively toned example displays glimpses of silver luster shining through bronze and gunbarrel-blue patina. Prooflike surfaces gleam beneath the rich coloration. The full strike is a bit softened by high point wear, but marks are few and the wide rims are perfect. Worthy of a bold bid. NGC ID# 24YA, PCGS# 6926

1840 Seated Dollar, AU58
Virtually Complete Detail

4734 **1840 AU58 NGC.** Regular Seated dollar production began in 1840 with a mintage of only 61,005 coins; understandably, this issue is slightly scarcer in Mint State than are its higher-mintage counterparts from 1841 to 1843, inclusive. This Borderline Uncirculated example displays bright, semiprooflike fields with just trivial friction over the high points of the design. Abrasions are surprisingly few and far between for the grade. NGC ID# 24YA, PCGS# 6926

1841 Silver Dollar, MS61
Brilliant No Motto Type Coin

4735 **1841 MS61 NGC.** In the context of 1840s Seated dollars, the 1841 is fairly plentiful in Mint State, although finding an example with pleasing eye appeal will prove challenging. This representative shows surprisingly pleasant surfaces for the grade, with bright, semiprooflike fields and sharp motifs. Only a few obvious abrasions are present, none particularly detracting. Census: 18 in 61 (1 in 61+), 33 finer (4/15). NGC ID# 24YB, PCGS# 6927

4736 **1842 AU58 PCGS.** A bright, lustrous No Motto type coin. This near-Mint 1842 Seated dollar is well-struck and exhibits only trivial wear over the high points of the design. The obverse is clashed in the right field and there is a small die bulge in the left. NGC ID# 24YC, PCGS# 6928

1842 Seated Dollar, Semiprooflike MS61

4737 **1842 MS61 PCGS. CAC.** A genuinely Mint State No Motto type coin, this 1842 Seated dollar exhibits eye-catching semiprooflike fields and frosty devices, both accentuated by just a hint of light golden toning. Minor, uniformly scattered abrasions determine the grade. The strike is a trifle soft on the upper reverse shield, as well as on Liberty's head, but no other mentionable weakness is observed. NGC ID# 24YC, PCGS# 6928

4738 **1843 AU55 PCGS. CAC.** Although early Seated dollars were struck for domestic circulation rather than for foreign trade they remained relatively unappreciated by the public, which preferred half dollars. When the coins did circulate, they were prone to bagmarks, rim damage, and abrasions. A mintage of 165,100 pieces in 1843 makes the issue more available than surrounding dates, but the date is scarce in Choice AU condition. This example displays attractive album toning with blue and amber-gold shades at the borders around silver centers. A few light abrasions and hair-thin lines are visible with a glass. Nice detail on the elements remains, along with occasional glimpses of mint luster. NGC ID# 24YD, PCGS# 6929

1843 Seated Dollar, MS62+
Unusually Fine Surfaces

4739 **1843 MS62+ NGC.** This otherwise plentiful No Motto Seated dollar is extremely difficult to locate in Mint State without numerous abrasions, cleaning, or other faults. Select or Choice examples are rare, and the date is unknown in Gem condition. This Plus-graded MS62 coin combines the affordability of a lower-grade piece with the overall eye appeal of a higher-end example; satiny surfaces yield a blush of warm golden toning, while abrasions are unusually light and evenly distributed. The design elements show above-average definition. Census: 16 in 62 (3 in 62+), 18 finer (4/15). NGC ID# 24YD, PCGS# 6929

4740 **1846 AU55 NGC. CAC.** Luster remains around the sharp central motifs, stars, and legends of this Choice About Uncirculated dollar. The fields display a deep, blue-gray toning that retreats from the raised, silver devices. Numerous small marks are hidden in the toning, but none that are severe. The mintage of 110,600 pieces makes this Philadelphia issue a somewhat available date in the early series, and one that is considerably more available than its 1846 O-mint counterpart. CAC endorsed for quality. NGC ID# 24YG, PCGS# 6932

4741 **1846-O AU55 NGC.** The first of just four Seated dollar issues from the New Orleans Mint, the 1846-O is also difficult to locate in the upper circulated grades with pleasing coloration. This Choice AU example brings a combination of amber-red and olive toning to the peripheral recesses while the remainder of each side is largely light golden in color. Light wear grazes the design elements, but leaves substantial semiprooflike reflectivity in the fields. Census: 21 in 55, 48 finer (4/15). NGC ID# 24YH, PCGS# 6933

4742 **1847 AU58 NGC.** Reflective fields confirm the near-Mint condition of this sharply detailed and minimally abraded 1847 Seated dollar. Hints of lavender color in the peripheral recesses frame otherwise pale champagne surfaces, granting a high degree of eye appeal to the viewer. NGC ID# 24YJ, PCGS# 6934

1849 Seated Dollar, Sharp MS62

4743 **1849 MS62 NGC.** This broad-rimmed 1849 Seated dollar is boldly struck, with rich, satiny luster illuminating dusky amber-gray toning over each side. The surfaces are unusually smooth, considering the grade. The 1849 is a slightly better date in comparison to the frequently seen 1841 to 1843 issues, and is notably elusive in Mint State. Census: 18 in 62, 37 finer (5/15). NGC ID# 24YL, PCGS# 6936

4744 **1850 — Improperly Cleaned — NGC Details. AU.** A tiny mintage of 7,500 pieces makes the 1850 a scarce date in better circulated grades. This well-struck example has only a trace of wear on Liberty's cheek and the hair above the ear. The ice-blue and straw-gold surfaces are subdued, faintly hairlined, and moderately abraded. NGC ID# 24YM, PCGS# 6937

4745 **1853 — Improperly Cleaned — NGC Details. Unc.** Both sides display delicate vertical hairlines, but these are nearly imperceptible beneath dusky walnut-brown and forest-green toning. The well-struck and satiny surfaces display only incidental contact. NGC ID# 24YS, PCGS# 6941

4746 **1856 — Stained — NGC Details. Unc.** The scarcity of the 1856 Seated dollar will outweigh the Details-grade of this unworn example. Both sides show areas of penetrating olive-brown, amber, and deep teal color. The strike is sharp and the surfaces are free of distracting abrasions. NGC ID# 24YV, PCGS# 6944

1859 Dollar, MS61
Underrated in Mint State

4747 **1859 MS61 NGC.** In comparison to its readily available New Orleans counterpart, the 1859 Seated dollar is significantly underappreciated. NGC has seen hundreds of 1859-O submissions in Mint State, while the 1859 is represented at that service by just 32 Uncirculated coins. This MS61 example displays bold, satiny devices set against semiprooflike fields which yield bright, brilliant luster. Light, scattered grazes limit the grade, but none are singularly obtrusive. Census: 4 in 61, 28 finer (4/15). NGC ID# 24YX, PCGS# 6946

4748 **1859-O MS62 NGC.** A complete lack of toning allows radiant, frosty mint luster to illuminate uninterrupted the surfaces of this pleasing No Motto type coin. Light, scattered abrasions contribute to the grade, but none are singularly detracting. The 1859-O is one of the few No Motto issues in the series that is collectible in Mint State. NGC ID# 24YY, PCGS# 6947

1859-O Seated Dollar, MS62
Highly Lustrous Surfaces

4749 **1859-O MS62 PCGS.** Like many of its antebellum Seated dollar counterparts, the 1859-O was little-saved at the time of release, though the breakdown of the specie economy as a result of the Civil War helped preserve a number of survivors. The present coin shows light to moderate abrasions across strongly lustrous surfaces that show surprisingly little patina.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1599. NGC ID# 24YY, PCGS# 6947

1860-O Dollar, MS62 Prooflike
Dazzling Brilliance

4750 **1860-O MS62 Prooflike NGC.** Along with the 1859-O, the 1860-O Seated dollar is one of the most readily obtainable No Motto issues in the series, a favorite among type enthusiasts who find a complete date and mintmark set to be out of reach. This brilliant, Prooflike example displays bold definition throughout the eagle, and is only a trifle soft on Liberty's head. Light, scattered disturbances in the fields limit the grade, but do not overly detract from the eye appeal. NGC ID# 24Z3, PCGS# 6950

4751 **1861 — Improperly Cleaned — NGC Details. Unc.** A challenging issue in all grades, the 1861 Seated dollar is especially elusive in unworn condition. This example is sharply detailed on the central devices, with only trivial weakness on some of the right-hand stars, as usual. Bright silvery-gray surfaces show scattered hairlines in the fields, but the only mentionable abrasion is an old scrape on Liberty's cheek, not immediately apparent. NGC ID# 24Z4, PCGS# 6951

1868 Dollar, Sharply Struck MS61
Misplaced Date Punch

4752 **1868 Misplaced Date, FS-301, MS61 PCGS.** The 1868 is a seldom seen With Motto issue in the Mint State grades. PCGS and NGC have certified only 45 pieces in mint condition, a number of which are likely resubmitted coins. This MS61 example is sharply struck, with gunmetal-blue toning at the margins framing lavender-gray centers. Slight reflectivity remains in the fields, characteristic of the Seated type in general. A few light marks are scattered about but none are severe, especially considering the grade designation. This coin represents an interesting *Cherrypickers'* variety, with the upper loop of a misplaced 8 (or 6) seen in the dentils below the 6 in the date. Population: 3 in 61, 23 finer (5/15). PCGS# 416927 Base PCGS# 6961

1870 Dollar, MS62
Semiprooflike Fields

4753 **1870 MS62 NGC.** The 1870 is the first of the readily available With Motto Seated dollar issues, but Mint State examples are nonetheless elusive. This piece is well-struck, with brilliant, satiny luster and subtle semiprooflike reflectivity in the fields. Light, scattered abrasions contribute to the grade. Census: 15 in 62 (1 in 62+), 36 finer (4/15). NGC ID# 24ZD, PCGS# 6963

1870-CC Silver Dollar, XF40
Desirable Carson City Type Coin

4754 **1870-CC XF40 PCGS. Variety 1-D.** A stone-gray representative with additional hints of tan and olive toning. Traces of luster remain across moderately circulated and inoffensively marked surfaces. Although the 1870-CC is the most collectible of the four Carson City Seated dollar varieties, it is nonetheless significantly rarer than any CC-mint Morgan issue, including the 1889-CC. NGC ID# 24ZE, PCGS# 6964

4755 **1870-CC — Improperly Cleaned — NGC Details. AU. Variety 2-E.** Peach-gold luster brightens the borders of this well defined but moderately glossy representative. The fields exhibit distributed small abrasions. A challenging Carson City type coin. NGC ID# 24ZE, PCGS# 6964

1872 Seated Dollar, MS63
Toned, Luminous Surfaces

4756 **1872 MS63 NGC.** Rich, satiny luster glows beneath deep olive-gray and lavender-gold toning on each side of this Select With Motto type coin. The eagle's plumage is moderately well-defined, although the obverse shows the usual weakness on Liberty's head and figure and the right-hand stars. Light, scattered disturbances in the luster are well-masked by the rich patina. Census: 18 in 63, 25 finer (4/15). NGC ID# 24ZJ, PCGS# 6968

4757 **1872-CC — Cleaning — PCGS Genuine. VF Details.** The Carson City issues are among the most sought-after dates in the Seated dollar series. This 1872-CC representative displays excellent VF detail, with notably appealing olive-gray toning that lightens toward the central regions on each side. PCGS notes evidence of cleaning, and faint hairlines are detectable upon close study with lens. To the unaided eye, however, this piece will please most budget-conscious enthusiasts. NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

1866 Seated Liberty Dollar, PR62 Cameo
First Year With Motto

4758 **1866 Motto PR62 Cameo PCGS.** Only 725 proof Seated Liberty dollars were struck in 1866 and the issue is always popular as the first year of the Motto design. This attractive PR62 example exhibits sharply detailed design elements and deeply reflective fields that show a few minor hairlines. Population: 9 in 62 Cameo, 49 finer (5/15). PCGS# 87014

1867 Seated Dollar, PR63
Richly and Evenly Toned

4759 **1867 PR63 PCGS.** Only 625 proof dollars were struck in 1867. This Select example is toned mauve-gray, violet, and orange-gold. The strike is complete throughout, further enhancing the coin's overall eye appeal. Some wispy marks in the fields, visible only under high magnification, define the grade.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1944. NGC ID# 252N, PCGS# 7015

4760 **1869 PR55 ANACS.** Only the slightest traces of wear are evident on the sharply detailed design elements of this PR55 example, from a mintage of just 600 pieces. The reflective fields show a number of minor hairlines and contact marks under shades of sea-green, lavender, and amber toning. NGC ID# 252R, PCGS# 7017

4761 **1871 PR61 PCGS.** An attractive example for the grade, with slightly hazy, iridescent fields and medium proof mirrors. A distribution of delicate lines beneath the light toning determines the assigned grade. More than 1 million business strikes were produced in 1871, and the proof mintage of 960 pieces was large as well. Most proofs were sold to collectors as part of minor and silver proof sets. NGC ID# 252T, PCGS# 7019

TRADE DOLLARS

1873-S Trade Dollar, Two-Toned MS63

4762 **1873-S MS63 PCGS.** The obverse is lightly toned silver-white with a ring of gold near the rim, while the reverse is much more deeply toned in walnut, olive, and deep burgundy hues. A few faint luster grazes, rather than singular marks, determine the grade on this sharply struck coin. The 1873-S Trade dollar issue is a popular one, given its status as the debut San Francisco Mint entry in the series. Population: 27 in 63, 29 finer (5/15). NGC ID# 252Y, PCGS# 7033

4763 **1874 MS61 NGC.** Period after FINE. This untoned Mint State Trade dollar is well-struck, save for minor softness on the eagle's right (facing) claw. Luster illuminates design elements, and scattered small obverse marks correspond to the grade.
Ex: New York Signature (Heritage, 12/2011), lot 3743. NGC ID# 252Z, PCGS# 7034

4764 **1874-CC Chop Mark MS63 PCGS.** Micro CC. Period after FINE. The obverse has bold chops at star 3 and Liberty's feet. The reverse has five chops: at PLURIBUS, each claw, the right (facing) wingtip, and the eagle's shoulders. A lustrous and brilliant Carson City example. PCGS# 87035

4765 **1874-S MS61 PCGS.** Large S. No period after FINE. A lightly toned and coruscating representative. The strike is good although the right (facing) claw shows slight blending. The field marks are less consequential than is usual for the MS61 level. Certified in a green label holder. NGC ID# 2533, PCGS# 7036

1875-S Trade Dollar, MS64
Vibrant Cartwheel Luster

4766 **1875-S Type One Reverse MS64 PCGS.** Due to its availability through the Choice grade level, the 1875-S Trade dollar is often encountered in type collectors' cabinets. This piece is a lovely example for the grade, with fully original, frosty luster that shows just a hint of light golden toning that deepens slightly around the borders. Liberty's head is not fully defined, but the strike is otherwise pleasing. Housed in an old green label holder. PCGS has seen 36 numerically finer submissions (4/15). PCGS# 510101 Base PCGS# 7039

4767 **1875-S/CC FS-501, Chop Mark, MS60 PCGS.** Both sides display several deeply entered and interesting chop marks, which give this overmintmarked Trade dollar a wavy appearance. Lustrous and nearly brilliant. A late die state with cracks across the reverse legends. PCGS# 518792 Base PCGS# 87040

4768 **1876 Type One Obverse, Type One Reverse, MS62 NGC.** Scarcer than the Type Two Reverse, which lacks a berry beneath the eagle's right (facing) claw. Deep ocean-blue and golden-brown toning embrace this crisply struck and decidedly prooflike Centennial-year Trade dollar. Minimally marked for the designated grade. PCGS# 40110 Base PCGS# 7041

1876 Trade Dollar, MS64
Natural Toning

4769 **1876 Type One Obverse, Type Two Reverse, MS64 PCGS.** The 1876 Trade dollar is slightly scarcer overall than its San Francisco counterpart, but it is not as elusive in high grade as is the Carson City issue of this year. This Choice representative displays satiny luster beneath a blanket of dusky lavender-gray toning that also yields tinges of gold and sky-blue throughout. Well-struck, with a few small marks in the right obverse field being all that preclude a full Gem grade. Housed in an old green label holder. PCGS has seen 33 numerically finer representatives (4/15). PCGS# 40111 Base PCGS# 7041

4770 **1876-S Chop Mark MS63 PCGS. CAC.** Type One Obverse, Type One Reverse, Large S. The obverse field has three chop marks: two near the knees, and another above the sheaf of wheat. The final chop mark is on the reverse field above the eagle's left (facing) shoulder. Light to medium wheat-gold toning visits lustrous representative.
Ex: Dallas Signature (Heritage, 11/2006), lot 1136, which realized $2,070. PCGS# 87043

4771 **1876-S Type One Obverse, Type One Reverse, MS62 PCGS.** Large S. Vibrant cartwheel luster traverses this minimally abraded Trade dollar. Faint golden toning denies full brilliance. Liberty's waist displays minor mint-made roller marks, and the strike is typical on the eagle's right (facing) claw. PCGS# 40114 Base PCGS# 7043

1876-S Trade Dollar, Deeply Toned MS64

4772 **1876-S Type One Obverse, Type One Reverse, MS64 NGC.** An unusual but attractive color palette is created by the deep burgundy and grape patina that prevails throughout both sides. A few flecks of darker charcoal-gray punctuate the prevailing colors. The strike is quite sharp on this near-Gem coin, an attractive survivor from this pre-Morgan dollar mintage exceeding 5.2 million coins. For the issue, Census: 92 in 64, 22 finer (4/15). PCGS# 40114 Base PCGS# 7043

1877-S Trade Dollar, MS64
Lightly Toned and Lustrous

4773 **1877-S MS64 PCGS.** Large S. In spite of a record-breaking mintage that exceeded 9.5 million pieces, the 1877-S Trade dollar is a scarce date in Choice Mint State condition, and PCGS has certified only 36 coins in higher numeric grades (4/15). Most of the mintage was used in the China trade. The present virtually brilliant Choice type coin is sharply struck and lustrous. Marks are minimal aside from a nick on the reverse rim at 12:30.
Ex: Houston Signature (Heritage, 12/2010), lot 3828; Central States Signature (Heritage, 4/2012), lot 4941, which realized $2,530. NGC ID# 253E, PCGS# 7046

4774 **1878-CC VF30 PCGS.** The final circulation strike Trade dollar, with just 97,000 examples coined in Carson City. This original pewter and dark gray example has pleasing surfaces for the grade. Trivial surface marks are expected and insignificant emerald residue appears on the reverse. NGC ID# 253F, PCGS# 7047

4775 **1878-S MS63 PCGS.** Semiprooflike fields illuminate a dusky golden overlay on each side of this Select 1878-S Trade dollar. Liberty's head is pleasantly sharp and the eagle's plumage is well-defined. Light, scattered abrasions limit the grade, but none are singularly detracting. NGC ID# 253G, PCGS# 7048

4776 **1878-S MS63 PCGS. CAC.** This Select example is deeply toned in bronze-gold and olive shadings, but the underlying surfaces remain pleasantly lustrous. Sharp design elements show minimal abrasions. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

4777 **1873 PR58 NGC.** This broad-rimmed first-year proof shows just a trace of mishandling, resulting in the PR58 grade from NGC. Nonetheless, the motifs are sharply rendered and the deeply mirrored fields show warm champagne toning with deeper amber and ocean-blue hues around portions of the peripheries. An affordable proof Trace dollar. NGC ID# 27YJ, PCGS# 7053

1873 Trade Dollar, PR63 Cameo
Remarkably Deep Mirrors

4778 **1873 PR63 Cameo PCGS.** The introductory year of the Trade dollar had a proof mintage of 865 pieces, and this issue remains moderately obtainable for the type collector who wishes to stray from the more plentiful proof-only issues of the later part of the series. This piece displays strong mirroring in the fields and satiny, well-struck devices. Contrast is subtle, but noticeable. A blush of violet and orange-gold toning graces the left-hand border on each side. Population: 18 in 63 (1 in 63+) Cameo, 16 finer (4/15). PCGS# 87053

1874 Trade Dollar, PR64 Cameo
Fully Struck With Bold Contrast

4779 **1874 PR64 Cameo NGC.** "Patched Letters Reverse," as are most extant proof 1874 Trade dollars. After the first-year 1873, the 1874 is the rarest proof Trade dollar produced through 1883. As with the preceding year, proofs of this type were not popular with collectors in 1874, and the survival of high-grade examples was more a matter of chance than deliberate numismatic activity. This is a lovely near-Gem whose shimmering fields would probably warrant a higher grade were it not for a few faint hairlines. Both sides are toned in creamy alabaster hues on the devices. An attractively original and boldly cameoed example that boasts a needle-sharp strike. Census: 20 in 64 Cameo (2 in 64+ Cameo), 12 finer (4/15).
Ex: Long Beach Signature (Heritage, 9/2005), lot 3817; Long Beach Signature (Heritage, 5/2009), lot 983. PCGS# 87054

1875 Trade Dollar, PR64 Cameo
Brilliant, Type One Reverse

4780 **1875 PR64 Cameo NGC.** A nicely reflective example, with moderate Cameo contrast on the well-detailed devices against mostly brilliant, mirrored fields. The 1875 date has an official proof mintage of 700 pieces, but David Bowers describes in his *Silver Dollars & Trade Dollars of the United States* how an additional 200 pieces (now counted as business strikes) may have been proofs, most likely of the Type One reverse demonstrated by this coin. Census: 26 in 64 Cameo (1 in 64+ Cameo), 16 finer (4/15). PCGS# 87055

1876 Trade Dollar, Bright PR63 Cameo

4781 **1876 PR63 Cameo PCGS.** Type One Obverse. Type Two Reverse. The proof 1876 Trade dollar had a fairly substantial mintage of 1,150 coins, but Cameo survivors are nonetheless elusive, regardless of numeric grade. This Select example displays frosty, sharply-rendered design elements set against deeply mirrored fields, while both sides show just a hint of light golden toning overall. A few light hairlines in the fields are all that preclude an even finer grade. Population: 35 in 63 (3 in 63+) Cameo, 32 finer (4/15). PCGS# 87056

4782 **1877 — Improperly Cleaned — NGC Details. Proof.** The motifs are fully struck and frosty, and the margins display apple-green and golden-brown toning. Careful rotation beneath a light reveals hairlines throughout the fields. Only 510 proofs were issued, the lowest proof mintage of the type excluding the non-collectible 1884 and 1885.
Ex: Long Beach Signature (Heritage, 6/2010), lot 891, which realized $1,610. NGC ID# 27YN, PCGS# 7057

1877 Trade Dollar, PR63 Cameo
Electric Peripheral Color

4783 **1877 PR63 Cameo PCGS.** Vivid, concentrically toned bands of gleaming azure and striking indigo draw the viewer's attention into the soft champagne centers where the sharply rendered design elements deliver stark contrast with the deeply mirrored fields. A few minor marks in the recesses limit the technical grade, but are not obtrusive to the unaided eye. Population: 16 in 63 Cameo, 26 finer (4/15). PCGS# 87057

1878 Trade Dollar, PR63 Cameo
Strongly Contrasted

4784 **1878 PR63 Cameo NGC.** Since the Philadelphia Mint had to concentrate on production of Morgan dollars stipulated by the Bland-Allison Act, the few proof Trade dollars coined early in the year were the only production of the design at that Mint. Meanwhile, the branch mints in Carson City and San Francisco had time to produced a quantity of Trade dollars while they waited for Morgan dollar dies to arrive from Philadelphia. This lovely Cameo proof has excellent contrast and only a hint of gold toning.
Ex: Houston Signature (Heritage, 11/2007), lot 60801. PCGS# 87058

1879 Trade Dollar, PR64
Rich, Multicolor Toning

4785 **1879 PR64 PCGS. CAC.** From a generous proof mintage of 1,541 pieces, this attractive Choice proof exhibits sharply detailed design elements throughout. The reflective surfaces are blanketed in vivid shades of greenish-gold, cerulean-blue, gray, and amber toning. A few minor hairlines explain the grade. PCGS has graded 62 numerically finer examples (5/15). NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR63 Cameo
Notable Eye Appeal

4786 **1879 PR63 Cameo NGC.** The year 1879 was the second of proof-only Trade dollar production at the Philadelphia Mint, and the first of no supplementary coinage at the branch mints, making the Trade dollar of this year the first true proof-only issue of the series, essential for a complete date set. The present piece displays bold devices amid deeply mirrored, minimally disturbed fields. A blanket of light golden toning adds a degree of warmth to each side. PCGS# 87059

4787 **1880 PR62 Cameo NGC.** Fully rendered design elements and stark white-on-black contrast delivers pronounced eye appeal for this deeply mirrored Cameo proof. Scattered hairlines in the fields limit the grade, but a faint golden glaze over each side is the chief draw on the viewer's eye. This piece will fit easily into a budget-friendly Cameo date set. PCGS# 87060

4788 **1882 PR61 PCGS.** Light blue-green and rich peach hues over impressively reflective surfaces. Boldly impressed but with significant hairlines on each side and scattered contacts in the reverse fields. NGC ID# 27YU, PCGS# 7062

1882 Trade Dollar, PR63 Cameo
Brilliant Throughout

4789 **1882 PR63 Cameo NGC.** A lovely proof with excellent cameo contrast on both sides. The surfaces are fully brilliant with minor hairlines on each side. The upper obverse has a thin line of flan lamination, somewhat unusual on these proof-only coins. Census: 25 in 63 Cameo (2 in 63+ Cameo), 88 finer (4/15).
Ex: Houston Signature (Heritage, 11/2007), lot 60813. PCGS# 87062

1882 Trade Dollar, PR64 Cameo
Deeply Mirrored Fields

4790 **1882 PR64 Cameo NGC.** Warm golden toning is deeper around the peripheries, leaving the central regions starkly contrasted with bold, frosty design elements and deep, glassy fields. A few faint hairlines in the recesses are all that preclude a full Gem grade assessment from NGC. Census: 40 in 64 Cameo (1 in 64+ Cameo, 1 in 64+★ Cameo), 48 finer (4/15). PCGS# 87062

4791 **1883 — Environmental Damage — ANACS. PR60 Details.** A well-struck specimen with moderately mirrored fields. Dusky tan-gold and steel-gray toning embraces both sides, although the left border displays ocean-blue. The reverse field is minutely granular, and the obverse field shows scattered trivial marks. A proof-only date with a mintage of only 979 pieces. NGC ID# 27YV, PCGS# 7063

1883 Trade Dollar, PR63 Cameo
Fully Struck

4792 **1883 PR63 Cameo PCGS.** Strongly mirrored fields surround the medium-contrasted motifs of this light golden proof, from the final year of public sales for proof Trade dollars. A proof-only mintage of 979 pieces brought a quiet end to the series, although in numismatic circles the surreptitious 1884 and 1885 issues (both extreme rarities and unofficial as far as the Mint was concerned) are much-discussed to this day. The present 1883 coin is fully struck and limited only by a few dark spots on the lower reverse and some minimal cloudiness where delicate hairlines gather. Population: 28 in 63 (1 in 63+) Cameo, 63 finer (4/15). PCGS# 87063

MORGAN DOLLARS

4793 **1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** Virtually brilliant, although the peripheries display wisps of sun-gold toning. This highly lustrous and crisply struck Gem has a well preserved reverse and only unimportant contact on the left obverse. PCGS# 133818 Base PCGS# 7072

4794 **1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** Peach-gold, cherry-red, and aquamarine toning adorns this lustrous and well-struck First Reverse silver dollar. Remarkably unabraded, although we note a spot on the reverse rim at 1:30. PCGS# 133818 Base PCGS# 7072

4795 **1878 7/8TF Doubled Legs, VAM-33A, MS65 PCGS. CAC.** This clean-cheeked Gem boasts booming luster and a bold strike. The well preserved surfaces offer light wheat-gold toning. Certified in a green label holder with a Weak tailfeathers designation. PCGS# 134032 Base PCGS# 7070

4796 **1878 7/8TF Strong, VAM-38, MS65 PCGS.** LIBERTY is widely die doubled, characteristic of VAM-38. A trace of gold toning visits the cheek of this otherwise brilliant Gem. Sharply struck and thoroughly lustrous with pleasing preservation.
Ex: FUN Signature (Heritage, 1/2007), lot 6839. PCGS# 134035 Base PCGS# 7078

4797 **1878 7TF Reverse of 1879 MS65 PCGS.** Both sides if this conditionally rare issue exhibit intense olive and gold toning over the entire surface, with underlying frosty luster. An exceptional attractive example and rare in finer grades with only 20 PCGS-certified examples above MS65 (5/15). NGC ID# 253L, PCGS# 7076

4798 **1878 7TF Reverse of 1879 MS65 PCGS. CAC.** The slanting top arrow feather identifies the Reverse of 1879. This attractive Gem displays sharply detailed design elements and vibrant mint luster on both sides, and the lightly toned surfaces are free of mentionable distractions. PCGS has graded 20 numerically finer examples (5/15). NGC ID# 253L, PCGS# 7076

4799 **1878 Reverse of 1879, VAM-203, Short Leaf MS65 NGC.** A Top 100 Variety. This Gem is among the finest VAM-203 representatives certified. Brilliant, frosty luster accentuates the universally clean surfaces, while the eagle's talons and the hair above Liberty's ear exhibit sharp delineation. An accurately graded and eye-appealing example of this elusive variety. PCGS# 133838 Base PCGS# 7076

4800 **1878-CC MS65 NGC.** True Gem surface quality is the hallmark of this first-year Carson City Morgan, accentuated by uninhibited, brilliant luster and thick, frosty texture. The design elements are boldly defined. NGC ID# 253M, PCGS# 7080

4801 **1878-CC MS65 NGC.** This Gem inaugural Carson City Morgan exhibits intense, frosty luster with just a trace of light golden color around the extreme outer periphery. The eagle's talons are weak, but the hair above Liberty's ear is fully rendered. A few minor ticks on the cheek are in line with the grade. NGC ID# 253M, PCGS# 7080

4802 **1878-CC MS65 PCGS.** Both sides of this attractive first-year Gem exhibit vivid shades of greenish-gold and lavender toning, with considerable prooflike reflectivity under the patina. The design elements are sharply detailed and the surfaces are well-preserved. NGC ID# 253M, PCGS# 7080

4803 **1878-CC MS65 PCGS.** Despite the usual central weakness over Liberty's ear and on the eagle's breast, this highly attractive Gem exhibits excellent eye appeal. Both sides are fully brilliant, lustrous, and untoned. NGC ID# 253M, PCGS# 7080

4804 **1878-CC MS65+ NGC.** Copper-red and peach-gold colors dominate the obverse, surrounded by a thin frame of ruby-red, teal, and steel-blue toning. Mint luster shines brightly through the the dramatic and attractive patina. The reverse shares the same color scheme, but the toning resides mainly on the margins around the satiny silver center. Any marks are well-disguised by the toning, with only minor abrasions visible with a glass. The strike on this high-end Carson City Gem is razor-sharp throughout. NGC ID# 253M, PCGS# 7080

4805 **1878-CC MS65+ PCGS.** Remarkable autumn-brown, powder-blue, and lilac toning endows the entirety of the reverse. The obverse is brilliant, and both sides are thoroughly lustrous and well-struck. An exceptional Gem of the popular introductory Carson City issue. NGC ID# 253M, PCGS# 7080

4806 **1878-CC MS65 PCGS. CAC.** This Gem Carson City Morgan displays consistent frost-white luster and is boldly rendered on the eagle's breast and the hair above Liberty's ear. Subtle contact on Liberty's cheek precludes a finer grade, but the overall quality is fully gratifying for the MS65 level. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66
Intensely Radiant Luster

4807 **1878-CC MS66 NGC.** A shining Premium Gem representative of this desirable initial Carson City Morgan dollar issue. The portrait is lightly frosted with precise detail, qualities taken even further by the reverse. The centers are largely brilliant, and the rims show a faint whisper of pale champagne patina. NGC has graded just 10 coins numerically finer pieces (4/15).
Ex: Long Beach Signature (Heritage, 2/2009), lot 1671. NGC ID# 253M, PCGS# 7080

4808 **1878-CC MS64 Deep Mirror Prooflike NGC. VAM-2A.** Attractive peach-gold and cherry-red adorn the margins of this flashy and nicely struck Choice Carson City dollar. Occasional small marks decide the grade, but the cheek is generally smooth. Housed in a former generation holder. NGC ID# 253M, PCGS# 97081

4809 **1878-S MS64 Deep Mirror Prooflike NGC.** This first-year Branch mint Morgan dollar exhibits razor-sharp definition on the frosty design elements and deeply reflective fields with dramatic cameo contrast. NGC has graded 29 numerically finer examples (5/15). NGC ID# 253R, PCGS# 97083

4810 **1879-O MS63 Deep Mirror Prooflike NGC.** Scattered abrasions are of little concern on this 1879-O Morgan, as the stark contrast between the frosty devices and the fully mirrored fields in and of itself is enough to garner a second look from the casual observer. Bold design elements are another visual attribute that is seldom encountered on this challenging New Orleans issue. This piece centrally brilliant, with warm orange-gold peripheral toning. Census: 25 in 63 (1 in 63 ★) Deep Mirror Prooflike, 26 finer (5/15). NGC ID# 253V, PCGS# 97091

4811 **1879-S Reverse of 1878 MS64 PCGS.** This boldly struck, brilliant example reveals just a few too many small grazes on Liberty's cheek to warrant a full Gem grade, although the eye appeal is comparable. Semiprooflike fields and frosty devices exhibit radiant luster. The 1879-S Reverse of 1878 Morgan is challenging in this grade, and is particularly scarce finer. NGC ID# 253W, PCGS# 7094

4812 **1879-S Reverse of 1878, VAM-9, MS64 NGC.** A Top 100 Variety. Light butter-gold toning visits the margins of this lustrous and well-struck Choice silver dollar. The 1879-S has a mintage exceeding nine million pieces, but most exhibit a Third Reverse with a slanted upper tailfeather. The Second Reverse, which has a parallel upper tailfeather, is comparatively scarce. PCGS# 133858 Base PCGS# 7094

4813 **1879-S Reverse of 1878, VAM-9, MS64 NGC.** A Top 100 Variety. The 1879-S Third Reverse is plentiful, but the '79-S Second Reverse with a parallel upper tail feather is scarce. This lustrous and snow-white Choice dollar is boldly struck and exhibits scattered inoffensive abrasions. PCGS# 133858 Base PCGS# 7094

4814 **1879-S Reverse of 1878, VAM-42, MS64 PCGS.** A Top 100 Variety. A tiny die chip between the TY in LIBERTY is a pick-up point for VAM-42, a member of the popular Second Reverse subtype. The present well-struck near-Gem displays blue-green, stone-gray, and peach-gold obverse toning. The lustrous reverse remains brilliant. PCGS# 133863 Base PCGS# 7094

4815 **1879 Reverse of 1878, VAM-46, MS64 NGC.** A Top 100 Variety. This fully struck near-Gem is virtually brilliant, although the borders display traces of golden patina. The obverse has vibrant cartwheel luster, and the reverse is semiprooflike. Minor contact on Liberty's chin and lower neck decides the grade. PCGS# 133865 Base PCGS# 7094

4816 **1879-S Reverse of 1878, VAM-52, MS63 Prooflike ANACS.** A Top 100 Variety. Die lines on the right (facing) wing and a die chip between the TY in LIBERTY are the best-known markers for VAM-52. This Second Reverse silver dollar is mostly brilliant but exhibits orange-red and cobalt-blue borders. Lustrous and well-struck with wispy to moderate contact on the portrait. PCGS# 41001 Base PCGS# 7095

4817 **1879-S MS67+ PCGS.** The technical quality of this stand-out Morgan is accentuated by unusually sharp detail not only on the hair above Liberty's ear, but also on the eagle's talons, which are seldom seen delineated. Just a trace of golden color complements the reflective semiprooflike fields, and the overall eye appeal is supreme. NGC ID# 253X, PCGS# 7092

4818 **1880 MS65+ PCGS.** A fully brilliant Gem with the important PCGS Plus designation, this lovely Morgan dollar has satiny silver luster and shows fully rendered design elements. This Philadelphia issue is seldom available in finer grades. NGC ID# 253Y, PCGS# 7096

4819 **1880 MS66 PCGS.** This Premium Gem 1880 Morgan is well-struck and carefully preserved, but the hallmark visual attribute is by far the semiprooflike mirroring that accentuates the clean fields. A glaze of light golden toning further contributes to the eye appeal. None are numerically finer at either service (5/15). NGC ID# 253Y, PCGS# 7096

1880 Morgan Dollar, MS66+ Tied for Finest Certified

4820 **1880 MS66+ PCGS.** This Plus-designated Premium Gem is tied for the finest 1880 Morgan dollar certified, with no Superb Gem representatives seen by either service (5/15). The satiny surfaces are highly lustrous and almost devoid of blemishes. A faint golden hue is deepest along the lower-right reverse border. Some of the usual striking weakness is seen on the highest points of the eagle's breast and the hair above Liberty's ear. NGC ID# 253Y, PCGS# 7096

4821 **1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety, showing the bold remnants of an underlying 79 beneath the 80 in the date. This frosty Gem example is well-struck, with consistently smooth, brilliant surfaces. A few minor disturbances on the cheek limit the grade. PCGS# 133876 Base PCGS# 7108

1880/79-CC Dollar, MS66 VAM-4, Reverse of 1878

4822 **1880/79-CC Reverse of 1878, VAM-4, MS66 NGC.** A Top 100 Variety. NGC has certified this high grade dollar simply as "1880-CC Reverse of 1878," which implies VAM-7, but the present coin is instead VAM-4, well known for its prominent overdate. The lustrous and carefully preserved surfaces are minimally toned aside from a tiny spot on the right (facing) wing. PCGS# 133876 Base PCGS# 7108

4823 **1880-CC 8 Over Low 7, VAM-6, MS65+ PCGS. CAC.** A Top 100 Variety. It is difficult to believe that the VAM-6 underdigit 7 was not discovered until 1964, but it is true that most of the '80-CC dollars in today's market were secured in Treasury vaults until the 1970s. The present lustrous Gem shows light gold toning and unabraded fields. PCGS# 133878 Base PCGS# 7104

4824 **1880-CC 8 Over Low 7, VAM-6, MS66 NGC.** A Top 100 Variety. The variety and overdate are undesignated on the NGC holder. Each side is mostly untoned on this lustrous and nicely struck Carson City dollar. Minor facial grazes are of little import. Several overdate VAMs are known for 1880-dated Morgan dollars, but the 1880-CC VAM-4 through VAM-6 are the most prominent.
Ex: Dallas Signature (Heritage, 10/2009), lot 927; Long Beach Signature (Heritage, 2/2010), lot 527. PCGS# 133878 Base PCGS# 7104

1880-CC Dollar, MS66 Prooflike 8 Over Low 7, VAM-6, Top 100

4825 **1880-CC 8 Over Low 7, VAM-6, MS66 Prooflike NGC.** A Top 100 Variety. This brilliant Premium Gem has frosty devices and prominently mirrored fields. The central strike is above average for the issue. The 1880-CC is the source of the three most obvious overdates in the Morgan dollar series, VAMs 4, 5, and 6. Census: 2 in 66 Prooflike, none finer (4/15).
Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 1224, which realized $3,450. PCGS# 41135 Base PCGS# 7105

4826 **1880-CC 8/7, Reverse of 1878, VAM-7A, MS65 PCGS.** A Hit List 40 Variety. The heavily clashed, late die state variant of VAM-7. A bold strike is accentuated by crisp, brilliant mint frost over each side. A few minor ticks on Liberty's cheek appear to be all that limit the grade. PCGS# 134049 Base PCGS# 7110

4827 **1880-CC MS65+ NGC. VAM-3.** Light gold toning adorns this lustrous Carson City dollar. The fields are smooth and the portrait shows only wispy contact. The hair above the ear shows softness but the remainder of the strike is good. NGC ID# 2542, PCGS# 7100

4828 **1880-CC MS66 NGC. VAM-3A.** Dash under 8. A thick blanket of undeniably original frost glows from the surfaces of this essentially brilliant, well-struck Carson City Morgan. Liberty's cheek is attractively clean, and only a few faint disruptions in the left obverse field preclude an even finer grade. NGC has seen just 22 numerically finer representatives (4/15). NGC ID# 2542, PCGS# 7100

4829 **1880-CC MS66 PCGS.** An attractive Premium Gem example of a non-overdated 1880-CC dollar. The obverse is beautifully toned in shades of vivid-blue, violet, and raw-umber colors around pale peach-gold central devices. The reverse is nearly untoned save for faint ivory-gold overtones. High point softness on the above-the-ear hair strands and at the eagle's talons is of minor concern given the overall eye appeal of this desirable Carson City dollar. PCGS shows just 31 numerically finer pieces (4/15). NGC ID# 2542, PCGS# 7100

1880-CC VAM-8 Dollar, MS66+ Low-Mintage Carson City Issue

4830 **1880-CC MS66+ PCGS. VAM-8.** A broad arc of apple-green, orange-gold, and navy-blue toning endows much of the obverse. The reverse displays only a wisp of tan toning. A lustrous example of this lower mintage Carson City issue. The reverse is splendidly preserved and the obverse shows only moderate grazes. NGC ID# 2542, PCGS# 7100

4831 **1880-O MS64 PCGS.** Ex: Larry Shapiro. Medium O. Wisps of golden-tan preclude full brilliance, but this crisply struck and lustrous near-Gem is splendidly preserved aside from a solitary mark on the left obverse field.
Ex: Long Beach Signature (Heritage, 2/2001), lot 6253; Dallas Signature (Heritage, 11/2007), lot 1059. NGC ID# 2543, PCGS# 7114

1880-O Silver Dollar, MS64+
Conditionally Rare Issue

4832 **1880-O MS64+ PCGS. CAC.** Small or Micro O. The 1880-O is noted for its rarity at the MS65 level. Although the present piece does not quite attain that lofty grade, it is a boldly struck and lustrous near-Gem with delicate straw-gold toning. The reverse is well preserved, and the cheek is also smooth. The obverse field displays minor grazes. NGC ID# 2543, PCGS# 7114

1880-O Dollar, MS64+
Conditionally Rare O-Mint

4833 **1880-O MS64+ PCGS. CAC.** Small or Micro O. Fully struck and brilliant with a clean cheek and only a couple of minor field marks. The VAM is undetermined, but a horizontal die scratch in Liberty's forehead curl may be of interest to the specialist. The 1880-O becomes surprisingly rare above the MS64 level. NGC ID# 2543, PCGS# 7114

4834 **1880-O MS63 Deep Mirror Prooflike PCGS. CAC.** Oval O. Remarkable field reflectivity, icy devices, and brilliant surfaces combine to provide impressive cameo contrast. A well-struck and moderately bagmarked New Orleans silver dollar. NGC ID# 2543, PCGS# 97115

4835 **1880-S MS67+ PCGS. CAC.** This CAC-endorsed Superb Gem exhibits profound eye appeal with sharp, frosty devices and radiant fields. The strike is bold, and just a single disruption in the left obverse field appears to determine the grade. Brilliant in the centers, with amber and sea-green toning around the peripheries. NGC ID# 2544, PCGS# 7118

4836 **1880-S MS67 Prooflike PCGS. CAC.** Medium S. A stone-white Superb Gem that boasts mirrored fields and frosty motifs. The cheek and fields are exceptionally smooth, and the eagle's breast shows only indistinct contact. NGC ID# 2544, PCGS# 7119

4837 **1880/9-S VAM-11 MS67 PCGS. CAC.** A Hot 50 Variety. James Cornish is recognized as the discoverer of VAM-11, which displays remnants of a possible underdigit in the upper half of the loop of the 0. Lightly toned and thoroughly lustrous. Pristine aside from minor contact beneath GOD. PCGS# 133988 Base PCGS# 7122

4838 **1881 MS66 PCGS.** Peach-red and blue-green toning endows both sides, more prominently on the obverse. Sharply struck and lustrous with only minor facial grazes. The dies are noticeably rotated counter-clockwise, unusual for the series. NGC ID# 2546, PCGS# 7124

4839 **1881 MS66 PCGS.** Sea-green, lilac, and ice-blue toning fills the central obverse. The borders offer peach-gold and aquamarine patina. The reverse field and eagle remain brilliant. A well-struck and lustrous type representative. NGC ID# 2546, PCGS# 7124

4840 **1881-CC MS66 PCGS.** The 1881-CC is well-known for its high production quality and ready availability despite a low mintage of just 296,000 pieces. This example is visually arresting, with semiprooflike fields and densely frosted central devices. Untoned except for dual blazes of golden-brown toning in Liberty's hair strands. A few shallow marks in the left obverse field are the sole abrasions to mention, and they are minor. The strike is full. NGC ID# 2547, PCGS# 7126

4841 **1881-CC MS66 PCGS.** This is a sharply struck example of this popular Carson City issue, exhibiting the most modest hint of amber haze just beginning to emerge upon superb surfaces of satiny frost.
Ex: Long Beach Signature (Heritage, 9/2006), lot 5036. NGC ID# 2547, PCGS# 7126

4842 **1881-CC MS66 PCGS Secure. VAM-2.** A glimpse of peach toning adorns the obverse periphery at 7:30, but this high grade Carson City type coin is otherwise brilliant. Lustrous and crisply struck with unmarked fields and only minor facial grazes. NGC ID# 2547, PCGS# 7126

4843 **1881-CC MS66+ NGC. VAM-2.** Both 8s show die fill within the upper loops. An intricately struck and high grade representative of this low mintage and popular Carson City issue. Lustrous and brilliant with exemplary surfaces. NGC ID# 2547, PCGS# 7126

4844 **1881-CC MS66+ PCGS. CAC.** An extraordinary Premium Gem that features the all-important PCGS Plus designation, along with the CAC green approval sticker. This frosty Morgan dollar has brilliant silver surfaces with no toning on either side. NGC ID# 2547, PCGS# 7126

1881-CC VAM-2 Dollar, MS67
Uncommon Preservation

4845 **1881-CC MS67 NGC. VAM-2.** This well-struck Superb Gem has booming luster and wisp of tan toning at the centers. The fields are virtually pristine, as is the sweet spot of the cheek. A popular and low mintage Carson City issue, made collectible in better grades by the disbursement of the GSA holdings during the 1970s. Only a few examples are certified finer. NGC ID# 2547, PCGS# 7126

1881-CC Morgan, MS65+ Deep Mirror Prooflike Full Cameo Contrast

4846 **1881-CC MS65+ Deep Mirror Prooflike PCGS.** Significant cameo contrast is the hallmark visual attribute of this high-end Gem 1881-CC Morgan, accentuated by a light golden hue that exudes inward from the peripheries. The coin is well-struck and there are only a few faint grazes on the cheek to limit the grade. PCGS has seen 52 finer Deep Mirror Prooflike examples (5/15). NGC ID# 2547, PCGS# 97127

4847 **1881-O MS65 PCGS.** Seldom available without bagmarks, this vibrantly lustrous, untoned Gem is an exception. A few field ticks are visible to the left of Liberty's profile and above the eagle's head, but they are exceedingly minor and well within the tolerance of the MS65 designation. An essentially full strike covers both sides of the coin including above Liberty's ear. Just 26 pieces are grade numerically finer by PCGS (4/15). NGC ID# 2548, PCGS# 7128

4848 **1882 MS66 PCGS.** With a high mintage of more than 11 million pieces, the 1882 silver dollars nevertheless present a challenge to collectors. Die wear and bagmarking are the main culprits, making cherrypicking a must. The lucky bidder who plucks this amazingly toned Premium Gem gets the best of all worlds: fantastic two-sided toning and nearly blemish-free surfaces. Colors range from fuscia-pink and ruby-red to forest-green and lemon-gold. PCGS has certified a mere nine numerically finer pieces (4/15). NGC ID# 254A, PCGS# 7132

4849 **1882 MS66 PCGS.** The obverse of this frosty Premium Gem is essentially brilliant, although the reverse is enlivened by a half-and-half toning pattern that shows soft tan-gold and powder-blue hues on the right and vivid crimson, olive, and forest-green on the left. The coin is well-struck and equally preserved. Only nine coins are numerically finer at PCGS (5/15). NGC ID# 254A, PCGS# 7132

4850 **1882-CC MS66+ PCGS. CAC.** This is a distinctly attractive example of this obtainable Carson City issue, with a marbled rainbow toning palette over the obverse that catches the eye from a distance. The reverse is brilliant and here the semiprooflike fields are uninhibited and the pristine surfaces are fully revealed. A bold strike passes close scrutiny with a glass. NGC ID# 254B, PCGS# 7134

1882-CC Morgan, Untoned MS66+ Prooflike

4851 **1882-CC MS66+ Prooflike PCGS. CAC.** The devices feature intense mint frost and a decent strike, contrasted against highly reflective fields with no mentionable toning on either side, showing a remarkable silver-on-black contrast so desired among collectors of Prooflike Morgan dollars. A small patch of scrapes appears under Liberty's chin, and one under star 13. Population: 91 in 66 (6 in 66+) Prooflike, 1 finer (5/15). NGC ID# 254B, PCGS# 7135

4852 **1882-S MS67 Prooflike NGC.** The 1882-S Morgan is a favorite issue in the series for type purposes due to its frequently strong eye appeal. This example is indeed bold, with beautifully preserved Prooflike fields and just a hint of light golden toning overall. Census: 20 in 67 (2 in 67 ★) Prooflike, 0 finer (4/15). NGC ID# 254F, PCGS# 7141

4853 **1883 MS67 PCGS.** The 1883 Morgan dollar is scarce in MS67 condition and very rare in finer grades. This delightful Superb Gem is sharply detailed and lustrous, with impeccably preserved surfaces. PCGS has graded three numerically finer examples (5/15). NGC ID# 254G, PCGS# 7142

4854 **1883-CC MS65 Deep Mirror Prooflike NGC.** Vivid shades of greenish-gold and hints of lilac toning visit the well-preserved surfaces of this impressive Gem. The design elements are sharply detailed and frosty, while the fields are deeply reflective. NGC has graded 41 numerically finer examples (5/15). NGC ID# 254H, PCGS# 97145

4855 **1883-CC MS65 Deep Mirror Prooflike PCGS. VAM-8A.** A well-struck Carson City Gem. The mirrored fields are minimally toned and display only inconsequential contact. Liberty's cheek and neck are also smooth. VAM-8A is interesting for its bold clash marks near the lip and neck of Liberty. NGC ID# 254H, PCGS# 97145

1883-O Morgan Dollar, MS67 None Finer

4856 **1883-O MS67 NGC.** The high availability of lower-grade 1883-O dollars keeps the market value of the few known Superb Gems at a reasonable level that is not completely reflective of their scarcity. This representative is from an infrequently seen group of coins that are the finest certified of the date. Both sides exhibit profoundly frosted, vibrant luster, much stronger than is typically seen on New Orleans issues. Trivial incompleteness on the hair immediately above Liberty's ear is not distracting. The luster is brilliant and devoid of mentionable flaws. Census: 39 in 67 (3 in 67 ★), 0 finer (4/15). NGC ID# 254J, PCGS# 7146

4857 **1883-S MS61 NGC.** A challenging issue in Mint State, the 1883-S Morgan was released into circulation in large quantities in the 19th century. This piece is well-detailed, with just a hint of light golden color over satiny luster. Light chatter in the exposed areas limits the grade. NGC ID# 254K, PCGS# 7148

4858 **1883-S MS62 PCGS.** This is a frosty, sharply defined Mint State example of this conditionally elusive San Francisco issue. A light overlay of golden toning attests to the originality of the surfaces, even while light, scattered abrasions limit the grade. NGC ID# 254K, PCGS# 7148

4859 **1883-S MS63 NGC.** A pleasing Select specimen, with sharply detailed design elements and frosty mint luster, under shades of greenish-gold and lavender patina. A few roller marks in the lower right obverse field are the only flaws of note. NGC ID# 254K, PCGS# 7148

4860 **1883-S MS63+ NGC.** The 1883-S Morgan dollar issue is the higher Mint State grades is close to the top of many a collector's want list. Generous luster sweeps each side of this attractive piece, largely untoned but with a trace of pinkish patina on each side. A few reeding marks on Liberty account for the grade, along with a few larger marks on the eagle's left (facing) wing and breast. An attractive coin despite the abrasions. NGC ID# 254K, PCGS# 7148

4861 **1884-CC MS66+ PCGS. VAM-2.** The 1 in the date is repunched. Attractive peach-gold and aquamarine toning embraces the borders of this lustrous and high grade Carson City type coin. Faint parallel roller marks on Liberty's cheek and the eagle's breast are strictly of mint origin. NGC ID# 254M, PCGS# 7152

4862 **1884-CC MS66+ PCGS. CAC. VAM-2.** The 18 in the date exhibit repunching. An essentially brilliant silver dollar that boasts booming luster and pleasing surfaces. The strike is sharp and the eye appeal is blatant. An ideal Carson City type coin. NGC ID# 254M, PCGS# 7152

4863 **1884-CC MS66+ PCGS. CAC. VAM-4A.** One of several interesting 1884-CC die marriages, VAM-4 has a repunched 1 in the date and a "pinned wing gouge" on the left border of the right (facing) wing. Nicely struck and highly lustrous with faint chestnut toning and infrequent minor grazes. NGC ID# 254M, PCGS# 7152

1884-CC Silver Dollar, MS67
Naturally Toned and Lustrous

4864 **1884-CC MS67 NGC.** With nearly 85 percent of the original mintage preserved in Treasury vaults until the 1970s, the 1884-CC Morgan dollar's availability in high grades is among the greatest in the Carson City short set. Nonetheless, demand for Superb Gems continues to rise, and the occasional appearance of a such a piece at auction is met with rich enthusiasm. This delicately preserved coin displays vibrant luster and bold design elements. The obverse casts shades of pale amber and peach amid deeper grass-green overtones, while the reverse shows just a blush of pale champagne toning originating from the lower-left periphery. Close study with a lens finds Liberty's cheek pleasantly clean beneath the patina. Only a single numerically finer piece is listed at NGC (4/15). NGC ID# 254M, PCGS# 7152

1884-CC Dollar, Blazing Superb Gem
Only Four Coins Rated Higher at PCGS

4865 **1884-CC MS67 PCGS.** Vast quantities of Uncirculated 1884-CC dollars were dispersed from the Treasury during the GSA release of the 1970s, making this one of the most plentiful of the CC issues. Examples are available, though scarce, even in this high grade, but finer coins are practically unobtainable: PCGS has seen only three numerically finer examples, and there is just a single higher-rated coin at NGC (5/15). This blazing, fully brilliant representative exhibits radiant luster and boldly defined design features. Nearly perfect. NGC ID# 254M, PCGS# 7152

4866 **1884-CC MS65 Deep Mirror Prooflike NGC.** Full cameo contrast endorses the Deep Prooflike designation from NGC. The strike is well-executed and only a few trivial ticks are discernible on each side. Essentially brilliant, save for a faint hint of light golden color overall. The 1884-CC Morgan is one of the most available dates in the Carson City short set, but it is less often seen in Deep Prooflike grades. NGC ID# 254M, PCGS# 97153

4867 **1884-CC MS65 Deep Mirror Prooflike PCGS.** A delightful visual display on each side of this Gem 1884-CC Morgan consists of stark cameo contrast accentuated by warm golden toning that exudes inward from the peripheries. The strike is sharp and there are no distracting abrasions. This Carson City issue was well-represented in the GSA sales of the early 1970s, but only limited numbers of high-grade examples are known in the Deep Mirror Prooflike category. NGC ID# 254M, PCGS# 97153

4868 **1884-CC MS66 Deep Mirror Prooflike PCGS.** A gorgeous Premium Gem example, the untoned silver-white surfaces serve to emphasize the blatant contrast present between the snow-white devices and midnight-black fields. A few roller marks appear on the lower cheek, as made, and a couple of thin scrapes occur in the same area. PCGS shows three numerically finer pieces in the Deep Mirror Prooflike category (4/15). NGC ID# 254M, PCGS# 97153

4869 **1884-O MS67 NGC.** This is a delightful coin for the collector who appreciates deeply toned Morgan dollars. Both sides exhibit well-balanced multicolor hues which include mint-gold, turquoise, indigo, and amber-gold. Frosty luster shines through. Some of the usual striking weakness is noted on the eagle's breast and the hair above Liberty's ear. NGC and PCGS have each seen only a single numerically finer representative (4/15). NGC ID# 254N, PCGS# 7154

4870 **1884-O MS67 PCGS.** A vivid canopy of rainbow toning forms a crescent of color from 9 o'clock to 2 o'clock on the reverse, while the entire obverse and the remainder of the reverse are frosty and brilliant-white. A full strike confirms the Superb Gem status of this smoothly lustrous dollar. There are no abrasions to report or bothersome bagmarks. Rather, a pair of tiny dark dots — one below the P of PLURIBUS, and the other in front of Liberty's eye — are the only pinhead-sized blemishes. Just one coin is certified numerically finer by PCGS (4/15). NGC ID# 254N, PCGS# 7154

4871 **1884-S AU58 PCGS.** Despite a nominal mintage of 3.2 million pieces, the 1884-S Morgan dollar is a challenging issue in high grade. This attractive near-Mint example shows just a trace of high-point wear and the lightly abraded surfaces display shades of gold, lavender, and violet toning. NGC ID# 254P, PCGS# 7156

4872 **1884-S AU58 NGC.** Just a breath away from Mint State, this light golden 1884-S dollar displays substantial luster in the fields and sharp central devices, with just trivial friction over the highest points of the design. No significant abrasions are observed. NGC ID# 254P, PCGS# 7156

4873 **1884-S AU58 PCGS.** Only a hint of light golden toning accents the vibrant, satiny surfaces of this nearly Uncirculated 1884-S dollar. A few small abrasions on the cheek accompany trivial wear over the high points of the design, although the overall eye appeal is excellent for the AU58 grade level. NGC ID# 254P, PCGS# 7156

4874 **1884-S AU58 PCGS. CAC.** Substantial luster rolls over each side of this nearly Uncirculated 1884-S, and an additional light golden glow attests to the originality of the surfaces. This piece shows only trivial friction over the high points of the design and in the exposed regions of the fields. NGC ID# 254P, PCGS# 7156

1885 Morgan Dollar, MS66 Deep Mirror Prooflike Surfaces

4875 **1885 MS66 Deep Mirror Prooflike PCGS.** The 1885 Morgan dollar was produced in large numbers, some from polished prooflike dies, like the present coin. This delightful Premium Gem exhibits sharply detailed design elements with a frosty texture that contrasts dramatically with the deeply reflective fields. Population: 83 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (5/15). NGC ID# 254R, PCGS# 97159

1885 Morgan Dollar MS66 Deep Mirror Prooflike

4876 **1885 MS66 Deep Mirror Prooflike PCGS.** Ex: Naples II. The only suggestion of color on this amazing Premium Gem occurs at the upper obverse, where specks of golden-russet toning paint the letters in PLURIBUS. The remaining surfaces are fully brilliant and starkly contrasted. Nearly fully struck with the slightest bit of softness over Liberty's ear. A few inconsequential grazes are noted on Liberty's cheek. Population: 83 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (5/15). NGC ID# 254R, PCGS# 97159

4877 **1885-CC MS66 PCGS.** The 1885-CC is a favorite Morgan dollar issue, despite being moderately plentiful following the GSA sales of the early '70s. This Premium Gem is brilliant and frosty, with sharp motifs and a noticeable lack of singularly bothersome surface impairments. NGC ID# 254S, PCGS# 7160

4878 **1885-CC Doubled Dash, VAM-4, MS65 PCGS.** A Hot 50 Variety. A brilliant and thoroughly lustrous Gem. Sharply struck and well preserved. Any 1885-CC is popular for its low mintage and Carson City mintmark, but VAM-4 is particularly coveted due to the large "dash" below the second 8 in the date. PCGS# 133999 Base PCGS# 7160

4879 **1885-S MS65 PCGS. CAC.** This spectacular Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved, mostly brilliant surfaces show just a hint of golden-tan toning. PCGS has graded 41 numerically finer examples (5/15). NGC ID# 254U, PCGS# 7164

4880 **1886 MS67+ PCGS. CAC.** A common date, but hardly available this fine. This Superb Gem 1886 Morgan showcases seemingly flawless, brilliant surfaces that are fully deserving of the coveted Plus designation. Satiny luster is uninhibited. Only six coins are numerically finer at PCGS (5/15). NGC ID# 254V, PCGS# 7166

4881 **1886-O MS61 NGC.** Dusky golden toning graces each side of this satiny Mint State example. Light chatter on the cheek limits the grade, but there are no individually distracting abrasions. The 1886-O is one of many issues in the Morgan dollar series that are available in circulated grades but elusive in Mint State. NGC ID# 254W, PCGS# 7168

4882 **1886-O MS61 PCGS.** As the grade implies, trivial surface marks appear on both sides, although none stand out singularly. Both sides are fully brilliant and untoned with frosty silver luster. Despite a mintage of more than 10 million examples, the 1886-O is seldom encountered in Mint State grades. NGC ID# 254W, PCGS# 7168

4883 **1886-O MS62 PCGS.** This piece displays deep golden-gray toning over much of each side, with more vivid navy-blue and amber hues evident around portions of the peripheries. Some typical striking softness is evident on the eagle's breast and the hair above Liberty's ear, while several small abrasions on the cheek limit the technical grade. NGC ID# 254W, PCGS# 7168

4884 **1886-O MS62 PCGS.** The luster on this brilliant 1886-O Morgan is unusually vibrant and frosty for the issue, and the corresponding eye appeal is uncommonly pleasing for the MS62 grade. Well-struck, with a light scattering of minor abrasions over each side. NGC ID# 254W, PCGS# 7168

1886-O Silver Dollar, MS63 Victim of the Pittman Act Melts

4885 **1886-O MS63 NGC.** The technical quality of this New Orleans issue is typically limited by poor luster and moderate bagmarks. Moreover, a significant portion of the more than 10.7 million-coin mintage was released into circulation in the 19th century, and still more pieces were melted under the terms of the 1918 Pittman Act. This Select Mint State piece is representative of a seldom seen grade. The obverse exhibits lightly mottled aquamarine and amber-gold toning, while the reverse shows more uniform champagne color. The eagle's breast and the hair above Liberty's ear show minor striking weakness, as usual. NGC ID# 254W, PCGS# 7168

1886-O Dollar, MS63
Sharply Struck for the Issue

4886 **1886-O MS63 PCGS. CAC.** This New Orleans issue had a high mintage of 10.7 million pieces, yet it is the one of the most challenging issues among all O-mint Morgan dollars, especially in Uncirculated grades above MS62. This example is exceptionally struck for an 1886-O with nearly full definition everywhere except on the hair curls above Liberty's ear. Shimmering, satiny mint luster illuminates lightly marked surfaces that display variegated pastel colors across each side. NGC ID# 254W, PCGS# 7168

4887 **1886-S/S VAM-2 MS65 NGC.** A Top 100 Variety. The serifs of the mintmark are repunched. The most popular VAM of this better San Francisco issue. The variety is undesignated on the holder. Rich lavender-red and cobalt-blue patina consumes the obverse of this lustrous and well-struck silver dollar. The reverse is brilliant save for a peripheral band of golden-brown. PCGS# 133906 Base PCGS# 7170

4888 **1887 Doubled Date, VAM-5, MS66+ PCGS. CAC.** A Top 100 Variety. The date was initially entered with a downward slant, then corrected. Remnants of the initial logotype are apparent below the flag of the 7 and within the upper loop of the second 8. An essentially pristine example with a hint of golden patina and an intricate strike. PCGS# 133909 Base PCGS# 7172

4889 **1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The remnant of an underlying 6 is seen to the right of the base of the 7 in the date. This Select example shows frosty luster with just a hint of light golden color. Technical quality appears slightly finer than the MS63 level, but considerable striking deficiency in the centers likely contributes to the grade. PCGS# 133912 Base PCGS# 7178

4890 **1887-O MS65 PCGS.** This issue remains plentiful through the Gem grade level. However, it is rare in finer grades, with only 10 PCGS-certified examples above MS65 (5/15). The present piece has brilliant silver luster with untoned, satin surfaces. NGC ID# 2552, PCGS# 7176

4891 **1888-O MS66 PCGS. CAC.** A brilliant-white Premium Gem — sharply struck for this New Orleans date, with blazing cartwheel luster. The frosty surfaces show only minor grazes and present an attractive, vibrant appeal normally missing for the issue. Faint roller marks over the ear are visible with a glass but do not detract from the Mint-fresh appeal of this CAC-endorsed dollar. PCGS has not graded a numerically finer example (4/15). NGC ID# 2556, PCGS# 7184

1888-O Silver Dollar
MS65 Deep Mirror Prooflike

4892 **1888-O MS65 Deep Mirror Prooflike PCGS.** Only a glimpse of golden toning visits this fully struck and lustrous Gem. The cheek and fields are refreshingly free from abrasions. A couple of tiny ticks behind the mouth and on the base of the jaw do not begin to challenge the grade. Housed in an old green-label holder. Population: 61 in 65 Deep Mirror Prooflike, 4 finer (5/15). NGC ID# 2556, PCGS# 97185

4893 **1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 NGC.** A Top 100 Variety. Liberty's profile is strongly die doubled. Peach-red toning graces the reverse periphery, but the remainder of this lustrous example is stone-white. Distributed unimportant marks do not deny the impressive eye appeal. Census: 52 in 55, 23 finer (4/15). PCGS# 133919 Base PCGS# 7308

4894 **1889-CC — Cleaning — PCGS Genuine. XF Details.** A lightly circulated example of this key Carson City issue, with strong detail for the grade. Lightly cleaned in the past, the surfaces have since retoned consistent olive-gray color. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Original XF45

4895 **1889-CC XF45 NGC.** Fully original surfaces are the hallmark of this lightly circulated 1889-CC Morgan. Hints of luster glow in the peripheral recesses while each side is blanketed in warm golden toning with crescents of deeper aquamarine evident along the lower-right obverse and upper-right reverse peripheries. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, Untoned XF45

4896 **1889-CC XF45 PCGS.** Untoned silver-gray surfaces show consistent wear with the grade but no major abrasions on this Choice XF key-date Morgan dollar. This a nice collector-grade example of this last Carson City key, far finer than most certified survivors while avoiding the pricey Mint State grade levels. NGC ID# 2559, PCGS# 7190

4897 **1889-CC — Reverse Rim Damage — NGC Details. AU.** The only complaint on this key Carson City Morgan is a pair of rim bruises on the reverse, one at 1 o'clock and the other at 5 o'clock; neither is particularly detracting, and substantial remaining mint luster is the chief draw on the viewer's eye. Well-struck, with light lavender-gold toning. NGC ID# 2559, PCGS# 7190

4898 **1889-CC — Cleaning — PCGS Genuine. AU Details.** Pale golden-gray toning blankets both sides of this lightly cleaned but still-pleasing 1889-CC Morgan. Only a brush of actual wear is observed on the hair above Liberty's ear, although a heavy reed mark is seen behind the eye. NGC ID# 2559, PCGS# 7190

4899 **1889-CC — Rims Filed, Cleaned — ANACS. AU50 Details.** Mildly granular near the D in DOLLAR and the ME in AMERICA, but this key date Carson City dollar is otherwise stone-white. The surfaces are somewhat bright and the reverse rim is extensively filed. Substantial luster remains. NGC ID# 2559, PCGS# 7190

4900 **1889-CC — Rim Damage — PCGS Genuine. AU Details.** A mark on the reverse rim at 4:30 corresponds to the PCGS designation. A pinscratch is noted on the field near the eagle's right (facing) wing. Nonetheless, this key date Carson City dollar has pleasing design definition and substantial peripheral luster. NGC ID# 2559, PCGS# 7190

4901 **1889-O MS64 PCGS.** The 1889-O Morgan dollar was struck in large numbers, but most were released into circulation and the issue is scarce in grades above the MS64 level. This well-detailed Choice example displays lustrous, lightly toned surfaces with only minor signs of contact. NGC ID# 255A, PCGS# 7192

4902 **1889-O MS64+ PCGS. CAC.** Were this frosty 1889-O better-struck, it might have garnered a full Gem grade from PCGS. As it stands, the centers are characteristically weak, but the surfaces are remarkably clean. Traces of light golden toning grace each side. NGC ID# 255A, PCGS# 7192

4903 **1890 MS65 NGC.** This brilliant 1890 Morgan displays frosty Gem-quality surfaces, with only a few thin marks on the cheek limiting the numeric grade. Trivial softness is noted in the extreme centers, but the overall definition is pleasing. NGC lists only seven numerically finer submissions (5/15). NGC ID# 255C, PCGS# 7196

1890 Morgan Dollar, MS65+ Extremely Rare Any Finer

4904 **1890 MS65+ PCGS.** The sheer rarity of numerically finer pieces puts increased demand on high-end Gem examples of this conditionally elusive Philadelphia issue. This Plus-designated piece exhibits well-struck design elements, with minimally disturbed, frosty luster. The obverse is brilliant, although the reverse displays a blush of light golden toning. PCGS lists only four numerically finer representatives (4/15). NGC ID# 255C, PCGS# 7196

1890 Morgan Dollar, MS65 Prooflike Only One Finer Coin at PCGS

4905 **1890 MS65 Prooflike PCGS.** Despite a huge mintage of 16.8 million pieces, the 1890 Morgan dollar is almost never seen in really high grade. This impressive Gem displays sharply detailed design elements and reflective prooflike fields that show a few minor hairlines and contact marks. Population: 21 in 65 Prooflike, 1 finer (5/15). NGC ID# 255C, PCGS# 7197

4906 **1890-CC MS64 PCGS. VAM-12.** The VAM reference describes this variety as "left C mintmark doubled at top inside." Brilliant and lustrous with a good strike and a well preserved reverse. The obverse exhibits occasional minor marks. NGC ID# 255D, PCGS# 7198

4907 **1890-CC MS64 PCGS.** The 1890-CC is a less often seen Morgan from this mint, notably challenging in grades finer than the current Choice example. Both sides of this piece yield softly frosted luster and well-defined relief elements, while the surfaces exhibit just a tinge of pale champagne color. Trivial contact on Liberty's cheek defines the grade. NGC ID# 255D, PCGS# 7198

4908 **1890-CC MS64 PCGS. VAM-3.** The 90 is lightly repunched west. An impressively unmarked Choice silver dollar that has dynamic cartwheel luster and brilliant, well-struck surfaces. Scarcer than its mintage suggests, since comparatively few pieces emerged from the GSA auctions. NGC ID# 255D, PCGS# 7198

4909 **1890-CC MS64 PCGS. CAC. VAM-5.** The second C in the mintmark is repunched north. A precisely struck and highly lustrous near-Gem of this scarcer Carson City issue. The reverse and right obverse are smooth, while the left obverse displays only distributed wispy marks.
Ex: Chippewa Valley Collection (Heritage, 4/2008), lot 2801, which realized $1,495. NGC ID# 255D, PCGS# 7198

1890-CC Dollar, MS65 Vividly Toned Obverse

4910 **1890-CC MS65 PCGS.** Vivid patina on the obverse includes orange, pale violet, jade, amber, and champagne-pink, while the reverse is untoned and frosty silver-white. There are no mentionable abrasions on the high points of Liberty's cheek, although the eagle's breast shows a few small ticks. Numerous wispy peripheral die cracks encircle much of the reverse periphery. An issue seldom seen in finer grades. NGC ID# 255D, PCGS# 7198

4911 **1890-CC MS63 Deep Mirror Prooflike NGC. VAM-3.** The 90 is repunched southwest. The impressively reflective fields are untoned and contrast with the well-struck and frosty motifs. Scattered minor obverse marks correspond to the grade. A better Carson City emission. NGC ID# 255D, PCGS# 97199

1890-CC VAM-3 Silver Dollar MS64 Deep Mirror Prooflike

4912 **1890-CC MS64 Deep Mirror Prooflike NGC. CAC. VAM-3.** The 90 in the date is clearly repunched south. A snow-white Choice Carson City Morgan whose mirrored fields and frosty devices provide pleasing cameo contrast. Nicely struck and minimally marked, although Liberty's chin and the upper arrowhead exhibit moderate contact. NGC ID# 255D, PCGS# 97199

4913 **1890-CC Tail Bar, VAM-4, MS61 NGC.** A Top 100 Variety. VAMworld.com describes the "Tail Bar" as "a huge die gouge that emerges from the eagle's tailfeathers and runs into the wreath." The distinctive variety adds further interest to issue already popular for its scarcity and Carson City mintmark. Lustrous and lightly toned with the expected number of marks on the left obverse. PCGS# 133934 Base PCGS# 87198

4914 **1890-CC Tail Bar, VAM-4, MS62 NGC.** A Top 100 Variety. The "Tail Bar" variety is the easiest of all Morgan dollar VAMs to attribute. It can be cherrypicked at arm's length, identified by the broad die scratch below the fletchings. The present lustrous Carson City dollar has a brilliant reverse. The obverse is predominantly toned golden-brown, although blue-green and plum-red visit the right border. PCGS# 133934 Base PCGS# 87198

1890-CC Tail Bar Morgan, Untoned MS63

4915 **1890-CC Tail Bar, VAM-4, MS63 PCGS.** A Top 100 Variety. An untoned Select Mint State example of the popular Tail Bar VAM variety, this piece shows scattered marks and luster grazes in the field and on Liberty's cheek, where some light roller marks also appear. Much eye appeal is nonetheless present, and excellent frosty luster enhances the presentation. PCGS# 133934 Base PCGS# 87198

1890-CC VAM-4 Dollar, MS63 Popular Tail Bar Variety

4916 **1890-CC Tail Bar, VAM-4, MS63 NGC.** A Top 100 Variety. All Carson City Morgan dollar collectors are aware of the distinctive Tail Bar variety, named for the die gouge below the left edge of the tailfeathers. This lustrous representative exhibits rich aquamarine toning throughout the obverse, aside from hints of cherry-red in protected areas. The reverse is brilliant save for a narrow peripheral band of honey-gold. PCGS# 133934 Base PCGS# 87198

4917 **1890-O MS65 PCGS.** The obverse of this Gem displays splendid gold, blue, and violet toning, while the reverse exhibits delicate golden splashes on otherwise brilliant silver surfaces. Only 25 finer examples reside in PCGS holders (5/15). NGC ID# 255E, PCGS# 7200

4918 **1890-O MS65 PCGS.** Rings of lavender-gray and sea-green toning surround the mostly brilliant centers of this memorable Gem. The design elements are well-detailed and the well-preserved surfaces radiate vibrant mint luster. PCGS has graded 25 numerically finer examples (5/15). NGC ID# 255E, PCGS# 7200

4919 **1890-O MS65 PCGS. CAC.** Certified in a first-generation PCGS small-size holder, this untoned Gem 1890-O Morgan dollar offers broad eye appeal on surfaces that show a better-than-average strike for this strike-challenged issue. Liberty's cheek shows no mentionable contact beyond a small luster graze. Examples in finer grades are highly elusive. PCGS reports only 25 submissions numerically finer (4/15). NGC ID# 255E, PCGS# 7200

4920 **1890-S MS65 PCGS. CAC.** Vivid cherry-red, lime-green, ocean-blue, and golden-brown toning consume the reverse. The toning on that side, in fact, is so impressive that PCGS holdered the coin displaying the reverse in front. But the obverse is also richly toned, in cream-gray and chestnut shades with glimpses of peripheral orange, rose, and aquamarine. NGC ID# 255F, PCGS# 7202

1890-S Silver Dollar Satiny, Sharp Premium Gem

4921 **1890-S MS66 PCGS. CAC.** An exceptionally clean coin for the issue with a razor-sharp strike throughout. Both sides are satiny with minimally toned centers, while attractive deep-gold and blue color is noted at select border areas. The 1890-S dollar is extremely rare any finer than MS66, with just seven such pieces in the combined certified population — a count that has not changed in the past seven years (4/15).
Ex: New York Signature (Heritage, 7/2004), lot 7220; Palm Beach Signature (Heritage, 11/2004), lot 9702; Los Angeles Signature (Heritage, 8/2009), lot 1953. NGC ID# 255F, PCGS# 7202

4922 **1890-S MS64 Deep Mirror Prooflike ANACS.** The flashy fields provide obvious contrast against the devices on this nicely struck piece. Toning appears at the outer edges in hues of golden-brown. Scattered marks hold this dollar from a higher grade. As a point of reference, PCGS and NGC have graded 31 and 30 examples at the MS64 Deep Mirror Prooflike level, respectively, with a combined total of only 15 finer (10/14). NGC ID# 255F, PCGS# 97203

1891 Morgan Dollar, MS65
Conditionally Scarce

4923 **1891 MS65 PCGS.** A better date in Gem condition, the 1891 Morgan dollar is extremely rare any finer. This piece is fully lustrous and well-struck. The obverse displays varying shades of amber and reddish toning with a few ocean-blue peripheral accents. The reverse is largely brilliant, but yields to traces of gold coloring around the extreme outer peripheries. PCGS lists only three numerically finer representatives (5/15). NGC ID# 255G, PCGS# 7204

4924 **1891-CC MS64 NGC.** A nice example of a popular Carson City issue in an optimal collecting grade. Even though near-Gem and finer coins are readily available, the issue takes a big step up in price when in MS65 and finer. This MS64 example is more affordable, yet it displays few marks for the grade and an above-average strike. A thin band of lemon-gold toning surrounds the brilliant-white surfaces of the obverse, while the reverse is wholly untoned. This is a coin with strong cartwheel luster and considerable eye appeal. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65
Seldom Seen in Higher Grades

4925 **1891-CC MS65 PCGS.** The 1891-CC Morgan dollar was a well-produced issue and examples are always in demand. This impressive Gem displays vivid shades of greenish-gold, lavender, and gray toning, with most of the color on the obverse. The design elements are sharply detailed and the well-preserved surfaces exhibit vibrant mint luster. PCGS has graded 31 numerically finer examples (5/15). NGC ID# 255H, PCGS# 7206

4926 **1891-CC Spitting Eagle, VAM-3, MS64 NGC.** A Top 100 Variety. Hints of tan-brown toning visit this predominantly brilliant Carson City near-Gem. Lustrous and attractive with smooth fields and minor facial grazes. The dentils are softly struck at 6 and 12 o'clock, an interesting and seldom-seen mint error. PCGS# 133937 Base PCGS# 7206

4927 **1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. A die lump beneath the beak is the source of the variety nickname. The VAM is fairly prevalent among Uncirculated '91-CC dollars, and is undesignated on the PCGS insert. Lustrous and nicely struck with light wheat-gold toning and distributed minor grazes. PCGS# 133937 Base PCGS# 7206

4928 **1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. Undesignated as VAM-3 by PCGS, but the die lump beneath the beak is unmistakable. The mintmark is lightly repunched. Deep olive-green, autumn-brown, violet-red, and cobalt-blue toning drapes both sides. Smooth aside from a vertical mark on the cheek. PCGS# 133937 Base PCGS# 7206

4929 **1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC.** A Top 100 Variety. Peach-gold peripheries encompass silver-gray centers. A well-struck and lustrous Carson City Morgan dollar. The fields are impressively smooth, and Liberty's cheek shows only faint grazes. PCGS# 133937 Base PCGS# 7206

1891-O Silver Dollar, MS65
Among the Finest at PCGS

4930 **1891-O MS65 PCGS.** The availability of the 1891-O Morgan declines significantly at the Gem grade level, and finer pieces are almost unobtainable. This representative is unusually well-preserved, even for the Gem level; close study with a glass and a strong light reveals a few insignificant disturbances on the cheek and behind Liberty's head, but these are well-hidden by soft lavender-gray and orange-gold toning. Minor striking weakness on the eagle's breast and the hair above Liberty's ear is not unusual for the issue. None are numerically finer at PCGS (4/15). NGC ID# 255J, PCGS# 7208

4931 **1891-S MS65 PCGS. CAC.** A solidly struck and attractive silver-white Gem, frosty and essentially untoned, showing minimal marks. Powerful luster and undeniable eye appeal.
Ex: ANA Signature (Heritage, 3/2008), lot 1094.
From The Warsaw Collection. NGC ID# 255K, PCGS# 7210

4932 **1892 MS64 PCGS. CAC.** The 1892 Morgan dollar is elusive in MS65 and better grades, making near-Gems such as this an appealing group of coins. Though softly struck with many stars shallow, the coin's remarkable frostiness powers its eye appeal. Minimally patinated.
From The Zack Fluhr Collection. NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, Untoned MS65
Appealing Better Date

4933 **1892 MS65 PCGS.** Liberty's cheek and most of the surfaces throughout on this better-date coin are nice and smooth, but a trio of tiny scrapes appear on her chin, requiring a loupe to see well. The surfaces are completely untoned and offer rich, frosted luster. The strike over the ear is a bit soft, as usual for the issue. The eye appeal is quite nice overall. PCGS reports only five numerically finer (5/15). NGC ID# 255L, PCGS# 7212

4934 **1892-CC MS62 PCGS.** An attractively original, frosty example of this Carson City issue with a faint golden hue discernible over each side. Scattered light grazes limit the grade, but none deeply penetrate the surfaces. This piece is slightly soft in the central regions, not unusual for the issue. NGC ID# 255M, PCGS# 7214

4935 **1892-CC MS62 NGC.** Light chatter on Liberty's cheek limits the grade, but the overall eye appeal of this 1892-CC Morgan is unusually strong for the MS62 level. The coin is sharply struck, with vibrant, satiny luster. NGC ID# 255M, PCGS# 7214

4936 **1892-CC MS62 NGC.** The obverse of this attractive MS62 specimen is richly toned in shades of sea-green, lavender, and gray, while the reverse remains essentially brilliant. The design elements are well-detailed and the surfaces show a scattering of minor contact marks. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS64
Vivid Obverse Toning

4937 **1892-CC MS64 PCGS.** Vivid shades of golden-brown, lavender, and violet toning blanket the obverse of this attractive Choice specimen, but the reverse is only lightly toned. The design elements are sharply detailed and the lightly marked surfaces are brightly lustrous. The 1892-CC Morgan dollar becomes scarce in grades above the MS64 level. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
Strong Silver Luster

4938 **1892-CC MS64 PCGS.** Brilliant cartwheel luster radiates from the silver-white and nearly undisturbed surfaces of this Carson City blazer. A group of light abrasions in the left obverse field and a tiny spot of struck-through grease beneath E in ONE are the only marks of note, and they do not detract from the overall visual impact of this appealing, high-luster dollar. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
Lightly Toned and Lustrous

4939 **1892-CC MS64 PCGS.** A pale, lemon-gold sheen covers the obverse while the reverse is brilliant-white and untoned. Abrasions from coin-on-coin contact are few, suggesting the coin found an advantageous niche during transport and storage. Both sides are sharply struck for the issue, the relatively clean fields and central motifs confirm the near-Gem grade. Any finer, and the issue becomes quite pricey. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
Frosted and Nearly Brilliant

4940 **1892-CC MS64 PCGS. VAM-8A.** A pleasing Choice Carson City dollar. The highly lustrous surfaces are minimally toned and show only wispy abrasions. VAM-8A ranks among the more interesting VAMs for the issue. The N in IN is lightly clashed in front of Liberty's neck, and a die break fills the base of the 2 in the date. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, Rim-Toned MS64
Prize for Color Aficionados

4941 **1892-CC MS64 PCGS.** Iridescent ice-blue and cinnamon rim toning cedes to untoned silver centers on this splendid near-Gem example of the penultimate Carson City Morgan issue. The strike is sharp save for the hair just over the ear, and only under a loupe do a few marks appear that likely prevented a Gem grade. Interestingly, the reverse shows a couple of wispy die cracks, including one connecting the two C's of the mintmark. A prize for the color aficionados.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2847. NGC ID# 255M, PCGS# 7214

1892-CC Silver Dollar
High-End Near-Gem

4942 **1892-CC MS64+ NGC.** Only 3% of 1892-CC Morgan dollars in MS64 receive the NGC Plus designation, an important distinction when selecting a coin in the optimal near-Gem collecting grade. This example is brightly lustrous and untoned, with few marks or abrasions for a Carson City dollar. The strike is not 100% full, but perhaps 98% or so and far above average for the issue. Liberty's cheek is clean and without fault. A few tiny rim ticks are possibly marks from stacking. NGC ID# 255M, PCGS# 7214

4943 **1892-O MS64+ NGC.** This is another Morgan dollar with essentially Gem-quality surfaces but enough striking weakness in the centers that the numeric grade is kept in check. This is not unusual for the 1892-O, a date that is known for its deficient die impressions. The present piece is frosty with just a hint of light golden color; a few amber accents appear at the upper obverse rim. NGC ID# 255N, PCGS# 7216

4944 **1892-S AU50 NGC.** Light wear over the high points of the devices defines the grade, but leaves remnants of luster in the recesses. This piece shows dusky golden-gray patina overall, with deeper teal and russet overtones in the peripheral recesses. NGC ID# 255P, PCGS# 7218

4945 **1892-S AU53 PCGS.** The 1892-S is a challenging issue in Mint State, much more so than the 1883-S and 1884-S. About Uncirculated representatives are usually the finest obtainable by budget-conscious collectors. This example is pleasantly lustrous in the recesses, with light golden color and just trivial high-point wear. NGC ID# 255P, PCGS# 7218

4946 **1893 MS63 PCGS.** A scarcer Philadelphia issue, with a mintage of only 378,000 pieces. This Select example displays brilliant, satiny luster that illuminates well-defined relief elements. Light, scattered abrasions contribute to the grade, but none are worthy of individual mention. NGC ID# 255R, PCGS# 7220

4947 **1893 MS64 NGC. VAM-2.** The 3 in the date is lightly repunched north. A narrow but rich band of orange-red toning visits the obverse margin. A lustrous and well preserved near-Gem of this low mintage Philadelphia issue. The centers display moderate inexactness of strike. NGC ID# 255R, PCGS# 7220

4948 **1893 MS64 NGC.** This semikey-date representative possesses unusually strong eye appeal for the Choice grade level, as the few grade-limiting abrasions on Liberty's jaw and the adjacent field are not overly distracting to the naked eye. The devices are sharply rendered and each side shows a hint of light golden color. NGC ID# 255R, PCGS# 7220

4949 **1893-CC XF40 PCGS. CAC.** Lightly worn and lightly abraded, this low-mintage final-date Carson City issue displays problem-free surfaces under attractive shades of greenish-gold, lavender, and silver-gray toning. NGC ID# 255S, PCGS# 7222

4950 **1893-CC XF45 PCGS.** From a modest mintage of 677,000 pieces, the 1893-CC represents the final date of Carson City coinage. This Choice XF specimen shows some light wear on the eagle's breast and wing tips, but the pleasing surfaces are lightly abraded. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Uncirculated Sharpness

4951 **1893-CC — Obverse Improperly Cleaned — NGC Details. Unc.** This is an unusually appealing piece for a Details-graded coin, showing vibrant, frosty luster and minimal distractions. When held at the appropriate angle, numerous faint hairlines can be detected on Liberty's portrait, these being all that preclude a numeric grade from NGC. A trace of light golden toning accents each side, while the extreme centers show some of the usual striking weakness. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, MS61
Well-Struck and Highly Lustrous

4952 **1893-CC MS61 ANACS.** A blush of peach toning visits the obverse margin at 10 o'clock, but many collectors would regard this Carson City dollar as brilliant. Unlike most examples of the semikey issue, the centers are well-defined. The lustrous surfaces are smooth for the grade except for a bright vertical mark behind Liberty's mouth. NGC ID# 255S, PCGS# 7222

4953 **1893-O AU58 NGC.** Luster remains in the fields on each side of this near-Mint semikey O-Mint Morgan, while the only trace of toning is light golden color around the outer periphery. The eagle's breast and the hair above Liberty's ear are not fully struck, as is typical of this issue. NGC ID# 255T, PCGS# 7224

1893-O Silver Dollar, MS60 Rich Luster

4954 **1893-O MS60 NGC.** Frosty mint luster attests to the Mint State status of this moderately appealing 1893-O representative, and weakness on the eagle's breast and the hair above Liberty's ear is solely a produced deficient striking pressure, not uncommon on this semikey New Orleans issue. A light golden hue surrounds the peripheries on each side, while the interiors show light, scattered abrasions. NGC ID# 255T, PCGS# 7224

4955 **1893-S — Tooled — PCGS Genuine. Fine Details.** In low circulated grades, the Morgan dollar set is an achievable endeavor for even budget-conscious collectors, with only a few stoppers. This 1893-S example may fill this key-date hole for such a collector. Detail is pleasing for the Fine level. The surfaces are glossy and bright with uniform pewter-gray color, while extensive tool marks are evident on both sides, most noticeably in the left obverse field. NGC ID# 255U, PCGS# 7226

1893-S Dollar, VF Details

4956 **1893-S — Cleaning — PCGS Genuine. VF Details.** A gunmetal-gray representative of the key Morgan dollar business issue. The centers and the eagle's wings display wear, but ample plumage detail remains, along with occasional traces of luster. The mildly bright surfaces are minutely granular, but are minimally abraded for the VF level, and no hairlines are readily apparent. NGC ID# 255U, PCGS# 7226

1893-S Morgan, XF Details

4957 **1893-S — Cleaned — ANACS. XF Details, Net VF20.** An affordable, mid-grade example of this key San Francisco Morgan. The surfaces are unnaturally bright, but yield tinges of golden toning around the borders. Light wear leaves sufficient detail in Liberty's hair curls and the eagle's wings, with flat spots evident on the eagle's breast and immediately above Liberty's ear. NGC ID# 255U, PCGS# 7226

4958 **1894 VF35 PCGS.** With the second-lowest business-strike mintage of the series, the 1894 Morgan dollar is prized by collectors in all grades and conditions. This pleasing Choice VF example shows wear on the eagle's breast, but most of the hairlines remain intact and the ear is well-defined. NGC ID# 255V, PCGS# 7228

4959 **1894 XF40 ANACS.** Glimpses of luster illuminate recessed areas of this moderately circulated tan-gray rare-date Dollar. A few handling marks on the cheek and a tick on the upper reverse are not especially conspicuous. NGC ID# 255V, PCGS# 7228

4960 **1894 — Scratches — NGC Details. AU.** One of the most elusive Philadelphia issues in the series. This example displays bright, satiny surfaces, with just trivial loss of detail over the high points of the design. Hair-thin, scattered scratches on each side preclude a numeric grade from NGC. NGC ID# 255V, PCGS# 7228

4961 **1894 AU50 PCGS.** Wisps of gold toning appear on the light gray surfaces of this attractive Morgan dollar, showing trivial, grade-consistent marks on each side. The 1894 is well-known as the rarest circulation strike Morgan from the Philadelphia Mint. NGC ID# 255V, PCGS# 7228

4962 **1894 AU53 NGC.** This is a problem-free About Uncirculated example of this semikey Philadelphia issue. Remnants of luster illuminate just a blush of light golden color overall, with the high points of the design showing just minor wear. Lightly abraded, as expected for the grade. NGC ID# 255V, PCGS# 7228

4963 **1894 AU53 NGC.** Just a trace of wear shows on the high points of the design elements and the still-lustrous surfaces of this low-mintage Morgan dollar are lightly abraded on both sides. A few hints of pink toning add to the visual appeal. NGC ID# 255V, PCGS# 7228

4964 **1894 AU55 NGC.** A seemingly naturally acquired patina of pale silver-gray color allows ample mint luster to remain visible across the surfaces of this Choice About Circulated coin. The second-smallest mintage of the series (just 110,000 business strikes plus 972 proofs) assures key-date status for the surviving population in all grades. Two or three small areas of deep toning on the obverse attest to the coin's original surfaces. NGC ID# 255V, PCGS# 7228

4965 **1894 AU58 PCGS.** Significant luster illuminates a thin overlay of gold toning on each side of this near-Mint 1894 dollar. Only trivial wear is seen over the high points of the eagle and obverse portrait, and there are no particularly noticeable abrasions. NGC ID# 255V, PCGS# 7228

4966 **1894 AU58 NGC.** Soft luster resides beneath soft-gray toning on this key Philadelphia issue. The obverse shows a richer patina than the reverse, but each side of the coin is equally free of major marks or abrasions. A few small nicks on the high point rims are noted. The hair strands over the ear are blended and the eagle's talons lack detail, but the strike remains sharp elsewhere on this scarce, near-Mint 1894. NGC ID# 255V, PCGS# 7228

4967 **1894 AU58 NGC.** Light abrasions and bagmarks are typical of the assigned grade, but plentiful mint luster remains and a strong strike retains most of the coin's details. Light silver-gray toning is slightly deeper around the edges of the raised elements. Just 110,000 pieces were struck for circulation, although the present coin saw only a brief stint in commerce. NGC ID# 255V, PCGS# 7228

1894 Dollar, MS60
Better Philadelphia Issue

4968 **1894 MS60 NGC.** There are no singularly obvious abrasions on this Mint State 1894 Morgan, although some light lines and other contact on Liberty's cheek preclude a finer grade. This piece is essentially untoned and shows some of the usual striking softness on the eagle's breast and on the hair above Liberty's ear. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS61
Challenging in Mint State

4969 **1894 MS61 NGC.** The low mintage of 110,000 pieces always attracts attention, piggy-backing on the extreme rarity of the 1893-S issue with nearly the same mintage. The survival rates are far higher for the 1894, however. Even so, the date is challenging in Mint State. This example is relatively unmarked for the grade with silver-gray surfaces and soft luster. Heavy mint frost covers both sides. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, Brilliant MS61
Popular P-Mint Key

4970 **1894 MS61 NGC. CAC.** This well-detailed 1894 Morgan dollar shows few contact marks for the assigned grade of MS61. The luster is also surprisingly vibrant for a lower Mint State grade. The surfaces are mostly brilliant, save for a few hints of gold and lavender toning. Visual appeal is quite strong on this key-date issue.
Ex: Summer FUN Signature (Heritage, 7/2011), lot 4146. NGC ID# 255V, PCGS# 7228

4971 **1894-O MS62 NGC.** While a few trivial marks prevent a higher grade, this is an attractive example of the scarce New Orleans issue with full satin luster and mint brilliance beneath delicate champagne toning on the obverse. NGC ID# 255W, PCGS# 7230

4972 **1894-S MS63 PCGS.** Intense, frosty luster is the hallmark of this semikey-date Morgan dollar, essentially brilliant across the reverse with areas of pale tan-gold color over the obverse. The strike is well-executed. Minor, grade-consistent abrasions are noted on Liberty's cheek. NGC ID# 255X, PCGS# 7232

4973 **1894-S MS63 PCGS.** The almost full prooflike fields of this Select 1894-S immediately garner attention, as this issue is scarce with this quality. Sharp, frosty design elements contribute to modest cameo contrast, particularly on the obverse. Light golden in color, with a few minor abrasions on the cheek, as expected for the grade. NGC ID# 255X, PCGS# 7232

4974 **1894-S MS64 PCGS.** MS64 is the highest grade in which the 1894-S Morgan is usually available. This example displays satiny luster with wisps of light rose-gold toning. A well-struck piece, with no major abrasions. NGC ID# 255X, PCGS# 7232

4975 **1894-S MS64 PCGS.** The mostly brilliant centers of this attractive Choice specimen yield to pleasing shades of golden-brown and violet at the peripheries. The design elements are well-detailed and the lustrous surfaces are lightly marked. NGC ID# 255X, PCGS# 7232

4976 **1895-O AU55 PCGS.** From a low mintage of 450,000 pieces, this Choice AU Morgan dollar shows just a trace of high-point wear on the design elements and the lightly abraded surfaces retain much original mint luster. NGC ID# 255Y, PCGS# 7236

4977 **1895-O AU55 NGC.** Bright, satiny surfaces yield hints of luster in the recesses on each side of this Choice AU 1895-O Morgan. Light, scattered abrasions accompany the grade, although the design elements retain strong detail. NGC ID# 255Y, PCGS# 7236

4978 **1895-O AU55 PCGS.** Substantial original luster illuminates the recesses of this Choice AU 1895-O Morgan, while the design elements exhibit only trivial high-point friction. Largely brilliant, but with tinges of amber and blue toning around the peripheries. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, AU58
Challenging Finer

4979 **1895-O AU58 PCGS.** The 1895-O dollar is scarce and proportionately costly in Mint State, making high-end AU examples, such as this piece, ideal for the budget-conscious collector seeking the highest grade feasible. Both sides show semiprooflike fields with just a touch of golden toning around the peripheries. Slight friction visits the eagle's breast and the hair above Liberty's ear. NGC ID# 255Y, PCGS# 7236

4980 **1895-S AU58 PCGS.** With a mintage of only 400,000 coins, the 1895-S Morgan is a less often seen issue, particularly in Mint State. This near-Mint representative shows brilliant, satiny luster with hints of semiprooflike mirroring in the fields. Lightly abraded, not unusual for the grade. NGC ID# 255Z, PCGS# 7238

4981 **1896 MS66 PCGS.** The obverse of this impressive Premium Gem is spectacularly toned in shades of Burnt-orange, gold, and violet, while the reverse remains essentially brilliant. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC ID# 2562, PCGS# 7240

4982 **1896 MS67 PCGS.** This incredibly well-preserved 1896 Morgan displays a dusky blanket of subtle bluish-gray toning over each side. The design elements are sharply rendered. The obverse is softly frosted overall, while the reverse displays semiprooflike mirroring in the fields. There are only two numerically finer pieces at PCGS (5/15). NGC ID# 2562, PCGS# 7240

4983 **1896 MS65+ Deep Mirror Prooflike PCGS.** Each side displays a high degree of mirrorlike reflectivity and thick mint frost, providing unusual Prooflike contrast for the issue. This Gem is well-struck and brilliant. PCGS has certified 18 numerically finer examples (5/15). NGC ID# 2562, PCGS# 97241

4984 **1896-O MS61 NGC.** The 1896-O Morgan dollar is one of the most challenging issues of the series in high grade. This MS61 example shows unusually sharp definition on the design elements and the surfaces are lustrous and lightly toned. A scattering of minor contact marks and some scratches on the eagle's belly explain the grade. NGC ID# 2563, PCGS# 7242

4985 **1896-O MS62 PCGS.** Strike-challenged and often unattractive, the 1896-O seldom appears with any semblance of Mint freshness and eye appeal. The present coin is a fortunate exception, with strong mint luster and attractive, brilliant-white surfaces. The strike is soft at the centers, but still sharper than most. Light abrasions and marks on the satin-smooth surfaces account for the assigned grade. NGC ID# 2563, PCGS# 7242

4986 **1896-O MS62 PCGS.** A satiny Mint State example, this New Orleans dollar has brilliant and untoned silver surfaces with minimal marks for the grade. Weakness over Liberty's ear and on the eagle's breast is typical of most O-Mint issues. NGC ID# 2563, PCGS# 7242

1896-S Morgan, MS63+ Conditionally Elusive

4987 **1896-S MS63+ NGC.** A challenging date in Mint State, despite a mintage of 5 million coins. This Plus-designated MS63 coin displays frosty luster with a hint of light golden color over each side. Well-struck, with just minor surface grazes on Liberty's cheek that limit the technical grade. Seldom seen finer. NGC ID# 2564, PCGS# 7244

4988 **1896-S/S VAM-5 — Cleaning — PCGS Genuine. Unc. Details.** A Hot 50 Variety. The VAM is undesignated on the PCGS insert, but the mintmark is clearly repunched northeast. Faint vertical hairlines cross the cheek and right obverse field, but the surfaces are lustrous, brilliant, and nicely struck. A conditionally rare issue, despite a mintage of five million pieces. PCGS# 134022 Base PCGS# 7244

1897 Morgan Dollar, MS66+ Scarce Any Finer

4989 **1897 MS66+ PCGS. CAC.** The 1897 Morgan dollar is a scarce issue in MS66 condition and finer examples are rare. This high-end Premium Gem features sharply detailed design elements and well-preserved surfaces with vibrant mint luster throughout. PCGS has certified 30 numerically finer examples (5/15). NGC ID# 2565, PCGS# 7246

4990 **1897-O MS61 NGC.** The lustrous surfaces of this Mint State Morgan dollar show a scattering of minor contact marks on both sides, with a few hints of lavender and sea-green toning at the rims. The design elements are well-detailed throughout. NGC ID# 2566, PCGS# 7248

4991 **1897-O MS62 PCGS. CAC.** An affordable Mint State example of this slightly better O-mint issue. Both sides display steel-gray luster with overtones of deep olive, violet, and teal in the peripheral recesses. No major abrasions are observed. NGC ID# 2566, PCGS# 7248

1897-O Morgan Dollar, Untoned MS63

4992 **1897-O MS63 PCGS.** The certified populations this out markedly at the next grade level up from this Select 1897-O Morgan dollar, an untoned beauty showing radiant cartwheel luster on surfaces that show minor marks and grazes consistent with the grade. The central strike is typical, and a couple of dark toning flecks appear on Liberty's hair below the coronet. NGC ID# 2566, PCGS# 7248

1897-S Dollar, Untoned MS67
Tied for Finest at NGC

4993 **1897-S MS67 NGC.** The silver-gray surfaces are nearly flawless and completely untoned on this Superb Gem better-date Morgan dollar, which shows no mentionable abrasions on either side. Some minor roller marks appear on Liberty's lower cheek, scarcely visible. This sharply struck coin is among the finest graded at NGC. Census: 11 in 67 (1 in 67 ★), 0 finer (4/15). NGC ID# 2567, PCGS# 7250

4994 **1897-S MS65 Deep Mirror Prooflike PCGS.** Deep Mirror Prooflike examples of the 1897-S Morgan dollar are scarce in Gem condition, and are rarely seen finer. This piece is sharp throughout and modestly contrasted. A few light grazes on the cheek do not distract, and traces of light golden toning heighten the visual appeal. Population: 35 in 65 (2 in 65+) Deep Mirror Prooflike, 8 finer (5/15). NGC ID# 2567, PCGS# 97251

1898 Morgan Dollar, MS67
Well-Produced Issue

4995 **1898 MS67 NGC.** Ex: Stack's W 57th St Collection. The 1898 Morgan dollar was one of the best-produced issues of the series. The design elements of this impressive Superb Gem are sharply detailed and the well-preserved lustrous surfaces show a few traces of sea-green, lavender, and amber toning. Census: 16 in 67, 0 finer (5/15). NGC ID# 2568, PCGS# 7252

1898 Silver Dollar, MS67
Light, Two-Sided Toning

4996 **1898 MS67 PCGS.** This Superb Gem 1898 silver dollar is boldly rendered throughout each side, and exhibits beautifully unabraded surfaces and frosty luster. Both sides show consistent golden toning that deepens trivially toward the borders, where the reverse features occasional hints of lavender and blue. A sliver of rainbow toning graces the bottom of the date. Population: 87 in 67 (3 in 67+), 0 finer (5/15). NGC ID# 2568, PCGS# 7252

4997 **1898-O MS67 PCGS. CAC.** Superb Gem 1898-O Morgan dollars infrequently come on the market. This CAC-approved example is frosty and brilliant, with largely undisturbed surfaces. The eagle's breast and the hair above Liberty's ear are a trifle soft, as can be expected on this New Orleans issue. None are numerically finer at PCGS (5/15). NGC ID# 2569, PCGS# 7254

4998 **1898-S MS65+ PCGS. VAM-4.** The serifs of the mintmark are clearly repunched. A lustrous and well preserved Gem that exhibits faint almond-gold and gunmetal-blue toning. The strike is sharp. The 1898-S begins a run of better-date San Francisco issues that extends through the 1904 series hiatus. NGC ID# 256A, PCGS# 7256

1899-S Morgan Dollar, MS66
Condition Rarity in Higher Grades

4999 **1899-S MS66 PCGS.** The 1899-S Morgan dollar was a well-produced issue and high-grade examples are generally available with a little patience. Even at the MS66 grade level the date can only be called scarce, but it is a condition rarity in finer grades. This sharply detailed Premium Gem is well-preserved and lightly toned. PCGS has graded nine numerically finer examples (5/15). NGC ID# 256D, PCGS# 7262

5000 **1899-S Doubled Date, VAM-7, MS65 PCGS.** A Top 100 Variety. The date is repunched, most apparent on the 9s and the flag of the 1. This lustrous better date dollar is virtually brilliant, and is smooth save for a mark beneath Liberty's mouth. PCGS# 133952 Base PCGS# 7262

5001 **1900-O MS66+ PCGS. CAC.** Brilliant, frosty luster imparts strong eye appeal on each side of this Plus-designated Premium Gem 1900-O. Unusually sharp definition is seen on the eagle's body and the hair above Liberty's ear, while there are only a few faint disruptions observed on Liberty's cheek and in the adjacent field which limit the grade. Available in MS66, the 1900-O is seldom seen finer. NGC ID# 256F, PCGS# 7266

5002 **1900-O MS67 NGC.** This piece ranks among the finest 1900-O Morgans certified. Well-struck devices complement satiny luster which yields just a hint of light golden color. There are no mentionable surface flaws. Census: 77 in 67 (2 in 67 ★), 0 finer (4/15). NGC ID# 256F, PCGS# 7266

5003 **1900-O/CC VAM-8 MS65 NGC.** A Top 100 Variety. Glimpses of peach patina invigorate the peripheries of this lustrous and nicely struck Gem. Well preserved and highly attractive. Several years after the Carson City presses stopped churning, leftover unused CC-mint dies were overmintmarked and dispatched to New Orleans. PCGS# 133960 Base PCGS# 7268

5004 **1900-O/CC VAM-8 MS65 NGC.** Splashes of peach-gold, apple-green, and rose-red overlie pearl-white surfaces. Lustrous and well-struck with minor obverse contact and a well preserved reverse. An early die state without rust near the mintmark. VAM-8 is much scarcer than VAM-11. PCGS# 133960 Base PCGS# 7268

1900-O/CC Dollar, Lustrous MS66

5005 **1900-O/CC VAM-8 MS66 NGC.** A Top 100 variety. The mintmarks on the VAM-8 variety are shifted slightly left of center. The lustrous silver-gray surfaces of this Premium Gem display hints of reddish-tan. The design elements are well-defined, including near-full detail in the hair over Liberty's ear. Both sides have been well cared for. PCGS# 133960 Base PCGS# 7268

5006 **1900-O/CC VAM-11 MS65 NGC.** A Hot 100 Variety. The diagonal die crack beneath the shoulder curl attributes this overmintmarked silver dollar. Seven years after the Carson City Mint ended silver production, leftover reverse dies were sent to New Orleans and used as an economy measure. Lustrous and well preserved with a white reverse and a dusky rose-red and navy-blue obverse. PCGS# 133963 Base PCGS# 7268

5007 **1900-O/CC VAM-11 MS65 PCGS.** This lustrous overmintmarked Gem has a good strike and only a trace of honey patina. The fields are splendidly preserved, and the cheek shows several minor marks. *Ex: Dallas Signature (Heritage, 11/2007), lot 1349, which realized $2,185.* PCGS# 133963 Base PCGS# 7268

5008 **1900-S MS65 NGC.** The luster on this representative is somewhat more satiny than is typically seen on the 1900-S Morgan, yielding full brilliance in the centers but with a faint golden hue around the extreme outer peripheries. Trivial weakness is noted on the hair above Liberty's ear, but no other distractions are observed. NGC ID# 256H, PCGS# 7270

5009 **1901 AU58 PCGS.** The 1901 is an important condition rarity from a nearly 7 million-coin mintage, with most survivors in circulated grades. A trace of wear appears on the high points, explaining the grade of this otherwise highly lustrous and brilliant example. NGC ID# 256J, PCGS# 7272

5010 **1901 Doubled Die Reverse, VAM-3, AU50 NGC.** A Top 100 Variety. The eagle's tailfeathers, arrows, and beak are strongly die doubled south. Among the best known VAM varieties of the series, and separately listed in the Guide Book. A stone-gray and almond-gold example with unmarked surfaces and a narrow granular area on the cheek. PCGS# 133965 Base PCGS# 7302

1902 Morgan Dollar, Satiny MS67 Tied for Finest Graded

5011 **1902 MS67 NGC.** Satin luster and bright surfaces provide this Superb Gem 1902 Morgan dollar with strong eye appeal. This piece exhibits a strong strike. The eagle's breast does not display the level of detail that earlier issues did because the new reverse hub, introduced in 1900, was not as intricately detailed in that area. Census: 18 in 67 (2 in 67 ★), 0 finer (4/15). NGC ID# 256M, PCGS# 7278

5012 **1902-O MS66+ PCGS. CAC.** This high-end Premium Gem displays sharply detailed design elements and well-preserved surfaces that radiate vibrant mint luster. Eye appeal is outstanding. PCGS has certified 16 numerically finer examples (5/15). NGC ID# 256N, PCGS# 7280

5013 **1903-O MS66+ PCGS. CAC.** Frosty, vibrant luster engulfs each side of this high-end Premium Gem representative, with subtle traces of champagne toning discernible when turned in-hand. A trifle soft on the eagle's breast, but far above-average for the date. This New Orleans issue is seldom seen finer. NGC ID# 256S, PCGS# 7286

5014 **1903-S AU55 NGC.** The 1903-S is a scarcer late-series date, with few representatives dispersed through the Treasury releases of the 1960s. This Choice AU example displays pleasing detail for the grade, with consistent golden-gray toning that yields substantial underlying luster. NGC ID# 256T, PCGS# 7288

5015 **1903-S AU55 PCGS.** Traces of prooflike reflectivity appear on both sides of this still lustrous Choice AU Morgan dollar, showing brilliant and untoned silver surfaces. NGC ID# 256T, PCGS# 7288

5016 **1903-S — Harshly Cleaned — NGC Details. Unc.** The 1903-S Morgan is a challenging and expensive issue in Mint State, although this Details-graded example may fill the hole for a budget-conscious enthusiast. The coin is noticeably cleaned, but has since acquired faintly iridescent golden-gray toning and also possesses unusually smooth surfaces. NGC ID# 256T, PCGS# 7288

5017 **1904-S AU58 PCGS.** The recesses of this near-Mint 1904-S Morgan dollar retain substantial cartwheel luster with each side exhibiting a light golden hue overall. The eagle's breast and the hair above Liberty's ear are weak, a combined product of light wear and minor striking weakness. NGC ID# 256W, PCGS# 7294

1904-S Dollar, Lustrous MS62

5018 **1904-S MS62 NGC.** While the new Orleans issue of this year was discovered in quantity in Treasury vaults, the 1904-S remains conditionally elusive in Mint State. This example shows satiny luster with just a touch of light golden color over each side and a sliver of deeper russet toning along the upper-right obverse border. NGC ID# 256W, PCGS# 7294

5019 **1921-S MS65+ PCGS.** This is a surprisingly well-preserved, lustrous example of a date that is seldom seen in high grade. The reverse is light golden in color, while the obverse exhibits the same with deeper amber and aquamarine overtones also evident in the right-hand margins. The usual striking weakness is seen on the eagle's body and the lower portion of the wreath. NGC ID# 256Z, PCGS# 7300

1921-S Morgan Dollar, MS66
Very Rare in Finer Grades

5020 **1921-S MS66 NGC.** Morgan dollars were struck in record numbers in 1921, after a 16-year hiatus, but the Philadelphia issue is very scarce in MS66 condition, and finer examples are virtually unobtainable. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces. Census: 62 in 66 (3 in 66+, 3 in 66 ★), 1 finer (5/15). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1879 Morgan Dollar, PR64 Cameo
Nicely Contrasted

5021 **1879 PR64 Cameo PCGS.** The surfaces host a blend of gold and rose patina with moderately deep contrast between frosty devices and nicely reflective fields. A couple of small ticks on Liberty's cheek account for the grade while not defeating the broad eye appeal. A Gem proof would be far more costly. Population: 21 in 64 (4 in 64+) Cameo, 39 finer (4/15). PCGS# 87314

1883 Morgan, Mirrored PR63

5022 **1883 PR63 NGC.** This is an affordable proof Morgan dollar type coin and a counterpart to the final regular proof Trade dollar issue of the same year. The design elements are boldly struck and there is modest cameo contrast on the reverse. Light tan-gold toning is deepest over the left obverse margin and around the reverse periphery. NGC ID# 27Z7, PCGS# 7318

5023 **1894 PR53 PCGS.** A pleasing lower-grade proof, this 1894 Morgan displays unmistakable prooflike mirroring in the fields, with scattered marks and trivial high-point friction present to limit the grade. Subtle olive-gold toning deepens slightly around the borders. An ideal opportunity for the budget-conscious collector to acquire a proof example of this popular Philadelphia issue. NGC ID# 2577, PCGS# 7329

PEACE DOLLARS

5024 **1921 MS65 NGC.** Satiny golden luster is largely unabraded on this Gem 1921 Peace dollar, with the only mentionable abrasion being a small nick on the neck. The hair over Liberty's ear is not quite full, but the overall sharpness is above-average for this High Relief issue. NGC ID# 2U4E, PCGS# 7356

5025 **1921 MS65 PCGS.** Luminous lavender-gray surfaces reveal speckles of olive color, mostly around the borders. The devices are moderately well-struck, showing only some of the usual weakness over Liberty's ear. Minimal abrasions are present.
Ex: Dallas Signature (Heritage, 12/2004), lot 7779. NGC ID# 2U4E, PCGS# 7356

5026 **1921 MS65 NGC.** Powder-blue and wheat-gold overlie lustrous pearl-gray surfaces. The central strike is sharper than usually seen, and careful inspection is required to locate the few trivial indications of contact.
Ex: Cincinnati Central States (Heritage, 5/2009), lot 3259. NGC ID# 2U4E, PCGS# 7356

1921 High Relief Peace Dollar, MS65
Splendid Original Surfaces

5027 **1921 MS65 PCGS. CAC.** Frosty and brilliant with splashes of golden-tan, powder-blue, and pale lilac tones, the beauty of this first-year Gem is immediately apparent. The 1921 often comes softly struck over the high points, as one blow from the dies was insufficient to fully bring up the High Relief design. Such is the case with this offering, yet the incomplete strike is offset by this coin's originality and CAC-affirmed eye appeal. Minimally abraded with a single noteworthy reeding mark on Liberty's brow, this is a great example of this one-year subtype. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, Lustrous MS66
An Above-Average Strike

5028 **1921 MS66 NGC.** The 1921 Peace dollar is usually flatly struck in the centers. The current Premium Gem is a notable exception. Most all the hair detail is present on Liberty, and only the lowest, rightmost feather on the eagle shows any softness. The mint luster is thick and frosted and the surfaces are almost free from abrasions. An excellent choice for the advanced Peace dollar specialist. NGC has seen only six pieces finer and PCGS has graded seven finer (5/15).
Long Beach Signature (Heritage, 2/2002), lot 1129; New York Signature (Heritage, 7/2002), lot 7170. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, Remarkable MS66

5029 **1921 MS66 PCGS.** This remarkable Premium Gem exhibits lovely light gold toning on both sides. The design elements are mostly strong, although the typical central weakness is evident at the opposing design high points. The frosty obverse surface is lightly abraded, while the satiny reverse is nearly pristine. PCGS has only certified seven finer examples (5/15).
Ex: Central States Signature (Heritage, 4-5/2009), lot 3264. NGC ID# 2U4E, PCGS# 7356

1922-D Peace Dollar, Splendid MS66+

5030 **1922-D MS66+ PCGS. CAC.** The 1922-D and -S and 1923-D Peace dollars had the largest productions of mintmarked issues in the entire Peace dollar series, but few indeed survive so fine as the present 1922-D in MS66+ PCGS grade. The untoned silver-white surfaces show liberal mint frost and a near-complete absence of even the smallest contact marks. Population: 9 in 66+, 3 finer (5/15). NGC ID# 257D, PCGS# 7358

5031 **1922-S MS65+ NGC.** The San Francisco is the most challenging of the three 1922 Peace dollar issues, particularly in high grades. This Plus-designated Gem representative displays uniformly mottled olive-gold toning, with deeper amber hues also evident on the reverse. The strike is well-executed, and any grade-limiting abrasions are well-hidden by the rich patina. NGC has seen only 16 numerically finer examples (4/15). NGC ID# 257E, PCGS# 7359

1923-D Silver Dollar, MS66
Ex: Joseph C. Thomas

5032 **1923-D MS66 PCGS.** A hint of olive-green toning visits this thoroughly lustrous and sharply struck silver dollar. The fields are well preserved, although we note a mark at the top of the eagle's neck. A high mintage issue, but conditionally rare nonetheless. Certified in a green label holder. Population: 92 in 66 (3 in 66+), 1 finer (4/15).
Ex: Joseph C. Thomas Collection (Heritage, 5/2009), lot 3272, which realized $5,175. NGC ID# 257G, PCGS# 7361

5033 **1924-S MS64 PCGS.** The 1924-S is a less often seen date in pleasing Mint State condition, and it is genuinely scarce finer than the MS64 level. This Choice example is minimally abraded, with satiny luster shining through dusky bluish-gray and light golden patina. NGC ID# 257K, PCGS# 7364

5034 **1926 MS66 NGC.** Pleasantly sharp devices and satiny, glowing luster are the hallmarks of this Premium Gem 1926 Peace dollar. The obverse is furthermore vividly toned in deep amber-red, olive, and orange-gold hues, while the reverse displays uniform champagne color. Census: 52 in 66, 1 finer (5/15). NGC ID# 257N, PCGS# 7367

5035 **1926-D MS66 NGC.** Moderately available in this grade, but rarely seen finer. This Premium Gem example displays glowing, beautifully preserved mint luster and sharply struck design elements. Both sides show iridescent pastels overall, while the obverse also exhibits deeper orange-gold and russet toning along much of the periphery. NGC reports only seven numerically finer representatives (4/15). NGC ID# 257P, PCGS# 7368

5036 **1926-S MS65+ NGC. CAC.** This is a delightfully frosty, sharply struck Gem example of this conditionally elusive San Francisco issue. Only a couple tiny ticks around Liberty's throat appear to limit the grade. This piece displays light champagne-gold toning over much of each side, while the upper-right obverse also exhibits mint-green, amber, and deeper copper-red overtones. NGC shows only 35 finer representatives (5/15). NGC ID# 257R, PCGS# 7369

5037 **1926-S MS65+ NGC. CAC.** Despite the mintage of nearly 7 million pieces, the 1926-S Peace dollar is somewhat scarce in Gem condition, and finer examples are quite elusive. This high-end Gem offers well-detailed design elements and lustrous, lightly toned surfaces with no mentionable distractions. NGC has graded 35 numerically finer examples (5/15). NGC ID# 257R, PCGS# 7369

1926-S Peace Dollar, Lightly Toned MS66 Among the Series' Best-Produced Issues

5038 **1926-S MS66 PCGS.** The 1926-S is among the best-produced Peace dollars, as this lovely Premium Gem shows. The strike through the centers is sharp — close to full — and the surfaces are nicely preserved to complement the attractive frosty luster and light touches of color near the rims on each side. Population: 77 in 66, 2 finer (5/15). NGC ID# 257R, PCGS# 7369

5039 **1927 MS65 PCGS.** Often overshadowed by the lower-mintage 1928 issue, the 1927 Philadelphia issue Peace dollar is rarer in Uncirculated condition. Bonafide Gem coins are scarce and anything finer is virtually unobtainable. This lustrous and nearly mark-free Gem example is arguably at the upper-end of its assigned grade. The smooth surfaces are sharply struck, untoned, and without any grade-limiting distractions. PCGS lists just nine numerically finer grading events (4/15). NGC ID# 257S, PCGS# 7370

5040 **1927 MS65 PCGS.** Lustrous and crisply struck with wisps of almond-gold and powder-blue patina. The 1927 has the second-lowest mintage of the series, and is seldom offered any finer than the present piece. Struck from moderately rotated dies, and housed in a green label holder.
Ex: Superior (6/1999), lot 2828; Columbus Central States (Heritage, 4/2002), lot 4335. NGC ID# 257S, PCGS# 7370

5041 **1927 MS65 NGC.** Satiny, Gem-quality surfaces exhibit a faint blush of lemon-gold toning, adding a degree of warmth to the well-struck design elements. The 1927 is one of only four issues in the Peace dollar series with a mintage of less than 1 million coins (848,000 pieces), and is seldom obtainable in Gem condition. NGC has seen only three numerically finer representatives (5/15). NGC ID# 257S, PCGS# 7370

1927 Peace Dollar, Unmarked MS65

5042 **1927 MS65 PCGS. CAC.** The frosty surfaces show a light coating of copper-gold patina while remaining largely untoned silver-white. Few abrasions of any significance appear on either side. Liberty's cheek and the high points of the eagle are free of all but a couple of tiny ticks, and the strike is sharper than usual. PCGS reports only nine in MS66 (4/15). NGC ID# 257S, PCGS# 7370

5043 **1927-S MS64 PCGS. CAC.** Few Peace dollar sets contain a near-Gem or finer example of the 1927-S with the combined attributes of a good strike and strong eye appeal. The current coin lays claim to both. Bold silver luster covers both sides and the strike is far above average for the issue. Only a faint hint of almond-gold toning intrudes on the otherwise brilliant surfaces. The few small marks are widely distributed and non-distracting. CAC endorsed... PCGS reports just 77 numerically finer pieces. NGC ID# 257U, PCGS# 7372

5044 **1927-S MS64 PCGS. CAC.** Pale-blue and champagne-gold hues compete for space on both sides of this lustrous and well-struck 1927-S dollar. A condition rarity in attractive near-Gem preservation and finer, this sharp and appealing example shows only minor marks when viewed under magnification. CAC endorses the coin, which is no doubt destined for a high-end Peace dollar set. NGC ID# 257U, PCGS# 7372

5045 **1928 MS64 NGC.** An attractive Choice example of this low-mintage Peace dollar issue, with sharply detailed design elements and well-preserved brilliant surfaces. Vibrant mint luster is evident on both sides. NGC ID# 257V, PCGS# 7373

5046 **1928 MS64 PCGS.** This is an affordable and unusually frosty example of this popular series key, and the surfaces are largely devoid of any mentionable abrasions. Modest golden toning adds a degree of warmth to each side. NGC ID# 257V, PCGS# 7373

5047 **1934 MS66 PCGS.** This brilliant 1934 representative is radiantly enlivened with satiny cartwheel luster. The strike is sharp, and were it not for trivial contact on the eagle's wing and a few truly faint lines on Liberty's cheek, this eye-appealing piece might have garnered an even finer grade. As it stands, there are only three pieces numerically finer at PCGS (5/15). NGC ID# 257X, PCGS# 7375

1935 Peace Dollar, Frosty MS66

5048 **1935 MS66 PCGS.** The overall silver-gray surfaces show abundant frosty luster and a hint of sandy-tan patina. Excellent preservation appears throughout, with only a single small tick on Liberty's lip in accordance with the Premium Gem grade, making this piece tied for the finest at PCGS (4/15). A fine coin for a fine Peace dollar set. NGC ID# 2582, PCGS# 7378

1935 Silver Dollar, MS66
Clean Cheek, Smooth Fields

5049 **1935 MS66 PCGS.** Dappled chestnut-gold toning graces the fields of this lustrous and high grade Peace dollar. Liberty's cheek displays a glimpse of powder-blue. This final-year issue is plentiful in MS62 through MS64 grades, but Premium Gems are very scarce.
Ex: Long Beach Signature (Heritage, 5/2009), lot 1283. NGC ID# 2582, PCGS# 7378

5050 **1935-S MS65 PCGS.** Four Rays below ONE. Apricot-gold and ice-blue toning grace this lustrous and low mintage Gem. The obverse is remarkably void of contact, although wispy marks on the left reverse correspond to the third party grade. NGC ID# 2583, PCGS# 7379

5051 **1935-S MS65 PCGS. CAC.** Three rays below ONE. Delicate tan toning graces this thoroughly lustrous silver dollar. The strike shows slight inexactness at the centers. Scattered minor grazes hardly impact the formidable eye appeal. NGC ID# 2583, PCGS# 7379

1935-S Dollar, MS66
Ex: Jack Lee 2

5052 **1935-S MS66 PCGS.** Ex: Jack Lee 2. Three rays below ONE. Late and legendary dealer Jack Lee formed a remarkably high grade collection of silver dollars, sold it, and later assembled a second world-class holding. In fact, he repurchased some of the same coins for his second set. The present thoroughly lustrous and stone-white Premium Gem has a good strike and minimal grazes. Exceptional quality for this final San Francisco issue. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

5053 **1972 Type Two, FS-901, MS65 PCGS.** Reverse B, the "King of Ikes." The Caribbean Islands are indistinct on this rare *Guide Book* variety. This example is from the August 1972 release, showing light cracks in STATES. The devices are well-defined and the satiny surfaces show deep golden color. PCGS# 510592 Base PCGS# 97409

1974 Eisenhower Dollar, MS66+
Tied for Finest at PCGS

5054 **1974 MS66+ PCGS. CAC.** This Registry-quality 1974 Eisenhower dollar is one of only seven Plus-graded MS66 examples at PCGS, with none finer (5/15). The strike is sharp and the satiny nickel-gray surfaces yield appealing overtones in shades of champagne and sky-blue. Only 18 Premium Gems have been awarded a CAC endorsement. NGC ID# 258D, PCGS# 7415

5055 **1976-D Type One MS66+ PCGS Secure.** A Registry-grade example, with only six coins finer at PCGS (5/15). This Type One Bicentennial dollar is well-defined, with a light golden glaze appearing over satiny nickel-gray surfaces. NGC ID# 258J, PCGS# 7420

PROOF EISENHOWER DOLLAR

1977-S Eisenhower Dollar, PR70 Deep Cameo

5056 **1977-S PR70 Deep Cameo PCGS.** PCGS has found only 55 proof 1977-S Eisenhower dollars worthy of a perfect, PR70 Deep Cameo grade, and this spectacular piece is one of them. The cameo contrast is seemingly unequaled and the sharpness of the motifs is bold. Each side shows just a hint of light golden toning. NGC ID# 282C, PCGS# 97437

SACAGAWEA DOLLARS

5057 **2003-P MS69 PCGS.** The 2003-P Sacagawea dollar is seldom encountered with virtually pristine surfaces, as the open fields are particularly susceptible to bag marks. This fully struck lustrous specimen is just one tick away from perfection. Population: 24 in 69, 0 finer (5/15). NGC ID# 282T, PCGS# 15015

5058 **2004-P MS69 PCGS.** A virtually perfect specimen of this low-mintage Sacagawea dollar, with fully struck design elements and vibrant mint luster throughout. Eye appeal is terrific. Population: 24 in 69, 0 finer (5/15). NGC ID# 282V, PCGS# 15018

MODERN ISSUES

5059 **Complete 32-Piece 1995-1996 Atlanta Olympics Commemorative Set in Wooden Case.** Every design, every metal, every coin from half dollars to half eagles: the complete 32-coin Uncirculated and Proof set of Atlanta Olympic commemoratives. All coins housed in their original Mint plastic capsules, the whole contained in a two-tray setup mounted in an impressive wooden box. Comes with key and certificate of authenticity. The upper left portion of the box has moderate damage and the upper velvet lining is detached. The coins are pristine.(Total: 32 coins) NGC ID# 28TK, PCGS# 9734

5060 **1997-W Jackie Robinson Gold Five Dollar MS69 NGC.** Ex: U.S. Vault Collection L/M. A bold strike and almost perfect surface preservation deliver outstanding eye appeal in addition to the vibrant, yellow-gold cartwheel effect that illuminates each side. The Jackie Robinson gold five dollar piece is ranked number five in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

5061 **1997-W Jackie Robinson Gold Five Dollar MS69 NGC.** A limited mintage of just 5,174 business-strike Jackie Robinson five dollar gold pieces was struck at the West Point Mint in 1997. This technically perfect example exhibits fully struck design elements and pristine lustrous surfaces. NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

5062 **1997-W Jackie Robinson Gold Five Dollar MS70 NGC.** A faultless example, with frosty gold surfaces and an exacting strike. Minted in a limited quantity of just 5,174 business strikes, relatively few examples have achieved the magical MS70 grade. This piece is without discernible problems and deserving of the technically perfect grade. NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

1997-W Jackie Robinson Five Dollar, MS70
Key Modern Commemorative

5063 **1997-W Jackie Robinson Gold Five Dollar MS70 PCGS.** The Jackie Robinson five dollar gold Mint State commemorative was a contrarian's dream for the few collectors who bought original pieces from the Mint, as opposed to the legions who now want a perfect example such as this coin on the secondary market. The wheat-gold surfaces are every bit as distraction-free as the grade implies. One of the keys to the modern commemorative half eagle collection. Population: 56 in 70 (5/15). NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

5064 **2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** Ex: US Vault Collection. The surfaces of this bimetallic gold and platinum ten dollar commemorative display unbroken satiny mint luster and an exacting full strike. The surfaces are flawless in beauty and finish save for an inconsequential microscopic alloy spot on the R of AMERICA. As the first U.S. bimetallic commemorative, the mintage shows a surprisingly low 7,261 pieces in Mint State format. NGC ID# 28V5, PCGS# 9784

5065 **2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC.** Struck in Mint State format rather than proof, the unusual bimetallic combination of gold and platinum provides an interesting and attractive change of pace for collectors of modern issues. Just 7,261 pieces were struck in Mint State format with satiny, low-luster surfaces. This example is both technically and visually flawless. Importantly, there are no alloy spots that often plague the gold outer ring. NGC ID# 28V5, PCGS# 9784

MODERN BULLION COINS

5066 **1987 Silver Eagle MS70 NGC.** A technically perfect example of this early series bullion issue, with fully struck design elements and completely brilliant surfaces that radiate vibrant mint luster. Greater-than-anticipated demand resulted in a large mintage of over 11 million pieces.
From The Steitz Collection. NGC ID# 26J6, PCGS# 9808

5067 **1987 Silver Eagle MS70 NGC.** The classic Walking Liberty design never appeared to better advantage than on this magnificent Silver Eagle. The design elements are fully brought up and the brilliant, lustrous fields are free of imperfections. NGC ID# 26J6, PCGS# 9808

5068 **1988 Silver Eagle MS70 NGC.** As a legal tender coin with the weight, silver content, and purity guaranteed by the United States government, the Silver Eagles have become more than an investment vehicle, but also a popular collector coin. The 1988 issue commands a significant premium among collectors in the highest grade, since few have been certified in MS70 condition. This example is untoned with brilliant, silver-white luster and a needle-sharp strike.
From The Steitz Collection. NGC ID# 26J8, PCGS# 9816

5069 **1988 Silver Eagle MS70 NGC.** A single point makes a huge difference at the upper end of the grading scale, and especially so between MS69 and MS70. Only a tiny percentage of submissions reach the highest plateau. This top-rated example is satiny and lustrous, devoid of toning and sharply struck. There are no imperfections to report. NGC ID# 26J8, PCGS# 9816

5070 **1989-P Half-Ounce Gold Eagle PR70 Ultra Cameo NGC.** Profound contrast of the orange-on-black sort, coupled with pristine perfection, makes this a nonpareil representative of this early American Gold Eagle issue. NGC ID# 28YB, PCGS# 9833

1990 Silver Eagle, MS70
In-Demand Bullion Issue

5071 **1990 Silver Eagle MS70 NGC.** Although coin prices in general were in decline in 1990, demand for Silver Eagle bullion coins rose about 12%, compared to 1989. This spectacular MS70 example offers fully detailed design elements and vibrant mint luster throughout. The brilliant surfaces are impeccably preserved.
From The Steitz Collection. NGC ID# 26JC, PCGS# 9836

5072 **1990 Silver Eagle, First Strike MS70 NGC.** A total of 503 "First Strike" Silver Eagles were graded in 1990, the great majority in MS68. This fully struck example displays completely brilliant, technically perfect surfaces, with ample mint luster. PCGS# 89836

1991 Silver Eagle, MS70
Highest Possible Quality

5073 **1991 Silver Eagle MS70 NGC.** Demand for Silver Eagle bullion coins continued to increase in 1991, despite the general malaise in the contemporary coin market. This incredible MS70 example is fully struck throughout, with vibrant mint luster and technically perfect brilliant surfaces.
From The Steitz Collection. NGC ID# 26JE, PCGS# 9846

1991 Silver Eagle, MS70
Scarcer Issue at This Level

5074 **1991 Silver Eagle MS70 NGC.** Despite the large mintage of nearly 7.2 million pieces, relatively few 1991 Silver Eagles have been certified in the ultimate grade of MS70, making the issue one of the strongest values of the series at that level. This incredible specimen offers technically perfect brilliant surfaces, with fully struck design elements and vibrant mint luster. NGC ID# 26JE, PCGS# 9846

5075 **1992 Silver Eagle MS70 NGC.** The surfaces are entirely untoned and immaculately produced, with gleaming silver luster across the smooth surfaces. Relatively few examples of this date have achieved MS70 status, and perhaps not all of those are as deserving of highest accolades as this flawless Silver Eagle.
From The Steitz Collection. NGC ID# 26JG, PCGS# 9856

1993 Silver Eagle, MS70
Technical Perfection, Incredible Eye Appeal

5076 **1993 Silver Eagle MS70 NGC.** The mintage of Silver Eagle bullion strikes increased by 1.2 million pieces in 1993, driven by increasing silver prices in the bullion markets. This remarkable specimen is fully detailed and brightly lustrous, with technically perfect brilliant surfaces.
From The Steitz Collection. NGC ID# 26JJ, PCGS# 9866

1993 Silver Eagle, MS70
Increasingly Popular Bullion Issue

5077 **1993 Silver Eagle MS70 NGC.** Mintage of Silver Eagle bullion coins increased significantly in 1993, to more than 6.7 million pieces. The pristine brilliant surfaces of this magnificent specimen show no imperfections, even on close inspection with magnification. The design elements are fully struck and both sides radiate vibrant mint luster. NGC ID# 26JJ, PCGS# 9866

5078 **1993-P Silver Eagle PR70 Deep Cameo PCGS.** From a low mintage of 405,913 pieces, the 1993-P Silver Eagle commands a premium over most dates in the series. This technically perfect example is fully struck, with exceptional cameo contrast and terrific eye appeal.
From The Steitz Collection. NGC ID# 26JK, PCGS# 9867

5079 **1993-P Silver Eagle PR70 Ultra Cameo NGC.** This low-mintage proof Silver Eagle is always in demand, especially in the ultimate grade of PR70. This magnificent specimen is fully detailed and technically perfect, with stunning cameo contrast. NGC ID# 26JK, PCGS# 9867

1994 Silver Eagle, MS70
Only Three Others Certified

5080 **1994 Silver Eagle MS70 NGC.** Among the regular issues of American Eagles to this point, 1994 ranks as the second lowest mintage, with slightly over 4 million pieces produced. This incredible 1994 Silver Eagle is a technically perfect coin. A tiny as-made lint mark appears in the field below the eagle's right claw.
From The Steitz Collection. NGC ID# 26JL, PCGS# 9876

5081 **1994 Silver Eagle MS70 NGC.** The 1994 Silver Eagle bullion strike claims a low mintage of 4.2 million pieces. This technically perfect specimen exhibits fully struck design elements and completely brilliant surfaces with ample mint luster. Census: 4 in 70 (5/15). NGC ID# 26JL, PCGS# 9876

5082 **1994-P Silver Eagle PR70 Deep Cameo PCGS.** A low-mintage issue among Silver Eagle proofs, even though a sizeable 372,168 proofs were struck. This example is dramatically contrasted between the frosted motifs and the deep-mirrored fields. There are no technical flaws, and only a few minuscule white toning spots are seen with a glass.
From The Steitz Collection. NGC ID# 26JM, PCGS# 9877

5083 **1994-P Silver Eagle PR70 Deep Cameo PCGS.** Among Silver Eagle proofs that were issued individually, the 1994-P has the lowest mintage of the series at 372,168 pieces. This fully struck and profoundly contrasted example shows no visible flaws, even on close inspection with magnification. NGC ID# 26JM, PCGS# 9877

1995-W Silver Eagle, PR69 Deep Cameo
Traces of Golden Color

5084 **1995-W Silver Eagle PR69 Deep Cameo PCGS.** A fantastically appealing specimen of this famous modern-era key, virtually flawless to the unaided eye. The sole identifying mark appears on the obverse, which shows a tiny planchet defect between the R and T of LIBERTY. Just 59 coins have been assigned the ultimate grade by PCGS (4/15).
Ex: Dallas Bullet (Heritage, 12/2004), lot 2972; ANA Signature (Heritage, 3/2010), lot 1885. NGC ID# 28WZ, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo
Touch of Light Golden Toning

5085 **1995-W Silver Eagle PR69 Deep Cameo PCGS.** A nearly perfect in every regard example of this sought-after series key. Both sides are starkly contrasted, with quicksilver fields and thickly frosted motifs that feature just a hint of light golden toning. Tack-sharp and visually outstanding. Few are finer at PCGS. NGC ID# 28WZ, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo

5086 **1995-W Silver Eagle PR69 Deep Cameo PCGS.** Seemingly infinite depth of mirroring and fully rendered, heavily frosted devices deliver unsurpassed eye appeal on this nearly perfect Deep Cameo. Just a suggestion of pale golden toning on the relief elements heightens the aesthetic merit. Few examples of this key issue are certified finer at PCGS. NGC ID# 28WZ, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo Nearly Flawless

5087 **1995-W Silver Eagle PR69 Deep Cameo PCGS Secure.** The 1995-W is the only true "stopper" in the proof Silver Eagle series, having had a small distribution of just 30,125 pieces. Few examples have been certified by PCGS finer than this piece. Fully mirrored fields and needle-sharp, frosty devices deliver seemingly unimprovable visual merit.
From The Steitz Collection. NGC ID# 28WZ, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo Stellar Eye Appeal

5088 **1995-W Silver Eagle PR69 Deep Cameo PCGS Secure.** Untoned, virtually perfect surfaces yield bold white-on-black contrast on this 1995-W Silver Eagle. This issue was only distributed as part of the five-denomination 10th Anniversary proof sets of that year, which had a limited distribution of 30,125 sets due to a high purchase price of $999.
From The Steitz Collection. NGC ID# 28WZ, PCGS# 9887

5089 **1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** A popular *Guide Book* variety, this issue was produced with West Point dies that lacked the proof finish typically imparted on working dies for that mint. The current example is boldly struck and almost perfectly preserved. It is important to note that PCGS has only certified a single finer piece in MS70 (4/15). NGC ID# 26MG, PCGS# 99942

5090 **2001 Silver Eagle MS70 PCGS.** The PCGS certified population for this issue in perfect MS70 condition amounts to only 24 coins (5/15), a paltry number in comparison to later issues which are represented in this grade by thousands of pieces at this service. This example is fully struck, with intense, frosty luster that shows just a hint of pale champagne coloring.
From The Steitz Collection. NGC ID# 26K3, PCGS# 9954

5091 **2006-W Platinum Eagle Four-Piece Set MS70 NGC.** The set includes the tenth-ounce $5, quarter-eagle $25, half-ounce $50, and one-ounce $100. Each coin is separately certified with the highest obtainable grade. All coins appear flawless and untoned. A single-year reverse type with a Legislative Branch "Foundations of Democracy" design.(Total: 4 coins) PCGS# 21128

2009 Ultra High Relief Twenty One-Ounce Gold, MS70 Prooflike

5092 **2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Saint-Gaudens, MS70 Prooflike NGC.** One can only imagine what Augustus Saint-Gaudens would have given in 1907 for the Mint's current capability to produce Ultra High Relief coins such as this pristine 2009 MS70 Prooflike twenty in high numbers. The concave surfaces gleam with perfection and flawless execution — a fitting tribute to the Saint-Gaudens' design. By definition, tied for the finest known. PCGS# 528564 Base PCGS# 506602

2013-W Gold Buffalo Fifty, Flawless PR70 Reverse Proof with the Moy Signature

5093 **2013-W One-Ounce Gold Buffalo, Reverse Proof, Moy Signature, PR70 PCGS.** Celebrating the 100th anniversary of the American Buffalo design, a mintage of 47,836 reverse proofs were struck featuring high-gloss motifs against textured matte backgrounds. Each coin contains one ounce of .9999 pure gold. A limited number of proofs were issued with the signature of Edmund C. Moy, the 38th Director of the U.S. Mint. PCGS shows a population of 71 2013 Reverse Proofs with the Moy signature, all in PR70 holders (4/15). PCGS# 521909 Base PCGS# 520050

COINS OF HAWAII

5094 **1847 Hawaii Cent MS63 Brown PCGS. Medcalf 2CC-2.** Crosslet 4. The initial brick-red color illuminates protected areas, but most of this Hawaiian cent displays sea-green and golden-brown toning. Carbon is absent and the fields exhibit only minor marks. Listed on page 413 of the 2016 *Guide Book*. PCGS# 10965

1847 Hawaii Cent, MS64 Brown
Crosslet 4, M. 2CC-2

5095 **1847 Hawaii Cent MS64 Brown PCGS. CAC. Medcalf 2CC-2.** Crosslet 4. Two Kings of Hawaii had coinage struck with their portraits. Kalakaua, the later king, ordered silver coinage, while Kamehameha III struck copper large cents. Though this coin is designated as Brown, it displays blushes of orange-red, accompanied by sea-green shades. The borders exhibit occasional minor spots. Listed on page 413 of the 2016 *Guide Book*. PCGS# 10965

1847 Crosslet 4 Hawaii Cent
MS63 Red and Brown

5096 **1847 Hawaii Cent MS63 Red and Brown PCGS. Medcalf 2CC-2.** Crosslet 4, 7x8 berries. Orange-red dominates both sides of this coruscating and fully struck representative. Gunmetal-blue freckles are also present, mostly along the reverse periphery. The surfaces display incidental marks. Ordered by the Hawaiian government from the Attleboro, Massachusetts firm H. M. & E. I. Richards, which blundered the expected HAPA HANELE legend as HAPA HANERI. PCGS# 10966

5097 **1883 Hawaii Ten Cents MS61 NGC.** Crisp detail and satiny luster ensure the Mint State status of this moderately affordable Hawaiian dime. Both sides are consistently toned in amber-gold and pale olive hues, while a few obverse abrasions are not immediately apparent. PCGS# 10979

5098 **1883 Hawaii Quarter MS66 PCGS.** Razor-sharp detail complements satiny mint luster that cartwheels beneath an array of ocean-blue, champagne, and lavender-gray toning on each side. The preservation is exceptional and the fields display modest semiprooflike reflectivity. PCGS has seen only 17 numerically finer representatives (4/15). PCGS# 10987

5099 **1883 Hawaii Half Dollar MS62 PCGS.** A well-struck example with notable semiprooflike mirroring in the fields. The obverse is consistently lavender-gray, while the reverse shows deeper gunmetal and olive-gray hues that stretch across the surface in a wood grain pattern. Fewer abrasions are present than are expected for the grade. PCGS# 10991

5100 **1883 Hawaii Half Dollar MS63 PCGS.** The Hawaiian half dollar, also known as the Hapa Lua, was coined at the San Francisco Mint in 1883, utilizing planchets for regular United States half dollars. This Select Mint State piece has frosty silver luster beneath wispy gold toning. PCGS# 10991

5101 **1883 Hawaii Half Dollar MS64 PCGS.** Sharp, luminous devices are set against distinctly prooflike mirroring in the fields, delivering a high degree of eye appeal for the grade. The obverse shows shades of orange-gold, blue, and violet toning, while the reverse exhibits the same around the peripheries but is essentially brilliant in the center. A few small abrasions on the obverse portrait and adjacent field limit the grade, but are well-masked by the rich patina. Population: 66 in 64 (4 in 64+), 19 finer (4/15). PCGS# 10991

5102 **1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, Thin Planchet, Six Star Reverse, XF40 PCGS. Medcalf 2TE-8.** Captain Thomas H. Hobron built the first narrow gauge railroad in Maui to help transport sugar from the plantations to Kahului's port. The railroad began operations in July 1879, the year Hobron began issuing these tokens. The denomination, 12 1/2 cents, was interchangeable with one bit in Spanish-American money. An evenly struck and unblemished walnut-brown example. Listed on page 414 of the 2016 *Guide Book*. PCGS# 515877 Base PCGS# 600515

5103 **1882 Haiku Plantation One Rial Token AU55 PCGS. Medcalf TE-15.** The Haiku Sugar Company was located east of Wailuku. The denomination, one rial, was based on the Spanish real and was equivalent to about a day's wages for a laborer on the plantation. Per Medcalf, the Haiku Plantation tokens are considered "the most artistic and well-struck of the early metal tokens." This lovely chocolate-brown example shows only trivial contact and provides impressive eye appeal. Listed on page 414 of the 2016 *Guide Book*. PCGS# 600518

GSA DOLLARS

1878-CC GSA Dollar, MS65
White and Lustrous

5104 **1878-CC GSA MS65 NGC.** Many first-year Carson City Morgan dollars from the GSA auctions were eventually broken out of their government-issued holders and sent to the grading services. But this untoned representative has remained in its black GSA capsule for more than four decades. It is lustrous and nicely struck with well preserved fields and only minor chatter on Liberty's face and neck. No box or papers accompany the lot. PCGS# 518845 Base PCGS# 407080

1879-S Reverse of 1879 Dollar, MS67
Scarce GSA Issue

5105 **1879-S GSA MS67 PCGS.** An 1879-S dollar is common everywhere except in a GSA holder, where it is seldom encountered. As of (5/15), PCGS has certified a total of only five GSA examples, with the present dollar as the finest by three grades. It is a delicately toned and fully struck Superb Gem that offers potent luster and a smooth cheek. No box or certificates are included. PCGS# 519010 Base PCGS# 7092

1880/79-CC GSA Dollar, MS65
VAM-4, Reverse of 1878

5106 **1880/79-CC Reverse of 1878, GSA, MS65 NGC. VAM-4.** A Top 100 Variety. A famous Carson City Morgan die marriage that pairs an obvious overdate with the obsolete first-year reverse subtype. This lustrous better grade example has a nice strike and only a hint of straw-gold toning. The fields display minimal contact, and the cheek shows only moderate grazes. No box or papers are included. PCGS# 518922 Base PCGS# 407108

5107 **1880-CC GSA MS65 NGC.** Only a trace of golden toning is present on this highly lustrous and beautifully preserved Gem. The centers display slight incompleteness, customary for the issue. The original black box and certificate of GSA origin are included in the lot. *Ex: Long Beach Signature (Heritage, 2/2012), lot 4516.* PCGS# 518851 Base PCGS# 407100

1881-CC GSA Dollar, MS66+
Multicolor Reverse Toning

5108 **1881-CC GSA MS66+ NGC. VAM-2.** An intricately struck high grade dollar that boasts booming luster and unmarked fields. The obverse is brilliant, while the reverse is partially patinated with blushes of plum-red, navy-blue, and golden-brown. The fields are pristine and the portrait shows only delicate contact. Offered without a box or certificate. PCGS# 518863 Base PCGS# 407126

1882-CC GSA Dollar, MS66+
Exceptionally Clean Surfaces

5109 **1882-CC GSA MS66+ NGC.** Delicate gold toning visits this thoroughly lustrous and high grade Carson City type coin. The cheek is nearly pristine, and the fields display only inconsequential imperfections. The original buyer from the GSA auctions must have been amazed when the coin finally arrived. No box or certificate accompanies the lot. PCGS# 518866 Base PCGS# 407134

5110 **1883-CC GSA MS66+ NGC. VAM-3A.** The letters N and ST from IN GOD WE TRUST are faintly clashed near the bust of Liberty. Both sides display a wisp of tan toning, though many observers would refer to this Carson City dollar as brilliant. Lustrous and nicely struck. No box or certificate accompanies the lot. PCGS# 518869 Base PCGS# 407144

5111 **1885-CC GSA MS65 NGC. VAM-2B.** The 1885-CC Morgan is a famous and popular GSA issue, with nearly 65 percent of the 228,000-coin mintage represented in the early 1970s sales. This Gem VAM-2B example remains in its original hard plastic GSA holder, and exhibits frosty, brilliant luster. The design elements are sharply brought up and a few faint grazes on Liberty's cheek are all that limit the grade. The late die state crack to the right of the 5 in the date is just beginning. PCGS# 518875 Base PCGS# 407160

1885-CC GSA Dollar, MS66
Outstanding Preservation

5112 **1885-CC GSA MS66 NGC. VAM-4.** A Hot 50 Variety. The large die chip beneath the second 8 in the date makes the present VAM popular among Carson City specialists. An exemplary Premium Gem with pristine fields and an uncommonly unmarked portrait. The stone-white surfaces are lustrous and well-struck. The low mintage '85-CC is significantly scarcer than its '82-CC through '84-CC predecessors. No box or certificates accompany the lot. PCGS# 518875 Base PCGS# 407160

1885-CC GSA Dollar, MS66
'Thick Dash' VAM-4, Hot 50 Variety

5113 **1885-CC GSA MS66 NGC. VAM-4.** A Hot 50 Variety. VAMworld.com calls VAM-4 "the key variety of the date." It can be attributed by the unaided eye, due to the "thick dash under and touching [the] second 8" in the date. Such dashes are popular among Morgan dollar collectors, partly due to the various 1880-CC VAMs that show traces of the base of a 7 beneath the second 8. The present brilliant Premium Gem has dynamic luster, a bold strike, and exceptionally well preserved surfaces. No box or certificate accompanies the lot. PCGS# 518875 Base PCGS# 407160

1885-CC GSA Dollar, MS66
Well-Struck, Nearly White

5114 **1885-CC GSA MS66 NGC.** A mere hint of almond-gold toning visits this thoroughly lustrous and crisply struck silver dollar. The obverse field is immaculate, while the cheek and reverse field show only delicate marks. The lowest mintage Carson City issue, nonetheless collectible in quality Mint State because of the GSA holdings dispersed during the 1970s. No box or papers are included in the lot. PCGS# 518875 Base PCGS# 407160

1891-CC Morgan Dollar, MS61
GSA Hoard With Box and Card

5115 **1891-CC GSA MS61 PCGS.** The entire original black GSA holder has been slabbed and certified by PCGS and the original cardboard government box and card accompany the lot. This attractive Mint State specimen features well-struck design elements and lustrous surfaces that show a scattering of minor contact marks on both sides. Population: 2 in 61, 9 finer (5/15). PCGS# 518881 Base PCGS# 407206

ERRORS

1857 Flying Eagle Cent, MS63
Struck on an Attenuated Planchet

5116 **1857 Flying Eagle Cent — Struck on a Thin Planchet — MS63 PCGS.** This cent weights 69 grains, according to the PCGS insert. The expected weight of a Select Uncirculated Flying Eagle cent is 72 grains. Presumably, the planchet was attenuated in thickness near 7 o'clock, since the strike is very weak in that vicinity, and opposite at 11 o'clock on the reverse. The date is extremely faint but the crossbar of the 7 is apparent. The eagle is well-struck, and the lustrous chestnut-gold surfaces are unblemished. NGC ID# 2276, PCGS# 2016

1919 Buffalo Nickel, MS65
Struck 20% Off Center

5117 **1919 Buffalo Nickel — Struck 20% Off Center — MS65 PCGS.** Significantly off center toward 7 o'clock. UNITED STATES OF AMERICA is partially off the flan. The designer's initial is absent, as is the bottom of the 191 in the date. The bison and Indian are complete and show exceptionally sharp definition. Pastel lilac-red, butter-gold, and jade-green toning grace lustrous and unabraded surfaces. Minute carbon decides the grade.

5118 **(1924) Silver Dollar — Blank — Ungraded NGC.** 26.7 gm. The standard weight of a Peace dollar is 26.73 gm. A blank, or Type One planchet, for the 90% silver dollar last struck for circulation in 1935. Lightly toned olive-gold and rose-red. One side of the piece displays a faded felt marker inscription, which NGC denotes on the insert as "2/4/54 rec'd in bag of new 1924 $'s from Philly."

BETTS MEDAL

1782 Holland Receives Adams Medal, SP62
Betts-603, Sharply Struck and Prooflike

5119 **1782 Holland Receives Adams, Betts-603, SP62 PCGS.** 45 mm. 448.6 gn. The Latin legends of this Dutch medal declare America as "a free sister, acknowledged by solemn decree April 19, 1782." The design depicts America as a Native American woman, bestowed with a Liberty Cap by a Netherlands maiden dressed in armor. A lion and unicorn represent the defeated England. Future U.S. President John Adams served as Minister to the Netherlands, and commissioned the medal. Engraved by Johann Georg Holtzhey. Lightly and attractively toned golden-brown and aquamarine. The open areas remain brilliant and reflective. The high relief design is well-struck. The reverse field displays moderate marks appropriate for the designated grade.
Ex: Dodson and Collier Collections (Bowers and Merena, 6/1984), lot 2734. PCGS# 541617

SO-CALLED DOLLAR

1901 Lesher Dollar, Near-Mint
HK-791, Imprint Type, Serial #4

5120 **1901 Lesher Dollar, Imprint Type, Serial #4, Zerbe-5, HK-791, R.6, AU58 PCGS.** Joseph Lesher was a Victor, Colorado, silver mine owner and an advocate of the free coinage of silver. He struck several varieties of octagonal referendum "dollars," some bearing the names of local merchants, before the Secret Service put a stop to his silver medal activities in 1901. This is a briefly circulated and lightly abraded example with a cream-white obverse and a mildly granular charcoal-gray reverse. Listed on page 408 of the 2016 *Guide Book*. Population: 3 in 58, 3 finer (5/15).

HARD TIMES TOKENS

5121 **1837 Feuchtwanger Cent MS65 PCGS. CAC. Low-120, HT-268, Breen 3-E, R.3.** A satiny and mark-free Gem with attractive pastel apricot-gold and powder-blue patina. A late die state with crumbling on the 7 in the date, the N in ONE, and the obverse rim near 5 o'clock. Listed on page 408 of the 2016 *Guide Book*. PCGS# 661090

5122 **Undated Wright & Bale, New York, New York, MS62 Brown NGC. Low-332, Baker-594A, Rulau-HT-342.** Charles Cushing Wright and James Bale were partners in an engraving venture during the early 1830s. Bale was formerly the apprentice of Early American engraver Richard Trested. A sharply struck and unworn example with an olive-brown obverse and ample glimpses of mint red on the reverse.

U.S. TRADE TOKENS (1866-1889)

5123 **Uncertified (1879-1890) Fort Bowie, Arizona Territory, Drink Token. Cunningham-AZ100a.** This plain edge 22mm brass token grades XF and has lightly abraded olive-brown surfaces. The obverse states POST TRADER (ornament) / FORT / BOWIE / ★ A.T. ★ and the reverse reads ★GOOD ★ / ★ / FOR ONE / ★ / ★DRINK ★. Valued at $3,500 in the first volume of the Paul A. Cunningham reference, *Military Tokens of The United States*.

INGOTS

(1941-42) 6.26-Ounce Silver Ingot
Type One San Francisco Oval Hallmark

5124 **(1941-42) 6.26-Ounce San Francisco Mint Silver Ingot.** This smaller-size silver ingot displays the Type One oval hallmark with small font serial number, and curved stem 9 digits in the fineness. The ingot number 174 impressed on the top side indicates this was probably cast in late 1941 or early 1942. This type is the next to last serially numbered series produced in San Francisco. The series is a relatively common one with an estimated 1500 ingots produced, only some 60 have been traced. The top side has the oval hallmark centered at the top, followed by the ingot number 174, then 999.75, and finally FINE. The upper part of the back side has the weight stamped in: 6.26 / OZS. No imprints are on the sides. The top side is brighter than the rest of the ingot, and there are traces of a few gas bubbles evident on the lower half. The ingot measures 31 x 50 x 10 mm.

(1953-54) 23.91-Ounce Sheared Plate Silver Ingot Complete San Francisco Mint Hallmark on Back

5125 **(1953-54) 23.91-Ounce San Francisco Mint Sheared Plate Silver Ingot.** It appears that only 2,000 or so sheared silver ingots were ever produced, but the attrition rate was very high and only 25 or so are believed extant today. The large plates of silver were stamped with an oversized Type Two hallmark on the back side, as seen here; but almost all of the large hallmark was cut in half when the larger ingots were sheared into smaller ones. Silver ingot specialist, Ken Conaway, has only seen one other sheared ingot with an intact hallmark on the back. Among sheared plate ingots, number 477 is dated 1954, which would place this item's production date in late-1953 or early-1954. The top side has a well-centered Type Two hallmark / 424 / 23.91 / OZS / 999.75. The large size hallmark is well-centered on the back side. The surfaces have the look of untampered old silver. No imprints on the sides, of course. The ingot measures 66 x 97 x 10 mm.

NUGGETS

5126 **Gold Nugget. 7.2 grams, .2 ounce.** 10.5 x 11.5 x 3.1mm. Smoothly oblong, flat nugget of fairly uniform thickness and bright, medium-gold coloration. Only naturally smoothed indents and shallow surface pits. Original glossy surfaces.
Ex: Philadelphia Americana Sale (Stack's, 10/2010), lot 3612.

5127 **Gold Nugget. 20.81 grams, .7 ounce.** 31.2 x 24.0 x 8.1mm. A bright, yellow-gold nugget, naturally rough, irregular flat shape, but attractive surfaces.
Ex: Baltimore Auction (Bowers and Merena, 6/2010), lot 339.

24.7-Gram Gold Nugget, Bright Patina Attractive, Nicely Shaped Gold Nugget

5128 **Gold Nugget. 24.7 grams, .8 ounce.** 22.8 x 15 x 13 mm. A knobby, natural greenish-gold nugget with bright highlights and shimmering gold allure in protected areas. A large, wonderfully shaped piece slightly rounded on its high points but decidedly distinctive and attractive.
Ex: Philadelphia Americana Sale (Stack's, 10/2010), lot 3600.

25-Gram Gold Nugget, Natural Appeal

5129 **Gold Nugget. 25 grams, .8 ounce.** 23.1 x 20.3 x 14.8 mm. A sizeable gold nugget in its natural state with olive-gold color and a few tiny quartz inclusions. A pleasing shape with craggy recesses and slightly rounded, exposed high points.
Ex: Philadelphia Americana Sale (Stack's, 10/2010), lot 3599.

5130 **10 Gold Nuggets. Total Weight 62.6 grams, 2.2 ounces.** A group of 10 native gold nuggets of generally similar appearance and size, yellow-gold color, for a total weight of 62.6 grams. An attractive, uniform group without any obvious quartz. Total: 10 nuggets.

End of Session Three

SESSION FOUR

PATTERNS

1850 Restrike Cent in Billion, PR64
Rare Judd-120 Variety

5131 **1850 One Cent, Judd-120 Restrike, Pollock-135, High R.7, PR64 PCGS.** The so-called "ring cent" of 1850 was an early attempt by the Mint to reduce the size of the large cent. This piece is an unperforated restrike produced with cracked dies, struck in billion (an alloy of 90% copper and 10% silver) with a plain edge, and is one of fewer than a dozen such pieces known. The obverse exhibits the denomination CENT at the top with the date below and blossoms on each side; the reverse exhibits USA at the top and the legend ONE TENTH SILVER along the bottom. This particular piece displays pale olive-gold patina overall, with deeper gray-brown toning in the central reverse. Well-struck with no significant distractions. Housed in an old green label holder. Population: 2 in 64, 0 finer (4/15). PCGS# 11514

1854 Cent, PR63 Red and Brown
Judd-161, Transitional Diameter

5132 **1854 One Cent, Judd-161, Pollock-187, R.4, PR63 Red and Brown PCGS.** The diameter is about midway between the large and small cent. The designs are similar to the contemporary large cent but smaller in scale, and there are no obverse stars. The wreath is undersized in relation to the legends. Struck in bronze with a plain edge. A medium brown representative with straw-gold and steel-blue undertones. Devoid of marks, but moderately granular near Liberty's nose. Struck from clashed dies. Encapsulated in an old green label holder. PCGS# 11664

1856 Half Cent, PR61
Judd-177, Copper-Nickel

5133 **1856 Half Cent, Judd-177, Pollock-205, R.5, PR61 PCGS.** Regular dies for the Braided Hair half cent, struck in copper-nickel with a plain edge. These metallurgical trial strikes were produced in anticipation of the Flying Eagle small cents that began production the same year. A chestnut-gold example with smooth, glossy surfaces and minor incompleteness of strike. The rims are broad and lightly brought up, as usual for Judd-177. A few specks of aqua residue are noted within the reverse legends.
Ex: Brian Loncar Collection (Heritage, 5/2003), lot 6400, which realized $1,955. PCGS# 11777

1859 Longacre Half Dollar, PR62
Judd-237, Silver, Reeded Edge

5134 **1859 Half Dollar, Judd-237, Pollock-293, R.4, PR62 PCGS.** The Longacre-designed French Liberty Head, facing right with laurel and vine in her hair. A ribbon below the bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date below. The reverse displays the agricultural wreath of the Seated dime, resized to appropriate scale, around the denomination HALF DOLLAR. Struck in silver with a reeded edge. The present fully struck specimen displays lovely peach-gold toning, with hints of lilac across the right-side obverse margin. Microgranular near 9 o'clock on the obverse, the sole reason why a higher grade was not attained. PCGS# 11966

1859 Half Dollar in Copper, PR63 Brown Judd-238, Glossy Surfaces

5135 **1859 Half Dollar, Judd-238, Pollock-294, R.5, PR63 Brown PCGS.** Longacre's so-called "French Head" of Liberty, which faces right, draped with a ribbon inscribed LIBERTY and a wide wreath of oak and vine on her head. The reverse has HALF DOLLAR in the center, surrounded by a wreath identical except for scale to that seen on the Legend Obverse Seated dime. Struck in copper with a reeded edge. At least 30 examples are believed to exist. This is a glossy Select representative, with auburn-brown surfaces that yield cool steel-blue overtones. The strike is bold and there are no obtrusive surface flaws. Housed in an old green label holder. Population: 7 in 63 Brown, 10 finer (4/15). PCGS# 11968

1866 No Rays Shield Nickel, PR64 Judd-507 Transitional Pattern

5136 **1866 No Rays Shield Nickel, Judd-507, Pollock-591, R.5, PR64 PCGS.** This transitional pattern lacks the rays found on regular issue 1866 Shield nickels. The reverse differs slightly from 1867 No Rays business strikes, since a star points to the center of the first A in AMERICA, rather than between AM. Some rare 1867 proofs were struck from this reverse subtype, believed to be the first No Rays die. Struck in nickel with a plain edge. Medium caramel-gold and dove-gray toning blends throughout this fully struck and slightly subdued Choice proof.
From The DuPont Collection. PCGS# 60703

1869 Three Cent Nickel, PR63 Smooth Pillars, Judd-676

5137 **1869 Three Cent Nickel, Judd-676, Pollock-753, R.4, PR63 PCGS.** Similar to the contemporary three cent nickel, except the date is larger and the denomination pillars are smooth. The Pollock variant with a long lower left ribbon end. Struck in nickel with a plain edge. Pastel straw-gold patina adorns this satiny and nicely struck specimen. The unabraded surfaces show infrequent hints of granularity. A slender vertical lamination (as made) is noted beneath Liberty's nose.
Ex: New York Signature (Heritage, 7/2002), lot 8489; Pittsburgh Signature (Heritage, 8/2004), lot 7938. PCGS# 60901

1869 Judd-702 Standard Silver Ten Cent Proof Details, Silver, Reeded Edge

5138 **1869 Standard Silver Ten Cents, Judd-702, Pollock-781, R.5 — Cleaned — ANACS. PR60 Details.** Standard Silver design with a diadem in Liberty's hair on the obverse. The reverse has an oak and laurel wreath with STANDARD SILVER above and the date below with 10 CENTS in the center. Struck in silver with a reeded edge. GOD has been widely repunched both to the left of G and right of D. A fully struck and untoned example without any visible contact marks, although the surfaces are moderately subdued and somewhat wavy. PCGS# 60927

1869 Standard Silver Half, PR64 Brown Copper, Plain Edge, Judd-745

5139 **1869 Standard Silver Half Dollar, Judd-745, Pollock-826, Low R.7, PR64 Brown PCGS.** Liberty faces right, and wears a cap ornamented by two stars. The reverse features a wreath of oak and laurel leaves, with 50 CENTS tightly fit within the wreath and the date depicted below. The borders exhibit the usual legends for the Standard Silver series. Repunching is noted on the initial B, the L in LIBERTY, and the lower left reverse star. Struck in copper with a plain edge. The rich ruby-red, ocean-blue, and orange toning is comprehensive aside from a brown obverse spot at 4 o'clock. PCGS# 60973

1870 Standard Silver Ten Cents, PR64
Rare Judd-842 Variety in Aluminum

5140 **1870 Standard Silver Ten Cents, Judd-842, Pollock-934, High R.7, PR64 PCGS.** On the obverse, Liberty wears a cap with three stars and has flowing hair, a scroll, inscribed with the legend IN GOD WE TRUST, is below, and UNITED STATES OF AMERICA encircles. The reverse shows 10 CENTS and the date inside a wreath of cotton and corn, with STANDARD above. One of fewer than half a dozen known that are struck in aluminum with a plain edge. Bright bluish-gray patina blankets each side, revealing sharp motifs that provide subtle contrast with the mirrored fields. No environmental impairments are observed. Housed in a first generation holder. Population: 1 in 64, 3 finer (4/15). PCGS# 61086

1870 Standard Silver Half Dollar in Silver, PR64
Judd-951, In an Old Doily Label Holder

5141 **1870 Standard Silver Half Dollar, Judd-951, Pollock-1094, R.5, PR64 PCGS.** The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in silver with a reeded edge. These pieces were sold in sets with the other Standard Silver denominations for $15. This example is well-struck, with deeply mirrored fields and a blush of light golden toning over each side. A bluish speck of deeper color resides near the O in OF. Housed in a rare old doily label holder. Population: 9 in 64, 3 finer (4/15). PCGS# 61197

1871 Nickel, PR64 Red and Brown
Liberty Head, Judd-1054
Struck in Copper

5142 **1871 Five Cents, Judd-1054, Pollock-1189, High R.6, PR64 Red and Brown PCGS.** The obverse is similar to the adopted three cent nickel design, while the reverse has 5 CENTS in the center and is surrounded by a laurel wreath. Struck in copper with a plain edge. Forest-green and lavender-red bathe this rare specimen. A fully struck and satiny near-Gem with smooth, undisturbed surfaces.
Ex: Denver Signature (Heritage, 8/2006), lot 1466, which realized $1,610. PCGS# 71313

1873 Bailly-Designed Trade Dollar
Judd-1281, PR62
Ex: Lemus

5143 **1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR62 NGC.** Ex: Lemus Collection. The obverse, designed by J. A. Bailly, features a coiled hair bust of Liberty facing left. The reverse mimics the 'Amazonian' pattern silver dollar save for a reduction in the size of the eagle and the addition of the motto E PLURIBUS UNUM above and the weight and fineness below. Struck in silver with a reeded edge. Fully reflective proof mirrors dance around the brilliant surfaces of this remarkable pattern Trade dollar. The centers are brilliant with peripheral gold toning.
From The Lemus Collection, Queller Family Collection Part Three. PCGS# 61566

1879 Goloid Metric Dollar, Judd-1617

5144 **1879 Metric Dollar, Judd-1617, Pollock-1813, R.4 — Obverse Spot Removed — NCS. Proof.** A William Barber design with the head of Liberty facing left, wearing a coronet with the word LIBERTY on it. Above the portrait is E PLURIBUS UNUM, and the date is below. The reverse has the composition of the metric alloy in three lines with the weight below, surrounded by an elaborate wreath of corn and cotton, and a cartouche above with DEO EST GLORIA inside. At the margin is UNITED STATES OF AMERICA and ONE DOLLAR. Struck in goloid alloy with a reeded edge. A well struck and satiny caramel-gold and powder-blue pattern. Both sides display faint hairlines, and a small patch of hairlines accompanies a minor spot near star 4.
Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 2752. PCGS# 61995

1881 Liberty Nickel, PR63
Judd-1671, No Reverse Legends

5145 **1881 Liberty Head Five Cents, Judd-1671, Pollock-1872, High R.6, PR63 PCGS.** An early prototype for the Liberty nickel that was adopted two years later. This version differs in several ways from the regular design. On the obverse UNITED STATES OF AMERICA circles the rim in place of the stars. On the reverse, a large V is surrounded by a wreath with no statutory inscriptions around the periphery. Struck in nickel with a plain edge. A caramel-gold and powder-blue specimen of this rare pattern. Well struck except for the left ear of corn. Devoid of contact, although the reverse is minutely granular and a spot is noted on the obverse dentils at 9 o'clock. PCGS# 62067

GOLD DOLLARS

5146 **1849 Open Wreath MS63 PCGS. Breen-6004.** The Close Stars subvariety with thin date numerals. A coruscating sun-gold Select example. Nicely struck and inoffensively abraded. The introductory Open Wreath type was struck only in 1849, but is nonetheless collectible in quality Mint State. NGC ID# 25B9, PCGS# 7502

5147 **1849 Open Wreath MS64+ NGC.** The 1849 Open Wreath is more often seen than its Closed 3 counterpart, ideal for date or type purposes. This Plus-graded example shows bold design definition, with satiny yellow-gold luster and minimal abrasions. Several stars are recut. NGC ID# 25B9, PCGS# 7502

5148 **1850-O MS61 NGC. Variety 1.** A lovely apricot-gold example. Satiny and unblemished with a crisp strike and good eye appeal. The lowest mintage New Orleans gold dollar issue. Just 14,000 pieces were struck. Census: 47 in 61, 26 finer (4/15). NGC ID# 25BJ, PCGS# 7512

1851-C Gold Dollar, MS62
Nearly Full Strike, Lovely Orange-Gold Color

5149 **1851-C MS62 PCGS. Variety 3.** There is a die crack from the rim to (STATE)S. The nearly full strike on this lustrous Uncirculated Charlotte gold dollar, combined with the issue's relative availability in high grades, make it ideal for type purposes. Liberty's hair is fully delineated, the stars show full centers, and the wreath leaves are completely detailed. Mild chatter occurs in the left obverse field, a common trait among high-end coins. One of perhaps 75 Mint State survivors from a mintage of 41,267 coins. Population: 19 in 62 (1 in 62+), 32 finer (5/15). NGC ID# 25BL, PCGS# 7514

5150 **1851-O MS63 PCGS. Variety 1.** The 1851-O is one of the few gold dollars from this mint that is readily collectible in Mint State. This Select example displays satiny yellow-gold luster with a few deeper amber accents in the recesses. Minor striking weakness is evident in the centers, as usual for this New Orleans issue. NGC ID# 25BN, PCGS# 7516

5151 **1852-O MS62 NGC. Variety 1.** Attractive orange-gold luster appears on each side of this 1852-O gold dollar, a far-above-average survivor of the mintage of 140,000 coins. Some die clashing and a few scattered marks are evident in concert with the grade, and LA in DOLLAR and the 5 in the date are somewhat softly struck as expected, but this piece offers much remaining eye appeal. Census: 51 in 62, 31 finer (5/15). NGC ID# 25BT, PCGS# 7520

1853-O Dollar, Pleasing MS64
Elusive in This Grade

5152 **1853-O MS64 NGC. Variety 2.** The 1853-O gold dollar, with a mintage approaching 300,000 pieces, can be located through MS62 without too much trouble. This issue is elusive in near-Gem, where NGC and PCGS have certified only about 70 examples. Higher-grade pieces are rare, with only 20 coins seen by both services. The lustrous yellow-gold surfaces of this MS64 offering exhibit sharply struck design features. No significant marks are apparent, nor are areas of mentionable die rust that sometimes occur as a result of the humid New Orleans climate. Overall, this piece yields pleasing eye appeal. Census: 39 in 64 (1 in 64+), 13 finer (5/15). NGC ID# 25BX, PCGS# 7524

5153 **1855 MS62 PCGS.** Minor clash marks are evident on the reverse of this Type Two gold dollar. Faint field reflectivity is seen at certain light angles on this lovely yellow-gold piece with excellent eye appeal. NGC ID# 25C4, PCGS# 7532

5154 **1855-O AU50 NGC. Variety 2.** A lightly circulated but problem-free apricot-gold representative. The sole New Orleans issue of the Type Two design. Scarce, since only 55,000 pieces were produced. A later die state with lapping apparent on the upper portion of the wreath. NGC ID# 25C7, PCGS# 7535

1855-O Gold Dollar, AU58
The Final Gold Dollar at New Orleans

5155 **1855-O AU58 NGC. Variety 2.** The 1 in the date partly under the first L in DOLLAR attributes the variety. The 1855-O is the final gold dollar produced at the New Orleans Mint. Uncirculated examples are difficult to locate, and when found are mostly in MS60 to MS62 condition. Many collectors seek this issue, and therefore often acquire a near-Mint piece such as the present offering. The yellow-gold surfaces retain a good amount of luster and exhibit well-defined devices, though Liberty's hair at the temple is weak. NGC ID# 25C7, PCGS# 7535

5156 **1856-S/S Type Two FS-501 AU50 NGC.** Repunched Mintmark. Gold dollar production in San Francisco in 1856 was restricted to just 24,600 pieces, all of the Type Two design. Survivors are highly sought-after in all grades, but are only infrequently found in AU and finer. This About Uncirculated representative shows appealing olive-gold patina with deeper coppery-orange overtones in the peripheral recesses. Well-struck and problem-free. PCGS# 145703 Base PCGS# 7536

5157 **1859 MS64 PCGS. CAC.** A lovely near-Gem that possibly deserves a finer grade, this frosty gold dollar exhibits brilliant yellow-gold luster with hints of rose and blue overtones. Trivial grade-consistent marks are noted alongside a sharp strike. Population: 29 in 64 (2 in 64+), 29 finer (5/15). NGC ID# 25CL, PCGS# 7551

5158 **1859-S AU58 NGC.** With a mintage of only 15,000 pieces, the 1859-S gold dollar is somewhat scarcer in high grade than is generally realized by nonspecialists. This near-Mint example displays original olive-gold patina, with remnants of luster in the protected regions. The design elements are sharp, showing just minor high-point friction. Census: 40 in 58, 15 finer (4/15). NGC ID# 25CP, PCGS# 7554

5159 **1860-S — Improperly Cleaned — NGC Details. Unc.** Gold dollar production at San Francisco appears to have been little more than an afterthought, since mintages were tiny when compared with double eagles. Just 13,000 S-mint gold dollars were struck in 1860, the final emission from the facility until 1870. This straw-gold example has a crisp strike and few abrasions. The surfaces are subdued and faintly hairlined. NGC ID# 25CT, PCGS# 7557

1861 Gold Dollar, MS65
Excellent Type Candidate

5160 **1861 MS65 PCGS. CAC.** The Mint struck 527,150 gold dollars in the same year the Civil War began driving precious metals out of circulation. The Treasury stopped paying out gold in December of that year, leaving large quantities of 1861 gold dollars locked away in bank vaults. This is, therefore, an available date through Gem condition and a perfect issue for type purposes. A bold impression, lively luster, and light yellow-gold surfaces provide this coin with universal appeal. Light chatter in the lower obverse field likely precludes an even higher grade. Population: 40 in 65, 10 finer (4/15). NGC ID# 25CU, PCGS# 7558

5161 **1861 MS63 Prooflike NGC.** The present lot is the sole 1861 gold dollar certified as Prooflike by NGC (4/15). The fields display impressive reflectivity, and it is likely that this well struck honey-gold coin was sold as a proof in its past. Unimportant field hairlines determine the grade. PCGS# 77558 Base PCGS# 7558

5162 **1873 Closed 3 AU58 PCGS.** While the Closed 3 variety is definitively rarer than the Open 3 variety, although the exact mintage always stirs debate. The *Guide Book* reports just 1,800 business strikes for the Closed 3 (versus 123,300 pieces for the Open 3); others suspect the true figure may be as high as 5,000 Closed 3 pieces made. In any case, most collectors prefer an example of each variety. This near-Mint example straddles the line between Mint State and circulated status, and it would be nicely suitable for a gold dollar set of either persuasion. The medium-gold surfaces show only light abrasions, and plentiful luster remains. Population: 13 in 58, 51 finer (4/15). NGC ID# 25DA, PCGS# 7574

1877 Gold Dollar, MS64 Prooflike
Stark Cameo Contrast

5163 **1877 MS64 Prooflike NGC.** The 1877 is a challenging issue in the gold dollar series, restricted in availability by a mintage of only 3,900 pieces. NGC has certified only 27 examples as Prooflike, including three in this grade and four finer (5/15). This Choice representative is sharply struck and warmly colored, with considerable field-motif contrast. Some light marks in the upper-right reverse field preclude a full Gem grade. PCGS# 77578

5164 **1885 MS66 PCGS.** Pale and partly reflective with glimpses of green against pale canary-yellow. This well-struck Premium Gem comes from an issue of only 11,156 business strikes. Population: 35 in 66, 16 finer (5/15).
Ex: Central States Signature (Heritage, 4/2012), lot 6340. NGC ID# 25DP, PCGS# 7586

5165 **1887 MS66 PCGS.** A sensational Premium Gem, this late-issue gold dollar has brilliant yellow-gold surfaces with a hint of delicate rose toning. Population: 67 in 66 (2 in 66+), 28 finer (5/15). NGC ID# 25DS, PCGS# 7588

PROOF GOLD DOLLAR

1888 Gold Dollar, PR62 Cameo
Attractive and Deeply Mirrored

5166 **1888 PR62 Cameo ANACS.** A scarce issue despite the mintage of 1,079 proofs. Popular as gifts, many coins were purchased by jewelers when the proofs were issued, and then either mounted or engraved. This survivor is deeply mirrored with attractive, medium-gold surfaces. The motifs show contrasting mint frost to earn the Cameo designation. Minor delicate lines are visible on both sides. NGC ID# 25EY, PCGS# 7638

CLASSIC QUARTER EAGLES

5167 **1834 AU53 NGC. Breen-6138, Variety 1, R.1.** Peach-tinged luster outlines design elements of this original and lightly abraded Classic type coin. The introductory Small Head subtype, known only from the present die pair. Evenly struck from moderately rotated dies. NGC ID# 25FS, PCGS# 7692

5168 **1834 AU55 NGC. Breen-6140, Variety 2, R.3.** The "Wide AM" variety, scarcer than the Small Head variety that dominates the first-year Classic quarter eagle date. This orange-gold Choice AU example has a lustrous margin and an even strike. The left obverse field displays unimportant marks, and the remainder of the coin is smooth. NGC ID# 25FS, PCGS# 7692

5169 **1834 AU58 NGC. Breen-6140, Variety 4, R.3.** Large Head. A well defined and lightly abraded caramel-gold Classic representative. Luster brightens design recesses, and infrequent traces of dirt attest to the originality.
Ex: FUN Signature (Heritage, 6/2008), lot 1798. NGC ID# 25FS, PCGS# 7692

1834 Classic Head Quarter Eagle, MS61
An Ideal Type Representative

5170 **1834 MS61 NGC. Breen-6138, Variety 1, R.1.** William Kneass' Classic Head design was implemented part way through 1834, replacing John Reich's Capped Bust portrait. The Capped Head coins are challenging to locate in any grade, while the Classic Head representatives (112,234 pieces struck) are far more accessible overall. This mint condition Small Head example features illuminating luster over light yellow-gold, minimally abraded surfaces. The stars show full centers, the hair curls are well-detailed, and the eagle's plumage is crisply rendered. NGC ID# 25FS, PCGS# 7692

5171 **1835 AU55 NGC. Breen-6141, Variety 6, R.2.** The "Wide AM" variety, a re-use of the 1834 Variety 2 reverse. Three die marriages of 1835 quarter eagles are known, although varieties 5 and 7 are infrequently encountered. The present lightly worn butter-gold example displays peripheral luster and an incomplete central strike. NGC ID# 25FT, PCGS# 7693

5172 **1836 Block 8 AU58 NGC. Breen-6144, Variety 15, R.2.** Luster illuminates the peripheries and devices of this sun-gold Classic type coin. Close inspection reveals minor field abrasions, but high-point friction is limited to the curls and wingtips. PCGS# 97694

5173 **1838-C — Cleaning — PCGS Genuine. AU Details. Variety 20.** A honey-gold representative of the elusive introductory Charlotte issue. Bright from cleaning, and a mint-made strike-through is noted on the cheek, but the wings and curls are bold. The sole die variety for the '38-C. Just 7,880 pieces were struck. NGC ID# 25FZ, PCGS# 7697

5174 **1839 — Improperly Cleaned — NGC Details. AU. Breen-6148, Variety 21, R.3.** The reported mintage of 27,021 pieces was produced with a single pair of dies. This better date Philadelphia quarter eagle has minimal wear and lacks visible marks, but the pale apricot-gold surfaces are somewhat luminous from a wipe. NGC ID# 25G2, PCGS# 7698

LIBERTY QUARTER EAGLES

5175 **1840-C VF25 PCGS. Variety 1.** Original olive-gold patina gives this mid-grade 1840-C quarter eagle pleasing eye appeal. The reverse appears slightly finer than VF25, but the obverse portrait is weak, partly due to a weak strike and not only wear. Only 175 to 225 examples of this issue survive in all grades. NGC ID# 25GB, PCGS# 7718

1841-C Quarter Eagle, Attractive AU50
Elusive Early Charlotte Issue

5176 **1841-C AU50 PCGS. Variety 1.** Only a single die pair is known for the production of 10,281 quarter eagles of the 1841-C vintage. Most circulated extensively during the early years of the Charlotte Mint, a period when the Bechtlers had largely (or entirely) ceased coinage, and small-denomination gold in the Carolinas and Georgia saw burgeoning demand. The average circulated example grades between XF45 and AU50, but certified examples are known as low as Fine 12. These factors make the 1841-C among the rarest Charlotte Mint quarter eagle issues. This piece shows about half of the luster remaining, but a patch of small digs shows before Liberty's nose, and other smaller marks are scattered about. Attractive amber-gold color is a plus. The reverse strike is typical, strong save for the lower eagle's legs, and clash marks are seen on that side. Population: 13 in 50, 23 finer (5/15). NGC ID# 25GE, PCGS# 7721

5177 **1844-C VF30 NGC. CAC. Variety 1.** Those in search of original Charlotte Mint gold coins need look no further than the present lot. This orange-red and olive-green example should please the veteran branch mint gold specialist. The strike is typical, and the lightly marked surfaces are faintly granular. NGC ID# 25GU, PCGS# 7735

5178 **1850-O AU58 NGC. Variety 4.** The 5 in the date is lightly repunched on this variety. As a date, the 1850-O quarter eagle is fairly scarce, somewhat more so than would be assumed by looking only at its mintage of 84,000 coins. This near-Mint example retains modest luster in the recesses, with original orange-gold patina overall. The obverse is sharp, but the eagle exhibits the usual striking softness. Census: 62 in 58 (1 in 58+), 11 finer (5/15). NGC ID# 25HK, PCGS# 7758

5179 **1850-O — Cleaning — PCGS Genuine. Unc Details. Variety 1.** A majority of this New Orleans issue show the mintmark over the numerator half of the fraction, but the very scarce Variety 1 places the mintmark over the denominator. The present sun-gold example is faintly hairlined but free from bagmarks. The strike is intricate on the stars and dentils, but shows softness on the eagle's legs. NGC ID# 25HK, PCGS# 7758

1852 Quarter Eagle, MS65
Seldom Seen So Fine

5180 **1852 MS65 NGC. CAC.** The Gem surface quality of this glowing wheat-gold quarter eagle is undeniable, as close study with a loupe reveals only a couple faint grazes in the left obverse field, indistinct to the unaided eye, and a few similar disturbances in the upper reverse recesses. The eagle's left (facing) leg is slightly soft, as usual, but the strike is otherwise bold. Seldom is such an eye-appealing example of this conditionally rare Philadelphia issue offered. Census: 7 in 65 (1 in 65 ★), 1 finer (4/15). NGC ID# 25HR, PCGS# 7763

5181 **1853 MS64 PCGS. CAC.** The 1853 Liberty quarter eagle claims a large mintage of 1.4 million pieces, but few have survived in high grade. This attractive MS64 specimen is lustrous and well-detailed, with a touch of the usual softness on the central reverse. Population: 72 in 64, 8 finer (5/15). NGC ID# 25HV, PCGS# 7767

5182 **1856-O AU55 NGC. CAC. Variety 2.** The top left portion of the mintmark is covered by a feather. This is an extremely scarce issue in any grade, and it is a noteworthy rarity in AU condition and better. Gorgeous green-gold surfaces show mint luster in the legends and minimal high-point wear over devices that are notably sharp for the facility. The eagle's neck and the olive leaves are typically incomplete. A phenomenally appealing Southern gold piece. NGC ID# 25JA, PCGS# 7780

5183 **1856-S AU58 NGC.** Large S mintmark. Sandy wheat-gold surfaces show a mere trace of rub on the high points of this briefly circulated coin, among the few dozen finest survivors of the mintage of 72,000-plus coins in only the third year of operation for the San Francisco Mint. This piece is nicely struck and only trivially abraded. Census: 45 in 58, 27 finer (5/15). NGC ID# 25JB, PCGS# 7781

1857-D Quarter Eagle, Bright AU55

5184 **1857-D AU55 NGC. Variety 21-N.** Only the single die pair is known for the small production of 2,364 quarter eagles in antebellum Dahlonega, Georgia. The coins seem not to have circulated a great deal, however; since its opening in 1838, the Dahlonega Mint had turned out in excess of 193,000 quarter eagles — likely causing a glut of the denomination, at least locally — by the time the 1857-D rolled around. The average certified survivor is in the grade of this piece, Choice AU. The bright yellow-gold surfaces show deeper brownish-rose patina around the star edges. Few marks of any import appear, leading to good eye appeal. Census: 11 in 55, 38 finer (5/15). NGC ID# 25JD, PCGS# 7783

5185 **1865-S XF45 PCGS.** The 1865-S Liberty quarter eagle is an elusive low-mintage issue. This attractive Choice XF example shows light wear on the design elements and lightly abraded orange-gold surfaces. Population: 9 in 45, 27 finer (5/15). NGC ID# 25K6, PCGS# 7802

5186 **1869-S AU58 NGC.** An attractive near-Mint specimen of this elusive issue, with just a trace of high-point wear on the design elements and lustrous, lightly abraded yellow-gold surfaces. Census: 69 in 58, 19 finer (5/15). NGC ID# 25KE, PCGS# 7810

5187 **1873 Closed 3 MS64 PCGS. CAC.** Intense orange-gold color and Mint-fresh frosty luster are the hallmarks of this Choice Mint State quarter eagle. Both the Closed 3 and Open 3 varieties are desirable in higher grades, although the Closed 3 is marginally scarcer. The current example shows only a few shallow marks and nominal weakness on the eagle's left leg, consistent for the grade and non-factors in terms of eye appeal. CAC endorsed, rare any finer. Population: 50 in 64 (2 in 64+), 12 finer (4/15). NGC ID# 25KM, PCGS# 7818

1873 Two and a Half, Sharp MS65
Elusive Closed 3 Variant

5188 **1873 Closed 3 MS65 NGC.** The apricot-gold surfaces of this Gem 1873 Closed 3 quarter eagle are sharply struck and free of major marks, although a small copper spot appears above star 10, and some buildup shows in the denticles near star 1. The small mintage for the Closed 3, slightly more than 55,000 pieces (about 40% of the total of the Open 3 quarter eagles), makes this issue doubly attractive. Census: 4 in 65, 1 finer (4/15). NGC ID# 25KM, PCGS# 7818

5189 **1875-S AU58 NGC.** Satiny luster illuminates medium green-gold surfaces on each side of this near-Mint 1875-S quarter eagle. The strike is sharp and there are no surface complaints. This date is scarce overall, but original, problem-free examples in AU are especially elusive. Census: 55 in 58, 30 finer (5/15). NGC ID# 25KT, PCGS# 7823

5190 **1877 AU58 NGC.** From a low mintage of 1,652 pieces, this attractive near-Mint specimen is lightly abraded and the fields show prooflike reflectivity in sheltered areas. The sharply detailed design elements show just a trace of high-point wear. Census: 38 in 58, 31 finer (5/15). NGC ID# 25KW, PCGS# 7826

1878 Quarter Eagle, MS66
Lovely Rose-Red Patina

5191 **1878 MS66 NGC.** This is a charming quarter eagle of a date that is conditionally scarce in Gem or finer grades. Smooth, frosty surfaces are aglow with rich rose-gold hues which show deeper amber-red overtones in the peripheral recesses. As might be expected for the issue, there is minor striking softness on the eagle's left (facing) leg and inner shield, and reactionary incompleteness is observed on the hair curls around Liberty's face. Census: 8 in 66, 3 finer (5/15). NGC ID# 25KY, PCGS# 7828

5192 **1879 MS64 PCGS.** This underrated issue is seldom found in better grades, and the present Choice Mint State piece has amazing lemon-yellow and brilliant orange surfaces with frosty luster and bold design motifs. Population: 66 in 64 (5 in 64+), 21 finer (5/15). NGC ID# 25L2, PCGS# 7830

5193 **1884 MS61 NGC.** From a typically small mintage of 1,950 pieces, this Mint State Liberty quarter eagle displays sharply detailed design elements and lustrous yellow-gold surfaces with a scattering of minor contact marks. Census: 36 in 61, 31 finer (5/15). NGC ID# 25L8, PCGS# 7836

5194 **1891 Doubled Die Reverse, MS64 NGC. FS-801.** Dramatic doubling is evident on the central design elements and the lettering in the reverse legends on this popular doubled die issue. This attractive Choice example is sharply detailed and lustrous, and a short gouge between stars 2 and 3 is the only mark of note. Census: 36 in 64, 9 finer (5/15). NGC ID# 25LF, PCGS# 7843

1893 Two and a Half, MS66
Bright, Satiny Surfaces

5195 **1893 MS66 PCGS.** The relatively low mintage of the 1893 quarter eagle (30,000 pieces) makes this an attractive coin for type collectors. Plus, this date has the charm of a coin struck in the 19th century, always a factor for collectors, even though it is usually unstated. This piece has an unusual finish that adds even more to its appeal. The surfaces are satiny, as expected, but are brighter than normally seen on a P-mint quarter eagle. The color is also distinctive with a bright, even orange-gold hue across each side. Sharply defined throughout. Population: 23 in 66, 2 finer (5/15). NGC ID# 25LH, PCGS# 7845

5196 **1897 MS65+ PCGS. CAC.** An extraordinary Gem Liberty quarter eagle, this 1897 displays bold design motifs with exceptional eye appeal. Both sides are satiny and highly lustrous with brilliant yellow surfaces. A small copper spot above the coronet attests to its originality. PCGS has only certified 42 finer examples (5/15). NGC ID# 25LM, PCGS# 7849

5197 **1899 MS65 PCGS.** A nominal mintage of 27,200 Liberty quarter eagles was struck at the Philadelphia Mint in 1899. This delightful Gem is sharply detailed and brightly lustrous, with well-preserved orange-gold surfaces. Population: 71 in 65 (1 in 65+), 28 finer (5/15). NGC ID# 25LP, PCGS# 7851

1899 Quarter Eagle, Impeccable MS66+

5198 **1899 MS66+ PCGS. CAC.** Thick, rich mint luster imbues the apricot-gold surfaces on this fully struck Premium Gem 1899 quarter eagle, among the few finest survivors of the surprisingly small mintage of only 27,200 pieces. Both sides are, as expected, free of all but the tiniest ticks. Population: 21 in 66 (2 in 66+), 7 finer (5/15). NGC ID# 25LP, PCGS# 7851

1900 Quarter Eagle, Immaculate MS67

5199 **1900 MS67 NGC.** Some of the late-series Philadelphia Mint quarter eagles (and half eagles, for that matter) after 1896 or so are among the most attractive survivors of their respective types. This 1900 quarter eagle is a case in point, showing a full strike over immaculate wheat-gold surfaces brimming with luster. Census: 37 in 67 (2 in 67 ★), 1 finer (4/15). NGC ID# 25LR, PCGS# 7852

1902 Quarter Eagle, Blazing MS67
Ideal for a High-Grade Type Set

5200 **1902 MS67 PCGS.** The 1902 quarter eagle, sporting a mintage exceeding 133,000 pieces and a PCGS/NGC population in excess of 6,700 submissions, is a popular type coin. It is elusive in Superb Gem and exceeding rare any finer. Greenish-gold surfaces radiate blazing luster and exhibit sharply struck design elements. Close examination reveals no mentionable contact marks, though a handful of as-made copper stains are visible, especially on the reverse. These are a typical characteristic of this date. Population: 44 in 67, 0 finer (5/15). NGC ID# 25LT, PCGS# 7854

5201 **1903 MS66 PCGS.** A highly lustrous lemon-yellow Premium Gem, this Liberty quarter eagle has bold design motifs and excellent eye appeal. PCGS has only certified 69 finer examples of this higher mintage issue (5/15). NGC ID# 25LU, PCGS# 7855

5202 **1903 MS66+ NGC.** This high-end Premium Gem exhibits sharply detailed design elements throughout and the well-preserved orange-gold surfaces show a few hints of rose, with vibrant mint luster on both sides. NGC ID# 25LU, PCGS# 7855

5203 **1904 MS66+ PCGS.** A frosty, lustrous, and high-end Premium Gem quarter eagle. The moderate mintage of 160,700 pieces belies the ready availability of this issue in high grades. With many coins to choose from, those with high technical quality and attractive coloration are valued above all others. The green-gold color of this coin radiates olive-gold highlights when rotated in light. There are no copper alloy spots or distracting marks to mention. Population: 4 in 66+, 51 finer (4/15). NGC ID# 25LV, PCGS# 7856

5204 **1905 MS65 PCGS. CAC.** An incredibly attractive Gem quarter eagle with rousing mint luster and a resounding full strike. Lime-green and orange accents flash across the satiny, medium-gold surfaces. Three tiny alloy spots — one near star 3 and the others on the reverse — are of little consequence either for the grade or for the great in-hand eye appeal. Fittingly CAC endorsed. NGC ID# 25LW, PCGS# 7857

1906 Quarter Eagle, MS67
Bounteous Luster and a Full Strike

5205 **1906 MS67 NGC.** A fully struck Superb Gem of this next-to-last issue in the Liberty Head quarter eagles, showing bounteous luster on amber-gold surfaces that are problem-free. These late-series issues in high grades are not only relatively available, but they are also wonderful examples of the coiner's art. Census: 85 in 67 (1 in 67+), 3 finer (4/15). NGC ID# 25LX, PCGS# 7858

5206 **1907 MS66+ NGC.** This last-year Liberty Head quarter eagle displays a near-complete absence of mentionable marks combined with a full strike on both sides to achieve its high grade. The Liberty Head quarter eagle and half eagles from Philadelphia in the late 1890s through the series' end are exceptionally well-struck. NGC ID# 25LY, PCGS# 7859

1907 Quarter Eagle, Attractive MS67+

5207 **1907 MS67+ NGC.** Sharply struck surfaces show full central details on all of the obverse stars, and trivial weakness on Liberty's lower hair curls, those trailing down her neck. The only noticeable abrasion is a single oval lump on Liberty's neck, about even with star 1. Attractive honey-gold patina and the overall excellent preservation are consistent with the high grade. Census: 2 in 67+, 25 in 67 ★, 11 in 67+★, 5 finer (4/15). NGC ID# 25LY, PCGS# 7859

PROOF LIBERTY QUARTER EAGLE

1902 Quarter Eagle, PR62
Affordable Proof Gold Piece

5208 **1902 PR62 NGC.** The proof 1902 quarter eagle is moderately available in the context of proof Liberty Head gold, but it is not nearly as plentiful as the certified population reports suggest. NGC and PCGS combined list 237 grading events, far more than 193 pieces that were actually struck. The current offering is a pleasing lower-grade example, ideal for the budget-conscious collector seeking to acquire a proof gold piece for type or novelty purposes. Bold design elements are displayed atop glassy fields amid rich honey-gold patina. A few minor marks define the grade. Census: 9 in 62, 62 finer (4/15). NGC ID# 288S, PCGS# 7928

INDIAN QUARTER EAGLES

5209 **1909 MS63 PCGS.** A delightful Indian quarter eagle featuring the distinctive sunken design, this piece has satiny light yellow surfaces with excellent eye appeal. Sharply struck with trivial marks. NGC ID# 288Z, PCGS# 7940

5210 **1909 MS64 PCGS.** Housed in a green-label PCGS holder, this 1909 Indian quarter eagle is an important part of a complete set, as the issue is seldom encountered in Choice or finer Mint State grades. Most representatives grade only MS61 to MS63. This piece is sharply struck with matte-like luster. Shades of amber, rose, and lilac-gold blanket each side.
Ex: Santa Clara Bullet (Heritage, 4/2000), lot 402; FUN Signature (Heritage, 1/2012), lot 6191. NGC ID# 288Z, PCGS# 7940

5211 **1910 MS63 NGC.** Some strike weakness near the rims is typical of this date. Yellow-gold surfaces show generous luster and only a few minor marks that account for the grade. An appealing example of this date, an elusive one at the Gem level. NGC ID# 2892, PCGS# 7941

5212 **1910 MS64 NGC.** This near-Gem quarter eagle features reddish-gold coloration and satiny luster. Pleasing detail is noted on the eagle's breast and leg feathers as well as the Indian's headdress. Minimally abraded with only a thin graze from the T in UNITED to the L in PLURIBUS. NGC ID# 2892, PCGS# 7941

1910 Two and a Half, MS65
Impressively Clean Surfaces

5213 **1910 MS65 NGC.** The 1910 Indian quarter eagle is an available issue often chosen for type purposes. This Gem example is sharply defined, with smooth, satiny luster that yields a consistent wheat-gold hue. The obverse is seemingly pristine, although close study of the reverse with a loupe reveals a few faint infractions of the luster in isolated areas of the fields. NGC lists 15 numerically finer representatives (4/15). NGC ID# 2892, PCGS# 7941

1911 Quarter Eagle, MS65
Above-Average Strike

5214 **1911 MS65 NGC.** This delightful Gem is sharply detailed throughout, an unusual attribute for a date that is usually softly struck. The pleasing greenish-gold surfaces are lustrous and free of mentionable distractions. Eye appeal is quite strong on this piece. NGC has graded only seven coins in higher grades (5/15).
Houston Signature (Heritage, 11/2012), lot 4827. NGC ID# 2893, PCGS# 7942

1911 Two and a Half, MS65
Smooth, Frosty Luster

5215 **1911 MS65 NGC.** The 1911 Indian quarter eagle is elusive in Gem condition, particularly in comparison to the 1925 and later issues; finer pieces are extremely rare and rightfully command strong premiums at auction. This frosty straw-gold example exhibits the occasional glimpse of mint, amber, and lilac in the recesses. The surfaces are impressively smooth, and the only imperfection on this piece is minor striking weakness on the lower headdress feathers and the upper-left stars. NGC shows only seven numerically finer representatives (5/15). NGC ID# 2893, PCGS# 7942

1911-D Quarter Eagle, AU55
Pleasing Surfaces

5216 **1911-D Weak D AU55 PCGS.** This is a lovely Choice AU example of this sought-after 1911-D quarter eagle, showing original patina in shades of honey and bronze-gold. Trivial friction leaves the design elements well-defined, and there are no obtrusive abrasions. The mintmark is barely discernible with a glass, thus the designation on the holder: "Weak D." PCGS# 7954

1911-D Quarter Eagle, AU53
Original Patina

5217 **1911-D AU53 NGC.** The 1911-D quarter eagle is seen with mild frequency in AU grades, but the vast majority of such coins have been dipped or otherwise cleaned in an attempt to garner a Mint State grade. Pieces such as this AU53 coin, with original orange-gold patina and deeper copper-red overtones in the recesses, are seldom available. The mintmark is weak, but fully visible. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU55
Strong D

5218 **1911-D AU55 NGC.** Strong D. This is a collectible example of the sole key date in the series, well-detailed with bright yellow-gold color. Scattered abrasions are as expected for the grade and the soft gold alloy, but actual wear is minimal. Examples of this issue are always in demand, regardless of condition. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, Unc Sharpness

5219 **1911-D — Improperly Cleaned — NGC Details. Unc.** The razor-sharp detail of this unworn 1911-D quarter eagle is uninhibited by a light cleaning which leaves the satiny surfaces with a pale yellow-gold hue. Light hairlines are the only notable blemish, and these are of little concern to the unaided eye. A still-pleasing Strong D representative. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, Unc Details
Strong D

5220 **1911-D — Scratch — PCGS Genuine. Unc Details.** Strong D. A couple hair-thin scratches are almost indiscernible within the headdress feathers of the obverse. The coin is otherwise visually pleasing with medium bronze-gold surfaces and the occasional glimpse of rose in the recesses. The design elements are sharply rendered and there are no other significant abrasions. NGC ID# 2894, PCGS# 7943

5221 **1913 MS64 NGC. CAC.** The sizeable mintage of 722,000 pieces yielded few attractive, minimally abraded coins in high Mint State grades, increasing the desirability of this sharp and lustrous example. CAC endorsement accompanies the near-Gem grade, and appealing orange-gold color trumps the normal light, yellow-gold patina seen most often for the date. NGC ID# 2897, PCGS# 7945

5222 **1913 MS64+ PCGS. CAC.** Slightly satiny with an impressive overall appearance. Boldly struck and carefully preserved, remarkably close to Gem quality. Rich honey-gold luster enhances the eye appeal. NGC ID# 2897, PCGS# 7945

5223 **1914 MS63 NGC.** The 1914 Indian quarter eagle is a better date from a mintage of 240,000 pieces. This pleasing Select example offers sharply detailed design elements and lustrous yellow and rose-gold surfaces that show a few scattered contact marks. NGC ID# 2898, PCGS# 7946

5224 **1914 MS63 PCGS.** Warm wheat-gold color greets the viewer on surfaces brimming with luster. A few ticks on the Indian's cheek and the obverse field nearby account for the grade. The 1914 is among the scarcer issues in the series — the second-rarest overall behind the 1911-D — its scarcity beginning with the moderate 240,000-coin mintage. The MS64 grade level is the finest frequently seen. NGC ID# 2898, PCGS# 7946

5225 **1914 MS63 NGC.** This Select Mint State example displays rich orange-gold luster with a mildly granular surface texture. The lower headdress feathers are a trifle soft, but the eagle is sharp. Scattered small abrasions limit the grade. NGC ID# 2898, PCGS# 7946

5226 **1914-D MS63 PCGS.** The second of just three Denver Mint issues of the Indian quarter eagle, this example displays good detail with lovely rose gold and blue toning on its light yellow surfaces. NGC ID# 2899, PCGS# 7947

5227 **1914-D MS64 NGC.** Choice examples of this semikey Denver issue are constantly in demand among budget-conscious collectors of the popular Indian quarter eagle series, as Gem representatives are seldom seen and command substantially higher prices at auction. This piece displays satiny green-gold luster with few abrasions for the grade. Slight striking weakness is evident on the lower headdress feathers. NGC has seen 43 numerically finer submissions (4/15). NGC ID# 2899, PCGS# 7947

5228 **1914-D MS64 NGC.** An attractive example of this conditional rarity within the Indian Head quarter eagle series, obtainable at the near-Gem level of the present coin but far more elusive in Gem and finer grades. Appealing patina in shades of orange-gold and minimal marks on each side contribute to the grade. NGC ID# 2899, PCGS# 7947

5229 **1914-D MS64 NGC.** Unmellowed, glowing luster delivers impacting eye appeal on this Choice semikey representative, highlighting rich honey and apricot-gold hues on each side. The lower headdress feathers are slightly soft and scattered light grazes limit the grade, but these are of little concern in comparison to the luster. NGC lists 44 numerically finer representatives (4/15). NGC ID# 2899, PCGS# 7947

5230 **1926 MS65 NGC.** A curious deep-orange dot on the Indian's cheek complements the largely wheat-gold, lustrous surfaces that are free of all but the most trivial signs of contact. The nice, sharp strike is a plus. NGC ID# 289C, PCGS# 7950

5231 **1926 MS65+ NGC.** An extremely sharp strike and the absence of all but the most trivial signs of contact on the high points combine with rich, flowing luster on khaki-gold surfaces (with small orange accents) to separate this coin from most of its cohort. Census: 12 in 65+, 21 finer (5/15). NGC ID# 289C, PCGS# 7950

5232 **1926 MS65+ NGC.** The Plus designation attests to the outstanding quality of this Gem 1926 quarter eagle's surfaces which are aglow with fresh, frosty luster. The usual yellow-gold luster is substituted for rich rose-gold, lilac, and olive hues which appeal to the eye. NGC has seen only 21 finer pieces (5/15). NGC ID# 289C, PCGS# 7950

1926 Quarter Eagle, Well-Struck MS65+

5233 **1926 MS65+ PCGS. CAC.** Variegated orange and green-gold toning ensures the eye appeal of this lustrous and well-struck Gem. Scattered wispy field grazes are all that deny a finer assessment. Population: 10 in 65+, 42 finer (5/15).
Ex: Dallas Signature (Heritage, 4/2007), lot 1668, which realized $4,053.75. NGC ID# 289C, PCGS# 7950

5234 **1928 MS65+ NGC.** Untroubled surfaces display a variegated color palette including lemon-yellow, orange-gold, and even a daub of cherry-red and burgundy. Relatively unabraded on the high points. Census: 16 in 65+, 1 in 65 ★, 18 finer (5/15). NGC ID# 289E, PCGS# 7952

5235 **1928 MS65+ NGC.** Intense, frosty luster such as is almost never seen on an Indian quarter eagle glows on both sides of this Plus-graded Gem. A few light ticks on the reverse are not detracting. The surfaces are primarily straw-gold, although overtones of rose and apricot are also present. Well-struck, but a trifle weak on the lowest headdress feather. NGC shows only 18 finer pieces (5/15). NGC ID# 289E, PCGS# 7952

5236 **1929 MS65 NGC.** The 1929 quarter eagle in Gem condition is about as good as it gets, as MS66 grading events at either leading service are few and far between. The few scattered, tiny marks on this piece are mostly away from the focal points, and rich luster and honey-gold color add to the broad eye appeal. NGC has seen just four numerically finer submissions (5/15). NGC ID# 289F, PCGS# 7953

5237 **1929 MS65 NGC.** This final-year issue is one of the more available dates in the series in high grade, ideal for type representation. This Gem example displays frosty green-gold luster and a lack of mentionable abrasions, as is befitting of the grade. Some striking weakness is noted on the lower headdress feathers. NGC lists four MS66 coins numerically finer (4/15). NGC ID# 289F, PCGS# 7953

1929 Quarter Eagle, Appealing MS65+ Variegated Patina

5238 **1929 MS65+ NGC.** The lovely variegated patina ranges from wheat-gold to honey-gold on this Gem 1929 quarter eagle, which shows the added benefit of an unmarked cheek on the Indian chief, with the sole exception of a small tick on the jawline. Minimal abrasions appear throughout, in fact, although some strike softness occurs on the headdress feathers. Some deeper reddish-orange patina shows on the lower reverse, and the overall eye appeal is top-notch. Census: 2 in 65+, 4 finer (4/15). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

5239 **1854 AU55 NGC.** Hints of luster remain in the peripheral recesses of this Choice AU first-year type coin, while the smooth, olive-gold surfaces reveal minimal wear and are devoid of distracting abrasions. An appealing, problem-free example. NGC ID# 25M3, PCGS# 7969

5240 **1854 AU55 PCGS.** The first year of issue and a one-year subtype with small letters in DOLLARS, this popular three dollar piece should enjoy spirited bidding. Both sides are light yellow with nearly full luster and slight high-point wear. NGC ID# 25M3, PCGS# 7969

5241 **1859 VF35 NGC.** Surprising bits of luster remain around the devices of this Choice VF. The surfaces are minimally marked for 25 points of wear on this early three dollar. NGC ID# 25MD, PCGS# 7979

5242 **1860-S — Polished — Genuine PCGS. AU Details.** The 1860-S has a scant mintage of 7,000 pieces. Since there were few if any West Coast gold coin collectors during the 19th century, the issue is rare overall and very rare in Mint State. The present briefly circulated honey-gold example displays scattered hairlines and glossy, prooflike fields.

5243 **1863 — Cleaning — PCGS Genuine. AU Details.** Unusually bright due to past cleaning, this 1863 three dollar gold piece retains remnants of coppery-red toning in the protected regions. Well-detailed and seldom seen so. NGC ID# 25MJ, PCGS# 7984

5244 **1868 AU53 NGC.** A less often seen date with a mintage of only 4,850 pieces. This About Uncirculated representative retains substantial semiprooflike mirroring in the fields, with trivial wear over the high points of the design. Bright yellow-gold in color, but with coppery-red overtones in the protected regions. NGC ID# 25MP, PCGS# 7989

5245 **1868 AU55 NGC.** Original wheat-gold surfaces yield hints of luster in the peripheral recesses, while the design elements show sharp detail. Some modest reflectivity is apparent when the coin is tilted against a light. NGC ID# 25MP, PCGS# 7989

1870 Three Dollar, AU58
Small Mintage of 3,500 Coins

5246 **1870 AU58 PCGS.** This pleasing, nearly Uncirculated 1870 three dollar gold coin features needle-sharp detail on the lower portion of the wreath. Liberty's headdress shows an equally strong impression, and only the lower curls display a noticeable trace of friction. A degree of reflectivity in the fields provides the obverse with a distinctly semiprooflike appearance, and the lustrous, lemon-gold surfaces show a handful of trivial marks. From a tiny mintage of just 3,500 pieces. NGC ID# 25MS, PCGS# 7991

5247 **1874 AU55 NGC.** In 1874 the Philadelphia Mint coined more than 40,000 three dollar gold pieces, more than they produced during the previous 10 years. Only once more, in 1878, did the mintage exceed 6,000 coins. This Choice AU example has a blend of light yellow and orange-gold color with reflective fields. NGC ID# 25MX, PCGS# 7998

5248 **1874 MS61 NGC.** Shimmering orange-gold luster grants this Mint State type coin pleasing visual appeal. The wreath bowknot shows the only mentionable striking weakness, and a couple tiny ticks on Liberty's cheek are the only abrasions of note. NGC ID# 25MX, PCGS# 7998

5249 **1878 AU55 NGC.** A sun-gold three dollar type coin that retains ample bright luster. The reverse displays clusters of marks left of the date, at 9:30, and at 12 o'clock. The reverse is lightly die doubled, apparent on the upper right border of the wreath.
Ex: Baltimore Signature (Heritage, 3/2009), lot 10468. NGC ID# 25MZ, PCGS# 8000

5250 **1878 AU58 PCGS.** Just a trace of friction away from Mint State, this 1878 three dollar gold type coin displays pleasantly smooth, satiny surfaces with substantial yellow-gold luster remaining in the recesses. There is almost no loss of detail due to wear. NGC ID# 25MZ, PCGS# 8000

5251 **1878 MS62 PCGS.** The 1878 three dollar gold piece is an available date in the context of the series, and a favorite choice of type collectors. This well-detailed MS62 example offers lustrous surfaces with a scattering of minor contact marks. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS63
CAC-Endorsed Quality

5252 **1878 MS63 NGC. CAC.** Shimmering rose and glowing apricot-gold hues compete for dominance on each side of this Select three dollar gold type coin. The wreath bowknot is predictably weak, but there are no other complaints. A few light grazes on Liberty's cheek are fully within the confines of the MS63 grade, and the eye appeal is excellent. NGC ID# 25MZ, PCGS# 8000

EARLY HALF EAGLES

1802/1 Half Eagle, AU Details
Scarce BD-8 Marriage

5253 **1802/1 BD-8, R.4 — Removed From Jewelry — NGC Details. AU.** Bass-Dannreuther Die State c/b. Clash marks are prevalent and a die crack connects UNI. Design elements exhibit luster and no abrasions merit mention, but the obverse border is filed near 1, 4, and 11 o'clock. Both sides display parallel hairlines, and the yellow-gold color is uniform throughout. PCGS# 519889 Base PCGS# 8083

5254 **1803/2 BD-4, R.4 — Holed, Plugged — PCGS Genuine. AU Details.** Bass-Dannreuther Die State b/c. All 1803 half eagles were struck with one of two different overdated 1802 head dies. Of the four die pairings, BD-4 is one of the more often seen, identified by the T in LIBERTY having an intact right foot, whereas it is broken on the other three marriages. This coin is evenly struck with strong details. Unnaturally bright yellow-gold surfaces yield extensive abrasions, and there is a crudely plugged hole below the IB in LIBERTY. PCGS# 504951 Base PCGS# 8084

1812 Five Dollar, AU Sharpness
BD-1, Wide 5D

5255 **1812 BD-1, R.3 — Damaged — NGC Details. AU.** Bass-Dannreuther Die State a/a. The Wide 5D 1812 variety. A sharply defined honey-gold example. Luster dominates the stars, legends, cap, curls, and eagle. The fields and portrait exhibit myriad minute marks, and clusters of wispy pinscratches are noted beneath the beak and left (facing) wing. PCGS# 507601 Base PCGS# 8112

CLASSIC HALF EAGLES

5256 **1834 Plain 4 AU55 NGC. Breen-6502, McCloskey 2-B, R.3.** Second Head. A classic example of the underrated (even neglected) Classic Head type, showing much eye appeal on richly lustrous orange-gold surfaces with a bit of lighter color around the letter edges. A top-notch example for the grade. NGC ID# 25RR, PCGS# 8171

5257 **1834 Plain 4 AU58 NGC. Breen-6501, McCloskey 3-B, R.1.** First Head. An original peach-gold example with plentiful indications of luster and moderate inexactness of strike at the centers. A couple of minor marks on the lower reverse rim are of little import. *Ex: Orlando FUN Signature (Heritage, 1/2006), lot 5125.* NGC ID# 25RR, PCGS# 8171

1834 Plain 4 Half Eagle, MS60
McCloskey 4-C, Block 8

5258 **1834 Plain 4 MS60 NGC. Breen-6502, McCloskey 4-C, R.2.** Block 8. The 1834 Plain 4 variety is the most plentiful Classic Head half eagle issue in Mint State, frequently encountered in type collectors' cabinets. This lustrous yellow-gold example yields only light chatter in the fields rather than deep abrasions, with just mild weakness on the central hair curls and upper-left portion of the shield. An affordable example of this short-lived type. NGC ID# 25RR, PCGS# 8171

1834 Classic Half Eagle, Mint State
Plain 4, McCloskey 3-B

5259 **1834 Plain 4 MS60 NGC. Breen-6501, McCloskey 3-B, R.1.** A butter-gold representative of the first-year Classic issue. The strike is generally sharp, and the lightly marked fields are semiprooflike. Bright luster dominates the margins and motifs. A slender vertical break beneath Liberty's eye helps attribute the die marriage. Encapsulated in a former generation holder. NGC ID# 25RR, PCGS# 8171

5260 **1836 AU50 NGC. Breen-6509, McCloskey 4-D, R.2.** Second Head, Large Date. An original honey-gold representative with ample luster across the margins and motifs. Abrasions are relatively minor, and the eye appeal is substantial for the designated grade. NGC ID# 25RY, PCGS# 8174

1838-C Half Eagle, XF Details
Variety 2, Repunched 5

5261 **1838-C Repunched 5, Breen-6516, Variety 2, R.5 — Improperly Cleaned — NGC Details. XF.** A well-detailed, yet, collectible example of this first Charlotte half eagle issue. NGC notes evidence of old cleaning, but the surfaces have since acquired deep green-gold patina, with russet in the crevices and no significant distractions. A fantastic die break bisects the reverse from the U in UNITED to the tip of the eagle's right (facing) wing. The 5 in the denomination is recut, as are several letters in the peripheral legend. NGC ID# 25S5, PCGS# 8177

LIBERTY HALF EAGLES

5262 **1840 Narrow Mill AU58 NGC.** An incredible near-Mint example with fully reflective fields, bold design elements, and exceptional eye appeal. The nearly mark-free surfaces are bright with green-gold color. The reverse has a thin bisecting die crack from 6 o'clock to 11 o'clock. Census: 59 in 58, 28 finer (5/15). NGC ID# 25SA, PCGS# 8194

1840-O Half Eagle, AU58
Challenging in High Grade

5263 **1840-O Narrow Mill AU58 NGC. Variety 3.** This early New Orleans issue was a workhorse in Southern commerce, and Mint State survivors are rare. This nearly Uncirculated example retains substantial luster in the peripheral regions and displays medium yellow-gold patina overall. A little softness on the central hair curls and the upper-left corner of the shield is evidence of brief circulation, and this piece is actually fairly well struck for the issue. Census: 25 in 58, 17 finer (5/15). NGC ID# 25SK, PCGS# 8200

1844-C Five Dollar, VF35
Original Orange and Green Toning

5264 **1844-C VF35 PCGS. Variety 1.** An original example that retains the blended sea-green and apricot-gold color characteristic of Charlotte Mint fives. Traces of dirt in recessed regions will also please the knowledgeable specialist. The eagle's wings are richly detailed, although Liberty's high points are softly impressed. NGC ID# 25T8, PCGS# 8220

5265 **1844-O AU58 NGC. Variety 4.** This eye-appealing near-Mint representative displays luminous honey-gold luster in the recesses, with original green-gold patina elsewhere. The strike is bold and there is only trivial friction evident over the high points of the design. NGC ID# 25TA, PCGS# 8222

1847 Half Eagle, MS62
Appealing for the Grade

5266 **1847 MS62 NGC.** The 1847 half eagle had a substantial mintage of nearly 1 million coins, but remarkably few survive in Mint State. This example is sharply struck, with bright yellow-gold patina and semiprooflike mirroring in the fields. An interesting, bisecting die crack is seen on the obverse from 11:30 to 6:30. No distinct abrasions are present, though some light field chatter limits the grade. Census: 44 in 62 (1 in 62+), 36 finer (5/15). NGC ID# 25TL, PCGS# 8231

5267 **1848-C — Obverse Spot Removed — NGC Details. AU. Variety 1.** The 1848-C half eagle is somewhat scarcer than its mintage of nearly 65,000 coins would suggest, with only 250 to 350 pieces believed extant in all grades. The typical example grades only VF or XF, and this issue is seldom seen in AU; Mint State coins are extremely rare. This piece is rather appealing for a Details-graded coin; deep honey-gold patina yields deeper copper-red overtones the peripheries, and the protected regions of the fields show substantial prooflike mirroring. Well-struck motifs further contribute to the appeal. The obverse spot removal is not immediately obvious, although significant chatter is observed in the fields.

5268 **1848-C — Cleaning — PCGS Genuine. AU Details. Variety 1.** A slightly better Charlotte issue, much less available than its mintage of 64,472 pieces would suggest. This example is sharply detailed and shows almost no wear. Unnaturally bright green-gold patina is evidence of an old cleaning, although the eye appeal is not overly impeded. NGC ID# 25TT, PCGS# 8237

5269 **1852-D XF45 PCGS. Variety 32-V (formerly 27-S).** Luster fills the legends of this charming green-gold Dahlonega type coin. The obverse is uncommonly unabraded for the issue, and reverse displays only incidental contact. Liberty's curls and the lower half of the eagle are typically struck. NGC ID# 25UC, PCGS# 8252

1852-D Half Eagle, AU55
Pleasing Dahlonega Representative

5270 **1852-D AU55 NGC. Variety 32-V.** The date and mintmark placement attribute this usually seen variety. A total of 91,584 half eagles were manufactured at Dahlonega in 1852, making this one of the more accessible dates in the D-mint short set. With that in mind, examples in this grade are quite scarce. Deep green and khaki-gold color blankets each typically struck side. The central obverse is well-detailed, but the borders are mostly flat. The wing feathers and olive leaves are surprisingly sharp. An appealing example with minimally scattered marks. NGC ID# 25UC, PCGS# 8252

5271 **1853 MS61 NGC.** The generous mintage of 300,000 pieces makes this Philadelphia No Motto five a popular selection for type. Readily available in lesser grades, the issue is more challenging when Uncirculated — especially with natural coloration and minimally marked surfaces such as this example. Soft luster glows beneath apricot-gold surfaces. Weakness at the eagle's right talon and minor blending of the neck feathers are offset by a reasonably sharp obverse strike. Census: 32 in 61, 43 finer (4/15). NGC ID# 25UD, PCGS# 8253

1853-D Large D Half Eagle, Lustrous AU55

5272 **1853-D Large D AU55 PCGS. Variety 34-Y.** The mintmark is mostly over the E and leans left. Much luster remains over the bright golden-yellow surfaces of this lightly circulated coin. The strike is sharper on the right-side obverse stars than those on the left. The 1853-D is among the more readily obtainable Dahlonega half eagles due to its large mintage of nearly 90,000 coins, but a Choice AU example such as this is finer than generally seen. Population: 29 in 55, 57 finer (4/15). NGC ID# 25UF, PCGS# 8255

5273 **1854-O AU53 NGC. Variety 1.** A minimally abraded straw-gold example of this scarce New Orleans issue. The strike shows softness on the curls but the wings are bold. The more prevalent of the two known die marriages, which shows the mintmark above the right half of the V in FIVE. The rare Variety 2 has the mintmark entered high over the E in FIVE. NGC ID# 25UM, PCGS# 8259

1858-D Half Eagle, Bold AU55

5274 **1858-D AU55 NGC. Variety 43-HH,** showing the upright of the D mintmark over the juncture of VE in FIVE. Deep amber-gold patina and minimal, grade-consistent marks and wear are hallmarks of this attractive Choice AU 1858-D half eagle, among the nicer survivors of the original production of 15,362 pieces. This piece shows good production qualities that could well be taken for a P-mint of the same era, except for minor strike weakness on the lower reverse, on the claws and eagle's legs. An elusive date in finer grades. Census: 21 in 55, 52 finer (5/15). NGC ID# 25V9, PCGS# 8278

1860-C Five Dollar, AU50
Natural Pale-Rose and Green-Gold Color

5275 **1860-C AU50 NGC. CAC. Variety 1.** This lightly circulated Charlotte half eagle, one of 14,813 representatives struck in 1860, offers natural pale-rose and green-gold coloration with glimpses of original, albeit subdued luster in the hidden areas. The obverse is strongly detailed with nearly full star radials and centers, and good hair curl definition. The reverse is typically incomplete, particularly over the eagle and olive branch. Although the surfaces show a number of abrasions, the only mark of note is a tiny linear depression on the lower portion of Liberty's neck. NGC ID# 25VG, PCGS# 8285

5276 **1867-S VF20 PCGS.** A charming peach-gold half eagle with ample wing plumage and relatively few marks. A much better issue with a low mintage of 29,000 pieces. Certified in a green label holder. NGC ID# 25W4, PCGS# 8314

5277 **1877 — Improperly Cleaned — NGC Details. AU.** Only 1,132 examples of the 1877 business strike half eagle were produced. Pieces are rare in all grades and always of interest to knowledgeable collectors. This well-detailed example has unusually bright surfaces and each side shows evidence of peppering of marks that looks like it was intentionally done. NGC ID# 25WZ, PCGS# 8342

5278 **1879-CC VG8 PCGS. Variety 1-A.** The 1879-CC Liberty half eagle is somewhat available in lower circulated grades, but high grade examples are rare. This evenly worn, moderately abraded specimen retains considerable interior detail on the devices, including a bold LIBERTY. NGC ID# 25X8, PCGS# 8349

1882-S Five Dollar, MS65
Scarce in Gem Condition

5279 **1882-S MS65 NGC.** This lustrous peach-gold Gem has a nearly pristine appearance save for a single brief hair-thin line above the eagle's right (facing) shoulder. Though a common issue in typical Mint State grades, the 1882-S becomes an important conditional rarity at the MS65 level. Census: 33 in 65 (1 in 65+), 3 finer (4/15). NGC ID# 25XJ, PCGS# 8360

5280 **1883 MS63 PCGS.** The 1883 Liberty half eagle is difficult to locate in high grade. This attractive MS63 example displays well-detailed design elements and lustrous orange-gold surfaces that show scattered minor signs of contact. Population: 67 in 63 (3 in 63+), 24 finer (5/15). NGC ID# 25XK, PCGS# 8361

5281 **1885-S MS64+ PCGS. CAC.** Satiny green-gold luster illuminates sharp design elements on each side of this Plus-designated 1885-S half eagle. A few light ticks on the obverse preclude a full Gem grade assessment. NGC ID# 25XT, PCGS# 8368

5282 **1886-S MS65 PCGS.** The 1886-S half eagle can be located with little difficulty through the Select level of preservation. Near-Gems are scarce and MS65 pieces are infrequently seen. Lustrous surfaces display hints of rose and exhibit well-defined design elements. Neither side reveals mentionable marks. Population: 16 in 65, 0 finer (5/15). NGC ID# 25XV, PCGS# 8370

1890-CC Five Dollar, MS62

5283 **1890-CC MS62 PCGS Secure. Variety 1-A.** This pumpkin-gold Carson City representative offers good luster and is crisply struck. Distributed unimportant field grazes correspond to the designated grade. The '90-CC is approximately four times scarcer than the 1891-CC, whether judged by the mintage or third party census data. NGC ID# 25Y3, PCGS# 8376

5284 **1891-CC AU55 PCGS. Variety 1-A.** An early die state piece, not yet cracked. The 1891-CC is a fairly available Carson City issue, ideal for the collector seeking a single representative from this mint. This Choice AU representative displays warm honey-gold surfaces with remnants of luster in the peripheral recesses. Well-struck and problem-free. NGC ID# 25Y5, PCGS# 8378

5285 **1891-CC AU58 NGC. Variety 2-A.** A boldly struck apricot-gold Carson City five. Luster dominates the peripheries, and the only mentionable mark is a thin line just above the eagle's neck. Variety 2-A is the scarcer of the two known die varieties, noteworthy for minor repunching atop the second 1 in the date. NGC ID# 25Y5, PCGS# 8378

5286 **1891-CC MS62 NGC. Variety 1-A.** The 1891-CC half eagle is an available date in the context of Carson City fives, and is more readily available for date representation than the Philadelphia issue of this year. This example is lightly abraded, as the grade suggests, but shows a sharp strike with vibrant straw-gold luster. NGC ID# 25Y5, PCGS# 8378

5287 **1892 MS65 NGC. CAC.** This CAC-approved Gem exhibits notably attractive orange-gold luster with hints of even deeper apricot color throughout. The striking sharpness is excellent throughout the stars and central devices, and close study with lens reveals only a few trivial disturbances in the luster. Census: 33 in 65 (2 in 65+), 29 finer (4/15). NGC ID# 25Y6, PCGS# 8379

5288 **1892-CC MS60 PCGS. Variety 1-A.** Nearly 83,000 half eagles were coined in Carson City in 1892, but Mint State survivors are in short supply. This lower-end example offers affordability combined with an unusual degree of eye appeal for the MS60 level. Satiny yellow-gold luster accents the bold devices and remarkably smooth fields. No major distractions are in evidence. NGC ID# 25Y7, PCGS# 8380

5289 **1893-CC AU58 NGC. Variety 1-A.** This partly lustrous Borderline Uncirculated final year Carson City five has lovely khaki-gold color and only a single relevant mark, found on the reverse rim at 4 o'clock.
Ex: Long Beach Signature (Heritage, 5/2012), lot 5056. NGC ID# 25YB, PCGS# 8384

5290 **1894 MS64 PCGS.** While examples of this Philadelphia five are generally available up to the MS63 level, Choice coins are notably scarce and full Gems are rare. This near-Gem coin displays natural medium-gold coloration and frosty luster befitting its elusive high grade. Tiny marks are visible with a glass beneath Liberty's chin that account for the grade, since the eye appeal is suggestive of an even higher designation. Population: 42 in 64, 5 finer (4/15). NGC ID# 25YE, PCGS# 8387

1894 Half Eagle, MS65
None Finer at NGC

5291 **1894 MS65 NGC.** A mintage of nearly 1 million pieces ensures the availability of the 1894 half eagle in the absolute sense, but few representatives are known in Gem condition, and finer pieces are prohibitively rare. This example displays frosty yellow-gold luster with rose and peach accents throughout. The strike is sharp and the preservation is in keeping with the grade. Census: 14 in 65, 0 finer (4/15). NGC ID# 25YE, PCGS# 8387

5292 **1895 MS64 NGC. CAC.** A sharply but not fully struck example of this date, boasting lavish orange-yellow luster and a few small abrasions that preclude a Gem grade. A nice coin for the grade, and not that easily found finer. NGC ID# 25YH, PCGS# 8390

5293 **1895-S MS61 NGC.** Splashes of red-orange and peach colors are scattered on this honey-gold example of a better date in the series that was released into circulation rather than housed in overseas banks. As expected at this grade level, numerous marks are present. A granular area appears near the arrows, but the devices are sharply detailed and the surfaces retain much original mint luster. Census: 16 in 61, 7 finer (5/15). NGC ID# 25YJ, PCGS# 8391

5294 **1896 MS64 PCGS.** This low-mintage date slightly exceeding 59,000 pieces is elusive in near-Gem and extremely rare any finer. Peach-gold surfaces display dazzling luster and sharply struck design elements. Light scuffs limit the grade. Population: 21 in 64 (1 in 64+), 4 finer (5/15). NGC ID# 25YK, PCGS# 8392

1898 Half Eagle, MS65
Conditionally Rare

5295 **1898 MS65 NGC. CAC.** The 1898 is one of the more challenging Philadelphia half eagle issues from the 1890s, particularly in Gem or finer condition where it is notably rare. This example offers shimmering, frosty luster and boldly rendered design elements amid natural yellow-gold patina. A few small ticks are apparent when studied beneath a lens, but the overall eye appeal is pleasing for the grade. Census: 28 in 65 (1 in 65+), 6 finer (4/15). NGC ID# 25YP, PCGS# 8396

1899 Liberty Five, MS66
Great Eye Appeal

5296 **1899 MS66 NGC.** Fully struck, this Premium Gem has tremendous visual allure due to well-impressed design elements, pleasing peach and green-gold surfaces, and rich luster. Further adding to the eye appeal, the coin is minimally abraded. Census: 76 in 66 (3 in 66+), 12 finer (4/15). NGC ID# 25YS, PCGS# 8398

5297 **1901 MS64+ NGC. CAC.** There are no annoying copper stains or large marks to interfere with the appealing, brilliant-gold allure of this visually impressive near-Gem half eagle. Cartwheel mint luster radiates from the frosted, finely textured fields and devices. Small ticks and nicks are widely distributed across the surfaces, but they are too small to be visible without a glass. CAC endorsed, and deservedly so. NGC ID# 25YW, PCGS# 8402

1903-S Half Eagle, Frosty MS66

5298 **1903-S MS66 NGC.** This 20th century San Francisco issue is available through the Gem grade level, but finer pieces are rare. This Premium Gem representative displays frosty yellow-gold luster and sharp design elements. Only a few trivial grazes are present under a loupe. Census: 42 in 66, 8 finer (5/15). NGC ID# 25Z3, PCGS# 8408

5299 **1905 MS64+ NGC. CAC.** The 1905 half eagle is obtainable in Choice condition, but Gem representatives are elusive. This Plus-graded piece displays frosty green-gold luster with sharp motifs. A few light ticks on the obverse preclude a full Gem grade. NGC ID# 25Z6, PCGS# 8411

1908 Half Eagle, Crisp MS66

5300 **1908 MS66 PCGS.** Each side of this final-year Liberty half eagle sports fresh, vibrant luster. Pale straw-gold centers and deeper sun-yellow margins are equally well-preserved, and the strike is crisp. An ideal Premium Gem for the discerning type or date collector. Population: 35 in 66, 8 finer (5/15).
Ex: Baltimore Signature (Heritage, 3/2009), lot 3008. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

1908 Indian Head Five, Well-Struck MS64+
New Pratt Design With Coelanaglyptic Relief

5301 **1908 MS64+ PCGS. CAC.** This first-year Indian Head half eagle, the new design premiered by Bela Lyon Pratt, shows rich luster on khaki-gold, well-struck surfaces that are only a few stray, small ticks away from a Gem grade. The unusual coelanaglyptic relief (raised relief in a sunken panel, also known as *cavo rilievo* or "hollow relief" in Italian) of the Pratt half eagles and quarter eagles was the subject of an unusual amount of vitriol in the press of the day, but today the design is well-loved and treasured. NGC ID# 28DE, PCGS# 8510

5302 **1908-D MS63 NGC. CAC.** A pleasing khaki-gold Indian half eagle representing the first year of the sunken design, this Select Mint State example features frosty luster and minimal, grade-consistent marks. NGC ID# 28DF, PCGS# 8511

5303 **1909 MS63 PCGS.** Rich orange-gold and apple-green toning alternates across this well struck and coruscating Indian five. The reverse field displays scattered unobtrusive marks. Certified in a green label holder. NGC ID# 28DH, PCGS# 8513

5304 **1909 MS64 NGC.** Glowing, satiny mint luster radiates from the surfaces of this near-Gem in shades of peach, rose, and straw-gold. The surfaces are free of even minor distractions in almost all areas, and a single, faint scratch behind the eagle's head seems to be all that precludes full Gem status. As a date, the 1909 half eagle is among the more available early issues of the series, though Gem-quality pieces are conditionally scarce. NGC ID# 28DH, PCGS# 8513

5305 **1909 MS64 PCGS.** Satiny lemon-gold mint luster illuminates minimally abraded surfaces on this eye-appealing near-Gem. The strike is razor-sharp, with notable boldness seen on the headdress and the eagle's wing feathers. This issue is among the more easily obtainable issues in the series, ideal for type purposes. NGC ID# 28DH, PCGS# 8513

1909-D Five Dollar, MS64+
Sharp Indian Head Type Coin

5306 **1909-D MS64+ PCGS. CAC.** With a mintage in excess of 3.4 million coins, the 1909-D Indian half eagle is a favorite issue among type enthusiasts. Mildly granular honey-gold luster increases the eye appeal of this Plus-graded Choice example, while sharp design definition completes the visual attributes. A few light abrasions limit the grade. NGC ID# 28DJ, PCGS# 8514

5307 **1909-D MS64+ NGC. CAC.** The archetypal issue within the Indian Head series, struck to the extent of more than 3.4 million coins and available for a price up through the MS66 level at both NGC and PCGS. This piece shows rich golden-orange luster with minimal marks and a top-notch strike. NGC reports only 81 submissions numerically finer (5/15). NGC ID# 28DJ, PCGS# 8514

1910-D Half Eagle, Lustrous MS63

5308 **1910-D MS63 PCGS.** Bright orange-gold color enhances the lustrous surfaces of this 1910-D half eagle, an issue that is among the most available mintmarked Indian Head fives. The Indian's cheek is free of mentionable contact, but a few ticks appear in the obverse field nearby and are scattered over the reverse. This issue becomes difficult in near-Gem and is rare any finer. NGC ID# 28DL, PCGS# 8518

1910-D Half Eagle, MS63 Scarce Any Finer

5309 **1910-D MS63 NGC. CAC.** Satiny yellow-gold luster illuminates the minimally abraded surfaces of this Select 1910-D five. The devices are well-defined and the overall eye appeal is superior to that of many other equally graded examples. The 1910-D is a slightly better date in Mint State, scarcely seen in Choice or better condition. There are only 33 NGC-certified pieces finer than this coin (5/15). NGC ID# 28DL, PCGS# 8518

5310 **1911-D AU55 NGC.** Any numismatist completing a set of Indian Head half eagles must sooner or later confront the fact that the 1911-D is only one of a number of elusive low-mintage (or high-meltage, in the case of the 1929) keys to the series. The 1911-D half eagle is grade-for-grade far rarer than its quarter eagle counterpart. This piece displays wheat-gold obverse patina and deeper reddish-orange color on the reverse. Minor high-point wear shows on each side, with the sole mentionable contact a scuff in the reverse field above the eagle. NGC ID# 28DR, PCGS# 8521

5311 **1911-D AU55 NGC.** A Choice AU example of this elusive issue, from a mintage of just 72,500 pieces, this coin exhibits just a trace of actual wear on the design elements and the lightly abraded surfaces retain almost all of their original mint luster. NGC ID# 28DR, PCGS# 8521

1911-D Half Eagle, Attractive AU55

5312 **1911-D AU55 NGC. CAC.** The 1911-D half eagle is also a low-mintage coin like its quarter eagle counterpart, but it has more competition for the limelight within its series. This wheat-gold Choice AU example shows some light wear on the high points and a few small abrasions, but most of the luster still remains, and the eye appeal is quite good. NGC ID# 28DR, PCGS# 8521

5313 **1912 MS64 PCGS.** The 1912 is a popular issue among type collectors because of its sharp strike and lively luster. Light butter-gold color and typically vibrant luster embrace each crisply impressed side. A small linear depression adjacent to star 2 is likely all that prohibits a Gem designation. NGC ID# 28DS, PCGS# 8523

1912 Half Eagle, Sharp MS64+

5314 **1912 MS64+ PCGS. CAC.** Rich golden-orange mint luster rides on surfaces that show no mentionable contact marks on the crucial high points of the Indian's cheek or the upper eagle's breast. The strike is sharp throughout. An available issue through MS64, but much more elusive in Gem grade. Population: 35 in 64+, 52 finer (5/15). NGC ID# 28DS, PCGS# 8523

5315 **1912-S MS60 NGC.** The golden-orange surfaces show considerable luster but show some hazy smoke-gray overlay from coin-to-coin contact, also emphasized by the sprinkling of numerous abrasions seen throughout each side. Some buildup appears in some of the device recesses as well. A relatively affordable example of this elusive S-mint date. NGC ID# 25ZN, PCGS# 8524

5316 **1913 MS63 PCGS.** Slight strike weakness is evident on this Select Mint State Indian half eagle. The 1913 is a popular type issue from a mintage of more than 900,000 coins. NGC ID# 28DT, PCGS# 8525

5317 **1915 MS63 NGC.** The 1915 Indian half eagle was a well-produced issue and this impressive Select specimen offers sharply detailed design elements and lustrous rose-gold surfaces that show a few deeper olive and russet overtones. NGC ID# 28DX, PCGS# 8530

5318 **1915 MS63 PCGS. CAC.** Wheat-gold surfaces on this Select 1915 half eagle show a good strike and only minor abrasions, along with two tiny off-color spots on the obverse, undistracting but noted. CAC apparently agrees. Nice for the grade. NGC ID# 28DX, PCGS# 8530

5319 **1915 MS64 NGC.** The sharpness of strike and brilliant mint luster make this attractive half eagle a logical selection for type and date collectors alike. The eye appeal is outstanding. Marks are limited to a few light grazes in the fields as well as a single nick on the rim between stars 7 and 8, which may have been a test cut. The incuse elements are particularly bold and full-detailed. NGC reports just 39 numerically finer pieces (4/15). NGC ID# 28DX, PCGS# 8530

1915 Half Eagle, Well-Made MS64+

5320 **1915 MS64+ PCGS. CAC.** This orange-gold 1915 half eagle would likely grade a full MS65 were it not for a couple of small ticks in the date area. As it is, rich luster and a boldly impressed strike give it broad eye appeal and a high quotient of collectibility. One of the better-produced issues in the series. Population: 36 in 64+, 49 finer (5/15). NGC ID# 28DX, PCGS# 8530

1916-S Half Eagle, Lustrous MS62

5321 **1916-S MS62 PCGS.** The 1916-S half eagle is relatively obtainable through grades MS63 as a result of a hoard of about 200 coins that entered the market in the 1980s. Brass-gold color runs over the lustrous surfaces of this MS62 example, showing a relatively strong strike with light to moderate marks scattered over each side.
Ex: FUN Signature (Heritage, 1/2011), lot 6999. NGC ID# 28DY, PCGS# 8532

1916-S Five Dollar, MS62
Rich Multicolor Toning

5322 **1916-S MS62 PCGS.** Like all San Francisco Indian fives, the 1916-S is conditionally challenging in Mint State. The present coruscating example has a good strike and exquisite peach-gold and apple-green toning. A bagmark at star 4 limits the grade. The mintmark is indistinct, but no other issue was struck with that date. Housed in a green label holder. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

5323 **1840 AU53 NGC.** Orange-tinged yellow-gold surfaces remain luminous on this lightly rubbed early Coronet eagle. Both sides show scattered light to moderate abrasions, including a long mark on Liberty's jaw and several rim nicks. Census: 25 in 53, 56 finer (5/15).
Ex: Chicago Signature (Heritage, 8/2011), lot 5625. NGC ID# 262G, PCGS# 8581

1840 Ten Dollar, Choice AU
Underappreciated Philly Issue

5324 **1840 AU55 NGC.** The wingtips and the hair above the ear show slight wear, but this straw-gold representative retains glimpses of luster throughout the shield and reverse legends. Scattered small abrasions are consistent with light circulation. A great rarity in Uncirculated grades, the low mintage 1840 is very scarce but collectible at the Choice AU level. Census: 31 in 55, 25 finer (5/15). NGC ID# 262G, PCGS# 8581

5325 **1841 AU53 NGC.** The rarity of the 1841 eagle in Mint State puts increased demand on the scattered AU representatives. This piece displays medium yellow-gold patina, with hints of semiprooflike mirroring in the recesses. Well-struck with only trivial high-point wear. Census: 24 in 53, 64 finer (5/15). NGC ID# 262H, PCGS# 8582

1846 Ten Dollar, AU50
Condition Rarity

5326 **1846 AU50 PCGS.** Eagle coinage at Philadelphia was fairly minimal during the inaugural years of the Liberty Head design; 1846 saw the production of only 20,095 pieces. About Uncirculated representatives are about as fine as is typically available, as Mint State pieces are extremely rare. This example displays bronze-gold patina with just a hint of luster. Light field chatter accompanies the well-detailed design elements. Population: 10 in 50, 15 finer (5/15). NGC ID# 262W, PCGS# 8594

5327 **1847 AU55 NGC.** Abrasions are mostly minor in severity but widespread on scope on this nonetheless-attractive 1847 eagle, an early high-mintage date in the Liberty Head series. The strike is a tad stronger on the reverse. NGC ID# 262Z, PCGS# 8597

1848 Eagle, MS60
Scarce in Mint State

5328 **1848 MS60 NGC.** Shield Ring Variety. A high-mintage No Motto type coin, yet Uncirculated examples are decidedly scarce. The coin displays nice frosty luster over sun-gold surfaces, which are sharply struck on both sides including the distinctive die anomaly atop the second vertical stripe resembling a circular ring. The Shield Ring die defect is more commonly seen on New Orleans issues of the era. As one might expect for the assigned grade, frequent bagmarks and light abrasions visit the pleasing surfaces. Census: 7 in 60, 19 finer (4/15). NGC ID# 2633, PCGS# 8599

1848-O Ten Dollar, AU50
'Shield Ring' Variety

5329 **1848-O AU50 NGC. Variety 1.** A lemon-gold No Motto ten without any mentionable marks. The strike shows moderate blending, especially on the stars. A shield ring rests atop the second vertical stripe, seen on most but not all examples. A scarce New Orleans issue relative to its 1847-O predecessor, which had a mintage nearly 16 times greater. NGC ID# 2634, PCGS# 8600

1849 Ten Dollar, MS61
Ex: Harry W. Bass, Jr.
Repunched Date, Breen-6886

5330 **1849 MS61 NGC. Breen-6886.** Ex: Bass. One of three noteworthy repunched date varieties for the 1849, Breen-6886 shows the base of the 1 in the date recut north. The Bass II catalog described the present coin as "one of the finest we have seen in a long time. Extraordinary condition for the date." The lustrous sun-gold fields display the expected number of individually unimportant marks. Census: 15 in 61 (1 in 61+), 22 finer (4/15).
Ex: Purchased by Bass from William K. Raymond, 2/1972; Harry W. Bass, Jr. Collection, Part II (Bowers and Merena, 10/1999), lot 1390.
NGC ID# 2635, PCGS# 8601

1853/2 Eagle, AU55
Subtle, In-Demand Overdate

5331 **1853/2 AU55 PCGS.** The slender curve of an underdigit is visible within the bottom loop of the 3, confirming the overdate. This popular-but-subtle variety often goes unnoticed and is perhaps more available than earlier estimates, yet it is always in-demand by series specialists. Natural reddish-gold accents occupy protected areas of this orange-gold ten, which shows many small marks and abrasions but no serious hits. Nice luster and strike detail remains over the Choice AU surfaces. Population: 12 in 55, 5 finer (5/15). NGC ID# 263E, PCGS# 8611

5332 **1854 AU55+ NGC. CAC.** Moderate remaining luster in the recesses no doubt contributed to this Choice AU 1854 ten also receiving a Plus designation. The surfaces show original orange-gold patina and the design elements retain pleasing detail. NGC ID# 263G, PCGS# 8613

1854-S Eagle, AU55
Memento of the San Francisco Mint's Opening

5333 **1854-S AU55 PCGS.** A historic memento of the San Francisco Mint, which opened in this year, 1854, as a U.S. branch mint. Fortunately, examples of the eagle were saved in quantity, but Mint State examples are very rare. This Choice AU example shows scattered abrasions, including a couple of larger ones, on golden-orange, lustrous surfaces. Population: 20 in 55, 22 finer (5/15). NGC ID# 263K, PCGS# 8615

5334 **1855-S — Improperly Cleaned — NGC Details. AU.** Although the first-year 1854-S had a reasonable mintage, the 1855-S production was a scant 9,000 pieces, since West Coast bankers and exporters preferred the more convenient double eagle for large payments. The present '55-S displays luster throughout the legends but is moderately bright from a wipe, and small abrasions are distributed. NGC ID# 263N, PCGS# 8618

5335 **1856-S AU53 NGC.** Large S. The 1856-S is a better-date ten, with a mintage of only 68,000 coins. This AU representative displays bright yellow-gold surfaces with remnants of luster in the peripheral recesses. No major distractions are present. NGC ID# 263S, PCGS# 8621

1859-S Ten Dollar, AU Details
Rare No Motto Survivor

5336 **1859-S — Improperly Cleaned — NGC Details. AU.** Perhaps as few as 40 to 60 pieces survive in all grades from an original mintage of 7,000 pieces, making this San Francisco date a notable rarity in a series with more than its share of challenging issues. While this example is net-graded for cleaning, the lively medium-gold color is largely unaffected. Myriad ticks and tiny marks populate the surfaces. Substantial detail and appeal remains, providing an opportunity for the perceptive rare gold specialist. NGC ID# 2643, PCGS# 8630

1874-CC Eagle, Choice VF
Superior Color and Surfaces

5337 **1874-CC VF35 PCGS. Variety 1-A.** Like all Carson City tens from the 1870s, the 1874-CC is rare. Only 16,767 pieces were struck, and they were given no numismatic consideration until decades later. The present example offers original peach-gold and lime-green surfaces, and is minimally abraded given its encounter with Old West commerce. NGC ID# 2658, PCGS# 8670

1875-CC Ten Dollar, AU Details
Challenging Carson City Issue

5338 **1875-CC — Altered Surfaces — PCGS Genuine. AU Details. Variety 1-A.** The Wide CC variant, which is moderately less rare than its Close CC Variety 2-B counterpart. Any 1875-CC ten is desirable, since only a few hundred survivors are estimated from the mintage of 7,715 pieces. The apricot-gold surfaces are somewhat granular throughout, and may have been carefully smoothed to remove marks. NGC ID# 265B, PCGS# 8673

5339 **1877-S XF45 PCGS.** The 1877-S Liberty eagle is a scarce issue from a reported mintage of 17,000 pieces. This Choice XF specimen shows light wear on Liberty's hair and the Eagle's wing tips, with moderately abraded orange-gold surfaces. Population: 43 in 45, 27 finer (5/15). NGC ID# 265H, PCGS# 8679

5340 **1879-S MS60 PCGS.** The 1879-S ten dollar is significantly more elusive than its Philadelphia counterpart, particularly in Mint State. This piece is well-struck and exhibits warm orange-gold luster. Light, uniformly dispersed abrasions define the grade. Population: 4 in 60, 61 finer (5/15). NGC ID# 265R, PCGS# 8686

5341 **1883-CC XF40 PCGS. Variety 1-A.** The 1883-CC Liberty eagle is an elusive issue from a mintage of 12,000 pieces. This pleasing XF example shows light wear on the hair and wing tips and the orange-gold surfaces show prooflike reflectivity in sheltered areas. Housed in a green label holder. NGC ID# 2667, PCGS# 8700

5342 **1886 MS63 PCGS.** A low population coin in Select Mint State, this original example is boldly struck and richly lustrous. Frosted fields and devices convey the natural allure of fresh-minted gold. Minor abrasions confirm the grade but do not distract from the appeal. Population: 35 in 63, 8 finer (5/15). NGC ID# 266F, PCGS# 8708

1889 Eagle, Lustrous AU58
Low Mintage of 4,440 Coins

5343 **1889 AU58 PCGS. CAC.** A pleasing Choice AU specimen from a low mintage of 4,440 pieces, this coin displays lightly abraded greenish-gold surfaces with bright mint luster in sheltered areas. The sharply impressed design elements show just a trace of wear on the high points. Population: 19 in 58, 44 finer (5/15). NGC ID# 266N, PCGS# 8715

1891-CC/CC Eagle, MS62
FS-501, Lustrous, Lightly Marked

5344 **1891-CC/CC FS-501 MS62 NGC. Variety 3-C.** A sharply struck and lustrous butter-gold Carson City type coin. The sole reportable mark is relegated to the field behind Liberty's neck. The mintmark is widely repunched east. Douglas Winter is reported as the discoverer of the variety, as cataloger of lot 1731 of the June 1982 Steve Ivy Phoenix auction. The variety is undesignated on the NGC insert. PCGS# 145728 Base PCGS# 8720

5345 **1895 MS63 NGC.** The fields are bright and peppered with numerous small to medium-sized abrasions. Sharply struck throughout, the mint luster is the usually expected orange-gold color. NGC ID# 2678, PCGS# 8732

5346 **1895 MS64 NGC.** The 1895 ten ceases to be a plentiful issue in MS64, and anything finer is extremely rare. This Choice example displays sharp design elements and frosty yellow-gold luster, without any major abrasions. There are only four pieces numerically finer at NGC (5/15). NGC ID# 2678, PCGS# 8732

5347 **1896 MS63 NGC.** The rich reddish-orange surfaces show just the faintest hint of lilac when angled properly under a light. Sharply defined overall, the grade is derived from the numerous small to medium-sized abrasions seen over each side. NGC ID# 267B, PCGS# 8735

5348 **1897-O MS62 PCGS. CAC. Variety 1.** A crisply struck and coruscating apricot-gold and sea-green Liberty ten. The fields display scattered minor marks, but the eye appeal is superior for the designated grade. A scarce New Orleans issue with a mintage of just 42,500 pieces. Population: 65 in 62 (1 in 62+), 28 finer (4/15). *Ex: Long Beach Signature (Heritage, 9/2009), lot 1688, which realized $2,300.* NGC ID# 267E, PCGS# 8738

5349 **1901-S MS64 PCGS. Breen-7075.** The date is nicely repunched, especially on the base of the first 1. The initial logotype slanted upward. The reverse border is lightly strike doubled due to a slightly loose reverse die, misinterpreted as die doubling under Breen-7074. The present near-Gem has booming luster and lovely orange-gold color. The well struck surfaces are smooth save for wispy field marks near the bust tip and forehead. Housed in an old green label holder. NGC ID# 267S, PCGS# 8749

5350 **1903-S MS64 PCGS.** A splendid Choice Mint State example, the 1903-S is elusive in finer grades. This frosty eagle has brilliant yellow luster with wisps of rose color. Sharply struck and highly attractive. PCGS has only certified 83 finer examples (5/15). NGC ID# 267X, PCGS# 8754

5351 **1905 MS64 PCGS.** The 1905 Liberty eagle is very scarce in MS64 condition, and finer examples are rare. This attractive Choice Specimen is sharply detailed, with well-preserved orange-gold surfaces and vibrant mint luster. Population: 85 in 64, 29 finer (5/15). NGC ID# 2682, PCGS# 8757

5352 **1905 MS64 PCGS. CAC.** A sharply struck green-gold near-Gem. Cartwheel luster dominates lightly marked surfaces. The 1905 is a better date at the MS64 level, perhaps two dozen times scarcer than the 1901-S. It is nonetheless obtainable for only a modest premium over type. NGC ID# 2682, PCGS# 8757

5353 **1906-D MS64 PCGS. CAC.** A pleasingly original near-Gem example, with frosted medium-gold coloration. Rolling cartwheel luster reveals lilac and orange accents over the minimally marked surfaces of this first-year Denver eagle. Only 28 examples are numerically finer at PCGS (5/15). NGC ID# 2685, PCGS# 8760

5354 **1906-D MS64 PCGS. CAC.** The well-preserved peach-gold surfaces of this popular first-year Denver issue are brightly lustrous and the design elements are sharply detailed throughout. Eye appeal is quite strong. PCGS has graded 28 numerically finer examples (5/15). NGC ID# 2685, PCGS# 8760

5355 **1906-S MS63 PCGS.** The 1906-S eagle is reasonably available in grades through MS62 but becomes rare at the Select level. Though this wheat-gold example has a degree of the usual striking softness and scattered abrasions, the ample luster is key to the eye appeal. Population: 32 in 63, 11 finer (5/15). NGC ID# 2687, PCGS# 8762

INDIAN EAGLES

5356 **1907 No Periods MS61 NGC.** A popular type issue for the collector seeking a single Indian eagle, this piece exhibits honey-gold color over satin luster with exceptional surfaces for the grade. NGC ID# 28GF, PCGS# 8852

5357 **1907 No Periods MS62 PCGS.** Both sides of this fully lustrous Indian eagle blend lemon and light yellow color over satiny surfaces. An exceptional example of the plentiful first-year No Periods ten. NGC ID# 28GF, PCGS# 8852

5358 **1908 No Motto AU58 PCGS.** The bright yellow-gold mint luster has taken on a significant presence of deeper reddish-gold patina over each side. Lightly abraded and showing faint evidence of circulation. NGC ID# 28GG, PCGS# 8853

5359 **1908 No Motto MS62 NGC.** This satiny No Motto type coin displays medium straw-gold luster and has fewer abrasions than are expected for the grade. Moderately well-struck, with pleasing overall eye appeal. NGC ID# 28GG, PCGS# 8853

5360 **1908-D No Motto MS60 NGC.** This plentiful No Motto Indian eagle is frequently found in most Mint State grades, making it an ideal piece for a type collection. This example has trivial surface marks and microscopic hairlines that prevent a higher grade. Lustrous yellow surfaces enhance the eye appeal. NGC ID# 28GH, PCGS# 8854

5361 **1908 Motto MS63 NGC.** The yellow-gold surfaces show good luster beneath a layer of light smoky haze. Some scattered small abrasions are to be expected at this grade level. A single larger mark shows on the eagle's midsection, but good eye appeal is present on this attractive type coin. NGC ID# 28GJ, PCGS# 8859

5362 **1909 MS63 NGC.** Fewer abrasions are present than are expected for the grade, with satiny yellow-gold luster rolling over sharply impressed design elements on both sides. A number of Mint State 1909 Indian eagles survive, but these are primarily limited to MS62 and lower grades. Select examples are elusive and finer coins are scarcely encountered. NGC ID# 28GM, PCGS# 8862

5363 **1909-D AU58 PCGS. CAC.** The 1909-D Indian eagle is a slightly better date, particularly in Uncirculated condition. This near-Mint example displays consistent wheat-gold color with remnants of luster in the recesses. Well-struck, with trivial friction over the high points of the design. NGC ID# 28GN, PCGS# 8863

5364 **1909-D MS62 NGC.** Noticeably scarcer than its Philadelphia counterpart, the 1909-D Indian eagle becomes challenging above the MS62 grade level, and draws a substantial premium in these grades from competitive series collectors. This slightly more affordable example is well-struck, with satiny wheat-gold luster. A few light, scattered abrasions limit the grade, but none are individually noticeable. NGC ID# 28GN, PCGS# 8863

5365 **1909-D MS62 PCGS.** An appealing example for the grade, this MS62 coin shows primarily just light chatter, with no obtrusive abrasions. The strike is sharp, and the medium honey-gold surfaces exhibit strong, satiny luster. This issue is obtainable in MS62 and lower grades, but the certified population declines significantly in finer levels of preservation. This piece represents an ideal opportunity for the budget-minded collector to acquire this slightly better date. NGC ID# 28GN, PCGS# 8863

1909-D Ten Dollar, An Above-Average MS62

5366 **1909-D MS62 PCGS. CAC.** The yellow-gold surfaces of this D-mint ten dollar display a good amount of luster and exhibit well-struck design elements. Some light scuffs determine the grade, but that said, these are fewer and less severe than ordinarily expected for the MS62 level of preservation and for the issue that is typically "noticeably abraded" (Akers, 2008; Fuljenz, 2010). The above-average surfaces are corroborated by the CAC endorsement. Both Akers and Fuljenz regard this issue as one of the most undervalued and underrated Indian gold eagles. NGC ID# 28GN, PCGS# 8863

5367 **1909-S AU55 NGC.** As one of the scarcer S-mints in the ten dollar Indian series, this Choice AU offers an affordable alternative to the more expensive, high-priced pieces that are occasionally offered. The reddish-gold surfaces show gray-tinted high points. Numerous small abrasions are seen over each side. NGC ID# 28GP, PCGS# 8864

5368 **1910-D MS64 NGC.** An incredibly attractive example of this well-made issue, one much more elusive at the Gem grade level, where the certified populations are far smaller. This near-Gem 1910-D boasts excellent luster on apricot-gold surfaces that are unperturbed save for the smallest high-point marks. The strike and eye appeal are top-notch. NGC ID# 28GS, PCGS# 8866

1910-S Ten Dollar, MS62 Challenging Any Finer

5369 **1910-S MS62 PCGS.** The mintage figure of the 1910-S eagle exceeding 800,000 coins is the largest S-mint production in the Indian Head series. This figure is highly deceptive, however, as most of the production was melted in the 1930s. Today only a few thousand examples survive in all grades. This issue can be obtained through MS62 without too much trouble, but Select and near-Gem specimens are very scarce and finer coins are virtually unobtainable.

The present MS62 offering displays nearly complete luster and attractive peach-gold color with scattered scrapes and ticks accounting for the grade, including a patch on Liberty's cheek and neck. The design elements are well-struck except for the usual weakness in the 19 of the date. NGC ID# 268D, PCGS# 8867

5370 **1911 MS63 NGC.** Vivid orange-gold and apricot hues blend together over each side of this Select Mint State example, delivering unusually strong eye appeal for the grade. Well-struck, with only a few light abrasions on the cheek precluding an MS64 designation. NGC ID# 28GT, PCGS# 8868

5371 **1911 MS64 NGC.** A lovely specimen, this Choice Mint State Indian ten has brilliant and frosty yellow surfaces with only a few scattered marks on each side. Challenging in finer grades. *Ex: Long Beach Signature (Heritage, 2/2012), lot 4994.* NGC ID# 28GT, PCGS# 8868

5372 **1911 MS64+ NGC.** The 1911 Indian eagle is available through the Choice grade level, but is challenging any finer. This Plus-graded example exhibits satiny yellow-gold luster and a bold strike. A few faint surface grazes preclude full Gem status, but are not detracting to the unaided eye. NGC ID# 28GT, PCGS# 8868

5373 **1911 MS64 PCGS. CAC.** This attractive Choice Indian eagle exhibits sharply detailed design elements and vibrant mint luster throughout, with vivid orange-gold surfaces that show only minor signs of contact. Eye appeal is terrific. NGC ID# 28GT, PCGS# 8868

5374 **1911-D XF45 NGC.** This key Denver issue is seldom seen in such an affordable grade, and this piece should be readily acquired by the budget-conscious collector. Some luster remains in the recesses amid wheat-gold patina. Light wear is evident on the eagle's wing and the hair curls around Liberty's face. NGC ID# 28GU, PCGS# 8869

5375 **1911-S AU58 PCGS.** A pleasing near-Mint specimen of this elusive issue from a mintage of 51,000 pieces. This coin displays just a trace of actual wear on the well-detailed design elements and the lustrous orange-gold surfaces show a number of well-scattered minor abrasions. NGC ID# 28GV, PCGS# 8870

1911-S Indian Ten, MS60

5376 **1911-S MS60 NGC.** This scarce S-Mint Indian eagle survives from a low mintage of only 51,000 coins. Both sides exhibit splendid light yellow surfaces that show only trivial, grade-consistent marks. The luster is brilliant and frosty with good overall eye appeal with faint traces of delicate orange peripheral toning. NGC ID# 28GV, PCGS# 8870

5377 **1912-S AU55 NGC.** Honey-gold surfaces show good remaining luster despite light wear, and a few abrasions on the high points determine the grade. Some grayish overlay appears at the rims and high points. NGC ID# 28GX, PCGS# 8872

5378 **1912-S MS61 PCGS.** A distinctly elusive issue in Mint State, the 1912-S Indian eagle is even challenging in the MS61 to MS62 grade range. This MS61 coin is well-struck, with original green-gold coloration. Light chatter in the fields and on Liberty's cheek accounts for the grade, but no individually obtrusive abrasions are present. NGC ID# 28GX, PCGS# 8872

5379 **1913-S AU53 NGC.** An important low-mintage issue in the Indian eagle series, this example survives from a production of only 66,000 coins. Light wear appears on both sides of this light yellow example that retains considerable luster. NGC ID# 28GZ, PCGS# 8874

5380 **1914 MS62 PCGS.** Lustrous orange-gold surfaces show matte-like fields and are surprisingly clean for the grade. Excellent choice for type purposes. NGC ID# 28H2, PCGS# 8875

5381 **1914 MS63 NGC.** This Select piece is notably well-struck, and yields satiny yellow-gold luster that is free of any major abrasions. The 1914 ten is only infrequently seen finer. NGC ID# 28H2, PCGS# 8875

5382 **1914-D MS62 PCGS.** Bright yellow-gold frosted mint luster is interrupted by a number of small to medium-sized abrasions on each side. Well-struck. NGC ID# 28H3, PCGS# 8876

5383 **1914-S AU55 NGC.** The dusky "old gold" surfaces show a trace of wear over the high points, but surprisingly few abrasions. A good value as a Choice AU, the 1914-S is a pricey item in the better grades of Uncirculated. NGC ID# 28H4, PCGS# 8877

5384 **1914-S AU58 NGC.** The 1914-S Indian ten is a better date in Mint State grades, and high-end AU examples experience overflow demand as a result. This near-Mint coin displays original orange-gold surfaces, with scattered abrasions and trivial high-point friction consistent with the grade. Overall, a pleasing 1914-S. NGC ID# 28H4, PCGS# 8877

5385 **1914-S MS61 PCGS.** By mintages, the 1914-S Indian ten is nothing special, having a total of 208,000 coins to its tally; yet, pleasing Mint State survivors are seldom encountered, making the current offering of heightened importance. This piece is well-struck, with satiny yellow-gold luster and an unusual lack of major abrasions. NGC ID# 28H4, PCGS# 8877

5386 **1916-S AU58 NGC.** A trace of wear appears on the high points of this elusive Indian ten. Both sides retain considerable luster on the greenish yellow-gold surfaces, showing trivial marks. An attractive example with good eye appeal. NGC ID# 28H7, PCGS# 8880

5387 **1932 MS64+ PCGS.** This frosty and fully brilliant 1932 Indian ten represents the only collectible U.S. gold issue of the decade. A wonderful near-Gem, it exhibits amazing eye appeal with trivial surface marks.
Ex: Long Beach Signature (Heritage, 2/2012), lot 5013. NGC ID# 28HB, PCGS# 8884

5388 **1932 MS64 PCGS. CAC.** Razor-sharp definition is evident on all design elements of this attractive Choice specimen and the vivid orange-gold surfaces radiate vibrant mint luster, with few signs of contact. NGC ID# 28HB, PCGS# 8884

5389 **1932 MS64 PCGS. CAC.** Original, frosty luster blankets both sides of this final-year Indian ten in pleasing wheat-gold hues. Sharp design elements further contribute to the visual appeal. A small tick on Liberty's chin and another in the reverse field below the M in UNUM are the only abrasions of note. NGC ID# 28HB, PCGS# 8884

5390 **1932 MS64 NGC. CAC.** The fresh, uninhibited luster of this Choice final-year type coin significantly contributes to the eye appeal. The strike is sharp and there are hints of green and rose throughout the largely yellow-gold surfaces. NGC ID# 28HB, PCGS# 8884

5391 **1932 MS64+ PCGS. CAC.** This Plus-graded 1932 Indian eagle provides the budget-conscious collector with a pleasing, yet, affordable type representative that does not demand the financial investment of a full Gem or finer piece. This coin is well-struck and frosty, with consistent yellow-gold color. A few minor abrasions on the devices define the grade. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Twenty Dollar, XF45
First-Year Type Coin

5392 **1850 XF45 NGC. CAC.** Well-struck surfaces are honey- and amber-gold with glints of deeper patina around the devices. The wear is consistent with the grade but much eye appeal remains on this first-year issue struck in the amount of 1.1 million-plus pieces, a clear target for the affections of legions of type collectors. NGC ID# 268F, PCGS# 8902

5393 **1851 VF35 PCGS.** A honey-gold example that retains noticeable luster despite moderate wear on the wingtips and curls. The reverse is surprisingly free from marks, and the obverse displays only distributed small abrasions. Encapsulated in an old green label holder. NGC ID# 268H, PCGS# 8904

5394 **1852 XF45 PCGS.** An evenly worn Choice XF example, with bright yellow-gold surfaces that show a scattering of minor abrasions and retain traces of original mint luster. The 1852 Liberty double eagle claims a mintage of 2 million pieces, making it an available date and a popular type coin. NGC ID# 268K, PCGS# 8906

1853 Double Eagle, Well-Struck AU58

5395 **1853 AU58 NGC.** While mint condition 1853 double eagles can be located with patient searching, they will generally grade no better than MS62. Most collectors therefore choose to acquire an AU58 example such as the present offering. It is less costly and usually has better eye appeal than lower-level Uncirculated pieces. Breen (1988) writes: "The Baltimore hoard contained 27 ... many of which may have been AU rather than Unc." This crisply struck near-Mint representative provides substantial luster and only distributed moderate marks, none of which merit singular description.
Ex: Dallas Signature (Heritage, 10/2008), lot 3007. NGC ID# 268M, PCGS# 8908

1854 Double Eagle, Choice XF
Reddish-Gold Small Date Example

5396 **1854 Small Date XF45 NGC.** The 1854 double eagle was stuck to the extent of 757,899 coins, but the exact proportions comprising the Small Date and Large Date variants remain unknown. Still, the Small Date variety is acknowledged to be more available than its Large Date counterpart. This Choice XF piece shows reddish-gold color over surfaces that are expectedly abraded given their time in circulation. A well-detailed Type One twenty dollar. NGC ID# 268P, PCGS# 8911

5397 **1855 AU50 PCGS.** This Type One twenty blends khaki and rose-gold with scattered marks across both surfaces. Hints of field reflectivity and traces of luster remain visible in the protected areas. NGC ID# 268V, PCGS# 8914

1855 Double Eagle, Well-Struck AU55
Conditionally Rare in Mint State

5398 **1855 AU55 NGC.** Most known 1855 double eagles are in the XF to AU58 grade range. Mint condition pieces are exceedingly rare. Indeed, NGC and PCGS have certified only 35 Uncirculated coins, mostly MS60 through MS62 and none finer than MS64. This Choice AU offering displays yellow-gold surfaces with luster in the protected areas, and the design elements are well-struck. Scattered minute marks are within the parameters of a lightly circulated, large gold coin. Census: 84 in 55 (2 in 55+★), 85 finer (5/15). NGC ID# 268V, PCGS# 8914

1855-S Twenty, AU53
Much Luster Remains

5399 **1855-S AU53 NGC.** Medium S Mintmark. A thin skin of olive-gold patina overlays considerable medium-gold luster for an attractive in-hand appeal. Most of the marks and abrasions are softened by circulation, although plentiful detail remains. Between 350 and 400 pieces were recovered from shipwrecks, but this coin is possibly not one of them. NGC ID# 268X, PCGS# 8916

1855-S Double Eagle, AU58
Nice for the Grade

5400 **1855-S AU58 NGC.** Medium S, as usually seen for this issue of more than 879,000 coins, but the left side of the crossbar in the A of STATES is nearly absent, and the top of the E in AMERICA is broken. A peppering of mostly small but extensive abrasions is more prevalent on the obverse. Generous luster remains on the wheat-gold surfaces, in keeping with the near-Mint State grade. The design elements are well-struck. The second-year issue from the nascent San Francisco Mint, the 1855-S at the leading services averages no better than AU50. This AU58 NGC example is far nicer than usually seen. NGC ID# 268X, PCGS# 8916

5401 **1856-S XF45 PCGS.** This early San Francisco Mint double eagle has pale orange toning, and the only noticeable mark is a narrow abrasion near Liberty's forehead. The surfaces appear original and exude ample luster. NGC ID# 2692, PCGS# 8919

1856-S Double Eagle, AU55
Some Luster Remains

5402 **1856-S AU55 PCGS.** Before more than 1,000 pieces were recovered from the *S.S. Central America* shipwreck, high-end AU examples were among the finest 1856-S double eagles available to most collectors. The MS61 coin in the Smithsonian Institution was considered exceptional. This Choice AU coin exhibits modestly lustrous honey-gold surfaces, with minor wear over the high points of the design. A single tick near Liberty's nostril is the only abrasion of note. NGC ID# 2692, PCGS# 8919

1857 Double Eagle, AU55
Lustrous, Original Surfaces

5403 **1857 AU55 PCGS.** Lovely original surfaces yield hints of luster in the recesses amid warm peach-gold patina. The design elements are sharp and there are no unusually prominent abrasions for the grade. Due to the scarcity of Mint State coins, attractive AU representatives are an appealing option for the budget-conscious collector. NGC ID# 2693, PCGS# 8920

1857 Double Eagle, AU58
Scarcely Seen in Better Condition

5404 **1857 AU58 PCGS.** The 1857 was more available than its S-mint counterpart prior to the discovery of the *S.S. Central America*, which yielded thousands of Uncirculated 1857-S twenties. Only two 1857-P coins were found onboard the wreckage, and the issue is now far scarcer in AU and Uncirculated condition. This near-Mint double eagle has lovely orange and khaki-gold surface coloration. The stars show full radials, and the eagle's neck and wing feathers are quite bold. The obverse is noticeably more abraded than the reverse. Population: 37 in 58 (1 in 58+), 61 finer (5/15). NGC ID# 2693, PCGS# 8920

5405 **1858-S XF45 NGC.** This attractive Choice XF example shows light wear on Liberty's hair and the prongs of the crown, but the orange-gold surfaces are moderately abraded for the grade. A few traces of original mint luster are still evident. NGC ID# 2699, PCGS# 8925

5406 **1858-S XF45 NGC.** A lightly circulated early S-Mint double eagle, this Type One example has lemon-yellow surfaces with traces of luster in the protected areas. Scattered marks are expected for the grade, with none that stand out among the crowd. NGC ID# 2699, PCGS# 8925

5407 **1858-S XF45 NGC.** Scarce in XF and much scarcer in AU and Mint State grades, although the mintage was 846,710 pieces. This is an attractive Choice XF that retains significant luster around the devices. Numerous small abrasions are seen over each side, the only larger ones are within the glory of rays on the reverse. NGC ID# 2699, PCGS# 8925

1858-S Twenty Dollar, Lustrous AU53

5408 **1858-S AU53 NGC.** Light wear shows on the high points of Liberty's coronet and hair consistent with the grade, but this wheat-gold 1858-S twenty still retains considerable mint luster on each side, visible especially in the protected areas. Abrasions are relatively minor and somewhat fewer than expected. NGC ID# 2699, PCGS# 8925

5409 **1859-S *S.S. Republic* Authentic Shipwreck Specie NGC.** This piece appears to have AU Details and shows significant mint luster remaining around the devices on each side. Myriad small marks cover the obverse, the reverse however is far less, and more traditionally abraded. NGC ID# 269C, PCGS# 8928

1860 Twenty Dollar, Wheat-Gold AU55
Relatively Unmarked Surfaces

5410 **1860 AU55 NGC.** This Choice AU 1860 double eagle is in about an average grade or a touch finer than the average certified survivor of the issue, but there are fewer abrasions on the surfaces than might be expected. About half the luster remains on appealing wheat-gold surfaces, making this a tempting type coin. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, Well-Struck AU58

5411 **1860 AU58 NGC.** The 1860 double eagle is available in the Very Fine to About Uncirculated grade range. Mint State pieces are scarce from MS60 to MS62, having a certified population of 140 coins, and are very rare any finer.

The orange-gold surfaces of this near-Mint twenty dollar display abundant luster and the design elements are well-struck, though Liberty's hair shows a degree of softness. Scattered light marks are fewer and less severe than what might be expected for a briefly circulated large gold coin.

Ex: Central States Signature (Heritage, 4/2008), lot 3748; New York Signature (Heritage, 3/2012), lot 4227. NGC ID# 269D, PCGS# 8929

5412 **1862-S XF45 NGC.** The 1862-S double eagles were extensively exported, only to be repatriated later, and nearly 200 examples were recovered from the shipwrecks of the S.S. *Brother Jonathan* (which sank in 1865) and the S.S. *Republic* (which also sank in 1865) combined. This Choice XF piece, not specifically provenanced, shows the expected moderate marks and wear on wheat-gold surfaces but retains its essential eye appeal. NGC ID# 269N, PCGS# 8938

5413 **1864-S — Improperly Cleaned — NGC Details. AU.** This well defined sun-gold Civil War double eagle is moderately luminous from a wipe, but is surprisingly devoid of relevant bagmarks or hairlines. Luster emerges from the legends, stars, and devices. NGC ID# 269T, PCGS# 8942

1865-S Twenty Dollar, AU55
Rich Orange Toning

5414 **1865-S AU55 NGC. CAC.** Small S. Although the 1865-S was recovered in some quantity from shipwrecks such as the S.S. *Brother Jonathan*, the present Choice AU example obviously avoided that fate, since it displays rich, original peach-gold color. Minor marks can be found, but they are significantly fewer in number than seen on most lightly circulated examples. NGC ID# 269V, PCGS# 8944

5415 **1871-S AU55 PCGS.** The bright yellow-gold surfaces retain traces of mint luster around the devices on each side. A few abrasions are consistent with a short time in circulation. NGC ID# 26AC, PCGS# 8962

1873 Open 3 Twenty Dollar, MS62
Ideal Type Two Representative

5416 **1873 Open 3 MS62 PCGS. CAC.** Olive-green accents complement primarily rose-gold color, while frosty luster glistens over each side of this original twenty dollar gold coin. In excess of 1.7 million double eagles were manufactured in 1873, but the exact production totals for each variety are unknown. What is certain is that the Open 3 variety is more available than the Closed 3 coins, which were struck early in the year for a short period of time. Crisply struck and minimally abraded. An ideal Type Two representative. NGC ID# 26AH, PCGS# 8967

5417 **1873-S Open 3 AU53 NGC.** Small Squat S. Substantial luster crosses this well defined and moderately abraded apricot-gold Type Two twenty. Scarcer than its Closed 3 '73-S predecessor, likely due to the time required to ship dies from Philadelphia to San Francisco. NGC ID# 26AM, PCGS# 8979

5418 **1874-CC — Improperly Cleaned — NGC Details. AU. Variety 4-A.** The rarity of the 1874-CC double eagle in Mint State puts increased pressure on pleasing AU examples. Lightly cleaned in the past, this briefly circulated piece has since acquired medium green-gold patina, and retains small remnants of luster in the peripheral recesses. Lightly abraded, as is typical for the grade. NGC ID# 26AP, PCGS# 8971

5419 **1874-CC — Filed Rims — PCGS Genuine. AU Details. Variety 3-A.** A die chip behind Liberty's eye is the pick-up point for attribution purposes. This lightly circulated straw-gold Carson City type coin exhibits ample luster and has only a single mentionable mark, located near the R in AMERICA. The rims are unobtrusively filed. NGC ID# 26AP, PCGS# 8971

1874-S Double Eagle, MS61
Highly Appealing for the Grade

5420 **1874-S MS61 PCGS.** Mint State examples of this Type Two San Francisco issue are almost entirely restricted to the MS60 and MS61 grades. This example is among the more appealing pieces from this group. Original green-gold luster highlights well-struck design elements, and grade-limiting abrasions are evenly dispersed over each side. Scarcely seen finer. NGC ID# 26AR, PCGS# 8972

1875-CC Double Eagle, XF40
Moderate Even Wear

5421 **1875-CC XF40 NGC. Variety 7-A.** A small die chip on Liberty's next confirms the attribution, along with the mintmark left of the T, and the 1 in the date nearly touching the bust and nearly centered between dentils. Nine die varieties are known for this mintage of 111,000 pieces. Moderate, even wear shows throughout the peach-gold surfaces, but no major marks appear save for a small tick to the left of the 1. NGC ID# 26AT, PCGS# 8974

1878 Double Eagle, Lustrous MS62

5422 **1878 MS62 NGC.** Slightly more than a half-million examples of the 1878 double eagle were struck, but America's focus that year was on silver dollars. The double eagles appear scarcely to have circulated, however, as the average grade of certified survivors is nearly MS60. Many were bagged up and shipped overseas, only to be repatriated decades later. This MS62 piece shows excellent luster on amber-gold surfaces with a few small, grade-consistent abrasions. A bit of struck-in die grease appears on the reverse. NGC ID# 26B3, PCGS# 8985

5423 **1878-S MS61 PCGS. CAC.** Use in commercial transactions, overseas exportation, and repatriation ensure that most surviving 1878-S double eagles are heavily abraded. This green-gold MS61 coin is expectedly marked, but the sharp strike, frosty luster, and unaltered surfaces make this a highly appealing example. NGC ID# 26B5, PCGS# 8987

5424 **1884-S MS62 PCGS.** Radiant orange-gold luster accounts for much of the eye appeal which this Mint State example possesses, although sharp motifs also contribute. Light, scattered abrasions define the grade. NGC ID# 26BL, PCGS# 9002

5425 **1884-S MS62 PCGS. CAC.** With gold at relatively low or stable levels, the Type Three S-mint double eagles, with their good production values, provide fertile ground for collecting opportunities, in our opinion. This 1884-S bristles with rich luster and a bold strike that produces full radials on all of the obverse stars. Minor ticks and reeding marks account for the grade, but much eye appeal is present. Fewer signs of contact show on the reverse. NGC ID# 26BL, PCGS# 9002

1885-CC Double Eagle, AU Details
Very Low Mintage Carson City Issue

5426 **1885-CC — Obverse Damage — NGC Details. AU. Variety 1-A.** The damage is relatively inoffensive, and consists of several small digs near obverse star 4. Specks of struck-in grease (as made) are noted near obverse star 9 and the 5 in the date. The 1885-CC has a scant mintage of 9,450 pieces, partly due to the Federal order to shut down the Carson City Mint, issued March 18, 1885, shortly after Democratic President Cleveland assumed office. NGC ID# 26BN, PCGS# 9004

1888 Liberty Twenty, MS62
Scarcer P-Mint Issue

5427 **1888 MS62 PCGS.** A khaki-gold example of this better date Philadelphia issue. Nicely struck and lustrous with a number of wispy abrasions appropriate for the grade. The only reportable mark affects the I in LIBERTY. Rare any finer, and PCGS has yet to certify an 1888 above the MS64 level.
Ex: October Signature (Heritage, 10/2009), lot 1759. NGC ID# 26BT, PCGS# 9008

1888 Twenty Dollar, MS61
Doubled Die Reverse, FS-801

5428 **1888 Doubled Die Reverse, FS-801, MS61 PCGS.** The Philadelphia Mint struck double eagles each year throughout the 1880s, but all ten issues had low mintages, and three were proof-only. The 1888 is the most available of the group but is nonetheless elusive in Uncirculated grades. The present lustrous caramel-gold example has a good strike and scattered moderate marks, including a pair of thin lines on the shield. On the reverse, all peripheral legends are clearly die doubled. Housed in an oversized and very scarce Regency holder, certified circa-1995. PCGS# 145738

1889-S Double Eagle, Intensely Lustrous MS63

5429 **1889-S MS63 PCGS.** The 1889-S double eagle with a mintage approaching 800,000 pieces, is readily available in circulated grades, and even Mint State coins can be located with little trouble through MS62. The issue becomes more challenging in MS63 with a certified population of approximately 630 examples. Higher-grade pieces are much more elusive. This intensely lustrous Select example displays lovely blended coloration and sharp strike definition. A few wispy abrasions are observed on both sides, in accord with the MS63 grade assessment. PCGS has rated only 43 examples finer (5/15). NGC ID# 26BW, PCGS# 9012

1890-S Twenty Dollar, MS63
Attractively Hued Luster

5430 **1890-S MS63 PCGS.** The 1890-S double eagle is a less often seen date, but its scarcity above the MS63 grade level is recognized by few novices. This Select example displays frosty yellow-gold luster that deepens to lovely rose hues in the centers. The devices are sharp and a small reed mark near Liberty's chin is the only abrasion of note. PCGS records 30 finer pieces (5/15). NGC ID# 26BZ, PCGS# 9015

5431 **1897-S MS64 NGC.** An attractive Choice example, with well-preserved orange-gold surfaces and vibrant mint luster. The central design elements are sharply detailed but a touch of softness shows on some of the obverse stars. NGC has graded 19 numerically finer examples (5/15). NGC ID# 26CJ, PCGS# 9032

1897-S Double Eagle, MS64+
Rarely Seen Finer

5432 **1897-S MS64+ PCGS. CAC.** The Plus designation sets this eye-appealing near-Gem apart from most other Choice examples of the 1897-S twenty. Finer coins at PCGS amount to only 11 pieces (5/15). This example is awash in vibrant honey-gold luster and the surfaces reveal only trivial grazes, none individually significant. A CAC endorsement attests to the quality. NGC ID# 26CJ, PCGS# 9032

5433 **1898 MS62 PCGS.** The pleasing yellow-gold surfaces reveal few breaks in the luster and the design elements are well-struck throughout. The surfaces are minimally abraded for the grade designation. NGC ID# 26CK, PCGS# 9033

5434 **1898 MS62 NGC.** The 1898 Liberty twenty claims a relatively small mintage of 170,395 pieces. This attractive MS62 example is lustrous and well-detailed, with vivid orange-gold surfaces that show only minor signs of contact. NGC ID# 26CK, PCGS# 9033

5435 **1899 MS64 PCGS.** A pleasing near-Gem example of this Type Three P-mint issue of 1.6 million-plus coins. Splendid apricot-orange patina near the rims cedes to hints of rose on the high points, complementing rich luster and a needle-sharp strike. PCGS reports only 21 in Gem or finer grades (5/15). NGC ID# 26CM, PCGS# 9035

5436 **1899 MS64 PCGS.** This attractive Choice specimen offers sharply detailed design elements and vibrant mint luster throughout. The well-preserved straw-gold surfaces show only minor signs of contact. PCGS has graded 21 numerically finer examples (5/15). NGC ID# 26CM, PCGS# 9035

1899 Twenty Dollar, MS64+
Seldom Seen Finer

5437 **1899 MS64+ PCGS.** Any Liberty Head double eagle this close to the Gem grade level is a *rara avis* indeed. This piece shows a bold strike on orange-gold surfaces brimming with mint luster. A few minor grazes and a mark or two below the profile account for the grade. Some interesting die cracks appear around the obverse periphery. Population: 18 in 64+, 21 finer (5/15). NGC ID# 26CM, PCGS# 9035

1901 Double Eagle, MS65
Fairly Low Mintage, Green Label Holder

5438 **1901 MS65 PCGS.** A lustrous and boldly struck orange-gold Gem. The cheek displays wispy marks, but the fields are well preserved. The 1901 mintage of 111,430 pieces is relatively low, particularly when compared with the 6,256,699 pieces coined at Philadelphia in 1904. Housed in a green label holder.
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 7404, which realized $5,175. NGC ID# 26CS, PCGS# 9039

5439 **1903 MS64 PCGS.** An available date, ideal for type representation. This Choice example displays original honey-gold patina, with sharp design elements. Some light chatter on the cheek limits the grade, as usual. NGC ID# 26CW, PCGS# 9043

5440 **1903 MS64 PCGS.** Satiny, green-gold surfaces yield deeper honey-gold overtones in the central regions of this Choice 1903 twenty dollar gold piece. The strike is sharp and Liberty's cheek exhibits the only mentionable surface contact. NGC ID# 26CW, PCGS# 9043

5441 **1903-S MS63 PCGS. CAC.** The sharp strike has produced full radials on all obverse stars and good detailing in Liberty's hair. Flowing honey-gold luster complements surfaces that show a few scattered marks and grazes consistent with the grade, none terribly overt. NGC ID# 26CX, PCGS# 9044

5442 **1904 MS64 PCGS.** Lemon-gold and apple-green colors compete for territory across this lustrous and nicely struck Choice Liberty type coin. The obverse exhibits minor field marks, while the reverse is well preserved. Certified in an old green label holder. NGC ID# 26CY, PCGS# 9045

5443 **1904 MS64 PCGS.** A healthy does of vibrant luster illuminates the deep orange-gold surfaces of this Choice 1904 Liberty double eagle. The design elements are well-defined and the only grade-limiting contact is seen briefly on Liberty's cheek. NGC ID# 26CY, PCGS# 9045

5444 **1904 MS64 PCGS.** A lemon-gold near-Gem with hints of lime-green across the fields. Lustrous and well struck with moderate marks limited to the vicinity of the C in AMERICA. Three specks of struck-in grease are noted near the N in UNITED. Encapsulated in a green label holder. NGC ID# 26CY, PCGS# 9045

5445 **1904 MS64 PCGS. CAC.** Especially vibrant luster cartwheels around the satiny yellow-gold surfaces of this Choice PCGS example. Liberty's cheek shows only minute contact and the design elements are well brought up. NGC ID# 26CY, PCGS# 9045

5446 **1904 MS64 NGC. CAC.** This CAC-endorsed type coin is well-struck, with radiant yellow-gold luster over satiny surfaces. Light contact on Liberty's cheek limits the grade, but there are no singularly significant abrasions. NGC ID# 26CY, PCGS# 9045

5447 **1904 MS64+ NGC. CAC.** A Plus designation is awarded this Choice 1904 double eagle in response to its thickly frosty luster and minimally abraded surfaces. A sharp strike and CAC endorsement further heighten the overall appeal. NGC ID# 26CY, PCGS# 9045

1904 Double Eagle, Peach-Gold MS65+

5448 **1904 MS65+ PCGS.** Given the enormous mintage for the 1904 double eagles exceeding 6.2 million coins, it is a wonder than the average grade of certified survivors is as high as it is — approaching MS63, indicating plenty of bags of the issue in long-term storage. This well-struck peach-gold example is far finer still, and PCGS reports fewer than 200 in numerically finer grades. NGC ID# 26CY, PCGS# 9045

5449 **1904 MS61 Prooflike NGC.** The 1904 is the most available Liberty Head double eagle, and this Prooflike coin would make a perfect type representative for the series. Each side features strongly struck devices, reflective fields, and a minimal number of tiny abrasions. PCGS# 79045

5450 **1904 MS63 Prooflike NGC.** Remarkable mirroring in the fields contrasts markedly against the fully struck and partly frosted motifs, accounting for the Prooflike designation. A few small grazes on the lower reverse are the only mentionable flaws. An ideal type coin. PCGS# 79045

1904-S Twenty Dollar, MS65
Ideal S-Mint Type Coin

5451 **1904-S MS65 PCGS.** Over 5 million double eagles were struck at the San Francisco Mint in 1904, making it the most readily accessible Type Three S-mint issue and a popular choice among type collectors. Frosty luster abounds over the immensely appealing orange-gold surfaces of this Uncirculated Gem. Light marks are scattered throughout, and a small planchet void occurs in the right-obverse field behind Liberty's portrait. PCGS reports just six submissions in higher numeric grades (5/15). NGC ID# 26CZ, PCGS# 9046

5452 **1905 AU58 PCGS.** A briefly circulated representative of this low-mintage 20th century Liberty double eagle issue, sharply struck with ample luster on the pale straw-gold surfaces. Lightly marked overall with a touch of highpoint friction.
Ex: FUN Signature (Heritage, 1/2008), lot 4951; ANA Signature (Heritage, 3/2011), lot 9628. NGC ID# 26D2, PCGS# 9047

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Double Eagle, MS65
A High-Demand Issue

5453 **1907 Arabic Numerals MS65 PCGS.** This issue resulted from Charles Barber's recognition that Saint-Gaudens' High Relief design was unusable for high-speed coinage needs. Consequently, the relief was greatly reduced. Likewise, the date digits were changed from Roman to Arabic numerals. This issue was released in late 1907, and was saved in large numbers by the public and by European banks.

Both sides of this beautiful Gem are awash in frosty honey-gold luster and exhibit only a few faint grazes over the high points of the design. The design elements are sharply struck, including Liberty's facial features and fingers, the panes of the Capitol building, and the eagle's plumage. Due to the high cost of High Reliefs, the Arabic Numerals 1907 Saint-Gaudens double eagle is ideal for date representation. While 3,000 or so Gems have been certified by PCGS and NGC (5/15), Bowers (2004) contends that this is: "a small figure in comparison to the demand for them." NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Twenty
Lustrous, Sun-Gold Gem

5454 **1907 Arabic Numerals MS65 PCGS.** Extra care was taken in the minting of the 1907 Arabic numerals double eagles, since they represented the first year of production for Charles Barber's modified design. As a result, many Gem or finer coins exist. This one stands out for its exceptionally lustrous, sun-gold patina and bold strike. Only a few widely distributed marks prevent an even higher grade. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Twenty, MS65
Glowing Arabic Numerals Representative

5455 **1907 Arabic Numerals MS65 PCGS.** This was the third rendition of Saint-Gaudens' double eagle design of the year, but it was not the last; in 1908, Congress would move to return the motto IN GOD WE TRUST to the reverse. This Arabic Numerals 1907 is beautifully aglow in warm wheat-gold luster. About as sharp as can be expected for the low relief of the type, and almost devoid of abrasions. NGC ID# 26F5, PCGS# 9141

5456 **1908 No Motto MS65+ PCGS. CAC.** Long Rays Obverse. A lustrous pumpkin-gold Gem of the popular two-year No Motto subtype. The strike is exemplary and marks are minimal, even for the rigorous standards of the MS65+ grade. NGC ID# 26F6, PCGS# 9142

5457 **1908 No Motto MS66 PCGS. CAC.** Short Rays Obverse. A high grade orange-gold double eagle. Lustrous and nicely struck with uncommonly smooth surfaces. An excellent value relative to the few dozen certified finer by PCGS. NGC ID# 26F6, PCGS# 9142

1908 No Motto Double Eagle, MS66
Ex: Wells Fargo, Nevada

5458 **1908 No Motto, Wells Fargo Nevada MS66 PCGS.** Short Rays Obverse. Booming luster sweeps this beautifully preserved and nicely struck double eagle. The Wells Fargo pedigree was devised for marketing purposes when the hoard of high grade examples was initially distributed. The true source of this famous hoard has never been published.
Ex: New York Signature (Heritage, 3/2012), lot 4338, which realized $3,220. PCGS# 99142 Base PCGS# 9142

5459 **1909-S MS64 NGC.** A caramel-gold representative with booming luster and only minor marks. The strike shows slight incompleteness on the eagle's breast and Liberty's raised knee. Encapsulated in a prior generation holder. NGC ID# 26FE, PCGS# 9153

5460 **1910-D MS65 PCGS.** The 1910-D is a popular type coin in the Saint-Gaudens series, as it is a mintmarked issue that is fairly available up to the Gem (and occasionally finer) levels. The present specimen exhibits satiny, lustrous surfaces that are precisely struck throughout (if just a hair from full at the peripheries). The orange-gold coloration deepens to tinges of lilac near the rims, further enhancing the considerable appeal. NGC ID# 26FG, PCGS# 9155

5461 **1910-S MS64+ PCGS.** Glowing mint luster characterizes this better-date S-mint Saint. The strike is strong in all areas except on the nose of Liberty. Minimally abraded. NGC ID# 26FH, PCGS# 9156

5462 **1911-D MS65 PCGS.** Satin luster illuminates Gem-quality surfaces on this early D-mint Saint, yielding shades of rose and straw-gold throughout. Sharply struck, with a small nick on Liberty's shin being the only mentionable abrasion. NGC ID# 26FK, PCGS# 9158

5463 **1911-D MS65 PCGS.** Beautiful satin-like surfaces are especially smooth for the issue and draped in reddish-orange patina. A sharp strike rounds out the visual attributes.
Ex: FUN Signature (Heritage, 1/2004), lot 8199. NGC ID# 26FK, PCGS# 9158

5464 **1911-D MS65+ NGC.** The 1911-D is the only one of the four gold denominations that is *not* a low-mintage key to its series. *Au contraire*, it was struck in the generous amount of nearly 850,000 coins. Few examples approach the quality present here, however; rich luster on orange-gold surfaces complements excellent preservation and a bold strike. NGC ID# 26FK, PCGS# 9158

5465 **1911-D MS65+ NGC. CAC.** The 1911 Denver twenties rival the equally impressive 1923-D double eagles for production quality, eye appeal, and availability even in high grades. This example is a high-end Gem, with sparkling textured surfaces and brilliant, rich-gold color. There are no substantial abrasions or marks. A sharply struck and lustrous twenty, perfect for type. CAC endorsed. NGC ID# 26FK, PCGS# 9158

5466 **1911-D MS66 PCGS.** Variegated peach, mint-green, lilac, and yellow-gold patination embraces the highly lustrous, frosty surfaces of this beautiful Premium Gem twenty, and a solid strike delivers full delineation to the design elements. Impeccable preservation rounds out the coin's outstanding eye appeal. PCGS has seen only seven numerically finer examples (5/15). NGC ID# 26FK, PCGS# 9158

1911-S Double Eagle, MS65
Conditionally Rare Any Finer

5467 **1911-S MS65 PCGS.** From a mintage of 775,750 pieces, the 1911-S is an available date in lower Mint State grades, but it becomes fairly scarce at the Gem level. The present coin is a sharply detailed Gem, with vibrant, frosty mint luster. The surfaces are an attractive greenish-gold color and show few abrasions for the grade. Only 32 coins have been certified in higher numeric grades at PCGS (5/15).
Ex: FUN Signature (Heritage, 1/2011), lot 7489. NGC ID# 26FL, PCGS# 9159

5468 **1913 MS62 PCGS.** This example is intensely lustrous and displays deep greenish-gold and rose toning. Wispy surface marks are typical for the assigned grade. NGC ID# 26FN, PCGS# 9161

5469 **1914-S MS65+ NGC. CAC.** Among Saint-Gaudens double eagles from the first half of the series, the 1914-S is one of the most available issues. The date is particularly popular with mintmark type collectors. This spectacular high-end Gem is sharply detailed, with insignificant signs of contact. The surfaces are a mingled orange and rose-gold color, with vibrant mint luster and outstanding visual appeal.
Ex: Central States Signature (Heritage, 4/2012), lot 6932. NGC ID# 26FU, PCGS# 9166

5470 **1915-S MS65 PCGS.** Rich orange-gold luster yields occasional hints of rose and lilac throughout each side of this Gem 1915-S Saint. Ample definition in the design complements a lack of distracting abrasions. NGC ID# 26FW, PCGS# 9168

5471 **1915-S MS65 PCGS.** A strong Gem, this 1915-S Saint-Gaudens double eagle is richly lustrous in consistent wheat-gold hues. The strike is bold throughout and there are no mentionable abrasions. NGC ID# 26FW, PCGS# 9168

5472 **1915-S MS65 NGC.** Frosty yellow-gold luster accentuates the sharp design elements on this Gem 1915-S Saint, and reveals the fields to be well-preserved. The few grade-limiting abrasions are largely limited to the high points of the devices. NGC ID# 26FW, PCGS# 9168

5473 **1915-S MS65 NGC.** This boldly rendered Gem 1915-S twenty is awash in frosty orange-gold luster without any major abrasions observed. The only mentionable distraction is a small russet spot at 6 o'clock on the obverse. NGC ID# 26FW, PCGS# 9168

5474 **1915-S MS65 PCGS.** Bold design elements are illuminated in rich sun-gold hues on this Gem 1915-S Saint-Gaudens double eagle. A few light grazes are present, nothing out of line for the grade, and the eye appeal is excellent. Seldom seen finer. NGC ID# 26FW, PCGS# 9168

1915-S Twenty, MS66
None Finer at PCGS

5475 **1915-S MS66 PCGS.** This is an impressive specimen, one of the finest available. In fact, PCGS has never graded a better example of this date. It is sharply struck with fully lustrous and frosty yellow-gold luster. This is an unusual example for its lack of orange-peel texture that is usually seen on these and the 1916-S coins.
Ex: Long Beach Signature (Heritage, 9/2006), lot 4633; Central States Signature (Heritage, 4-5/2009), lot 4103. NGC ID# 26FW, PCGS# 9168

1920 Double Eagle, Sharp MS64
Virtually Unobtainable in Finer Grades

5476 **1920 MS64 PCGS.** Generous luster runs over well-struck peach-gold and apricot-gold surfaces on this better-date near-Gem 1920 double eagle, one of the "stoppers" in the Saint-Gaudens series. A few abrasions on Liberty's torso explain the grade, including a couple of larger marks away from the prime focal points, but this piece offers great eye appeal. Only a single Gem is numerically finer at PCGS (4/15). NGC ID# 26FY, PCGS# 9170

5477 **1922 MS64+ PCGS. CAC.** A stunning lemon-yellow near-Gem with the coveted plus designation, this double eagle has splendid surfaces and sharp design elements. A trace of pink toning appears on each side. NGC ID# 26G3, PCGS# 9173

1922 Twenty Dollar, Sharp MS65 Virtually Unobtainable Finer

5478 **1922 MS65 PCGS.** Flowing mint luster appears on both sides of this Gem 1922 double eagle, a sharply struck piece on surfaces ranging from orange-gold to wheat-gold. Minor abrasions are present to determine the grade, but much eye appeal remains throughout. Examples at the next grade level are virtually impossible: PCGS reports only eight in MS66 (5/15). NGC ID# 26G3, PCGS# 9173

5479 **1923-D MS65 NGC.** Vibrantly lustrous surfaces deliver exceptional visual merit on this Gem 1923-D twenty, a suitable coin for type purposes. Orange-gold peripheries yield to brighter yellow-gold centers, while the strike is sharp and there are no abrasions of note. NGC ID# 26G6, PCGS# 9176

5480 **1924 MS65+ NGC.** The most available date in the series, the 1924 Saint-Gaudens twenty is a favorite among type collectors. This Plus-designated piece is boldly struck, with frosty orange-gold luster and no distracting abrasions. NGC ID# 26G7, PCGS# 9177

5481 **1924 MS65+ NGC. CAC.** Frosty yellow-gold luster illuminates the well-defined design elements on each side of this Plus-graded Gem type coin. A CAC endorsement confirms the pleasing preservation of the surfaces. NGC ID# 26G7, PCGS# 9177

5482 **1924 MS66 PCGS.** Well-preserved, frosty luster casts each side of this Premium Gem type coin in yellow and green-gold hues. The design elements are sharply struck, with minor contact evident on Liberty's breast and knee. NGC ID# 26G7, PCGS# 9177

5483 **1924 MS66 PCGS.** The 1924 is the most plentiful issue in the series, ideal for type representation. This piece is well-struck and frosty, with intermingled honey and yellow-gold hues over the vibrantly frosted surfaces. A loupe fails to reveal any significant abrasions, though the obverse is faintly scattered with tiny blue-gray specks. NGC ID# 26G7, PCGS# 9177

5484 **1924 MS66+ NGC.** The 1924 Saint-Gaudens double eagle finally becomes conditionally elusive above the Premium Gem grade level. This Plus-graded MS66 coin is softly frosted in yellow-gold luster and displays well-defined relief elements. NGC ID# 26G7, PCGS# 9177

1924 Double Eagle, Richly Lustrous MS66

5485 **1924 MS66 PCGS. CAC.** Rich luster appears on problem-free surfaces that range from saffron-gold to orange-gold. The Premium Gem level is as fine as readily obtainable for some of the more available P-mint dates such as this one, the 1927, and 1928. PCGS reports only 90 submissions numerically finer of the 1924 (5/15). NGC ID# 26G7, PCGS# 9177

5486 **1925 MS66 NGC.** The light orange-gold surfaces of this impressive Premium Gem show attractive highlights of lilac and green, with vibrant mint luster. The design elements are sharply detailed and visual appeal is outstanding. Only 25 coins are numerically finer at NGC (5/15).
Ex: Long Beach Signature (Heritage, 2/2012), lot 5091. NGC ID# 26GA, PCGS# 9180

5487 **1927 MS65 PCGS.** A Gem grade assessment is suitable for this glowing orange-gold type coin, which shows just minor stacking marks on the high points of the devices. The strike is bold and the coin has pleasing eye appeal. NGC ID# 26GG, PCGS# 9186

5488 **1927 MS65 PCGS.** Both sides of this lovely Gem blend lemon-yellow, wheat-gold, and pale orange, creating an aesthetic delight. An ideal type coin for the connoisseur.
Ex: New York Signature (Heritage, 3/2012), lot 4367. NGC ID# 26GG, PCGS# 9186

5489 **1927 MS65 PCGS.** Frosty antique-gold surfaces display copious luster without any singular marks on this well-produced late-date piece. The strike is generally well-impressed, save for some softness on the Capitol dome, as often seen. An excellent example for a type set. NGC ID# 26GG, PCGS# 9186

5490 **1927 MS65+ PCGS. CAC.** A CAC green label confirms the Gem quality of this frosty 1927 Saint-Gaudens twenty. The design elements are well-defined amid wheat-gold luster, and no major abrasions are observed. NGC ID# 26GG, PCGS# 9186

5491 **1927 MS65+ PCGS. CAC.** The Plus designation is fully warranted on this beautifully preserved Gem 1927. Frosty wheat-gold luster illuminates the fields and the only mentionable evidence of contact is restricted to the high points of Liberty's figure. This issue is readily available, about on par with the 1924 in regards to popularity as a type coin. NGC ID# 26GG, PCGS# 9186

5492 **1927 MS66 PCGS.** An ideal candidate for a high-grade type set, this amazing Premium Gem shows coruscating luster over beautifully preserved lavender and orange-gold surfaces. Well-defined overall with a touch of usually seen softness on the Capitol dome. Remarkably, there are only 15 finer examples at PCGS (5/15). NGC ID# 26GG, PCGS# 9186

TERRITORIAL GOLD

August Bechtler Gold Dollar, K-24, AU50
Original Green-Gold Toning

5493 **(1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU50 PCGS. Gold CAC. K-24, R.3.** The open fields are peach-gold, while the lustrous legends display apple-green. A few wispy marks are noted above 27 G, but the lamination-free surfaces are decidedly superior to most circulated examples of this Bechtler type variety. Certified in an old green label holder. Listed on page 382 of the 2016 *Guide Book*. PCGS# 10040

1852 Humbert Ten Dollar, XF Details
K-10, Popular Pioneer Gold Issue

5494 **1852 Humbert Ten Dollar — Improperly Cleaned — NGC Details. XF. K-10, Low R.4.** Glimmers of peach-red luster emerge from design recesses, but the majority of the coin is toned green-gold. Marks are unexpectedly few, although we note a slight obverse rim ding at 9:30 and a thin vertical mark beneath the first S in STATES. Both sides display patches of fine hairlines. Moderate wear is apparent on the fletchings and the eagle's leg. Listed on page 386 of the 2016 *Guide Book*.

CALIFORNIA FRACTIONAL GOLD

5495 **1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS66+ Prooflike NGC.** The dies for this issue were heavily polished, resulting in some loss of detail in the portrait. This high-end Premium Gem exhibits well-detailed design elements and well-preserved yellow-gold surfaces with prooflike reflectivity on both sides. Census: 6 in 66 (1 in 66+) Prooflike, 0 finer (5/15). PCGS# 710374

5496 **1855 Liberty Round 25 Cents, BG-225, Low R.7, MS63 PCGS.** A rare die marriage identified by a heavy crack through star 4. A well struck and dusky peach-red and olive-green representative. A few tiny marks are noted on the portrait and the field near the profile. Certified in an old green label holder. Population: 2 in 63, 4 finer (4/15). PCGS# 10410

1853 Octagonal Half Dollar, AU58
Extremely Rare BG-303, "Peacock" Reverse

5497 **1853 Peacock Reverse 50 Cents, BG-303, Low R.7, AU58 NGC.** The "Peacock" reverse octagonal half dollar by Frontier, Deviercy, & Co. is almost always represented by the BG-302 variety, and it is a marquee event for the fractional gold specialist when a BG-303 example is offered. It is doubtful if many more than a dozen pieces are known. An example in Henry Chapman's 1907 sale of the Stickney Collection was described as "Very Fine. Ring soldered to edge. Very Rare," and realized $1.75 — a significant price for a "soldered" coin in that period. This nearly Uncirculated example shows deep, original patination in shades of olive, brown, violet, and gold. The eagle's head is weakly struck, as usual, while noticeable semiprooflike mirroring dominates the recesses. Census: 2 in 58, 1 finer (4/15). PCGS# 10423

1854 BG-504 Octagonal Dollar, AU58
Humbert-Style Large Eagle

5498 **1854 Large Eagle Octagonal 1 Dollar, BG-504, Low R.5, AU58 NGC.** All Period One octagonal dollar varieties are highly regarded by California small denomination gold collectors, but those with distinctive types are especially esteemed. The reverse of BG-504 imitates the iconic eagle-and-shield emblem of the Humbert / Assay Office fifty dollar "slugs," a mainstay of West Coast commerce during the Gold Rush. The present near-Mint example has only a trace of wear, and the semiprooflike butter-gold fields are smooth aside from minor laminations on the reverse near 9 o'clock. PCGS# 10481

5499 **1855/4 Liberty Octagonal 1 Dollar, BG-511, High R.4, MS61 NGC.** A pleasing Period One Octagonal dollar, with five-pointed stars with the trace of an underdigit 4 beneath the mostly filled-in second 5. Both sides of this lustrous straw-gold piece have reflective fields with mint luster and nice eye appeal. Census: 4 in 61, 8 finer (5/15). PCGS# 10488

5500 **1870 Liberty Octagonal 25 Cents, BG-713, R.4, MS66 PCGS.** An attractive Premium Gem with well-detailed design elements and lustrous, well-preserved greenish-gold surfaces. The fraction is always weak on this issue, but this specimen shows better-than-average detail. Population: 10 in 66, 1 finer (5/15). PCGS# 10540

5501 **1871 Liberty Octagonal 25 Cents, BG-714, R.3, MS66+ PCGS.** A magnificent butter-gold high grade example of the Period Two octagonal Liberty quarter type. Moderately prooflike and well struck. A later die state with the date weakened by lapping. Population: 26 in 66 (1 in 66+), 1 finer (6/13). PCGS# 10541

1871 Octagonal Liberty Quarter, MS67
Popular BG-714

5502 **1871 Liberty Octagonal 25 Cents, BG-714, R.3, MS67 PCGS.** A sharply struck Superb Gem with smooth and flashy sun-gold fields. Devoid of planchet issues, and about as nice an example of this available Frontier, Deviercy & Co. variety as can be found. Population: 5 in 67, 0 finer (5/15). PCGS# 10541

5503 **1866 Liberty Octagonal 25 Cents, BG-737, R.5, MS64 NGC.** Peach-gold and aquamarine toning adorns this satiny, unabraded, and typically struck example. The G beneath the bust is the initial of Robert B. Gray, a San Francisco jeweler that continued the operations of Antoine Louis Nouizillet. PCGS# 10564

5504 **1871 Liberty Octagonal 25 Cents, BG-767, R.3, MS64 Deep Prooflike NGC.** A lovely fractional quarter-dollar piece with deeply mirrored fields and well struck legends and devices. The G initial beneath the bust represents San Francisco jeweler Robert B. Gray. Census: 2 in 64 Deep Mirror Prooflike, 1 finer (4/15). PCGS# 910594

5505 **1880 Indian Octagonal 25 Cents, BG-799K, R.6, MS65 Prooflike NGC.** A beautiful lemon-gold Gem. The fields are smooth and flashy, and the strike is consistent throughout. As of (4/15), NGC has certified only five examples of the rare BG-799K, with the present piece tied with three others as finest graded by that service. PCGS# 710637

5506 **1867 Liberty Round 25 Cents, BG-805, Low R.5, MS66 PCGS.** Produced by Frontier & Co., this Premium Gem BG-805 representative displays satiny yellow-gold luster, with impeccably well-preserved surfaces that yield subtle semiprooflike mirroring when tilted beneath a light. This variety is often encountered poorly struck, and this is evident on the present piece to a certain degree in the centers, but the major elements remain clear. The R in DOLLAR is boldly recut, as is the 7 in the date. Population: 4 in 66, 0 finer (4/15). PCGS# 10666

5507 **1871 Liberty Round 25 Cents, BG-809, Low-R.4, MS66 NGC.** A scarce round quarter dollar variety made by Frontier Deviercy, & Co. in 1871. Discovery of the variety was first published in the March 1884 edition of *The Coin Collector's Journal*. This Premium Gem example displays carefully preserved, satiny surfaces with rich yellow-gold color. A few of the obverse hair curls are slightly soft, but the reverse is bold. Census: 3 in 66, 2 finer (4/15). PCGS# 10670

5508 **1873 Liberty Round 25 Cents, BG-817, R.3, MS66 PCGS.** The BG-817 variety was first published in the *Coin Collector's Journal* in March of 1884. This well-detailed Premium Gem exhibits prooflike yellow-gold surfaces with circular die striations on both sides. Population: 6 in 66, 0 finer (5/15). PCGS# 10678

5509 **1869 Liberty Round 25 Cents, BG-826, R.4, MS63 PCGS.** A nicely mirrored and boldly impressed apricot-gold specimen. Well preserved, but the grade is limited by minuscule retained laminations on the upper obverse border. A scarcer Period Two variety from the prolific jewelry firm of Robert B. Gray. Population: 11 in 63, 4 finer (4/15). PCGS# 10687

1875 Round Indian Quarter Dollar, MS65
Extremely Rare BG-848 Variety
The Sole Finest Known

5510 **1875 Indian Round 25 Cents, BG-848, Low R.7, MS65 NGC.** An extremely rare round quarter dollar made by Herman J. Brand of San Francisco in 1875. The Breen-Gillio reference cites just 12 different coins with the notation that a couple duplications may exist therein, a survival estimate that still stands unchallenged. This Gem example is the sole finest by two full grade points of just six pieces certified by NGC, while the finest at PCGS are four MS64 examples (4/15). Prooflike fields highlight consistent straw-gold patina, while the design elements show pleasing definition. A small planchet clip is present at 3 o'clock on the obverse. PCGS# 10709

1872/1 Round Indian Quarter, MS66
BG-868, Pristine Orange-Gold Fields

5511 **1872/1 Indian Round 25 Cents, BG-868, High R.4, MS66 PCGS.** A splendid lemon-gold representative. Flashy and essentially pristine with incompleteness of strike limited to the denominator and the A in DOLLAR. A scarce variety assigned to West Coast jeweler Christopher Ferdinand Mohrig. Population: 2 in 66, 0 finer (4/15). PCGS# 10729

5512 **1876 Indian Round 25 Cents, BG-879, R.4, MS65 Prooflike NGC.** A beautiful lemon-gold Gem. The fields are reflective and void of post-strike detractions. The strike is good, although a few letters in DOLLAR are lightly impressed. An interesting lint mark (as made) curls about the profile.
Ex: Long Beach Signature (Heritage, 10/2007), lot 10835, which realized $862.50. PCGS# 710740

5513 **1876/5 Indian Round 50 Cents, BG-1059, R.4, MS65 Prooflike NGC.** An apricot-gold Gem with reflective fields and a sharp strike for the variety. Trivial contact is confined to the field near the profile. The same die pair as BG-1058, but the dies were crudely modified by the maker to transform the 5 into a 6, and strengthen the fraction bar. Census: 2 in 65 Prooflike, 1 finer (5/15). PCGS# 710888

5514 **1869 Liberty Octagonal 1 Dollar, BG-1106, High R.4, MS62 PCGS.** Breen-Gillio Die State I. Struck from polished dies, with star 1 missing the two bottom points and the top of the G absent. Lilac and orange highlights visit the prooflike canary-gold surfaces. Minor contact marks do not distract from the considerable appeal of this octagonal dollar. The two Ls in DOLLAR are characteristically weak but stronger than often seen. Population: 24 in 62, 10 finer (4/15). PCGS# 10917

1876/5 Octagonal Indian Head Dollar BG-1128, MS63 Prooflike

5515 **1876/5 Indian Octagonal 1 Dollar, BG-1128, R.5, MS63 Prooflike NGC.** This rare octagonal gold dollar variety by Christopher Ferdinand Mohrig of San Francisco shares the same obverse as BG-1129, a slightly more available issue by the same maker, but is distinguished from the latter by the absence of a berry just to the left of the reverse wreath bow. This Prooflike piece yields deeply mirrored fields and warm straw-gold color. The strike is a trifle soft in the centers, as expected. Census: 2 in 63 Prooflike, 5 finer (4/15). PCGS# 710939

1876/5 Octagonal Indian Head Dollar, MS66 Among the Finest BG-1129 Examples Known

5516 **1876/5 Indian Octagonal 1 Dollar, BG-1129, R.4, MS66 NGC.** A collectible Period Two octagonal gold dollar by Christopher Ferdinand Mohrig of San Francisco, but extremely rare this fine. This piece is one of just two MS66 examples certified at NGC, the other a Prooflike representative (4/15). Both sides show distinctly reflective fields and rich yellow-gold color. Weakly struck in the centers, as always, but well-defined on the wreath and border denticles. PCGS# 10940

1872 Round Indian Head Dollar, MS62 Rare BG-1208, TOKEN Reverse

5517 **1872 Indian Round Dollar, BG-1208, Low R.6, MS62 NGC.** A rare round dollar variety made by Christopher Ferdinand Mohrig of San Francisco, unique with the word TOKEN on the reverse; this inscription was to avoid legal infractions in the aftermath of the Hershfield and Mitchell arrests. Struck with pure gold plating over an 18 karat core (approximately 70% gold, 9% silver, and 21% copper). Described in Henry Chapman's June 1907 sale of the Stickney Collection as "Very Rare," where a holed example realized $1.50. This problem-free Mint State piece shows deep straw-gold patina over prooflike fields. Trivial striking weakness is noted in the extreme centers, as always on this issue. Census: 1 in 62, 0 finer (4/15). PCGS# 10953

COMMEMORATIVE SILVER

5518 **1893 Isabella Quarter MS65 NGC.** A Gem example of the first commemorative quarter dollar issued by the United States Mint, this Isabella is well-struck and aglow with satiny luster. Both sides display a dusky overlay of pewter-gray toning, although the reverse shows some soft olive-gold undertones, as well. The right reverse field shows the only discernible surface contact, seen as a few tiny ticks near the peripheral legend. NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66 Brilliant, Frosty Luster

5519 **1893 Isabella Quarter MS66 PCGS.** A seldom seen untoned example of the Isabella quarter commemorative, issued in conjunction with the World's Columbian Exposition held in Chicago in 1893. The design elements are boldly impressed and close study with a loupe reveals only a few faint grazes in the luster. PCGS shows 48 numerically finer representatives (4/15). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66
Seldom Seen Finer

5520 **1893 Isabella Quarter MS66 PCGS.** Blended olive, gold, and lavender hues encompass each side of this Premium Gem example, with the deeper colors most prominent on the reverse. The strike is sharp and the surfaces are free of any distracting abrasions. The Isabella quarter was distributed in fairly small quantities (just 24,214 pieces), and is always in demand among classic commemorative collectors as the first commemorative quarter struck by the U.S. Mint. PCGS has certified only 48 numerically finer representatives (5/15). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66
Luminous Multihued Toning

5521 **1893 Isabella Quarter MS66 PCGS.** The rich, satiny surfaces of this concentrically toned Isabella quarter are fully deserving of the MS66 grade. The coloration is consistent to both sides and includes peripheral shades of rose-gold, mint, and ocean-blue, ceding to lavender and gray in the centers. A loupe finds bold rendering of the design elements. Only 48 pieces are numerically finer at PCGS (5/15). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, Rim-Toned MS66

5522 **1893 Isabella Quarter MS66 PCGS. CAC.** The 1893 Isabella quarter is a must-have issue for any commemorative set with even rudimentary claims to completeness. Not only is it the second-ever commemorative issue, it remains the sole entry in the classic series of the odd quarter denomination, a distinction it shares with the 1900 Lafayette silver dollar. This Premium Gem boasts the usual needle-sharp strike on surfaces tipped with gold on the device high points and medium copper-rose and magenta rim toning. A great example for a high-grade set — this coin, a Lafayette dollar, and any commemorative half of one's choice would constitute a complete denomination set. NGC ID# 28HR, PCGS# 9220

5523 **1900 Lafayette Dollar MS63 NGC. DuVall 1-B.** A lightly toned and lustrous example of the sole silver dollar classic commemorative issue. The fields are well preserved, although unobtrusive marks on the cheeks of Washington and Lafayette preclude a finer grade. NGC ID# 28N8, PCGS# 9222

5524 **1900 Lafayette Dollar MS64 NGC. DuVall 3-D.** The AT in STATES on the obverse is boldly recut, a diagnostic of this die variety. Light grazes on Washington's portrait are masked by consistent olive-gray toning which blankets each side. Satiny luster shines through the patina and the design elements are sharply rendered. NGC ID# 28N8, PCGS# 9222

5525 **1921 Alabama 2x2 MS65 NGC. CAC.** The small marks on the lower cheek of Governor Kilby appear not to be (not entirely, at least) post-Mint contact, but rather unstruck planchet where the lowest part of the metal failed to fill the die. The silver-white surfaces are highly lustrous and virtually unabraded. NGC ID# 28HS, PCGS# 9225

5526 **Five-Piece Lot of 1937 Antietam Half Dollars MS66 PCGS. CAC.** All five coins are identically graded by PCGS in separate holders, each with a green CAC seal. Four of the coins are lightly toned, and the fifth piece displays peripheral russet freckles. A couple of the coins display minor marks on the pivotal Burnside Bridge.(Total: 5 coins) NGC ID# 28HV, PCGS# 9229

5527 **1937 Antietam MS67 PCGS. CAC.** A gorgeous Superb Gem commemorating the 75th anniversary of the bloody Battle of Antietam during the Civil War. This half dollar has brilliant and frosty silver luster beneath vibrant gold and iridescent toning. PCGS has only certified 17 finer examples (5/15). NGC ID# 28HV, PCGS# 9229

5528 **1936-D Arkansas MS67 PCGS.** An outstanding Arkansas half dollar, this Superb Gem exhibits frosty mint luster with bold design motifs. A fully original example with delicate peripheral gold toning over brilliant silver surfaces. Population: 36 in 67 (4 in 67+), 1 finer (5/15). NGC ID# 28J2, PCGS# 9238

1937 Arkansas Centennial Half, MS67
Among the Finest Known

5529 **1937 Arkansas MS67 NGC.** Satiny luster graces each side of this Superb Gem Arkansas Centennial half dollar, while a thin veil of iridescent champagne and pale rose toning accentuates the sharply rendered design elements. The 1937 Arkansas half dollar is usually available in grades through MS66, but only a few pieces are known in MS67, the finest-certified condition. Census: 8 in 67, 0 finer (4/15). NGC ID# 28J4, PCGS# 9241

5530 **1937 Arkansas MS67 NGC.** The Arkansas Centennial half is another classic commemorative type that is extremely difficult to find with pleasing eye appeal, even in high grade. This 1937 representative is boldly struck, with satiny golden luster that deepens a trifle around the borders. A couple faint marks on the Indian's jaw are the only mentionable surface flaws. Census: 8 in 67, 0 finer (4/15). NGC ID# 28J4, PCGS# 9241

5531 **1937-D Arkansas MS67 PCGS.** Only 5,505 Arkansas half dollars were distributed at the Denver Mint in 1937. This sharply detailed Superb Gem displays lustrous impeccably preserved surfaces, with highlights of greenish-gold and lavender-gray toning. Population: 30 in 67 (5 in 67+), 1 finer (5/15). NGC ID# 28J5, PCGS# 9242

1939 Arkansas Half Dollar, MS66
Low Final-Year Mintage

5532 **1939 Arkansas MS66 PCGS.** This Arkansas Centennial half dollar exhibits characteristically satiny luster with a light golden hue overall. The design elements are sharply brought up. The final Philadelphia issue of this short series had a distribution of only 2,104 coins (including four pieces for assay purposes). Population: 52 in 66 (5 in 66+), 2 finer (5/15). NGC ID# 28JA, PCGS# 9249

5533 **1935-S Boone MS67 PCGS.** Speckled patina covers large portions of both sides of this Superb Gem representative. The colors include tan, gray, olive-green, and orange. Both sides reveal more vibrant, concentrated toning at portions of the peripheries. Those shades are peach, gold, green, cherry-red, apple-green, and lemon-yellow, with the more vibrant colors appearing on the reverse. Population: 29 in 67 (1 in 67+), 1 finer (5/15). NGC ID# 28JH, PCGS# 9260

5534 **1935/34-S Boone MS67 NGC.** The Daniel Boone Bicentennial half dollar is extremely difficult to locate without minor chatter on the portrait's cheek and jaw or on the bodies of the reverse figures. This Superb Gem 1935-S example, however, is just such a coin. The surfaces are seemingly pristine, showing only the soft, satiny luster for which this issue is widely known. The strike is razor-sharp and the each side exhibits a touch of light golden toning. Census: 29 in 67 (1 in 67 ★), 6 finer (4/15). NGC ID# 28JL, PCGS# 9264

5535 **1936-D Boone MS67 PCGS. CAC.** Attractive shades of lavender, ice-blue, and champagne-gold toning enhance the outstanding eye appeal of this delightful Superb Gem. The design elements are sharply detailed and vibrant mint luster shines through the toning. Population: 43 in 67 (5 in 67+), 0 finer (5/15). NGC ID# 28JN, PCGS# 9267

5536 **1937-D Boone MS67 PCGS.** An amazing Superb Gem, this 1937-D Boone half dollar has brilliant mint frost with outstanding luster and delicate toning over its bright silver surfaces. Population: 51 in 67 (2 in 67+), 4 finer (5/15). NGC ID# 28JS, PCGS# 9271

5537 **1937-D Boone MS67 PCGS. CAC.** The obverse of this Superb Gem displays brilliant luster beneath delicate gold toning, while the reverse has rich gold and iridescent toning. Population: 51 in 67 (2 in 67+), 4 finer (5/15). NGC ID# 28JS, PCGS# 9271

5538 **1937-S Boone MS67 PCGS.** Light gray through the interiors with arcs of gold-orange along the margins and a few slivers of deep blue-violet. Just 2,506 examples were struck in total, making this Boone issue among the lower-mintage dates in the series (though not the lowest). Population: 42 in 67 (3 in 67+), 2 finer (5/15). NGC ID# 28JT, PCGS# 9272

5539 **1925-S California MS67 NGC.** The 1925-S California Diamond Jubilee half dollar is one of the most popular issues in the classic commemorative series, but is seldom found in Superb Gem condition. This lovely example displays pastel lavender-gold toning with occasional splashes of teal, gold, and lilac. The motifs are boldly rendered and the surfaces are delightfully pristine. There are only 15 numerically finer pieces at NGC (4/15). NGC ID# 28JY, PCGS# 9281

5540 **1925-S California MS67 PCGS. CAC.** Satiny luster glows beneath mottled multicolor toning on each side of this beautifully preserved Diamond Jubilee half dollar. The motifs a sharply rendered and are boldly displayed by the rich patina. Only six coins are numerically finer at PCGS (5/15). NGC ID# 28JY, PCGS# 9281

1925-S California Diamond Jubilee Half
Beautifully Toned MS67+

5541 **1925-S California MS67+ PCGS. CAC.** The California commemorative half dollar is a favorite among collectors, largely due to its iconic portrayal of a walking grizzly, the state emblem, and a Forty-Niner, a snapshot of the period in California's history when the state was admitted into the Union. This high-end Superb Gem representative yields luminous, beautifully toned surfaces, with soft pastel lavender and champagne hues in the centers and deeper rainbow colors around the peripheries. The strike is bold and the overall eye appeal is exceptional. PCGS lists six numerically finer examples (4/15). NGC ID# 28JY, PCGS# 9281

1925-S California Half Dollar, MS67+
Diamond Jubilee of Statehood

5542 **1925-S California MS67+ NGC. CAC.** The California Diamond Jubilee is one of the more iconic half dollars in the classic commemorative series, highly sought-after in all grades. This Plus-graded MS67 example is worthy of special notice, exhibiting rich, satiny luster and mottled multicolor toning that is weighted toward lighter mint and champagne hues on the obverse. The motifs are boldly brought up and the eye appeal is outstanding. Only 15 examples are finer at NGC (5/15). NGC ID# 28JY, PCGS# 9281

1936 Cincinnati Half, MS67
Light, Iridescent Toning

5543 **1936 Cincinnati MS67 PCGS.** The satin surfaces of this Superb Gem Cincinnati half dollar exhibit superb luster that illuminates the iridescent champagne, rose, and ice-blue toning. The design elements are well brought up and the only discernible abrasions are a few tiny ticks seen on Stephen Foster's cheek. Cincinnati halves were sold in three-coin sets, including an example from each mint, for $7.75. Only 5,000 sets were issued. NGC ID# 28JZ, PCGS# 9283

5544 **1936-S Cincinnati MS66 PCGS.** Only 5,006 Cincinnati commemorative half dollars were struck at the San Francisco Mint in 1936. This impressive Premium Gem is well-detailed and lustrous, with well-preserved surfaces that show highlights of champagne-gold and electric-blue toning. Population: 63 in 66 (3 in 66+), 3 finer (5/15). NGC ID# 28K3, PCGS# 9285

5545 **20-Piece Lot of 1936 Cleveland Half Dollars MS65 PCGS. CAC.** All 20 coins are separately and identically certified by both PCGS and CAC. Most of the pieces display light tan-gold toning although some coins are essentially brilliant and a few exhibit medium silver-gray and olive shades.(Total: 20 coins) NGC ID# 28K4, PCGS# 9288

1936 Cleveland Half Dollar, MS68
Impressive Two-Sided Toning

5546 **1936 Cleveland MS68 NGC.** Virtually free of any contact marks and richly toned in shades of ruby-red, forest-green, and pearlescent silver, the technical quality of this Cleveland Centennial half is exceptional, and the eye appeal is off the charts. The large mintage of 50,000 pieces (plus 30 assay examples) shows just seven pieces of an equivalent grade by both services combined, and it is had to imagine that a more impressive example could exist. Census: 6 in 68 (2 in 68 ★), 0 finer (4/15). NGC ID# 28K4, PCGS# 9288

5547 **Ten-Piece Lot of 1936 Elgin Half Dollars MS66 PCGS. CAC.** All ten coins are identically assessed by both PCGS and CAC. One of the coins is housed in an old green label holder. The pieces exhibit various degrees of light to medium autumn-brown and stone-gray toning. A couple of the pieces display minor obverse abrasions.(Total: 10 coins) NGC ID# 28KA, PCGS# 9303

5548 **1936 Gettysburg MS66 PCGS. CAC.** Blended orange, russet, and reddish-purple patina provides splashes of color throughout this otherwise brilliant Premium Gem commemorative. Frosty mint luster swirls over the exceptionally preserved surfaces. Devoid of all but a few trivial flecks on the soldiers' cheeks. A delightful example. NGC ID# 28KB, PCGS# 9305

1922 Grant Memorial Half Dollar, MS67
Vibrant No Star Type Coin

5549 **1922 Grant No Star MS67 PCGS.** The No Star is by far the more available of the two Grant Memorial half dollar varieties, the ideal acquisition for a classic commemorative type set, but the collector can still expect a challenge when it comes to locating a Superb Gem. This boldly struck example showcases exceptionally well-preserved surfaces with unhindered mint bloom. The central regions yield soft champagne hues and there are deeper russet, amber, and midnight-blue shadings around the peripheries. Population: 47 in 67 (2 in 67+), 0 finer (5/15). NGC ID# 28KD, PCGS# 9306

5550 **1922 Grant With Star MS63 NGC.** An untoned silver-white example of this key commemorative half dollar, showing bright lustre with a few scrapes and field hairlines that determine the grade without defeating the eye appeal. NGC ID# 28KC, PCGS# 9307

5551 **1922 Grant With Star MS64 PCGS.** Subtle hints of sea-green and lavender toning enhance the well-preserved surfaces of this attractive Choice example. Well-detailed design elements are complemented by vibrant mint luster throughout. NGC ID# 28KC, PCGS# 9307

5552 **1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** This satiny and untoned half dollar is well struck but displays faint parallel hairlines on both sides. Otherwise, marks are essentially limited to a hair-thin diagonal line on the cheek. A key commemorative type. NGC ID# 28KE, PCGS# 9309

5553 **1928 Hawaiian — Environmental Damage — NGC Details. Unc.** Pastel olive-gold toning precludes full brilliance. This satiny half dollar is nearly unabraded but displays slender, subtle areas of granularity near 3 o'clock on the obverse and 9 o'clock on the reverse. NGC ID# 28KE, PCGS# 9309

5554 **1928 Hawaiian MS62 PCGS.** The Hawaiian half dollar is a notable key issue in the classic commemorative series, with a distribution of only 10,000 pieces (plus eight coins for assay purposes). The present piece is well-struck, with the relief details accentuated by the thick, heavy patina that slightly mutes the luster on each side. Deep gunmetal and tan-gray hues intermingle amid more vivid shades of olive and pistachio-green overtones. NGC ID# 28KE, PCGS# 9309

5555 **1928 Hawaiian MS63 NGC.** The Hawaiian half dollar is considered one of the keys to the classic commemorative series. This Select example displays satiny steel-gray luster with the occasional hint of gold. A well-struck example with no major abrasions. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half, MS65 Lightly Toned Example

5556 **1928 Hawaiian MS65 PCGS.** Hints of iridescence complement the light-gold toning covering three-quarters of the obverse, while the reverse presents a blush of rose-gold color behind the chieftain. The strike is sharp on Captain Cook's portrait and the chief's regalia. A challenging issue in Gem condition, this lightly-toned example will fill an empty slot in an advanced collection of classic commemoratives. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Half Dollar, Untoned MS65

5557 **1928 Hawaiian MS65 NGC. CAC.** This frosty Gem Hawaiian half dollar is untoned silver-white rather than the yellow or golden color that so many high-grade examples of this key issue show, a top-notch example for commemorative collectors who prefer untoned coins. The cheek of Captain Cook and other high points are pleasantly free of mentionable abrasions. NGC ID# 28KE, PCGS# 9309

5558 **1935 Hudson MS66 NGC. CAC.** The satiny silver surfaces show just a light touch of color near the rims amid the boldly impressed strike and excellent preservation, showing only a few undistracting ticks on either side. NGC ID# 28KF, PCGS# 9312

5559 **1935 Hudson MS66 PCGS. CAC.** A couple of shades of golden-gray and tan patination dominate both sides of this Premium Gem commemorative, accented with whispers of soft violet and reddish-gold. Sharply struck, with impeccably preserved, highly lustrous surfaces that are devoid of mentionable marks. NGC ID# 28KF, PCGS# 9312

5560 **1946 Iowa MS68 PCGS.** Wispy gold toning gathers at the peripheries of this brilliant Superb Gem Iowa half dollar. This piece is sharply struck and highly appealing. Population: 81 in 68 (7 in 68+), 0 finer (5/15). NGC ID# 28KJ, PCGS# 9316

5561 **1946 Iowa MS68 NGC. CAC.** A small arc on the obverse rim and larger portions of the reverse show an overlay of pink-champagne and gold patina deepening to burgundy, amid untoned silver-gray areas remaining. Both sides are notable for virtually mark-free preservation. NGC ID# 28KJ, PCGS# 9316

5562 **1918 Lincoln MS67 PCGS. CAC.** An extraordinary peripheral display of gold, violet, and iridescent toning appears on both sides of this gorgeous Superb Gem. PCGS has only certified two finer examples (5/15). PCGS# 9320

5563 **Five-Piece Lot of 1936 Long Island Half Dollars.** Four are certified as MS66 PCGS, and one is certified as MS66 NGC. One of the PCGS coins is ex: Guttag Family, and another has exquisite cherry-red and forest-green tab toning on the reverse. In fact, all five pieces are attractively toned.(Total: 5 coins) NGC ID# 28KL, PCGS# 9322

1936 Long Island Half, Toned MS67

5564 **1936 Long Island MS67 PCGS.** The 300th anniversary of the earliest white settlement of Long Island, a Dutch colony, is commemorated on this Long Island Tercentenary half dollar. More than 81,000 pieces were distributed, but few survive in Superb Gem condition. This example is vividly toned and lustrous, with mottled multicolor patina and bold design elements. The ship's sails are unusually smooth. Population: 63 in 67 (3 in 67+), 0 finer (5/15). NGC ID# 28KL, PCGS# 9322

5565 **1936 Long Island MS67 PCGS.** Among the finest seen by PCGS, this Superb Gem Long Island half dollar displays beautifully luminescent luster and impressively smooth surfaces. Iridescent lavender-blue and lilac hues yield additional olive and amber-gold accents near the peripheries. Population: 63 in 67 (3 in 67+), 0 finer (5/15). NGC ID# 28KL, PCGS# 9322

5566 **1920 Maine MS66+ PCGS. CAC.** This high-end Premium Gem exhibits sharply detailed design elements and the well-preserved surfaces display vibrant mint luster with a few hints of lavender and pale gold toning. PCGS has graded 42 finer examples (5/15). NGC ID# 28KN, PCGS# 9326

5567 **Ten-Piece Lot of 1934 Maryland Half Dollars MS65 PCGS. CAC.** A group of 10 1934 Maryland commemorative half dollars (mintage of 25,015 pieces), all graded MS65 by PCGS and certified by CAC. Two coins are in green label holders. The coins are well-detailed and lustrous, with varying degrees of toning.(Total: 10 coins) NGC ID# 28KP, PCGS# 9328

5568 **Five-Piece Lot of 1934 Maryland Half Dollars MS66 PCGS. CAC.** Five examples of the 1934 Maryland commemorative half dollar (mintage of 25,015 pieces), all graded MS66 by PCGS and certified by CAC. One coin is housed in a green label holder. The coins are well-detailed and lustrous, with light-to-moderate toning. (Total: 5 coins) NGC ID# 28KP, PCGS# 9328

5569 **1921 Missouri MS65 NGC.** This broad-rimmed Gem displays satiny golden-gray luster, with a lack of mentionable abrasions. Minor striking weakness is noticed only on the back of the reverse frontiersman. NGC has seen 37 numerically finer pieces (5/15). NGC ID# 28KS, PCGS# 9330

5570 **1921 Missouri MS65 PCGS.** This Gem Missouri Centennial half dollar displays bold motifs amid thick, satiny luster. Pale lavender-gray toning deepens to russet and amber around the peripheries. PCGS lists only 40 numerically finer representatives (5/15). NGC ID# 28KS, PCGS# 9330

5571 **1923-S Monroe MS66 PCGS.** Frosty luster shimmers beneath the soft patina on each side of this champagne and ice-blue Monroe half. The design elements are well-defined for the issue, and the obverse portraits are pleasantly free of the minor abrasions that usually reside thereon. Population: 79 in 66 (5 in 66+), 6 finer (5/15). NGC ID# 28KT, PCGS# 9333

1923-S Monroe Half, Radiant MS66

5572 **1923-S Monroe MS66 NGC.** Seldom is the Monroe Doctrine Centennial half dollar seen with the vibrant, frosty luster which is possessed by this sharp Premium Gem example. Small russet overtones accents select areas of each side, while the underlying surfaces yield primarily pale champagne color. Census: 60 in 66 (3 in 66+, 1 in 66 ★, 1 in 66+★), 8 finer (4/15). NGC ID# 28KT, PCGS# 9333

5573 **Ten-Piece Lot of 1938 New Rochelle Half Dollars MS65 PCGS. CAC.** A group of 10 1938 New Rochelle commemorative half dollars (mintage of 15,266 pieces), all graded MS65 by PCGS and certified by CAC. One coin is housed in a green label holder. The coins are sharply detailed and lustrous, with light toning.(Total: 10 coins) NGC ID# 28KU, PCGS# 9335

5574 **Ten-Piece Lot of 1936 Norfolk Half Dollars MS66 PCGS. CAC.** All ten coins are identically certified by PCGS, and housed in separate holders that bear a green CAC seal. Most of the coins are minimally toned but one piece displays impressive tab toning on the obverse. Among the more verbose commemorative types. (Total: 10 coins) NGC ID# 28KV, PCGS# 9337

5575 **Five Piece Lot of 1936 Norfolk Half Dollars MS67 PCGS. CAC.** A group of five 1936 Norfolk commemorative half dollars (mintage 16,936 pieces), all graded MS67 by PCGS and certified by CAC. One coin is housed in a green label holder, two are ex: Guttag Family. The coins are sharply detailed and lustrous with varying degrees of toning.(Total: 5 coins) NGC ID# 28KV, PCGS# 9337

5576 **1926 Oregon MS67+ NGC.** The bold strike and delicately preserved surfaces of this satiny Superb Gem deliver a high degree of eye appeal, while both sides show uniform olive-gold toning that lightens toward the centers. An outstanding first-year Oregon Trail half dollar. Census: 74 in 67 (3 in 67+, 2 in 67 ★), 5 finer (4/15). NGC ID# 28KW, PCGS# 9340

5577 **1926 Oregon MS67+ NGC.** Examples of this inaugural issue in the Oregon commemorative half series are usually available in grades through MS66, but Superb Gems are scarce. This Plus-graded piece exhibits rich, satiny luster with soft golden toning over each side. The die impression yields sharp definition throughout. Census: 74 in 67 (3 in 67+, 2 in 67 ★), 5 finer (4/15). NGC ID# 28KW, PCGS# 9340

5578 **1933-D Oregon MS67+ PCGS. CAC.** Delicate traces of greenish-gold and ice-blue toning visit the mostly brilliant pristine surfaces of this high-end Superb Gem. The design elements are sharply detailed and vibrant mint luster is evident on both sides. PCGS has graded just two numerically finer examples (5/15). NGC ID# 28KZ, PCGS# 9343

5579 **1936 Oregon MS67+ PCGS.** The long-running Oregon half series started with a bang in 1926 and continued with diminished distributions through 1939. This high-end Superb Gem is satiny and lustrous, with a hint of gold toning at the concave rims encircling silver centers. The coin is boldly struck on both sides with no significant marks to report. Population: 10 in 67+, 6 finer (4/15). NGC ID# 28L3, PCGS# 9345

5580 **1937-D Oregon MS68 NGC.** Glowing mint-fresh luster illuminates seemingly flawless surfaces on each side of this remarkable Oregon Trail half, while the silvery-white luster submits to just a tinge of pale champagne color. The rear-most upright of the reverse wagon is weak, but the strike is otherwise bold. Seldom is a 1937-D encountered with such visual appeal. Census: 80 in 68 (1 in 68+, 6 in 68 ★, 1 in 68+★), 1 finer (4/15). NGC ID# 28L5, PCGS# 9347

5581 **1937-D Oregon MS68 PCGS. CAC.** This splendid commemorative showcases the outstanding craftsmanship of the husband and wife engraving duo of James Earle and Laura Gardin Fraser. The Oregon Trail half dollars are also remarkable because they were originally released in 1926 and were struck intermittently through 1939—a span of some 14 years. Silver-gray patina drapes the surfaces, with deep olive-golden toning scattered around the perimeter of the obverse. A remarkable, fully original, and carefully preserved Superb Gem. Population: 52 in 68 (3 in 68+), 1 finer (5/15).
Ex: Central States Signature (Heritage, 5/2004), lot 11043; Central States Signature (Heritage, 5/2007), lot 5325; ANA Signature (Heritage, 7/2008), lot 2570. NGC ID# 28L5, PCGS# 9347

5582 **1938 Oregon MS67+ PCGS. CAC.** An attractive Superb Gem example of the 1938 Philadelphia issue, which also saw similar mintages of just over 6,000 pieces from the Denver and San Francisco mints. This example is sharply struck throughout and imbued with satin luster. Orange-gold toning surrounds bright silver central motifs on the obverse, with the reverse untoned and strongly lustrous. The 1938 Philadelphia coins are particularly elusive in the highest grades, with only three coins numerically finer. Population: 13 in 67+, 3 finer (4/15). NGC ID# 28L6, PCGS# 9348

5583 **1938-D Oregon MS67+ PCGS. CAC.** This exceptional Oregon Trail half dollar is almost devoid of any perceptible flaw, and is accentuated by mottled multicolor toning that is heavily weighted toward pale gold and sky-blue on each side. The rearmost upright of the wagon shows the only mentionable striking deficiency. NGC ID# 28L7, PCGS# 9349

5584 **1938-D Oregon MS68 NGC.** The Denver Mint struck 6,005 Oregon Trail commemorative halves in 1938, but NGC has only certified 61 examples in this lofty grade (1 in 68+, 34 in 68 ★, 2 in 68+★), and just two coins finer (5/15). This satiny and brilliant coin presents a strong opportunity for Registry specialists. NGC ID# 28L7, PCGS# 9349

5585 **1939-D Oregon MS67+ PCGS. CAC.** This Plus-graded Superb Gem is beautifully preserved and sharply rendered, but its chief visual attribute belongs to the vibrant sun-gold, amber, violet, and pine-green toning that exudes inward from the peripheries and fades to champagne in the centers. Only 24 coins are finer at PCGS (5/15). NGC ID# 28LA, PCGS# 9353

5586 **1915-S Panama-Pacific MS65 NGC.** The surfaces are untoned silver-white, save for a small hint of ivory at the extreme rims. The surfaces are largely mark-free; a small tick on Columbia's lower skirt may be responsible for precluding an even finer grade. NGC ID# 26H7, PCGS# 9357

1915-S Panama-Pacific Half, MS66
Excellent Eye Appeal

5587 **1915-S Panama-Pacific MS66 PCGS.** Nicely preserved surfaces on this Premium Gem Pan-Pac half are cream-white with light bands of cinnamon and blue-gray near the rims, providing great eye appeal and complementing the overall excellent preservation. Examples in the Superb Gem level are often tightly held, making this an excellent potential acquisition. NGC ID# 26H7, PCGS# 9357

5588 **1915-S/S Panama-Pacific, FS-502, MS64 NGC.** The mintmark is repunched north. A satiny and nearly brilliant Choice half dollar. The strike is sharp, and marks are limited to a faint and slender curved line on the lower half of Columbia. PCGS# 511601 Base PCGS# 9357

5589 **1915-S/S Panama-Pacific, FS-502, MS66 NGC.** Exquisite bands of powder-blue, sun-gold, and rose-red endow the borders of this satiny and sharply struck half dollar. Abrasions are absent aside from subtle contact on the upper half of the shield. PCGS# 511601 Base PCGS# 9357

5590 **1921 Pilgrim MS67 PCGS.** Struck to commemorate the 300th anniversary of the Pilgrims' arrival at Plymouth in 1620, the Pilgrim Tercentenary half dollar was produced in 1920 and 1921, with the latter issue being the scarcer overall. This richly lustrous representative exhibits bold design definition and nearly undisturbed surfaces. The obverse exhibits mottled lavender-gray, olive, and forest-green toning, while the reverse displays lesser amounts of the same, with an ice-blue hue dominating the central regions. Population: 36 in 67 (2 in 67+), 1 finer (5/15). NGC ID# 28LD, PCGS# 9360

5591 **1921 Pilgrim MS67 PCGS.** This is a boldly rendered and vividly lustrous Superb Gem representative of the Pilgrim Tercentenary half dollar, conditionally rare as such. Beautifully preserved surfaces yield warm champagne toning overall, with deeper olive, russet, and amber overtones also evident in the peripheries and lightly speckled over the central reverse. Population: 36 in 67 (2 in 67+), 1 finer (5/15). NGC ID# 28LD, PCGS# 9360

5592 **Eight-Piece Lot of 1936 Rhode Island Half Dollars MS65 to MS65+ PCGS. CAC.** This mini-hoard of eight 1936 Rhode Island commemorative half dollars, each certified MS65 PCGS, includes one green-label example and another that is certified MS65+. All eight coins have a green CAC label, and range from untoned, to lightly toned in gold. This lot will provide a nice start towards a roll of Gem examples.(Total: 8 coins) NGC ID# 28LE, PCGS# 9363

5593 **Five-Piece Lot of 1936-D Rhode Island Half Dollars MS65 PCGS. CAC.** Five examples of the 1936-D Rhode Island commemorative half dollar are each certified MS65 PCGS. These coins range from brilliant white to faintly toned in gold and champagne. Dark toning splashes appear along the obverse border on one example.(Total: 5 coins) NGC ID# 28LF, PCGS# 9364

5594 **1936-D Rhode Island MS67 PCGS. CAC.** This impressive Rhode Island commemorative displays well-executed design motifs that are much sharper-than-usual, for the type; which may partly explain the elevated grade assessment by PCGS. The blemish-free surfaces display glowing mint frost and occasional splashes of mottled russet, olive, gold, and burnt-orange toning. Population: 63 in 67 (2 in 67+), 1 finer (5/15). NGC ID# 28LF, PCGS# 9364

5595 **Four-Piece Lot of 1936 Robinson Half Dollars MS66 PCGS and NGC. CAC.** Four examples of the 1936 Arkansas commemorative half dollar (mintage of 25,265 pieces), all graded MS66 and certified by CAC. Three are PCGS-graded coins and one is certified by NGC. One is housed in a green label PCGS holder, one is ex:Guttag Family. The coins are brilliant or lightly toned, with sharp details and satiny luster.(Total: 4 coins) NGC ID# 28LJ, PCGS# 9369

5596 **Twenty-Piece Lot of 1935-S San Diego Half Dollars MS65 PCGS. CAC.** All 20 coins are separately but identically certified by both PCGS and CAC. One of the coins is housed in an old green label holder. Most of the pieces display faint to medium honey-gold toning, although a few coins show deeper shades, especially on their obverses.(Total: 20 coins) NGC ID# 28LK, PCGS# 9371

5597 **1935-S San Diego MS67+ NGC.** The 1935-S San Diego half dollar is a condition rarity in grades above the MS67 level. This high-end Superb Gem exhibits sharply detailed design elements, satiny mint luster, and well-preserved,lightly toned surfaces. NGC has graded eight numerically finer examples (5/15). NGC ID# 28LK, PCGS# 9371

5598 **1935-S San Diego MS67 PCGS. CAC.** Frosty silver luster engulfs the centers, with blended gold, peach, rose, and violet seen around the margins. A couple of tiny marks within the folds of Minerva's drapery are among the few perceptible flaws. PCGS has encapsulated only five finer representatives (5/15). NGC ID# 28LK, PCGS# 9371

5599 **Ten-Piece Lot of 1936-D San Diego Half Dollars MS65 PCGS. CAC.** A group of 1936-D San Diego commemorative half dollars (mintage of 30,092 pieces), all graded MS65 by PCGS and certified by CAC. The coins are brilliant or lightly toned, sharply detailed, with vibrant luster. (10 pieces).(Total: 10 coins) NGC ID# 28LL, PCGS# 9372

5600 **Forty-Piece Lot of 1936-D San Diego Half Dollars MS65 PCGS. CAC.** Each piece is separately housed in an identically graded holder with a green CAC seal. One of the coins is housed in a first generation holder, and another is certified in an old green label holder. Most of the pieces exhibit light golden toning, and none are deeply toned or display multiple colors.(Total: 40 coins) NGC ID# 28LL, PCGS# 9372

5601 **1936-D San Diego MS67 PCGS. CAC.** The San Diego half dollar, a souvenir issue for the California Pacific International Exposition, was issued at both the San Francisco and Denver mints. This Superb Gem is a product of the latter, and its preservation and eye appeal are seemingly unsurpassable. Iridescent champagne toning are dominant, with deeper rainbow ribbons seen around the peripheries. The forward corner of the Exposition observation tower shows the only mentionable weakness, which is minor. No MS68 coins are finer at PCGS (5/15). NGC ID# 28LL, PCGS# 9372

5602 **1936-D San Diego MS67 PCGS Secure. CAC.** Frosty silvery-golden interiors yield to more prominent amber and olive elements around the peripheries. Swirling luster enhances the eye appeal of this striking Superb Gem. None have been certified numerically finer at PCGS (5/15). NGC ID# 28LL, PCGS# 9372

5603 **1926 Sesquicentennial MS65 PCGS.** A softly struck but impressively preserved Sesquicentennial half with bold "halo" luster beneath dappled gold and white toning. Intriguing eye appeal. PCGS has graded eight numerically finer pieces (5/15). NGC ID# 28LM, PCGS# 9374

5604 **1935 Spanish Trail MS65 NGC.** Satiny luster is visited by just a trace of light golden color on each side of this Gem Spanish Trail half dollar, while the surfaces reveal only a few trivial disturbances, nothing obtrusive. El Paso, Texas is not fully struck. NGC ID# 28LN, PCGS# 9376

5605 **1935 Spanish Trail MS65 PCGS. CAC.** This Gem Spanish Trail half dollar is boldly rendered, even in the peripheral regions, and its surfaces display impressively smooth, satiny luster. Traces of champagne and sky-blue toning grace each side. NGC ID# 28LN, PCGS# 9376

5606 **1935 Spanish Trail MS65 PCGS. CAC.** A sharply struck, light golden example of this widely popular commemorative. A CAC endorsement confirms the Gem quality of the surfaces, and the overall eye appeal is pleasing. NGC ID# 28LN, PCGS# 9376

5607 **1935 Spanish Trail MS67 PCGS.** The Spanish Trail half is scarce in MS67 and anything finer is extremely rare. This piece is boldly struck up, with modestly iridescent, champagne-gold luster. There are only two MS68 coins numerically finer at PCGS (5/15). NGC ID# 28LN, PCGS# 9376

5608 **1925 Stone Mountain MS67 PCGS. CAC.** A mix of greenish-gold and lavender-gray toning blankets the well-preserved surfaces of this impressive Superb Gem. The design elements are well-detailed and satiny mint luster adds to the visual appeal. PCGS has graded eight numerically finer examples (5/15). NGC ID# 26H8, PCGS# 9378

5609 **1935-D Texas MS67+ PCGS. CAC.** The Texas Independence Centennial halves were issued over a five-year period from 1934 to 1938 in sets from the three mints (Philadelphia, Denver, and San Francisco). The earlier dates through 1936 tend to be lustrous and frosty, and the later dates more satiny. True to form, the present coin is brilliant silver-white and intensely lustrous. A touch of gold defines the raised rims, but for all purposes the coin is untoned. A needle-sharp strike completes the tremendous appeal. Population: 11 in 67+, 5 finer (4/15). NGC ID# 28LS, PCGS# 9383

5610 **1936 Texas MS67+ PCGS. CAC.** Hints of pale gold and lavender toning visit the surfaces of this high-end Superb Gem, with a few specks of amber and blue mixed in. The design elements are well-detailed and vibrant mint luster shines through the patina. PCGS has graded nine numerically finer examples (5/15). NGC ID# 28LU, PCGS# 9386

5611 **1937 Texas MS67+ NGC.** Dusky lavender-gold and powder-blue toning graces each side of this Plus-graded Superb Gem, while the underlying surfaces yield rich, satiny luster. The striking sharpness is pleasing and there are only a few minor contact points evident upon close study. NGC has seen seven MS68 coins technically finer (4/15). NGC ID# 28LX, PCGS# 9390

5612 **1937-D Texas MS67 NGC. CAC.** CAC-approved eye appeal is fully apparent on this Superb Gem 1937-D Texas half. The obverse is frosty and iridescent in the center, with rich russet and olive-gold hues around portions of the peripheries. The reverse is mottled in vivid gold and amber. A sharply struck piece with only six coins numerically finer at NGC (5/15). NGC ID# 28LY, PCGS# 9391

5613 **1937-D Texas MS67+ PCGS. CAC.** A thinly distributed hint of rainbow iridescence clings to the rims of this satiny, softly lustrous Texas half. Exceedingly well-preserved and sharply struck, the coin shows no marks worthy of mention. Pearlescent silver surfaces are perfectly balanced side-to-side, confirmed by the PCGS Plus designation and CAC approval. Population: 20 in 67+, 2 finer (4/15). NGC ID# 28LY, PCGS# 9391

5614 **1946-D Booker T. Washington MS67 PCGS. CAC.** Rose-gray surfaces show a thin ring of iridescent patina near the rims on each side of this nicely preserved 1946-D Booker T. half, a clear choice for a type set representative. Population: 47 in 67 (4 in 67+), 0 finer (5/15). NGC ID# 28M8, PCGS# 9405

5615 **1946-D Booker T. Washington MS67 PCGS. CAC.** Deep peripheral accents on the obverse include mahogany and cherry, while most of the center is a satiny silver-gray. The reverse is lavishly toned in red-orange patina, and the high points of Washington's portrait are free of mentionable contact. Population: 47 in 67 (4 in 67+), 0 finer (5/15). NGC ID# 28M8, PCGS# 9405

1947-D Booker T. Washington Half
Frosty Superb Gem

5616 **1947-D Booker T. Washington MS67 NGC.** Eye-appealing Booker T. Washington halves are difficult to come by, although this Superb Gem is of notable visual merit. Traces of light golden color accentuate the frosty, vibrant luster which radiates from each side. Boldly struck, with only the lightest of contact evident on Washington's cheek. Census: 12 in 67 (2 in 67+, 2 in 67 ★), 0 finer (4/15). NGC ID# 28MB, PCGS# 9409

5617 **1948 Booker T. Washington MS67 NGC.** Just a trace of light golden toning accents the frosty, carefully preserved surfaces of this high-end Booker T. Washington half. Some light, mint-made chatter on the portrait's high points does not affect the grade. Census: 13 in 67, 0 finer (4/15). NGC ID# 28MD, PCGS# 9412

5618 **1948-D Booker T. Washington MS67 PCGS.** Silver on the portrait with lush rose-to-violet colors around and on the reverse. One of just 8,005 pieces struck for this first-year Booker T. Washington issue. Population: 22 in 67, 0 finer (5/15). NGC ID# 28ME, PCGS# 9413

5619 **1949-D Booker T. Washington MS67+ NGC.** The Plus designation effectively translates the superior surface quality and aesthetic merit of this Superb Gem 1949-D Booker T. Washington half. Traces of iridescent color accentuate each side and the design elements are boldly rendered. Census: 25 in 67 (2 in 67+, 1 in 67 ★), 0 finer (4/15). NGC ID# 28MH, PCGS# 9417

5620 **1951 Booker T. Washington MS67 PCGS. CAC.** Extremely lustrous and brilliant surfaces combined with a stronger-than-usual strike give this Booker T. Washington half exceptional eye appeal for the issue. Only a few stray Mint handling marks are visible on the portrait. The coin is snow-white and displays considerable Mint-fresh appeal. Tied for the numerically finest-graded at PCGS with CAC endorsement. Population: 14 in 67 (2 in 67+), 0 finer (4/15). NGC ID# 28MN, PCGS# 9424

5621 **1952 Washington-Carver MS67 NGC.** Attractive shades of champagne-gold and lavender toning blanket the well-preserved surfaces of this delightful Superb Gem. The design elements are well-detailed and ample mint luster shines through the toning. Census: 33 in 67 (1 in 67+, 9 in 67 ★, 2 in 67+★), 1 finer (5/15). NGC ID# 28MV, PCGS# 9434

1952-S Washington-Carver Half, MS67
Rare So-Graded

5622 **1952-S Washington-Carver MS67 NGC.** The 1952-S Washington-Carver half dollar had a limited 8,000-coin distribution (plus six pieces for assay purposes), and is rarely encountered in Superb Gem condition. This example yields unusually frosty luster and is moderately well-struck for the type. A crescent of deep olive-brown, amber-red, and sun-gold toning stretches across the right margin of both sides, leaving the remainder of the surfaces with a pale champagne hue. Census: 14 in 67 (3 in 67 ★), 1 finer (4/15). NGC ID# 28MX, PCGS# 9436

1952-S Washington-Carver Half, MS67
Only One Coin Numerically Finer

5623 **1952-S Washington-Carver MS67 NGC.** Pleasantly frosted surfaces are layered in light golden and pale russet hues, with the latter color most prominent in the peripheral regions. The strike on this example is minutely soft in the centers, not unusual for the issue, but abrasions are almost nonexistent. Washington-Carver halves were produced as a series from 1951 to 1954. The 1952-S issue had a mintage of only 8,000 pieces (plus six coins for assay purposes). Census: 16 in 67 (2 in 67+, 3 in 67 ★), 1 finer (5/15). NGC ID# 28MX, PCGS# 9436

1954-S Washington-Carver Half, MS67
Among the Finest Certified

5624 **1954-S Washington-Carver MS67 NGC.** This final San Francisco issue in the Washington-Carver commemorative half series had a mintage of 122,000 pieces (plus 24 coins for assay purposes), but it is believed that only about 42,000 examples were ever distributed. This is a rare Superb Gem survivor, with satiny, champagne-tinted luster and well-struck design elements. Census: 8 in 67 (2 in 67 ★), 0 finer (4/15). NGC ID# 28N5, PCGS# 9444

5625 **Eight-Piece Lot of 1936 Wisconsin Half Dollars MS65 to MS65+ PCGS. CAC.** Seven coins are certified by PCGS as MS65, and one is graded MS65+ by that service. All eight pieces possess green CAC seals. One coin is housed in an old green label holder, and other is in a green label holder. Seven coins are lightly toned but the eighth piece has medium walnut-brown and cream-gray patina.(Total: 8 coins) NGC ID# 28N6, PCGS# 9447

5626 **10-Piece Lot of 1936 Wisconsin Half Dollars MS66 PCGS. CAC.** This lot includes a lustrous, nearly untoned group of 10 Premium Gem Wisconsin halves, each graded MS66 PCGS. Every coin in this set has received the green CAC endorsement seal. All of the coins are brilliant silver-white and lustrous, although a couple show faint wisps of gold at the rims. One of the coins is in an old green label holder, and displays light iridescence on the reverse.(Total: 10 coins) NGC ID# 28N6, PCGS# 9447

5627 **1936 Wisconsin MS68 NGC.** This impressive coin is among the finest Wisconsin Territorial Centennial halves known. Both sides exhibit seemingly pristine surfaces, with satiny luster that illuminates just a tinge of pale iridescent toning on the obverse and light lavender-gold on the reverse. Boldly struck and eye-appealing. Census: 38 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (4/15). NGC ID# 28N6, PCGS# 9447

5628 **Ten-Piece Lot of 1936 York Half Dollars MS65 PCGS. CAC.** All ten coins are separately housed in identically certified holders, each with a green CAC seal. One of the pieces is encapsulated in an old green label holder. Most of the Gems are lightly toned but a couple display medium golden-brown and cream-gray patina. Boston's Walter P. Nichols was the distributor of the county tercentenary type.(Total: 10 coins) NGC ID# 28N7, PCGS# 9449

5629 **Ten-Piece Lot of 1936 York Half Dollars MS66 PCGS. CAC.** A lot of 10 1936 York commemorative half dollars (mintage of 25,015 pieces), all graded MS66 or MS66+ by PCGS and certified by CAC. The coins are brilliant or lightly toned, with sharp details and ample mint luster.(Total: 10 coins) NGC ID# 28N7, PCGS# 9449

5630 **Five-Piece Lot of 1936 York Half Dollars MS67 PCGS. CAC.** Five examples of the 1936 York commemorative half dollar (mintage 25,015 pieces), all graded MS67 by PCGS and certified by CAC. One coin is housed in a green label holder. The coins are sharply detailed and lustrous, with light-to-moderate toning.(Total: 5 coins) NGC ID# 28N7, PCGS# 9449

COMMEMORATIVE GOLD

5631 **Certificate for Proof 1903 Louisiana Purchase, Jefferson Gold Dollar.** The 1903 Louisiana Purchase Jefferson gold dollar featured a special proof mintage of 100 pieces that were sold to VIP's and insiders, but not offered to the numismatic community in general. The coins were issued in large card holders with the certificate of authenticity imprinted on the card, signed by the coiner and Mint Superintendent Landis. The coin was secured under a waxed paper window, fastened by a cord with a wax seal. This custom-encased original certificate contains all these items except the coin itself and the waxed paper cover.

5632 **1903 Louisiana Purchase, Jefferson, MS65 PCGS.** Charles Barber designed both obverses and the common reverse for the Louisiana Purchase gold dollar commemoratives. This Gem of the Jefferson type has frosty luster that blends with rose-gold hues on each side. Tiny ticks are mainly confined to the upper reverse. Housed in a green label holder. NGC ID# 26HA, PCGS# 7443

5633 **1903 Louisiana Purchase, Jefferson, MS66 NGC.** This piece is boldly struck on the central devices, although the peripheral denticles show the usual incompleteness. The yellow-gold surfaces are beautiful free of abrasions, and the overall eye appeal is comparably excellent. NGC ID# 26HA, PCGS# 7443

5634 **1904 Lewis and Clark MS63 PCGS.** Green-gold adorns the margins of this MS63 Lewis and Clark gold dollar, ceding to rose-gold interiors. The denticles are typically struck, but the portraits show strong definition save for a few hair strands. Light marks in the fields do not overly detract. Housed in a green label holder. NGC ID# 26HC, PCGS# 7447

5635 **1904 Lewis and Clark MS64 NGC.** A well-struck example, with satiny yellow-gold luster. There are no singularly detracting abrasions, although a few light lines in the fields on each side preclude a full Gem grade assessment. NGC ID# 26HC, PCGS# 7447

5636 **1905 Lewis and Clark MS61 NGC.** This low-mintage issue was one of the earliest U.S. gold commemoratives to be produced, after its 1904 counterpart. This lustrous example displays a pleasing appearance despite a few noticeable abrasions, including a reeding mark on the upper obverse field. NGC ID# 26HD, PCGS# 7448

5637 **1905 Lewis and Clark MS62 PCGS.** A key issue, the 1905 Lewis and Clark is the rarest commemorative gold dollar. This pleasing Mint State piece has brilliant light yellow surfaces with satin luster and isolated design weakness. NGC ID# 26HD, PCGS# 7448

5638 **1905 Lewis and Clark MS63 PCGS.** A small quantity of 10,000 Lewis and Clark gold dollars were struck in 1905 for the eponymous exposition held in Portland, Oregon. This Select example displays shimmering orange-gold surfaces accented by tinges of green. Well-detailed with a few undistracting marks. Housed in a green label holder. NGC ID# 26HD, PCGS# 7448

5639 **1916 McKinley MS65 NGC.** Only 9,977 examples of the McKinley commemorative gold dollar were distributed in 1916. This attractive Gem displays vibrant mint luster, well-detailed design elements, and well-preserved yellow-gold surfaces. NGC ID# 26HF, PCGS# 7454

5640 **1916 McKinley MS66 PCGS.** The 1916 McKinley gold dollar is a scarce issue in grades above the MS66 level. This impressive Premium Gem exhibits well-detailed design elements and lustrous yellow-gold surfaces with no mentionable flaws. NGC ID# 26HF, PCGS# 7454

1916 McKinley Memorial Gold Dollar
Satiny Superb Gem

5641 **1916 McKinley MS67 PCGS.** The 1916 McKinley Memorial gold dollar is scarce in Superb Gem condition, and almost unknown above MS67. This example is sharp throughout the motifs and the surfaces exhibit satiny golden luster that deepens slightly toward the borders. Population: 87 in 67 (1 in 67+), 0 finer (5/15). NGC ID# 26HF, PCGS# 7454

5642 **1917 McKinley MS65 PCGS.** An impressive Gem from a distribution of just 10,000 pieces, this coin offers sharply detailed design elements and well-preserved lemon-yellow surfaces that radiate vibrant mint luster. NGC ID# 26HG, PCGS# 7455

5643 **1922 Grant No Star MS63 PCGS.** Intense orange-gold centers turn to lighter shades of lemon-gold peripherally on this sharply struck Select commemorative. Unlike the Grant half dollars, the Star and No Star gold dollars were struck in equal quantities (5,016 pieces per variant). Encapsulated in a green label holder. NGC ID# 26HJ, PCGS# 7458

5644 **1922 Grant No Star MS65 NGC.** A well-struck No Star example of the Grant Memorial half dollar, this Gem shows satiny straw-gold luster and is largely devoid of surface flaws, although a few faint lines on the obverse preclude a finer grade. NGC ID# 26HJ, PCGS# 7458

1922 Grant Memorial Dollar, MS67
No Star Obverse

5645 **1922 Grant No Star MS67 NGC.** The Grant commemorative half dollars and gold dollars used the same design, and both denominations had Star and No Star varieties. This Superb Gem is boldly defined and has exceptional frosty yellow luster with wispy pink toning. NGC has seen only five numerically finer submissions (5/15).
Ex: Purchased privately on 1/15/1927 at $4.00; Long Beach Signature (Heritage, 2/2009), lot 2225. NGC ID# 26HJ, PCGS# 7458

5646 **1922 Grant With Star MS65 NGC.** This is a lovely example of the With Star Grant Memorial half dollar, showing satiny yellow-gold luster and bold design elements. Close study with a lens fails to reveal any mentionable flaws, giving this piece unrivaled eye appeal for the grade. NGC ID# 26HH, PCGS# 7459

5647 **1926 Sesquicentennial MS65 PCGS.** Glowing golden-orange luster and a sharp strike on an issue that is strike-challenged put this piece firmly into the Gem category, and possibly held back from an even finer grade level due only to minimal ticks on Liberty's lower gown. NGC ID# 26HL, PCGS# 7466

5648 **1926 Sesquicentennial MS65 PCGS.** Faint pinkish overtones appear on both sides of this frosty and highly lustrous quarter eagle that retains full brilliance. An extraordinary Gem with considerable eye appeal. NGC ID# 26HL, PCGS# 7466

5649 **1926 Sesquicentennial MS65 NGC.** This Sesquicentennial quarter eagle is well-struck for the issue, as the design elements were produced in low relief to begin with. Warm yellow-gold luster graces each side with just a few faint grazes, primarily on the obverse, limiting the grade. NGC ID# 26HL, PCGS# 7466

5650 **1926 Sesquicentennial MS65 PCGS.** An impressive Gem, this brilliant yellow-gold commemorative quarter eagle has rich rose overtones with bold design motifs. NGC ID# 26HL, PCGS# 7466

5651 **1926 Sesquicentennial MS65+ NGC.** Frosty straw-gold luster is uninhibited on this high-end Gem, and the design elements are well-defined, taking into account the low relief with which this issue was struck. A pleasing example of the Sesquicentennial quarter eagle. NGC ID# 26HL, PCGS# 7466

5652 **1926 Sesquicentennial MS65+ PCGS. CAC.** Eye-catching frosty mint luster delivers impressive appeal on this high-end Gem example, while the strike is sharp and the surfaces are carefully preserved. The Sesquicentennial quarter eagle is the final gold issue in the classic commemorative series, and one of only two such pieces within the quarter eagle denomination. NGC ID# 26HL, PCGS# 7466

LARGE CENTS

7039 **1794 Head of 1794 VG10 ANACS.** NGC Census: (0/0). PCGS Population (34/548). Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: $771. NGC ID# 223P, PCGS# 901374 Base PCGS# 901374

7040 **1794 Head of 1794 — Corroded — ANACS. XF40 Details.** NGC Census: (0/0). PCGS Population (65/161). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $4,325.

7041 **1795 Lettered Edge, S-75, B-3, R.3, — Corrosion — NGC Details. VF.** Bland grade VG10. Noyes grade VF25 Details, Net Fine 12. Our EAC grade VF20 Details, Net VG10.
Purchased from Dr. William H. Sheldon, 2/1954.
From The Eugene Exman Collection.

7042 **1796 Liberty Cap, S-82, B-3, R.5, — Corroded — ANACS. VG8 Details.** NGC Census: (0/4). PCGS Population (0/1). PCGS# 35753 Base PCGS# 1392

7043 **1796 Reverse of 1797, S-115, B-43, R.3, — Scratches — NGC Details. XF.** Bland grade VG10. Noyes grade VF25 Details, Net VG10. Our EAC grade VF25 Details, Net VG10.
Ex: George L. Davis, Henry P. Graves Collections (Stack's, 4/1954), lot 1596.
From The Eugene Exman Collection.

7044 **1797 Rev of 1797, Stems Fine 15 PCGS.** PCGS Population (20/195). NGC Census: (3/50). Mintage: 897,510. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: $819. NGC ID# 2242, PCGS# 1422 Base PCGS# 1422

7045 **1798 First Hair Style — Scratches — NGC Details. XF.** NGC Census: (10/55). PCGS Population (20/40). Mintage: 1,841,745. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: $1,925.

7046 **1798 Second Hair Style VF25 PCGS.** PCGS Population (27/213). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $891. NGC ID# 2244, PCGS# 1434

7047 **1798 First Hair Style, S-153, B-12, R.3 — Obverse Rim Damage — NGC Details. XF.** Bland grade VG10. Noyes grade VF25 Details, Net VG10. Our EAC grade VF25 Details, Net Fine 12.
Ex: Anderson Dupont Collection (Stack's, 9/1954), lot 195.
From The Eugene Exman Collection.

7048 **1798 Second Hair Style, S-176, B-24, R.4, — Environmental Damage — NGC Details. VF.** Bland grade VG10. Noyes grade VF25 Details, Net VG10. Our EAC grade VF25 Details, Net VG10.
From The Eugene Exman Collection.

7049 **1800 VF25 PCGS.** PCGS Population (11/54). NGC Census: (0/13). Mintage: 2,822,175. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: $922. NGC ID# 2248, PCGS# 1449

7050 **1800 S-197, B-12, R.1, — Environmental Damage — NGC Details. AU.** NGC Census: (0/5). PCGS Population (0/4).

7051 **1800 S-199, B-14, R.4, Good 4 NGC.** Noyes grade VG10 Details, Net Good 7. Our EAC grade VG10 Details, Net Good 6.
From The Eugene Exman Collection.
PCGS# 36185 Base PCGS# 1449

7052 **1800 S-211, B-13, R.3 — Damaged — NGC Details. Fine.** Bland grade VF35. Noyes grade XF40 Details, Net VF30. Our EAC grade XF45 Details, Net VF30.

From The Eugene Exman Collection.

7053 **1801 S-216, B-6, R.1, VF20 NGC.** Noyes grade VF20 Details, Net VG10. Our EAC grade VF20 Details, Net VG10.
From The Eugene Exman Collection.
PCGS# 36245 Base PCGS# 1458

7054 **1801 S-222, B-16, R.1, — Environmental Damage — NGC Details. Fine.** Noyes grade VG8 Details, Net Good 5. Our EAC grade Fine 12 Details, Net Good 6.
From The Eugene Exman Collection.

7055 **1802 VF30 PCGS.** PCGS Population (51/249). NGC Census: (24/133). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: $726. NGC ID# 224E, PCGS# 1470

7056 **1802 S-225, B-1, R.3, — Obverse Damage — NGC Details. AU.** Bland grade VF25. Noyes grade XF40 Details, Net VF25. Our EAC grade XF45 Details, Net VF25.
Ex: Lester Merkin, 3/1969, lot 662.
From The Eugene Exman Collection.

7057 **1802 No Stems, S-231, B-9, R.1 — Obverse Damage — NGC Details. AU.** Bland grade VF25. Noyes grade XF40 Details, Net VF25. Our EAC grade XF40 Details, Net VF20.
From The Eugene Exman Collection.

7058 **1803 Small Date, Small Fraction, S-256, B-15, R.3 — Obverse Planchet Flaw — NGC Details. XF.** NGC Census: (1/4). PCGS Population (1/1).

7059 **1803 Small Date, Large Fraction — Environmental Damage — PCGS Genuine. AU Details.** NGC Census: (0/4). PCGS Population (5/32). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $1,450.

7060 **1805 S-269, B-3, R.1, — Repaired — NGC Details. AU. Ex: Exman Collection.** Bland grade XF40. Noyes grade XF45 Details, Net VF25. Our EAC grade XF45 Details, Net VF25.
From The Eugene Exman Collection.

7061 **1807 Large Fraction, S-275, B-5, R.3, — Corrosion — NGC Details. AU.** Bland grade VG8. Noyes grade VF35 Details, Net VG10. Our EAC grade XF45 Details, Net Fine 12.
From The Eugene Exman Collection.

7062 **1813 S-292, B-2, R.2, — Burnished — NGC Details. VF. Ex: Exman Collection.** Bland grade VG10. Noyes grade VF20 Details, Net Fine 15. Our EAC grade VF20 Details, Net Fine 15.
From The Eugene Exman Collection.

7063 **1814 Crosslet 4, S-294, B-1, R.1, — Environmental Damage — NGC Details. VF.** Bland grade Fine 12. Noyes grade VF30 Details, Net VF20. Our EAC grade VF30 Details, Net VF20.
From The Eugene Exman Collection.

7381 **1895-O — Altered Surfaces — PCGS Genuine. VF Details.** NGC Census: (9/91). PCGS Population (15/167). Mintage: 440,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: $1,450. NGC ID# 23DW, PCGS# 4807

7382 **1896-O XF45 PCGS.** PCGS Population (13/58). NGC Census: (5/35). Mintage: 610,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $508. NGC ID# 23DZ, PCGS# 4810

7383 **1899-O MS63 PCGS.** PCGS Population (11/27). NGC Census: (11/30). Mintage: 2,650,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $875. NGC ID# 23EA, PCGS# 4819

7384 **1899-O MS63 PCGS.** PCGS Population (11/27). NGC Census: (11/30). Mintage: 2,650,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $875. NGC ID# 23EA, PCGS# 4819

7385 **1903-O MS64 PCGS.** PCGS Population (29/15). NGC Census: (29/6). Mintage: 8,180,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $885. NGC ID# 23EN, PCGS# 4831

7386 **1903-S XF45 PCGS.** PCGS Population (13/96). NGC Census: (5/49). Mintage: 613,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: $734. NGC ID# 23EP, PCGS# 4832

7387 **1906-O MS65 PCGS.** PCGS Population (36/27). NGC Census: (18/17). Mintage: 2,610,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $900. NGC ID# 23EZ, PCGS# 4840

7388 **1907-D MS63 ANACS.** NGC Census: (10/38). PCGS Population (8/40). Mintage: 4,080,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $625. NGC ID# 23F4, PCGS# 4843

7389 **1908 MS66 PCGS.** PCGS Population (20/2). NGC Census: (19/4). Mintage: 10,600,545. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $825. NGC ID# 23F7, PCGS# 4846

7390 **1908 MS66 NGC.** NGC Census: (19/4). PCGS Population (23/2). Mintage: 10,600,545. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $825. NGC ID# 23F7, PCGS# 4846

7391 **1908-O MS63 PCGS.** PCGS Population (23/67). NGC Census: (20/53). Mintage: 1,789,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $565. NGC ID# 23F9, PCGS# 4848

7392 **1908-O MS64 NGC.** NGC Census: (28/24). PCGS Population (27/40). Mintage: 1,789,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $750. NGC ID# 23F9, PCGS# 4848

7393 **1909-S MS62 NGC.** NGC Census: (13/51). PCGS Population (2/50). Mintage: 1,000,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: $675. NGC ID# 23FE, PCGS# 4853

7394 **1911-S MS66 PCGS.** PCGS Population (58/7). NGC Census: (34/6). Mintage: 3,520,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $965. NGC ID# 23FL, PCGS# 4859

7395 **1913-S MS61 NGC.** NGC Census: (3/82). PCGS Population (6/102). Mintage: 510,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: $475. NGC ID# 23FS, PCGS# 4864

7396 **1913-S MS63 NGC.** NGC Census: (21/51). PCGS Population (21/69). Mintage: 510,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: $675. NGC ID# 23FS, PCGS# 4864

7397 **1914 MS66 PCGS.** PCGS Population (68/6). NGC Census: (43/1). Mintage: 17,360,656. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $850. NGC ID# 23FT, PCGS# 4865

7398 **1915-S MS64 NGC.** NGC Census: (43/25). PCGS Population (55/29). Mintage: 960,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: $565. NGC ID# 23FX, PCGS# 4869

PROOF BARBER DIMES

7399 **1894 PR64 PCGS.** PCGS Population (103/135). NGC Census: (88/128). Mintage: 972. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $710. NGC ID# 23G6, PCGS# 4878

7400 **1904 PR64 PCGS.** PCGS Population (93/72). NGC Census: (59/78). Mintage: 670. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $685. NGC ID# 23GH, PCGS# 4888

7401 **1908 PR64 PCGS.** PCGS Population (44/52). NGC Census: (48/87). Mintage: 545. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: $700. NGC ID# 23GN, PCGS# 4892

MERCURY DIMES

7402 **1916-D Good 4 PCGS.** PCGS Population (1332/2546). NGC Census: (479/1067). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $635. NGC ID# 23GY, PCGS# 4906

7403 **1916-D Good 4 PCGS.** PCGS Population (1332/2546). NGC Census: (481/1069). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $635. NGC ID# 23GY, PCGS# 4906

7404 **1916-D Good 4 PCGS Secure.** PCGS Population (1322/2542). NGC Census: (476/1068). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : $635. NGC ID# 23GY, PCGS# 4906

7405 **1916-D Good 6 PCGS.** PCGS Population (660/1882). NGC Census: (207/858). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : $833. NGC ID# 23GY, PCGS# 4906

7406 **1917-S MS66 PCGS.** PCGS Population (15/2). NGC Census: (13/0). Mintage: 27,330,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $650. NGC ID# 23H4, PCGS# 4914

7407 **1918-D MS65 PCGS. CAC.** PCGS Population (77/10). NGC Census: (45/14). Mintage: 22,674,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $625. NGC ID# 23H6, PCGS# 4918

7408 **1921 AU55 PCGS.** PCGS Population (41/49). NGC Census: (18/41). Mintage: 1,230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: $785. NGC ID# 23HE, PCGS# 4934

7409 **1921-D — Improperly Cleaned — NGC Details. AU.** NGC Census: (11/155). PCGS Population (38/198). Mintage: 1,080,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: $885.

7410 **1921-D — Improperly Cleaned — NGC Details. Unc.** NGC Census: (0/102). PCGS Population (3/115). Mintage: 1,080,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: $1,200.

7411 **1929-S MS66 Full Bands PCGS.** PCGS Population (127/41). NGC Census: (20/10). Mintage: 4,730,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $825. NGC ID# 23J4, PCGS# 4977

7412 **1930 MS66 Full Bands PCGS.** PCGS Population (92/16). NGC Census: (21/4). Mintage: 6,770,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $765. NGC ID# 23J5, PCGS# 4979

7413 **1930 MS66 Full Bands NGC. CAC.** NGC Census: (21/4). PCGS Population (92/16). Mintage: 6,770,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $765. NGC ID# 23J5, PCGS# 4979

7414 **1930-S MS65 Full Bands PCGS.** PCGS Population (155/96). NGC Census: (25/15). Mintage: 1,843,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: $685. NGC ID# 23J6, PCGS# 4981

7415 **1931-D MS66 Full Bands PCGS.** PCGS Population (178/56). NGC Census: (51/13). Mintage: 1,260,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $650. NGC ID# 23J8, PCGS# 4985

7416 **1931-D MS66 Full Bands PCGS. CAC.** PCGS Population (178/56). NGC Census: (51/13). Mintage: 1,260,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: $650. NGC ID# 23J8, PCGS# 4985

7417 **1934 MS67 Full Bands PCGS. CAC.** PCGS Population (188/21). NGC Census: (64/8). Mintage: 24,080,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: $440. NGC ID# 23JA, PCGS# 4989

7418 **1936-S MS67 Full Bands PCGS. CAC.** PCGS Population (180/3). NGC Census: (55/1). Mintage: 9,210,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: $480. NGC ID# 23JH, PCGS# 5003

❑ **IF NECESSARY, PLEASE INCREASE MY BIDS BY ❑1 ❑2 ❑3 INCREMENT(S)**
Lots will be purchased as much below top bids as possible.

❑ **I WANT TO LIMIT MY BIDDING TO A TOTAL OF $** _____
at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?
❑ Email ❑ Cell Phone Text ❑ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) *Please make a copy of this bid sheet for your records.*

❑ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS

❑ I HAVE A RESALE PERMIT – *please contact 877-HERITAGE (437-4824)*

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment
< $10	$1
$10 - $49	$2

7 Easy Ways to Bid

1 Internet

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 eMail

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGELive!®

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first $100,000 (minimum $14), plus twenty percent (20%) of any amount between $100,000 and $1,000,000, plus twelve percent (12%) of any amount over $1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real- time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at http://www.ha.com/c/ref/web-tips.zx#biddingTutorial.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< $10	$1	$10,000 - $19,999	$1,000
$10 - $49	$2	$20,000 - $49,999	$2,000
$50 - $99	$5	$50,000 - $99,999	$5,000
$100 - $199	$10	$100,000 - $199,999	$10,000
$200 - $499	$20	$200,000 - $499,999	$20,000
$500 - $999	$50	$500,000 - $999,999	$50,000
$1,000 - $1,999	$100	$1,000,000 - $4,999,999	$100,000
$2,000 - $4,999	$200	$5,000,000 - $9,999,999	$250,000
$5,000 - $9,999	$500	>= $10,000,000	$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.
35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, http://www.ngccoin.com/services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824)
or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-23-2015

MyRecommendations
ONLINE SUGGESTION TOOL

The last piece of the puzzle? Heritage has it.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with **MyRecommendations** visit Heritage's US Coin pages now at HA.com/Coin.
